

adrenal gland diseases: cluster map (automatic layout, closest connections only)

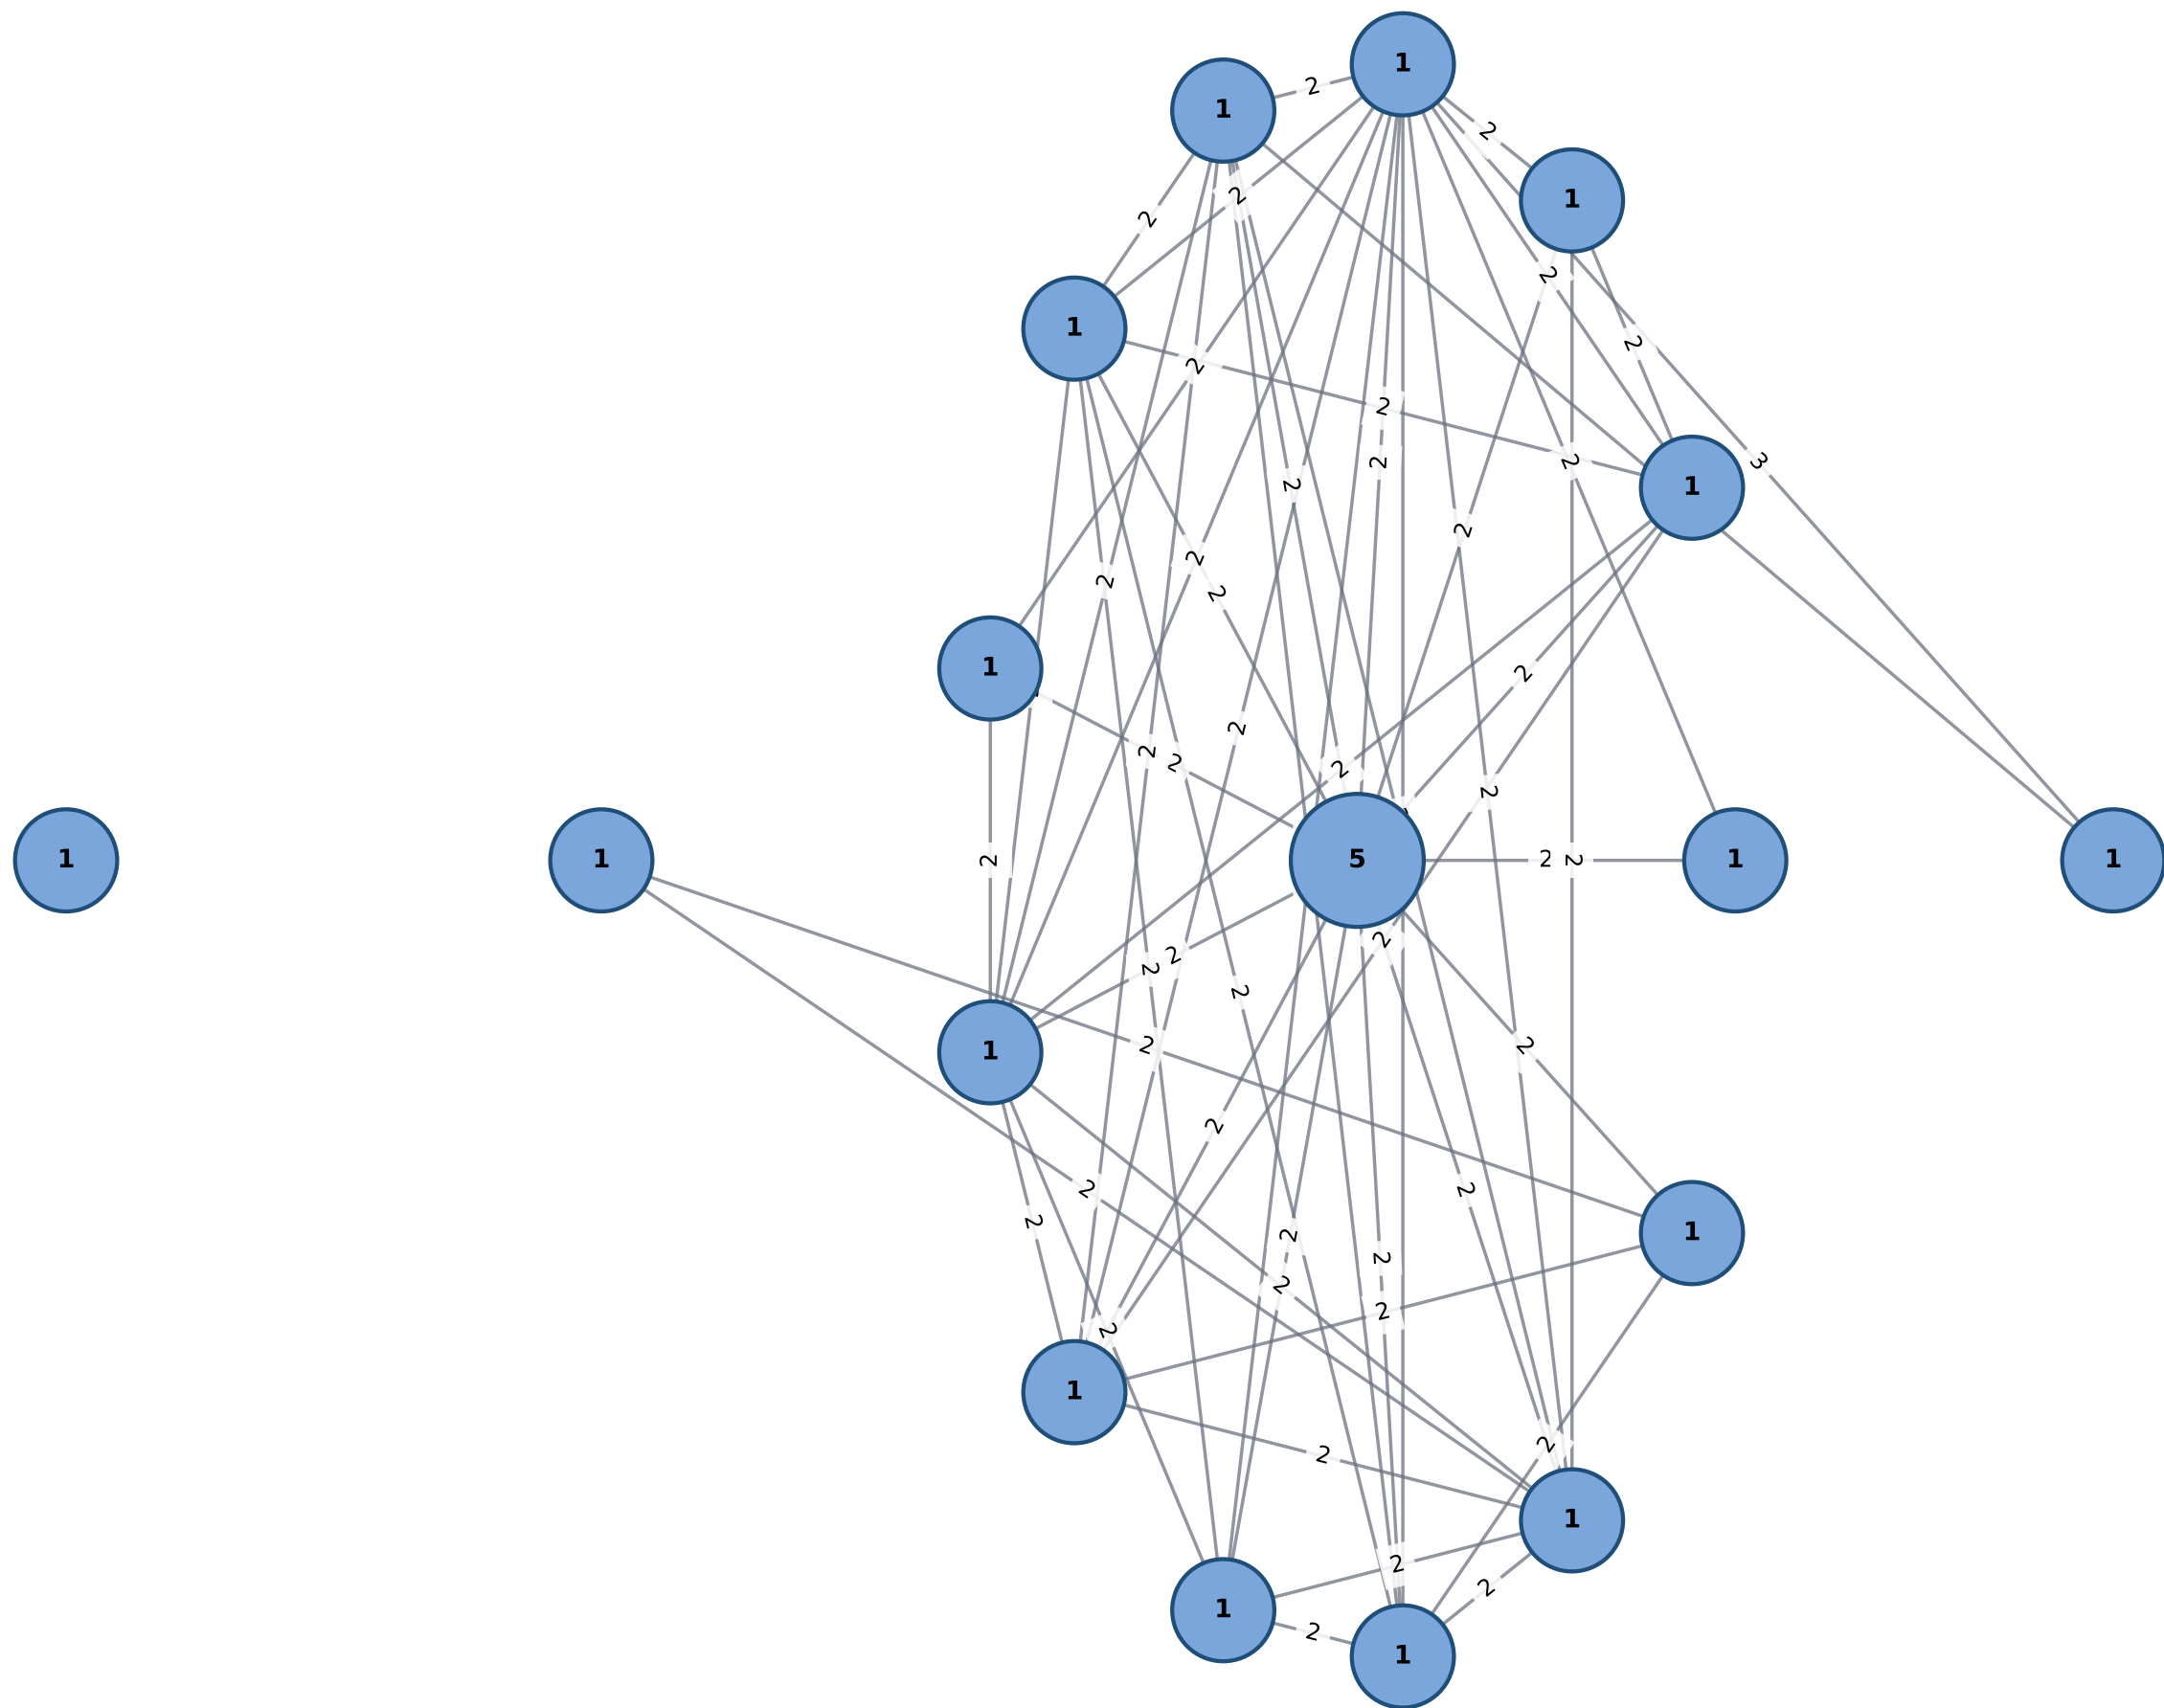

alzheimer disease: cluster map (automatic layout, closest connections only)

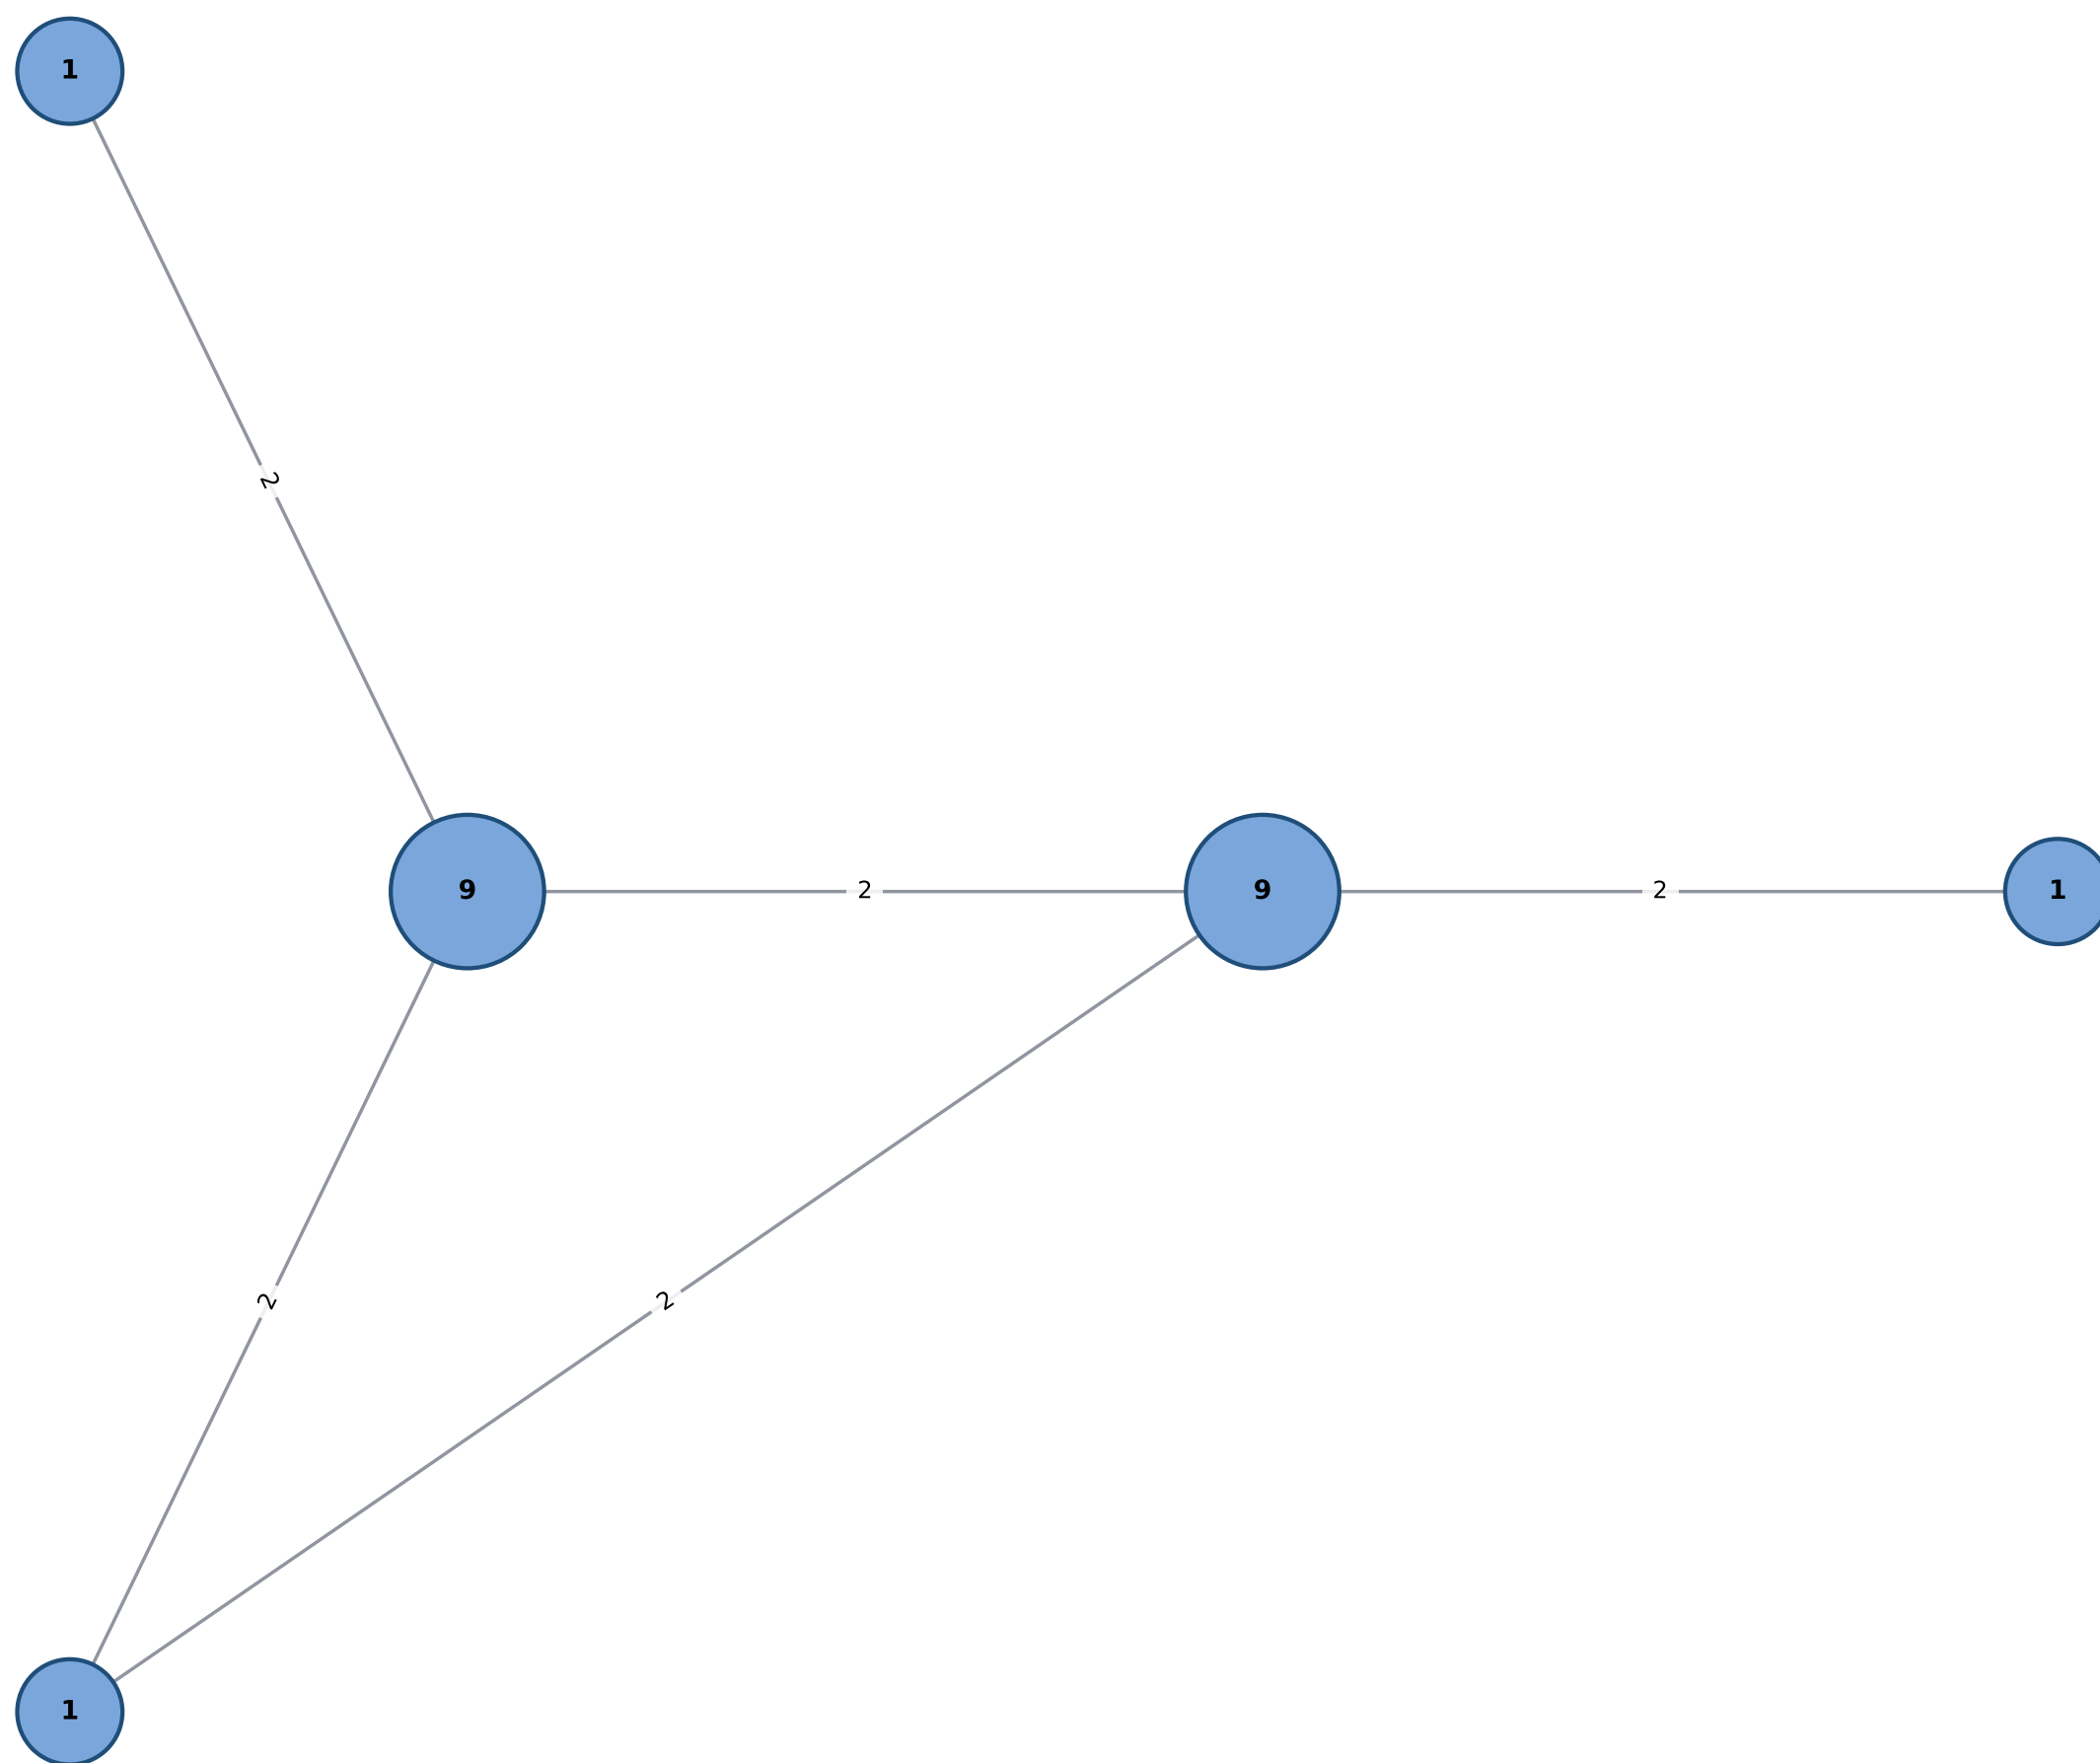

amino acid metabolism inborn errors: cluster map (automatic layout, closest connections only)

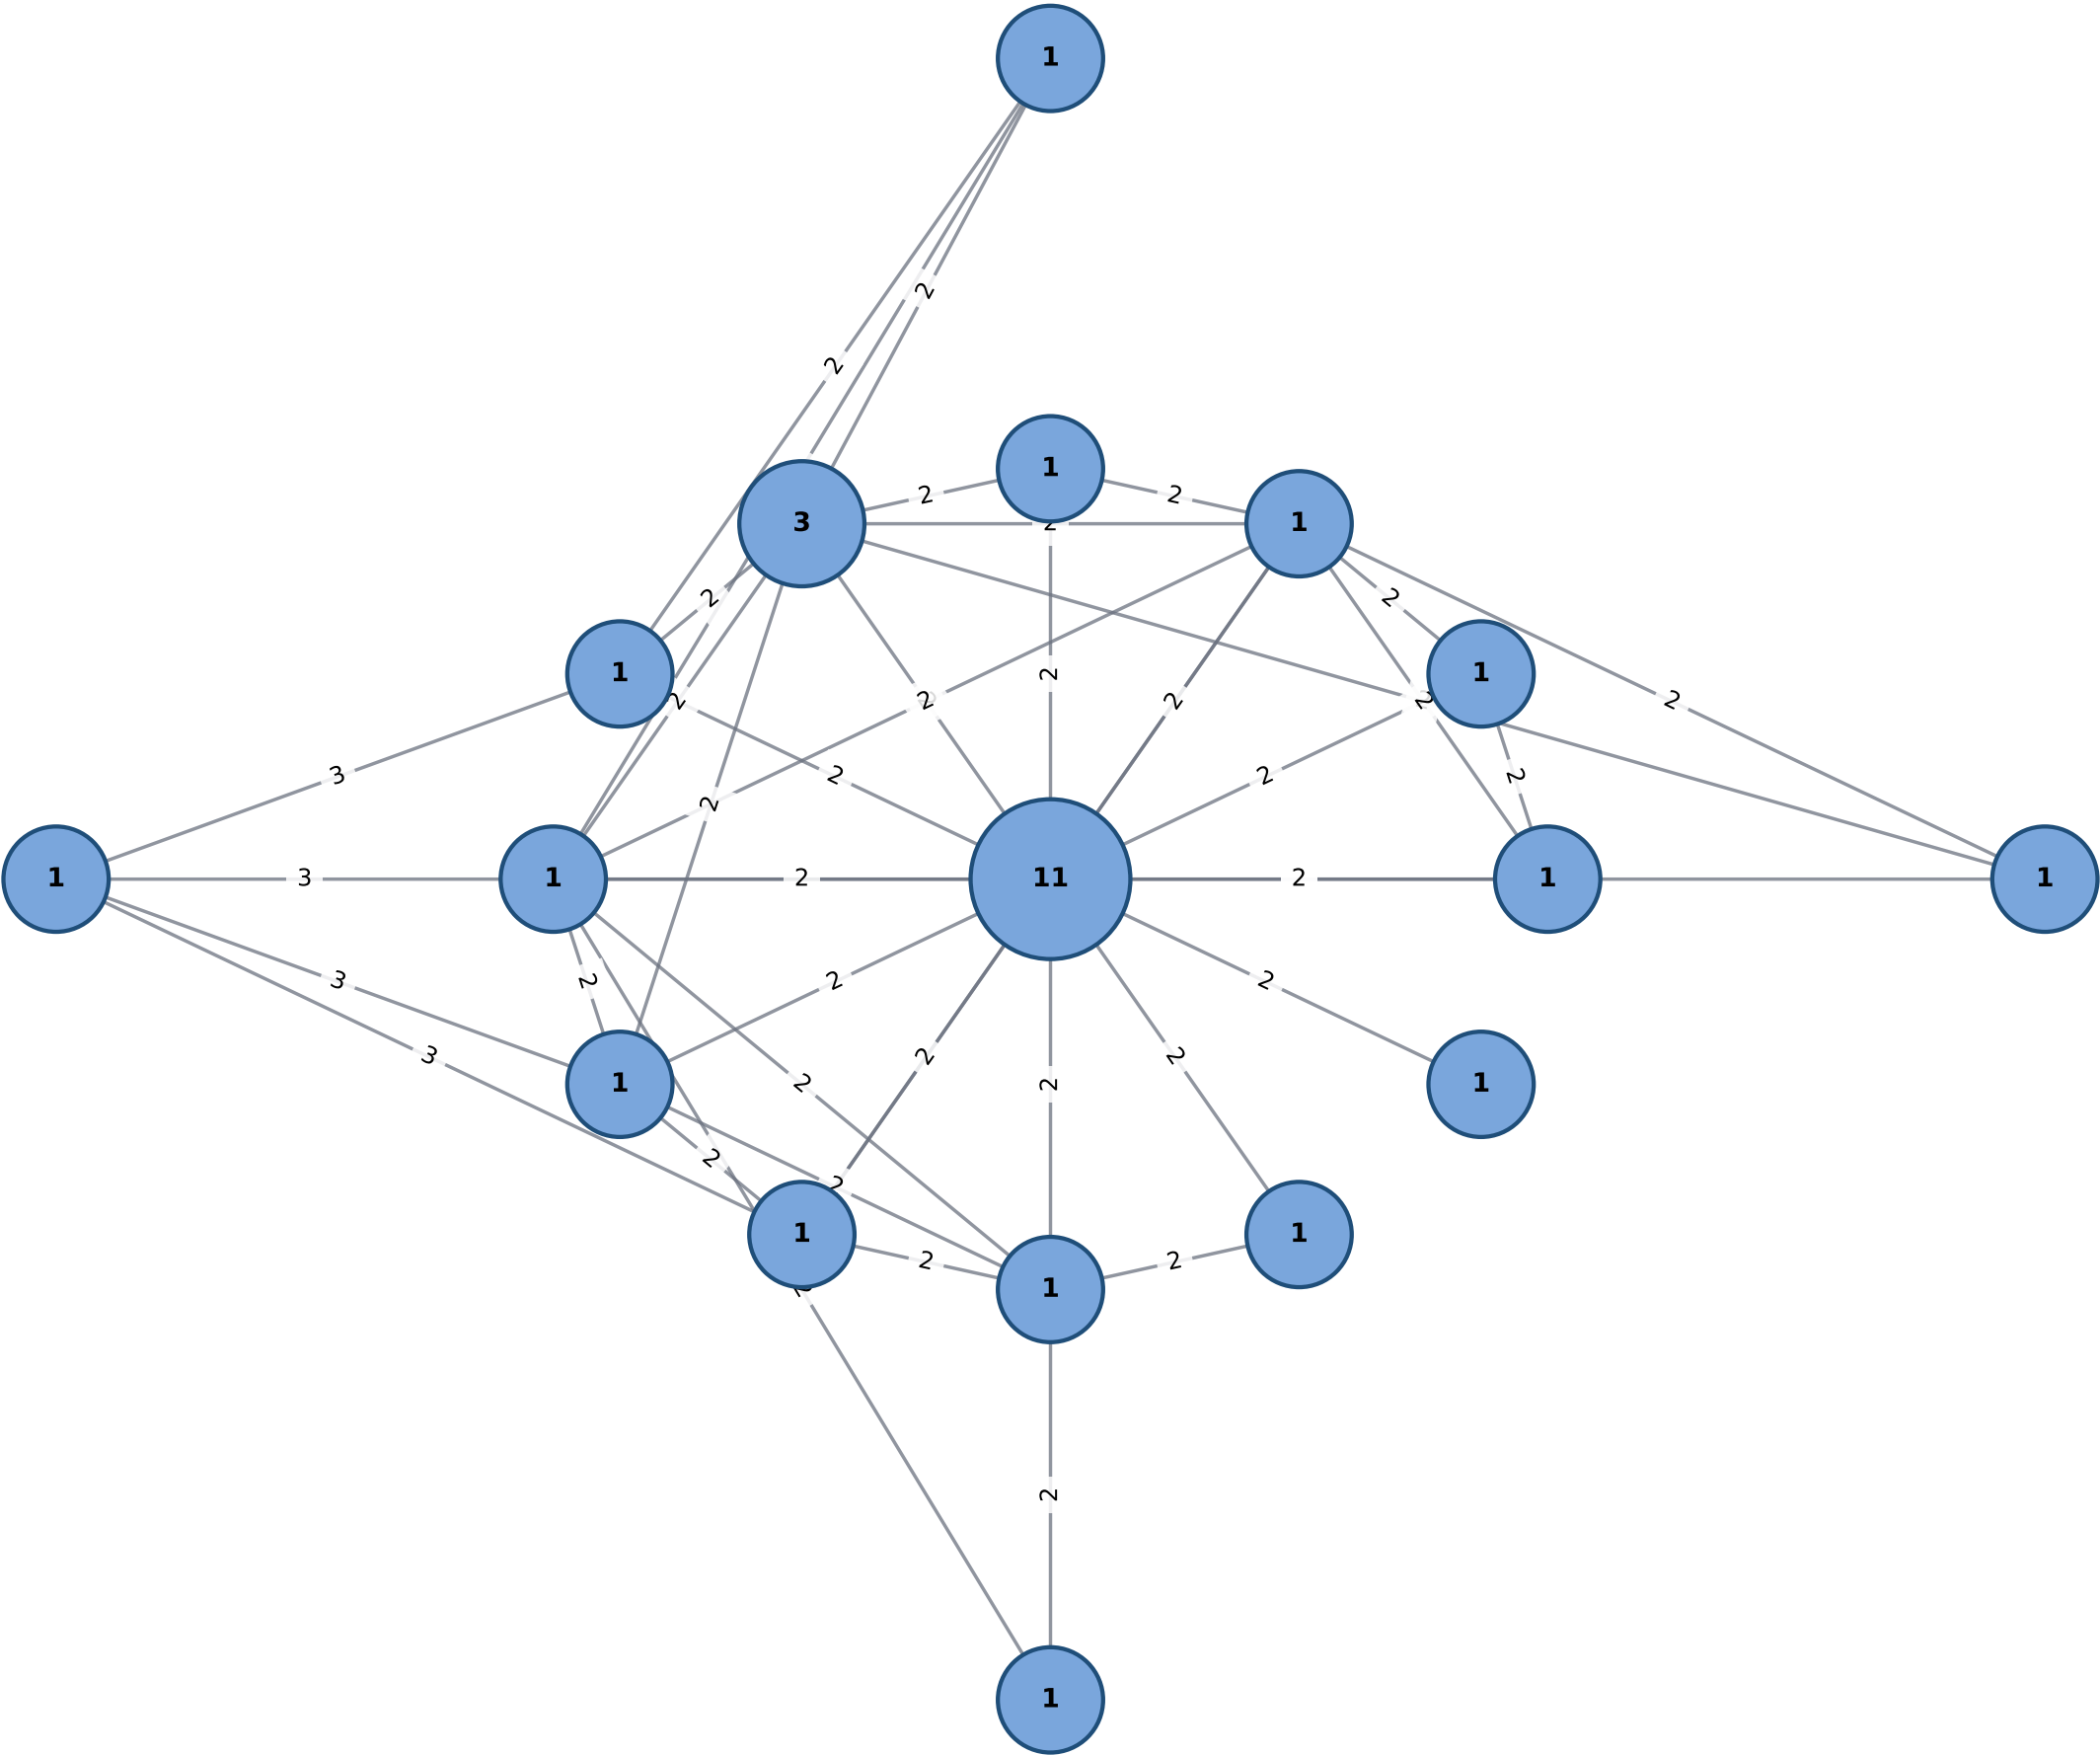

amyotrophic lateral sclerosis: cluster map (automatic layout, closest connections only)

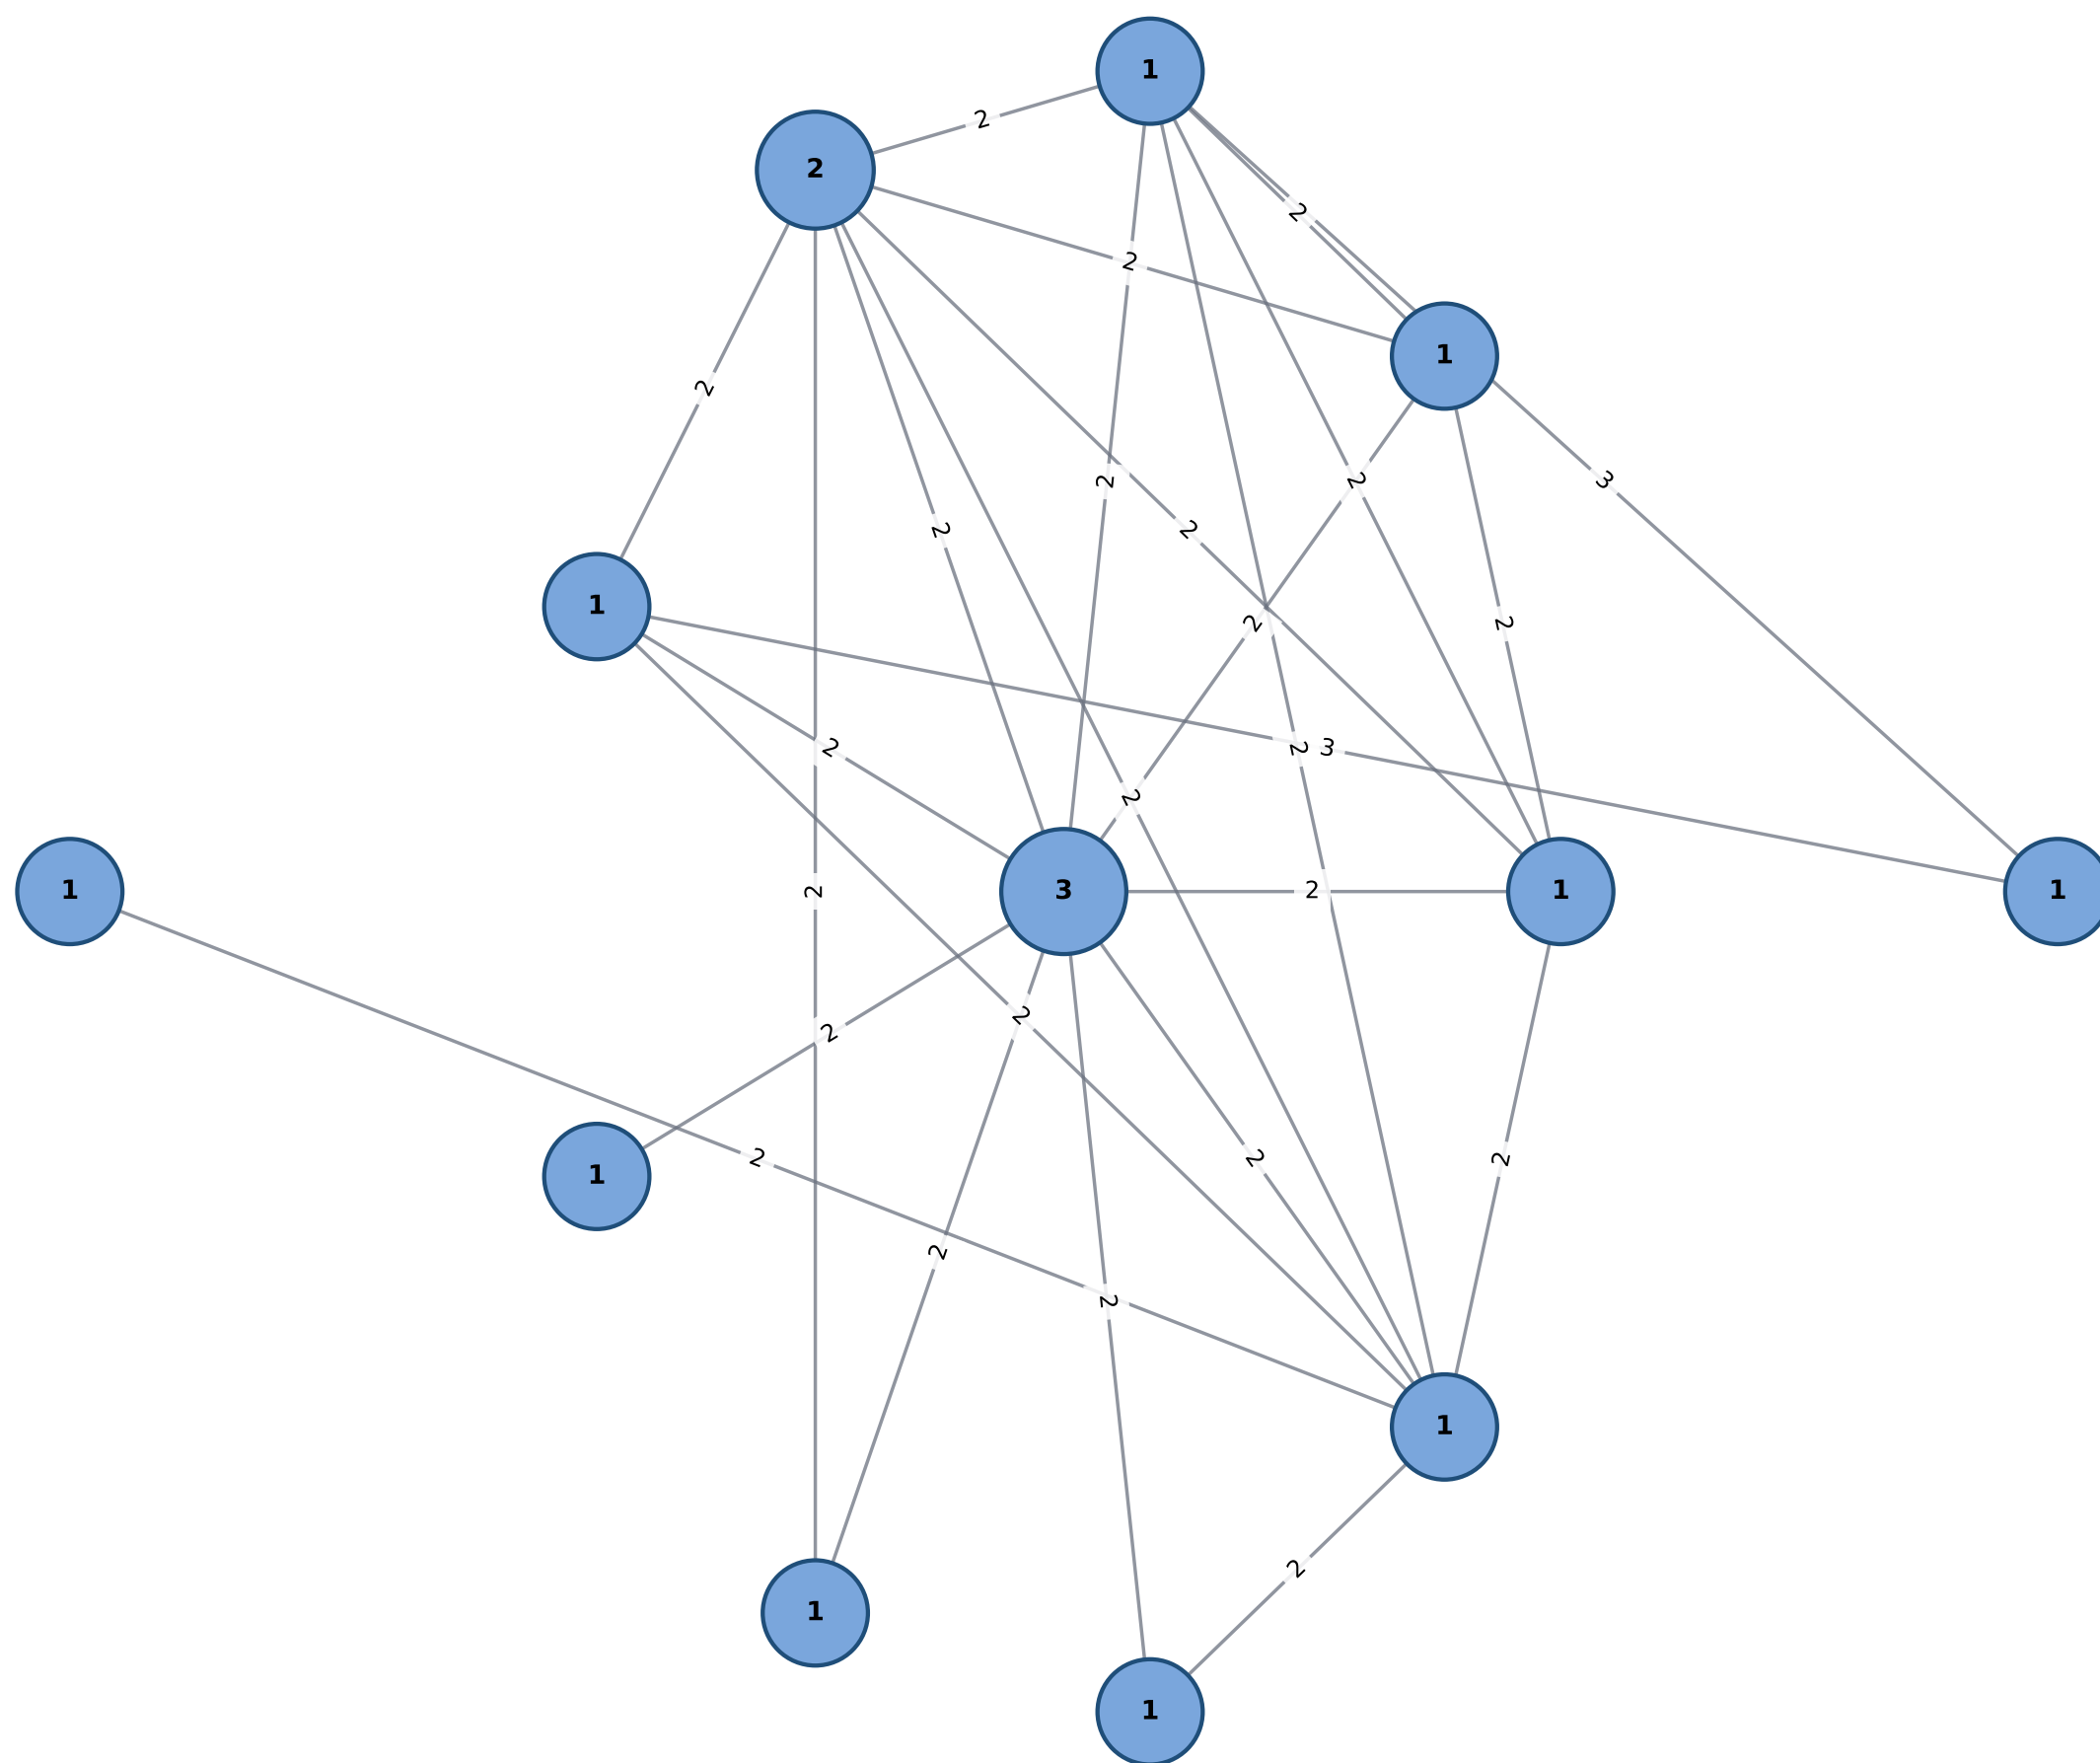

anemia aplastic: cluster map (automatic layout, closest connections only)

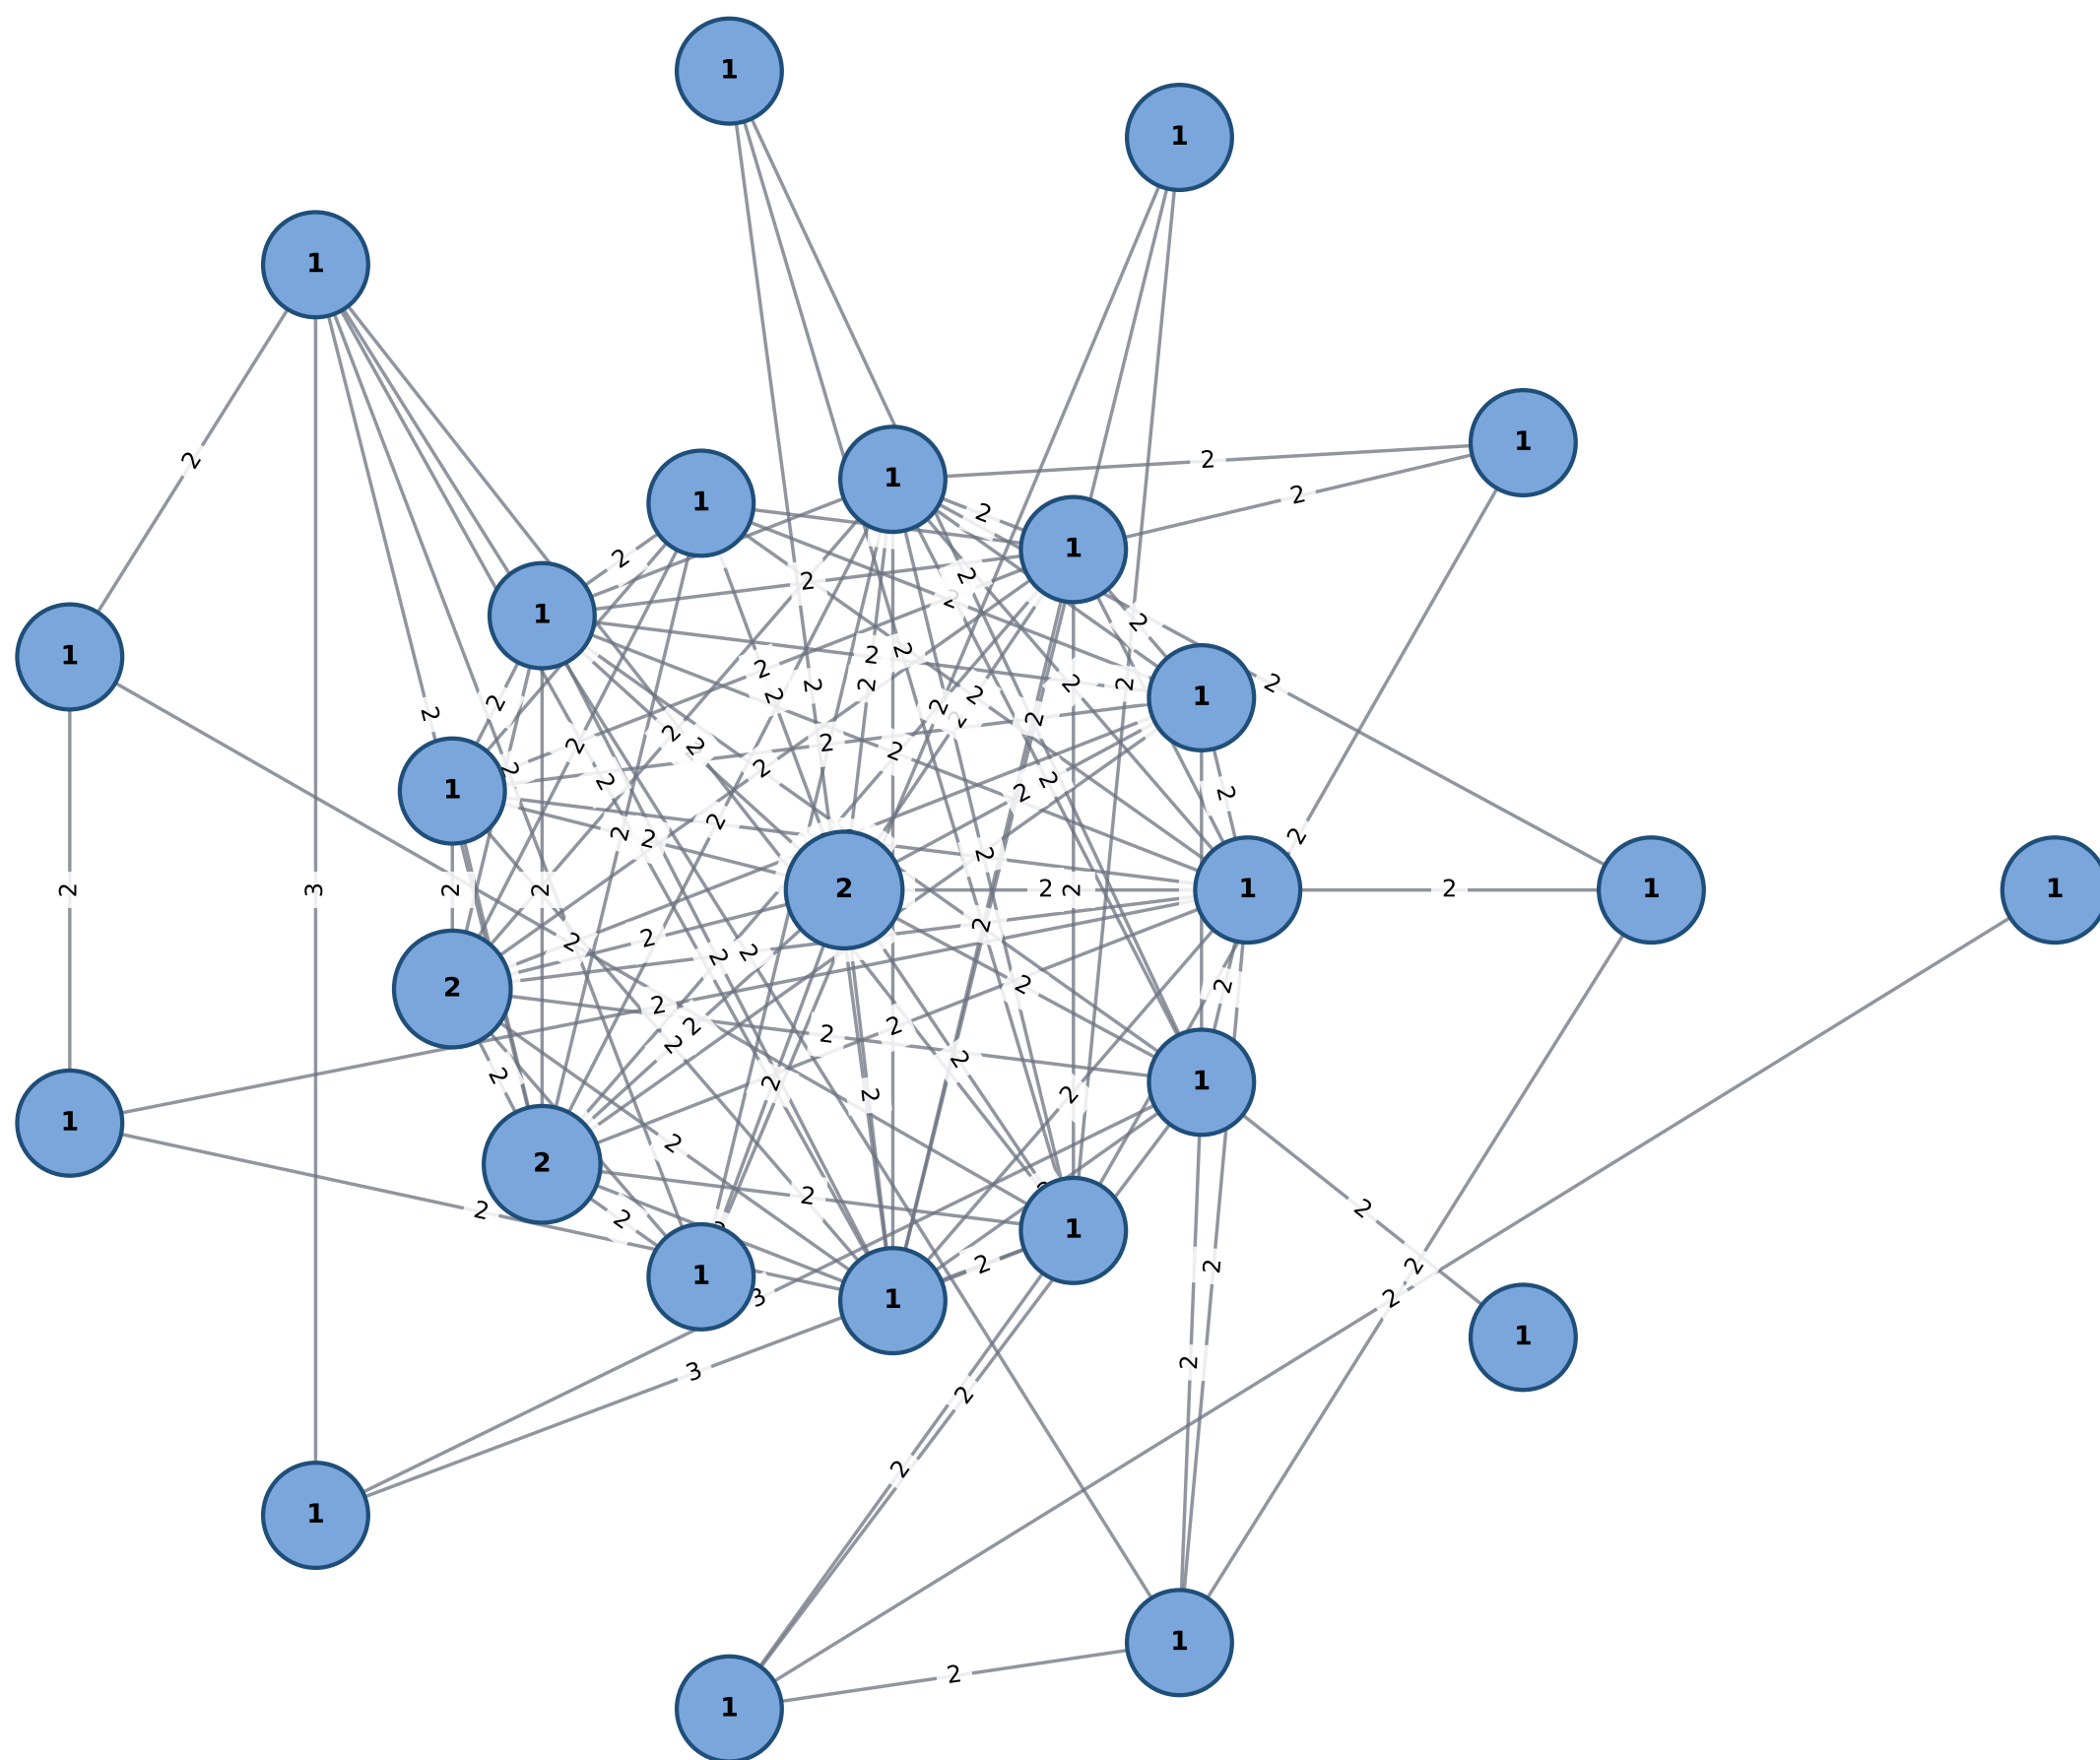

anemia hemolytic: cluster map (automatic layout, closest connections only)

aneurysm: cluster map (automatic layout, closest connections only)

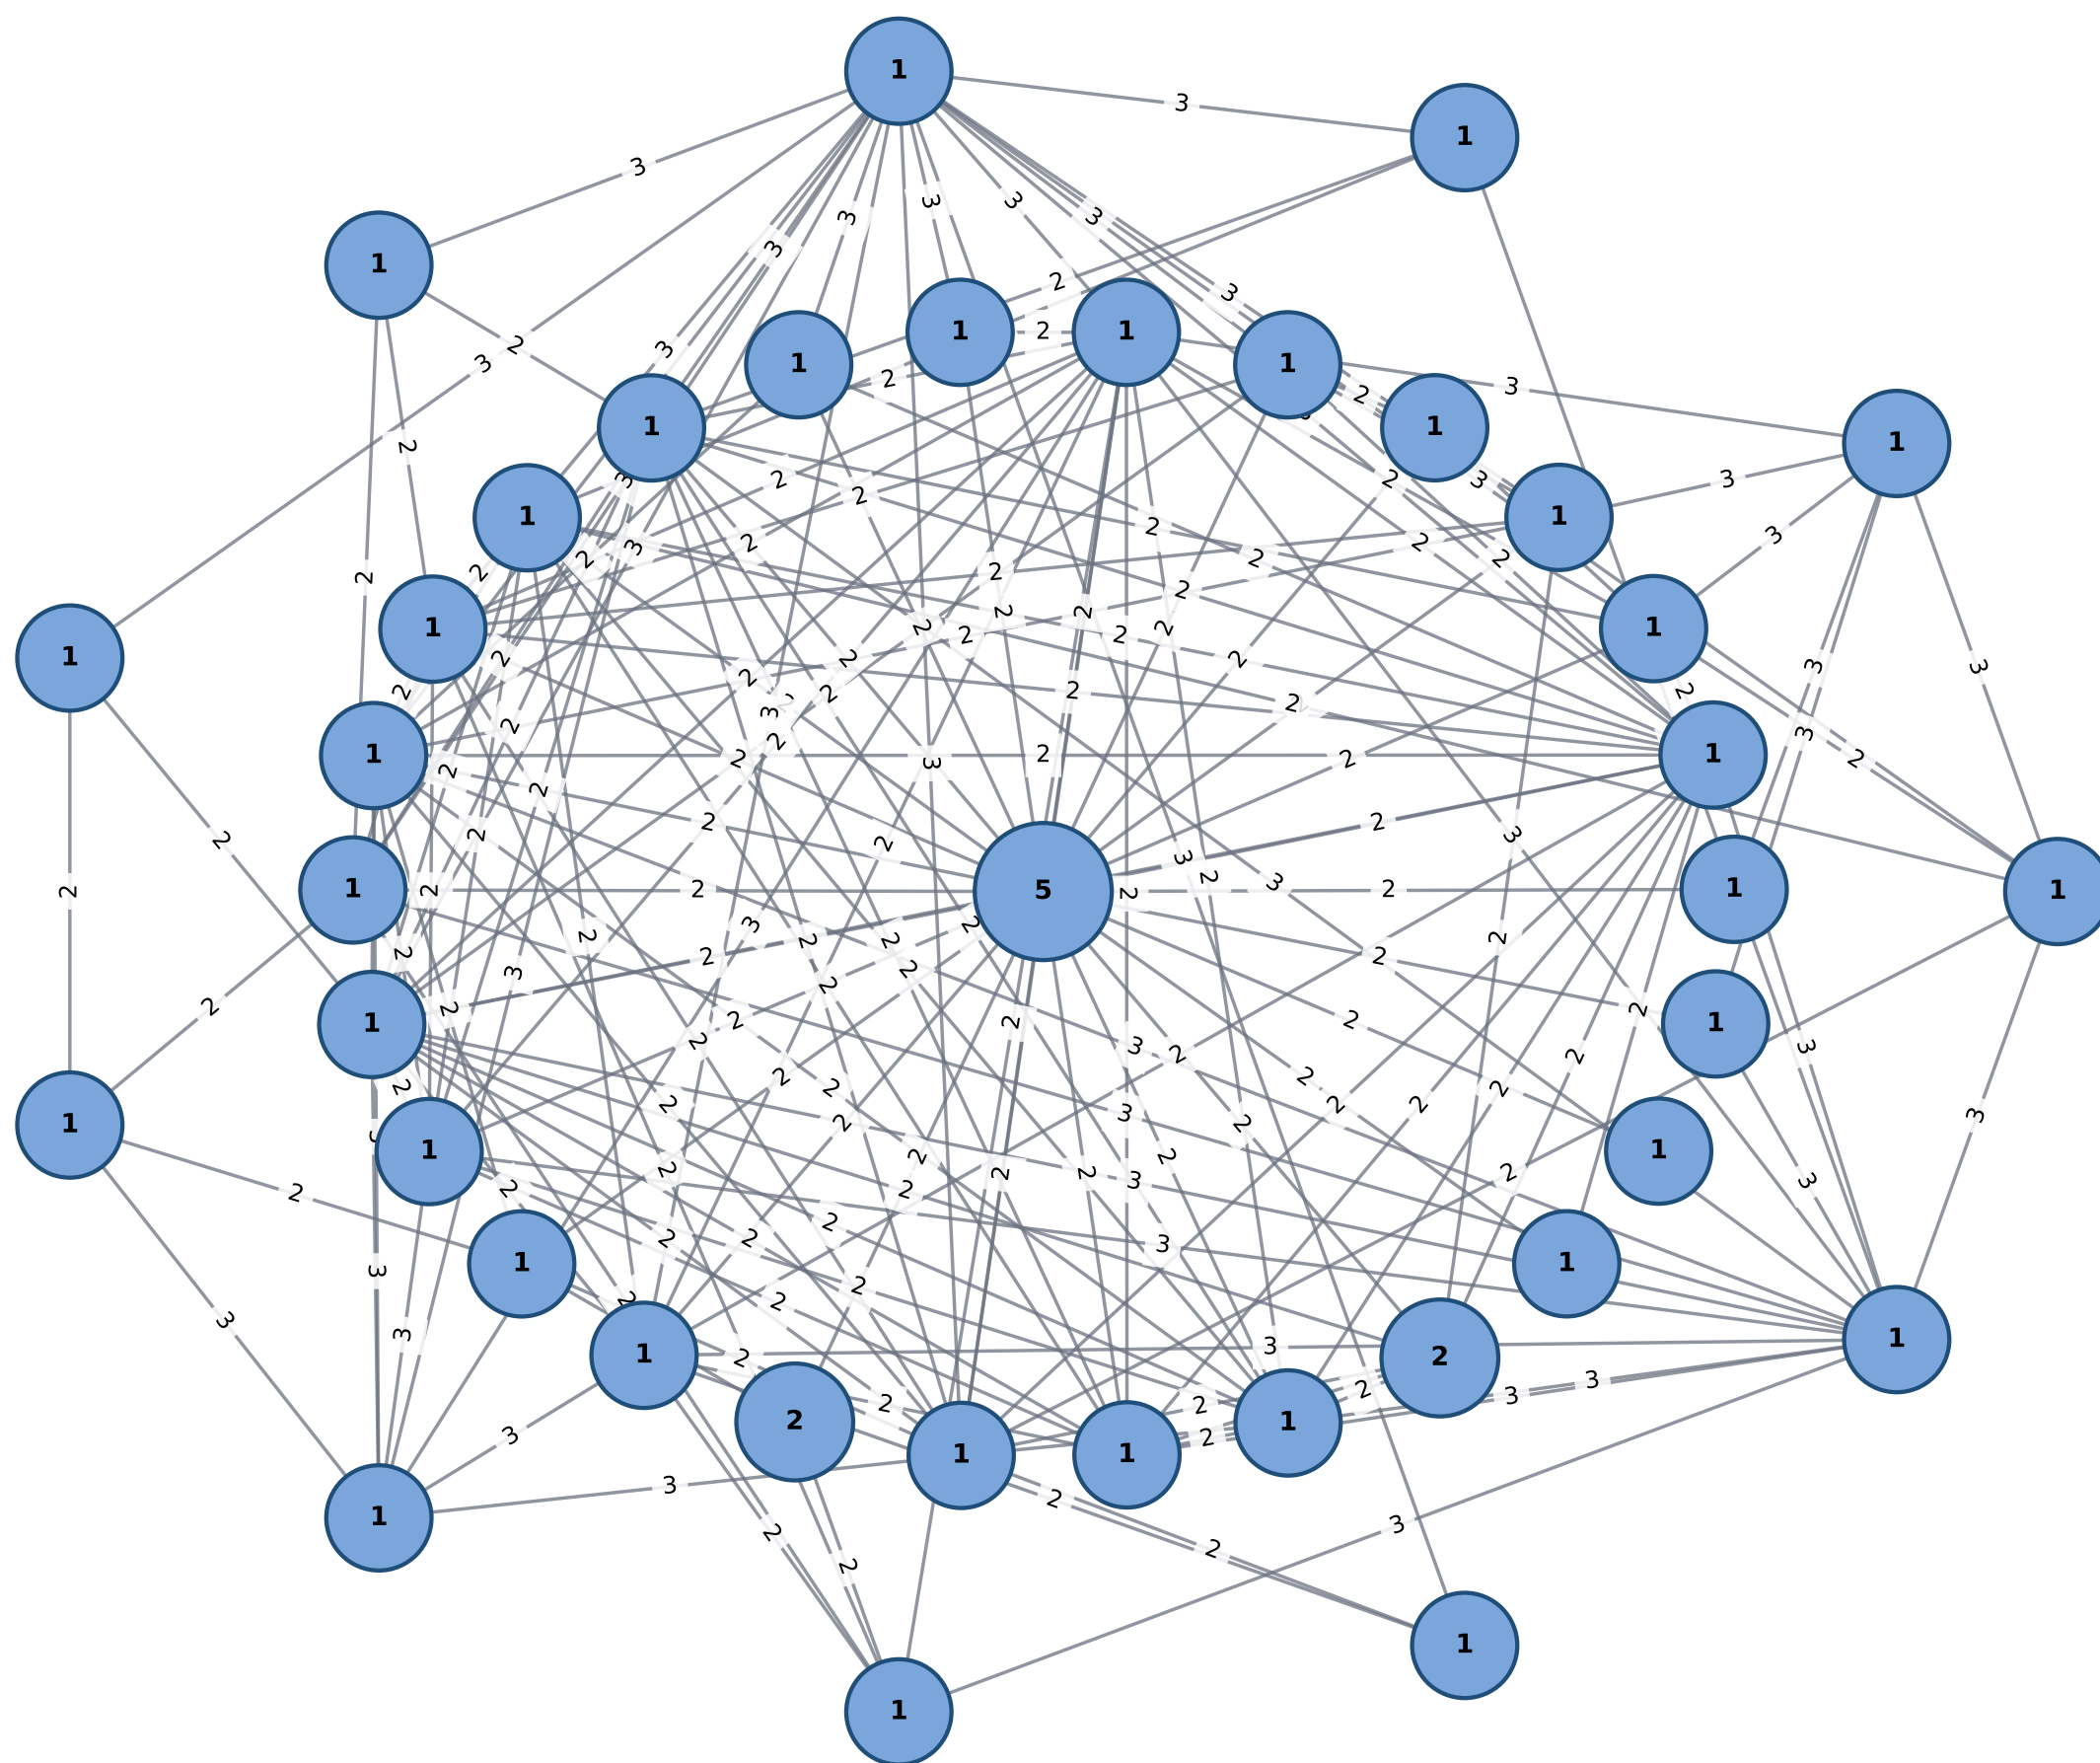

arrhythmias cardiac: cluster map (automatic layout, closest connections only)

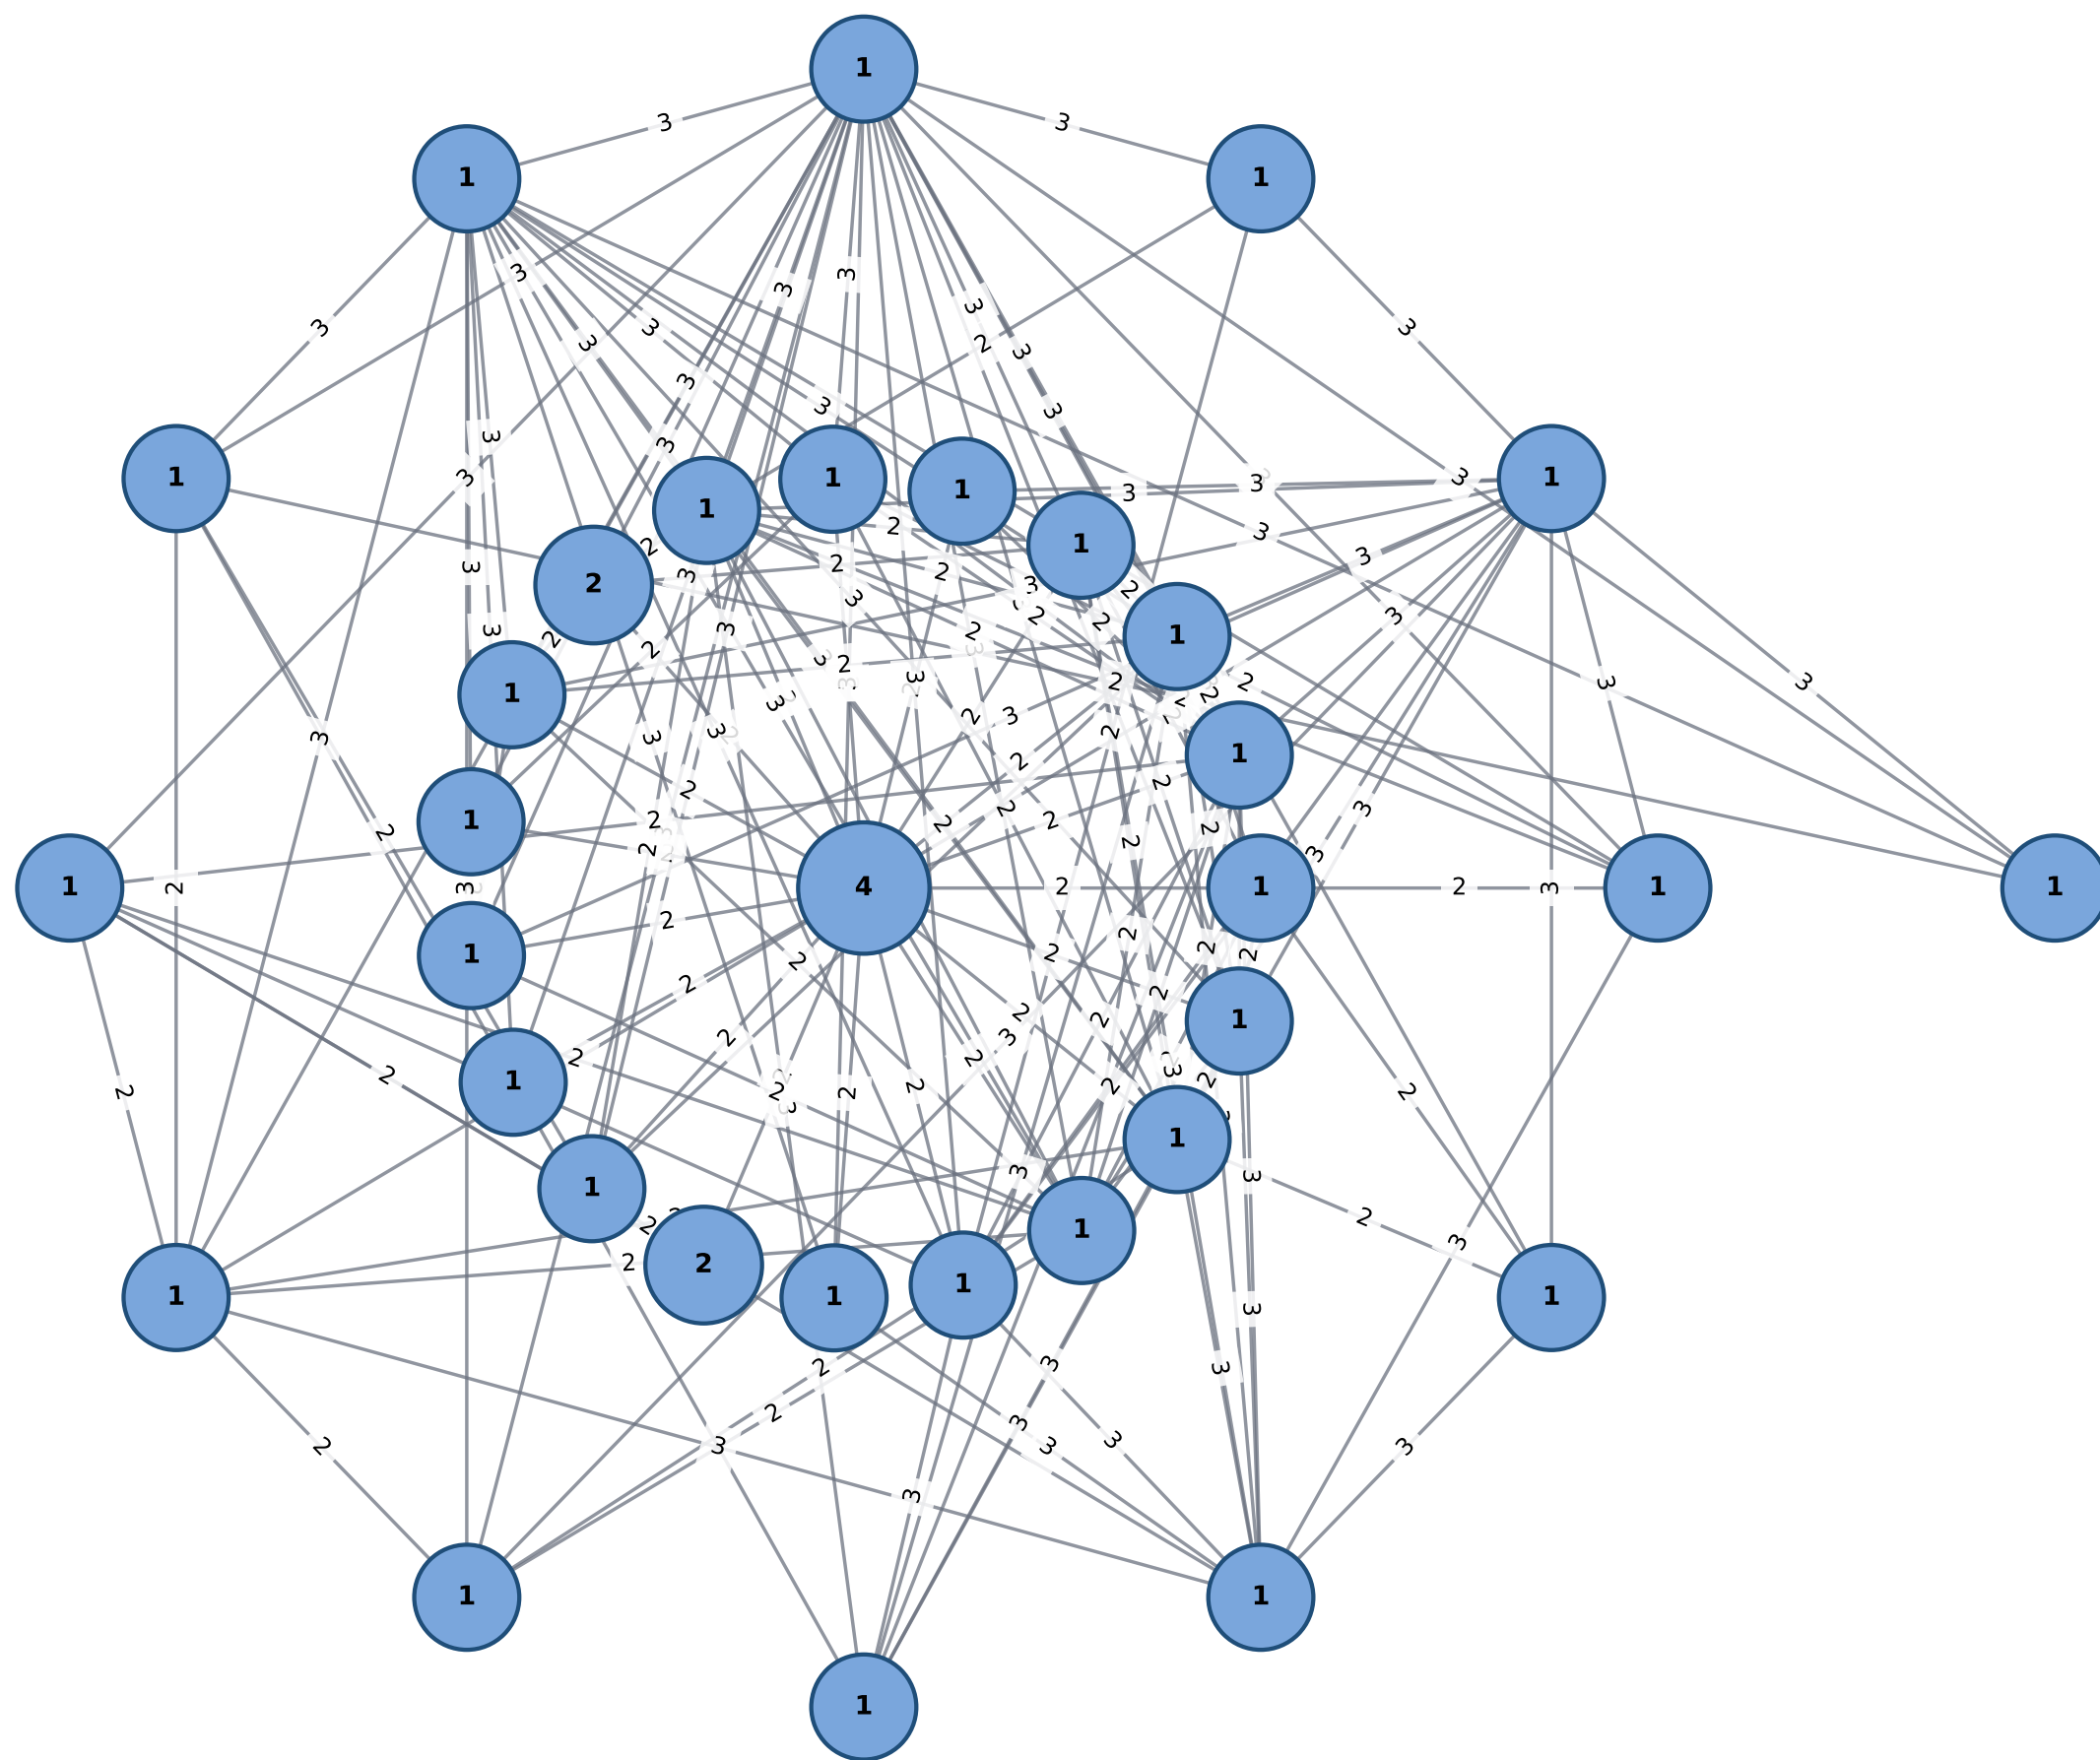

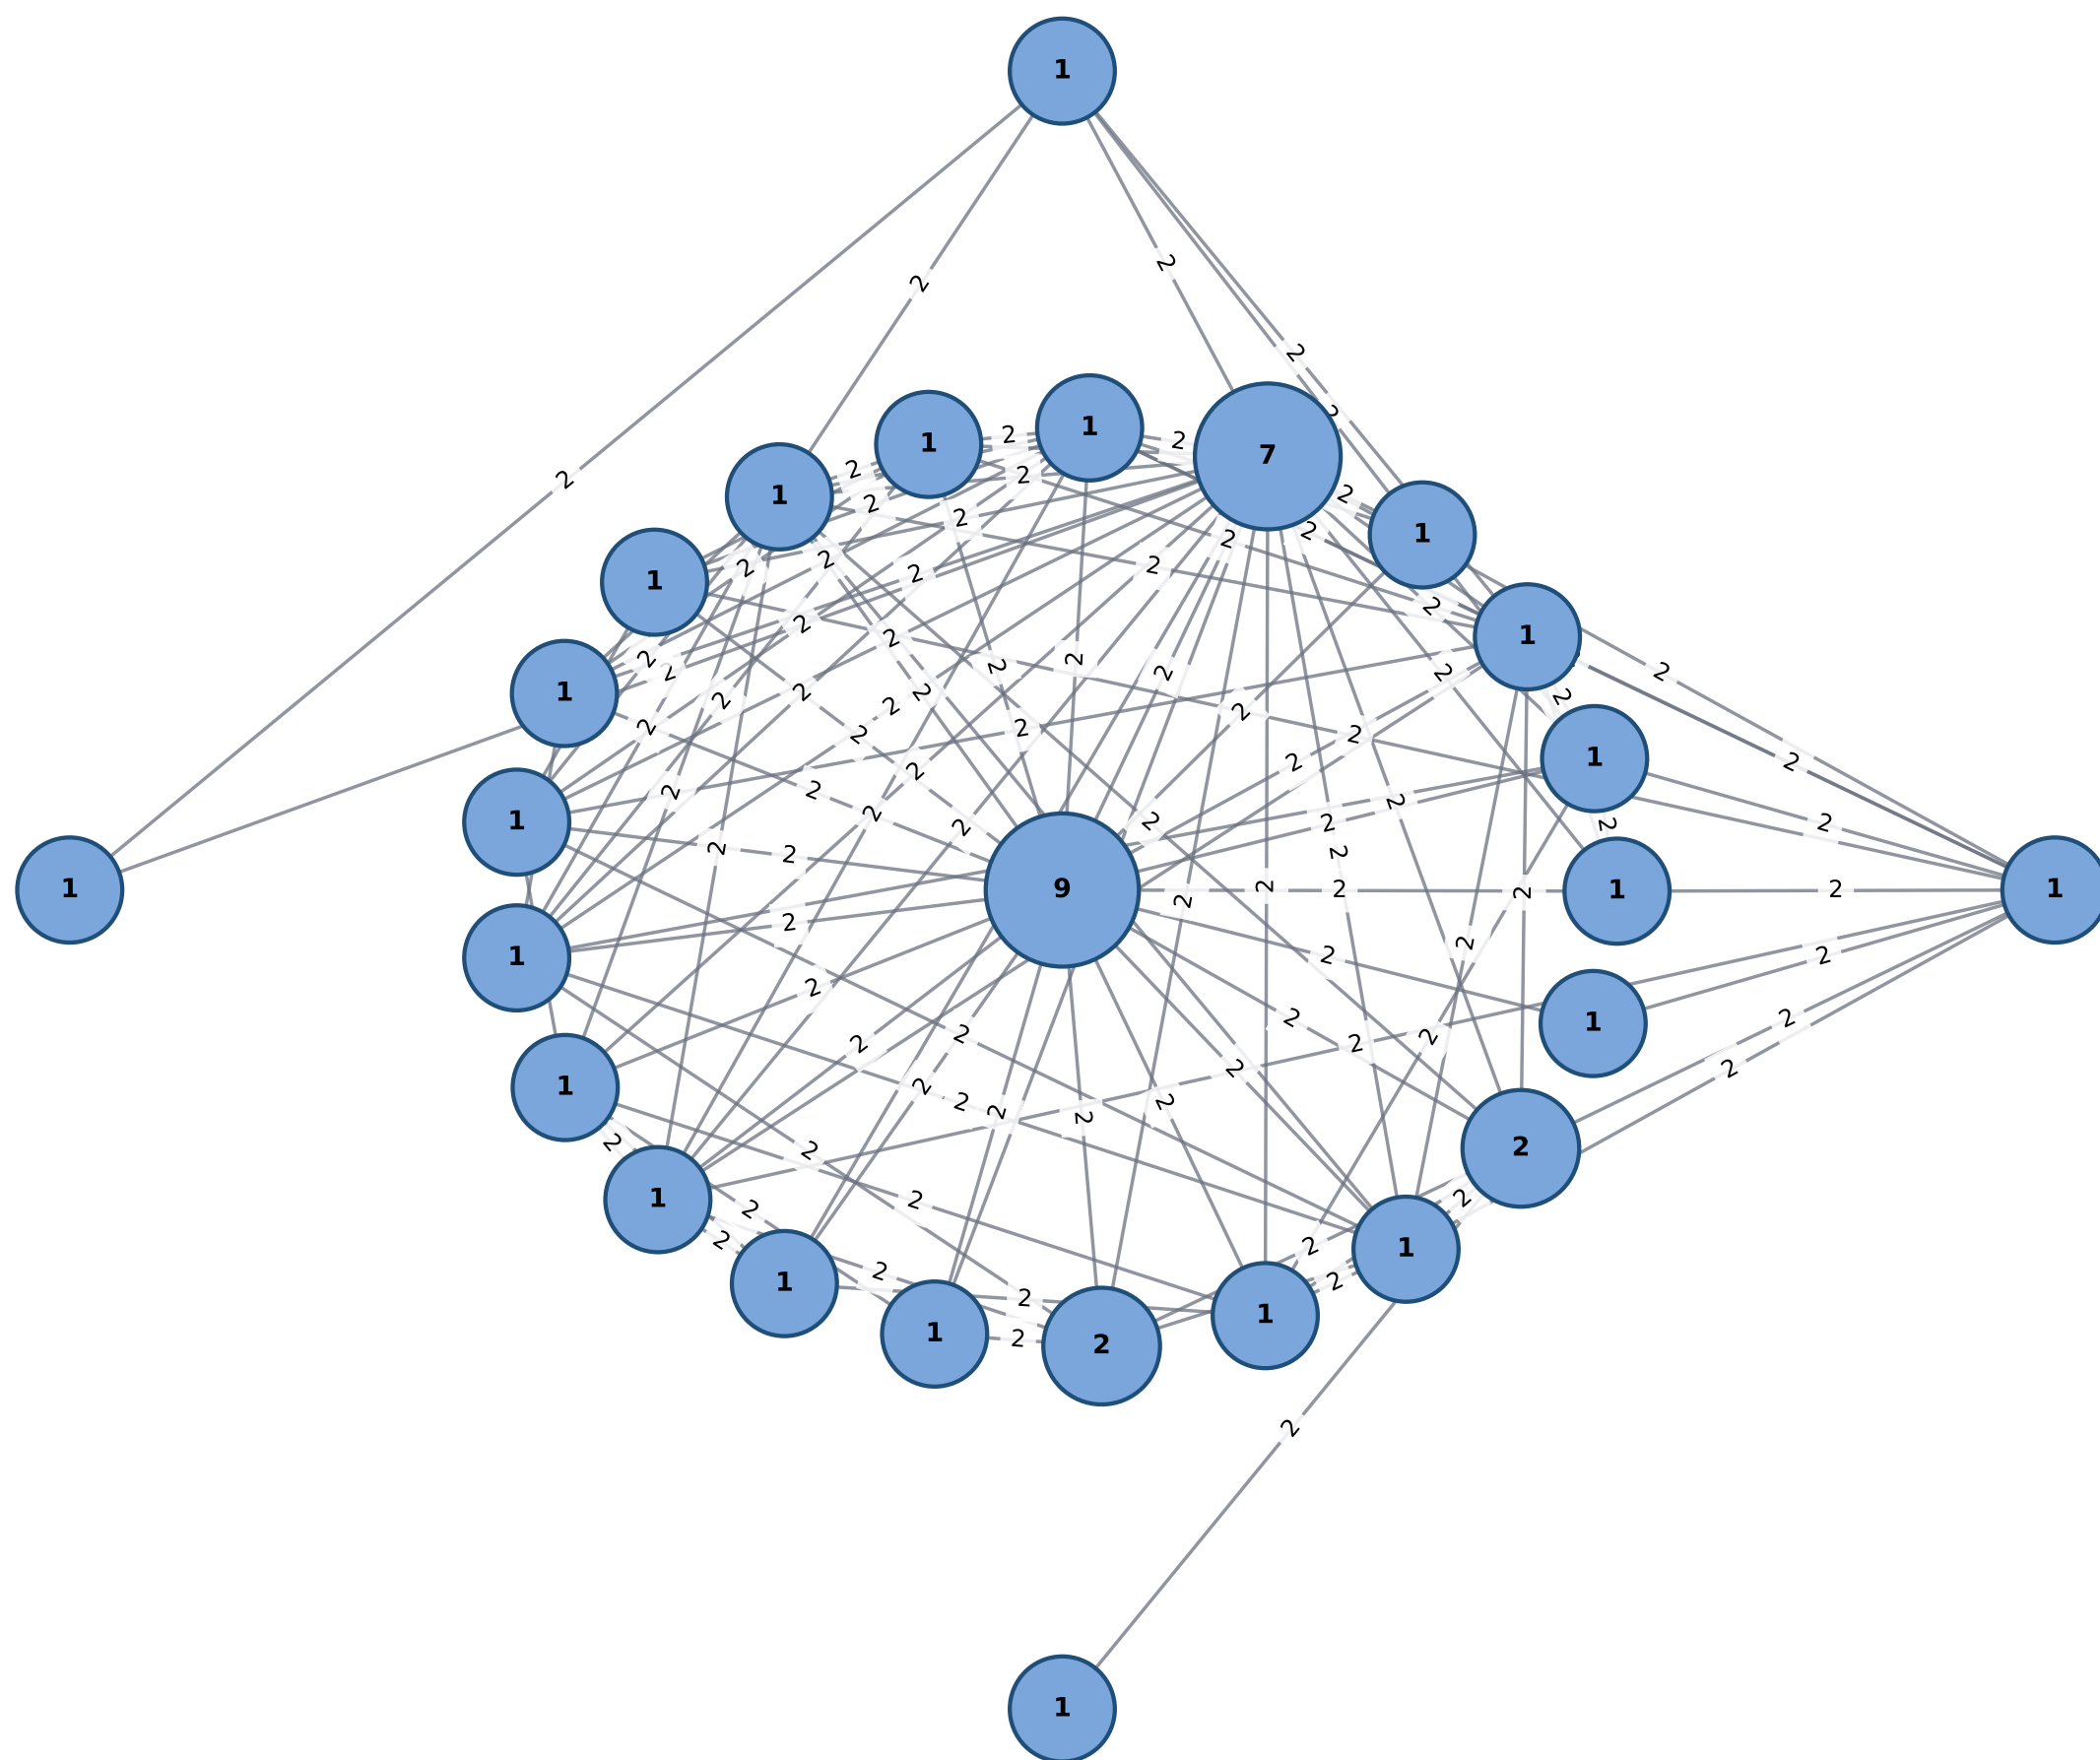

arterial occlusive diseases: cluster map (automatic layout, closest connections only)

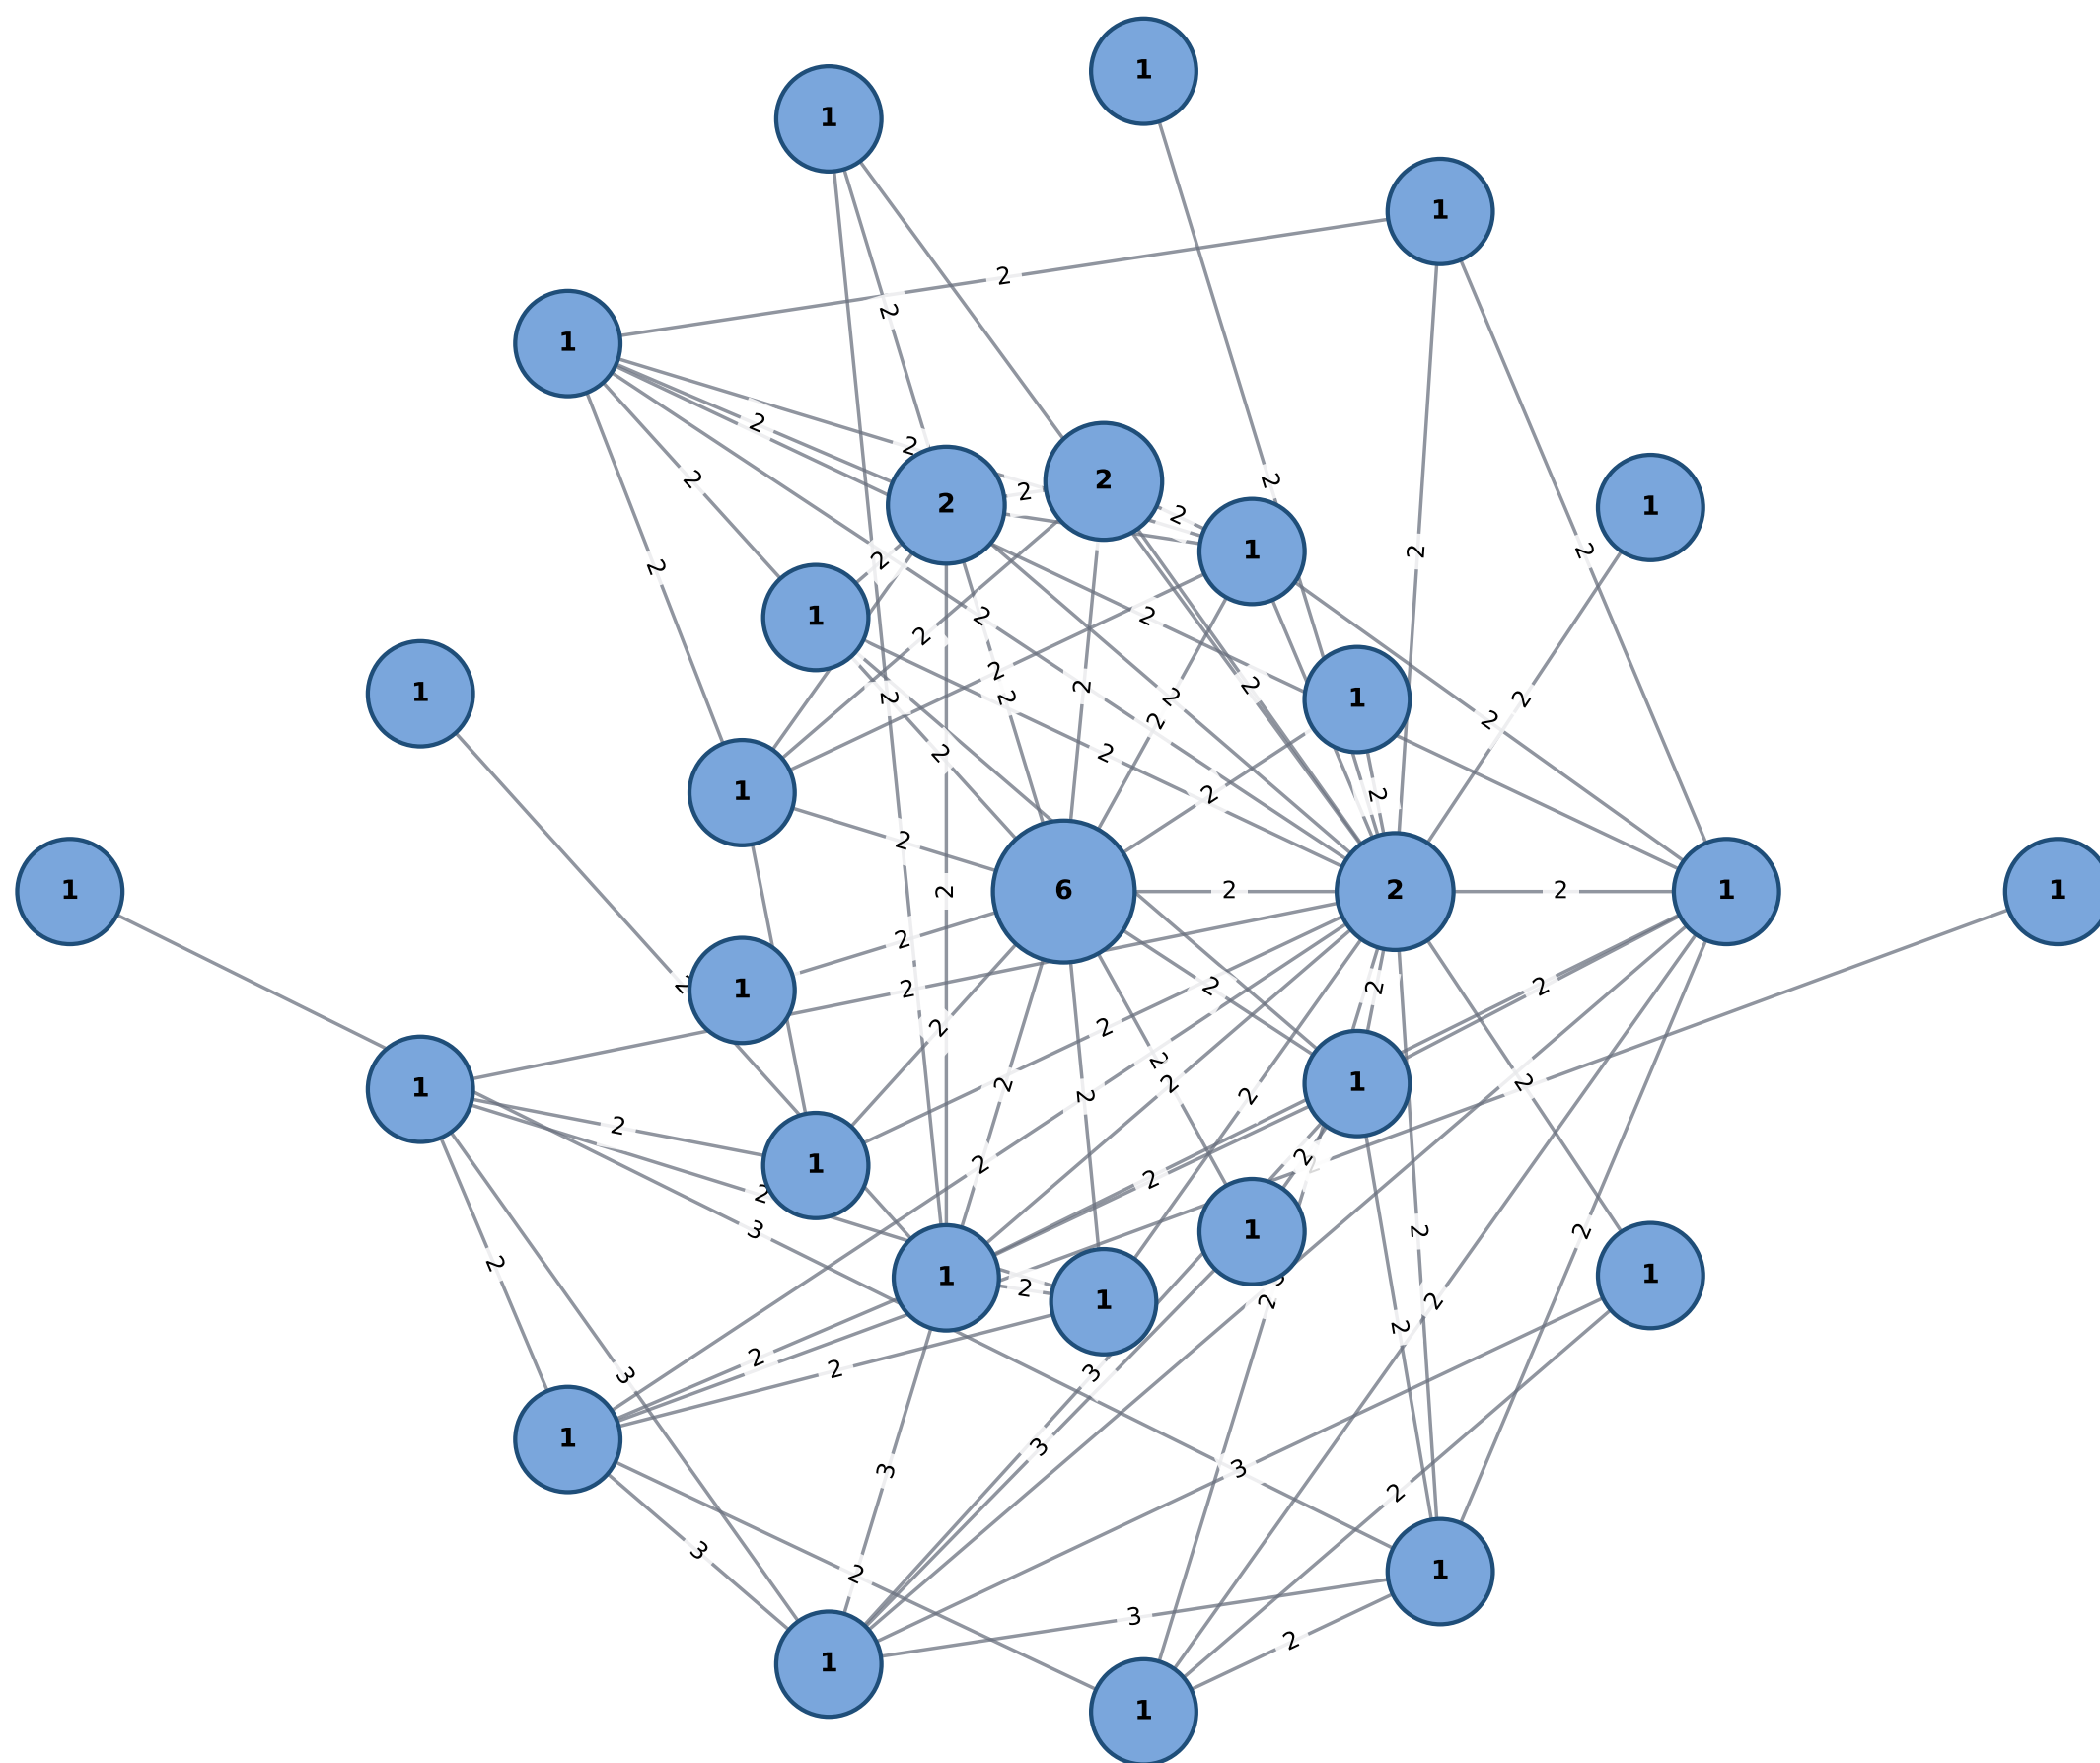

arteriosclerosis: cluster map (automatic layout, closest connections only)

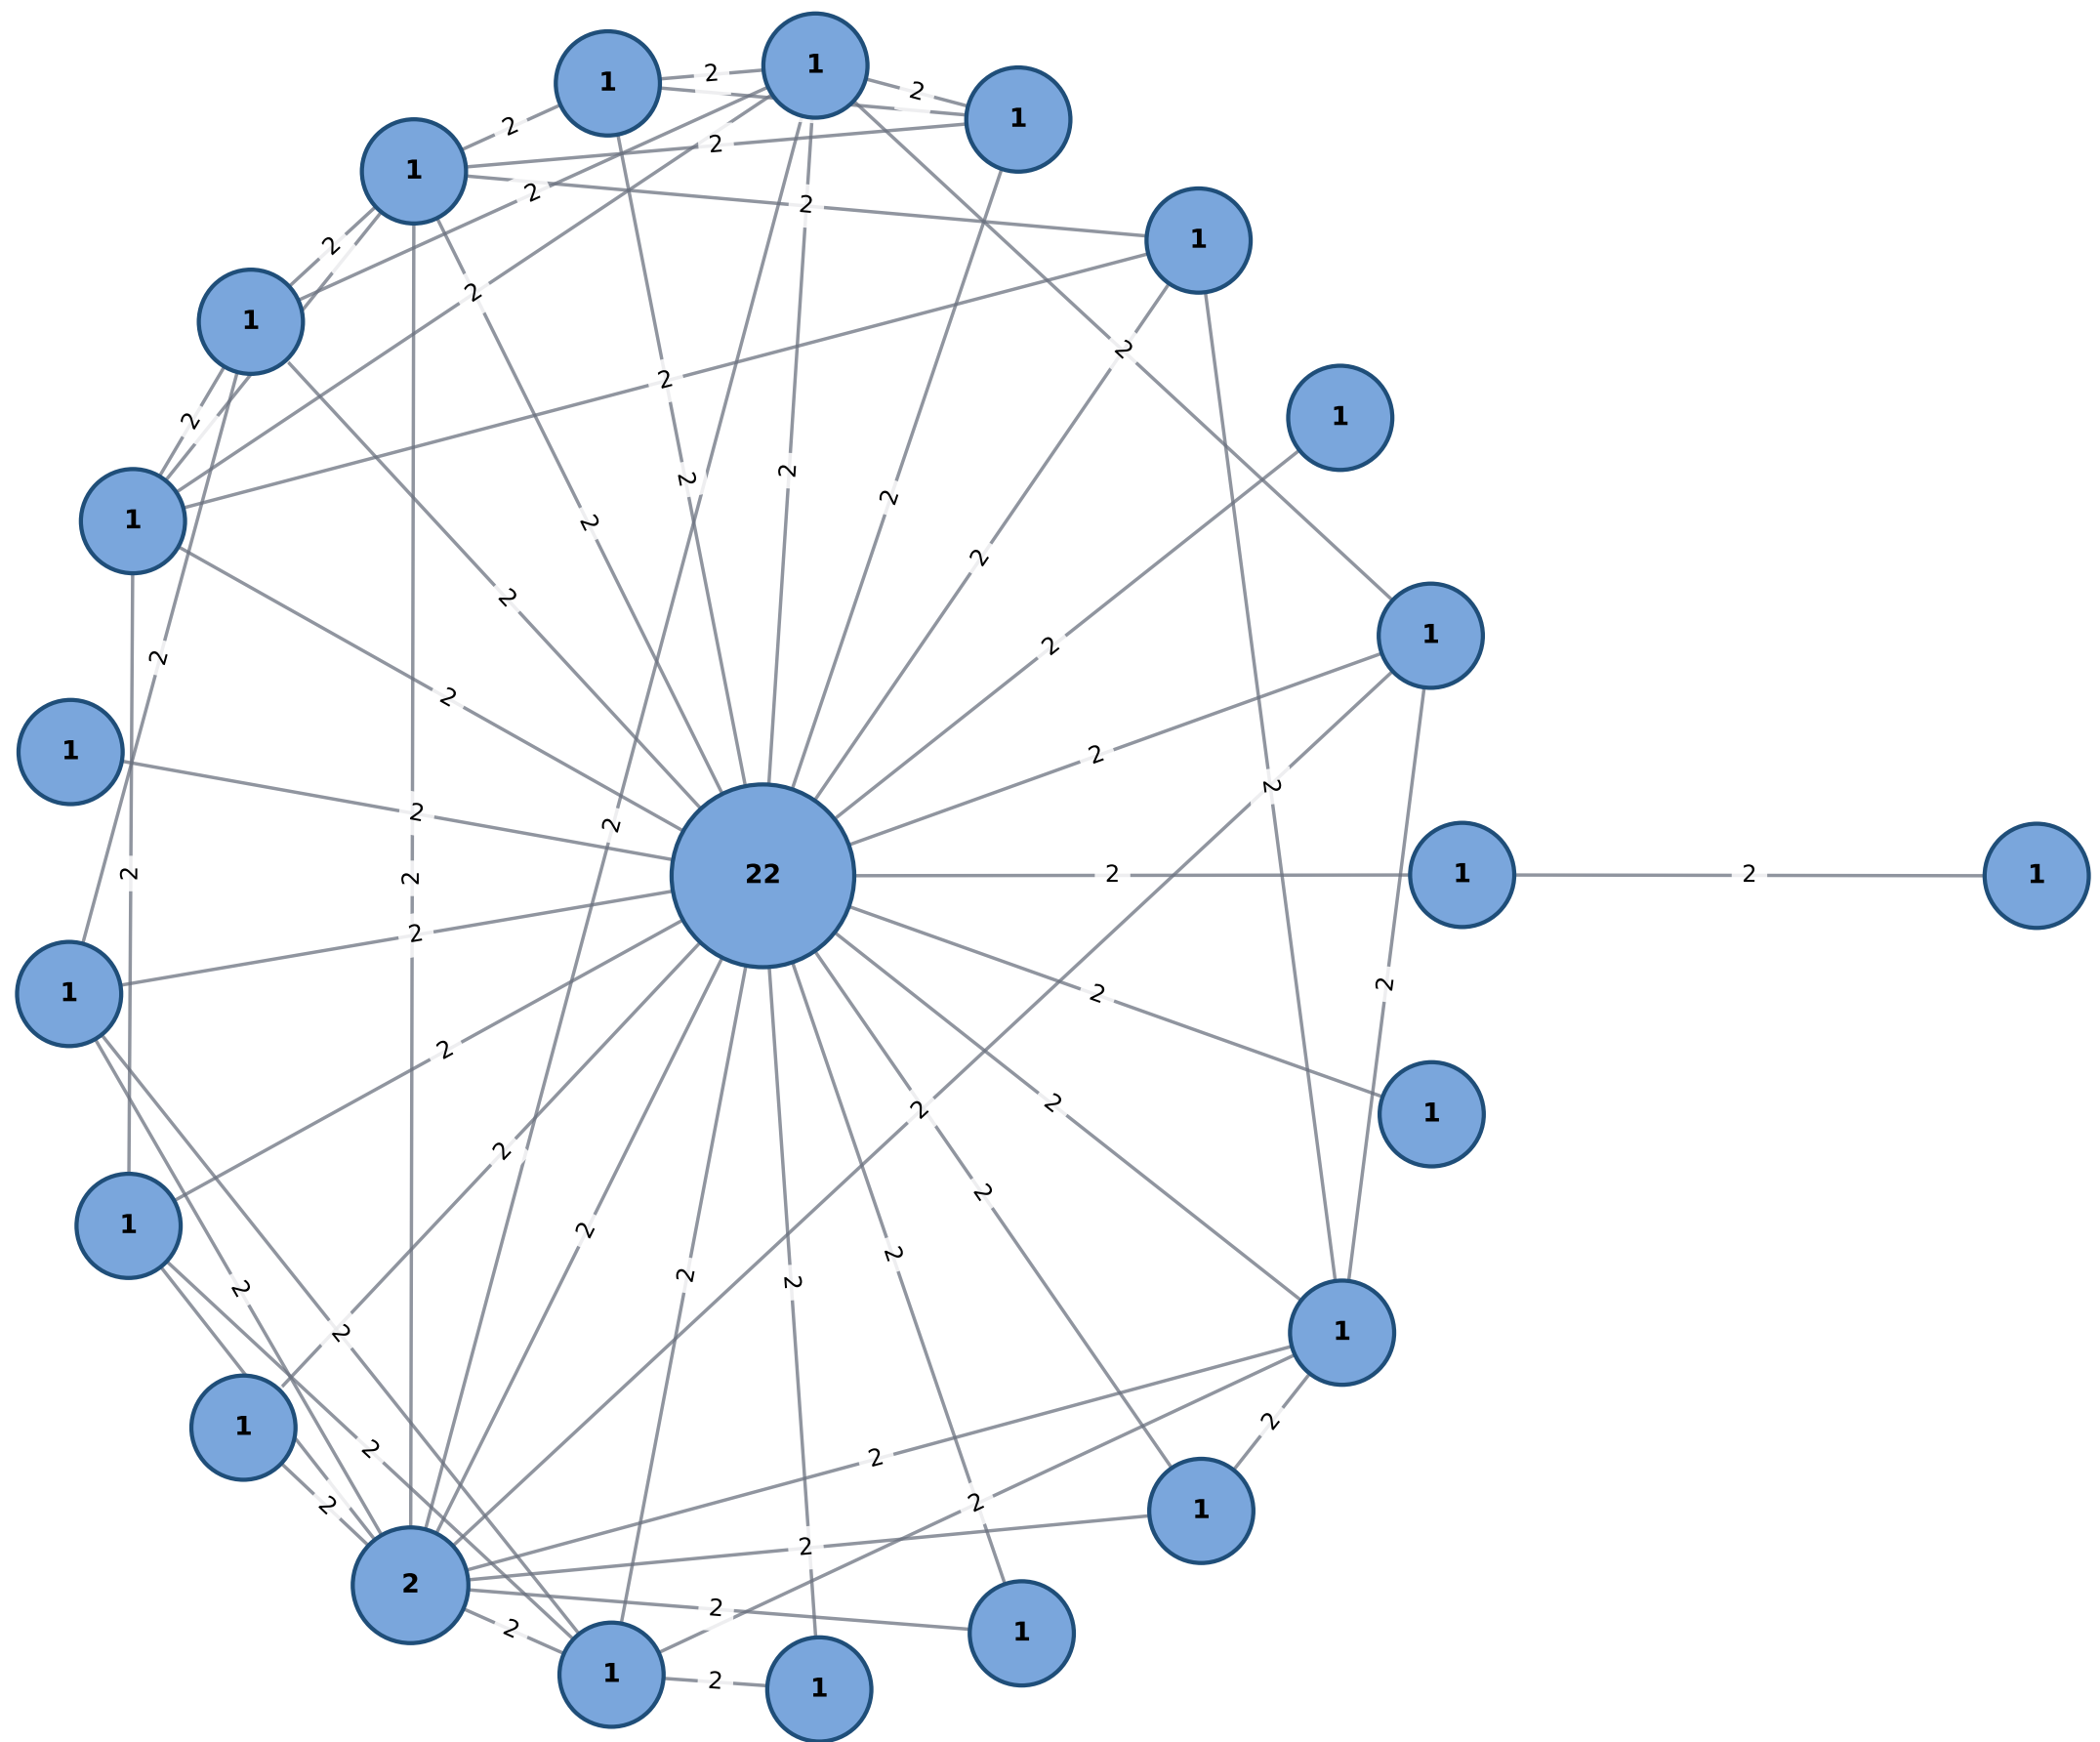

arthritis rheumatoid: cluster map (automatic layout, closest connections only)

asthma: cluster map (automatic layout, closest connections only)

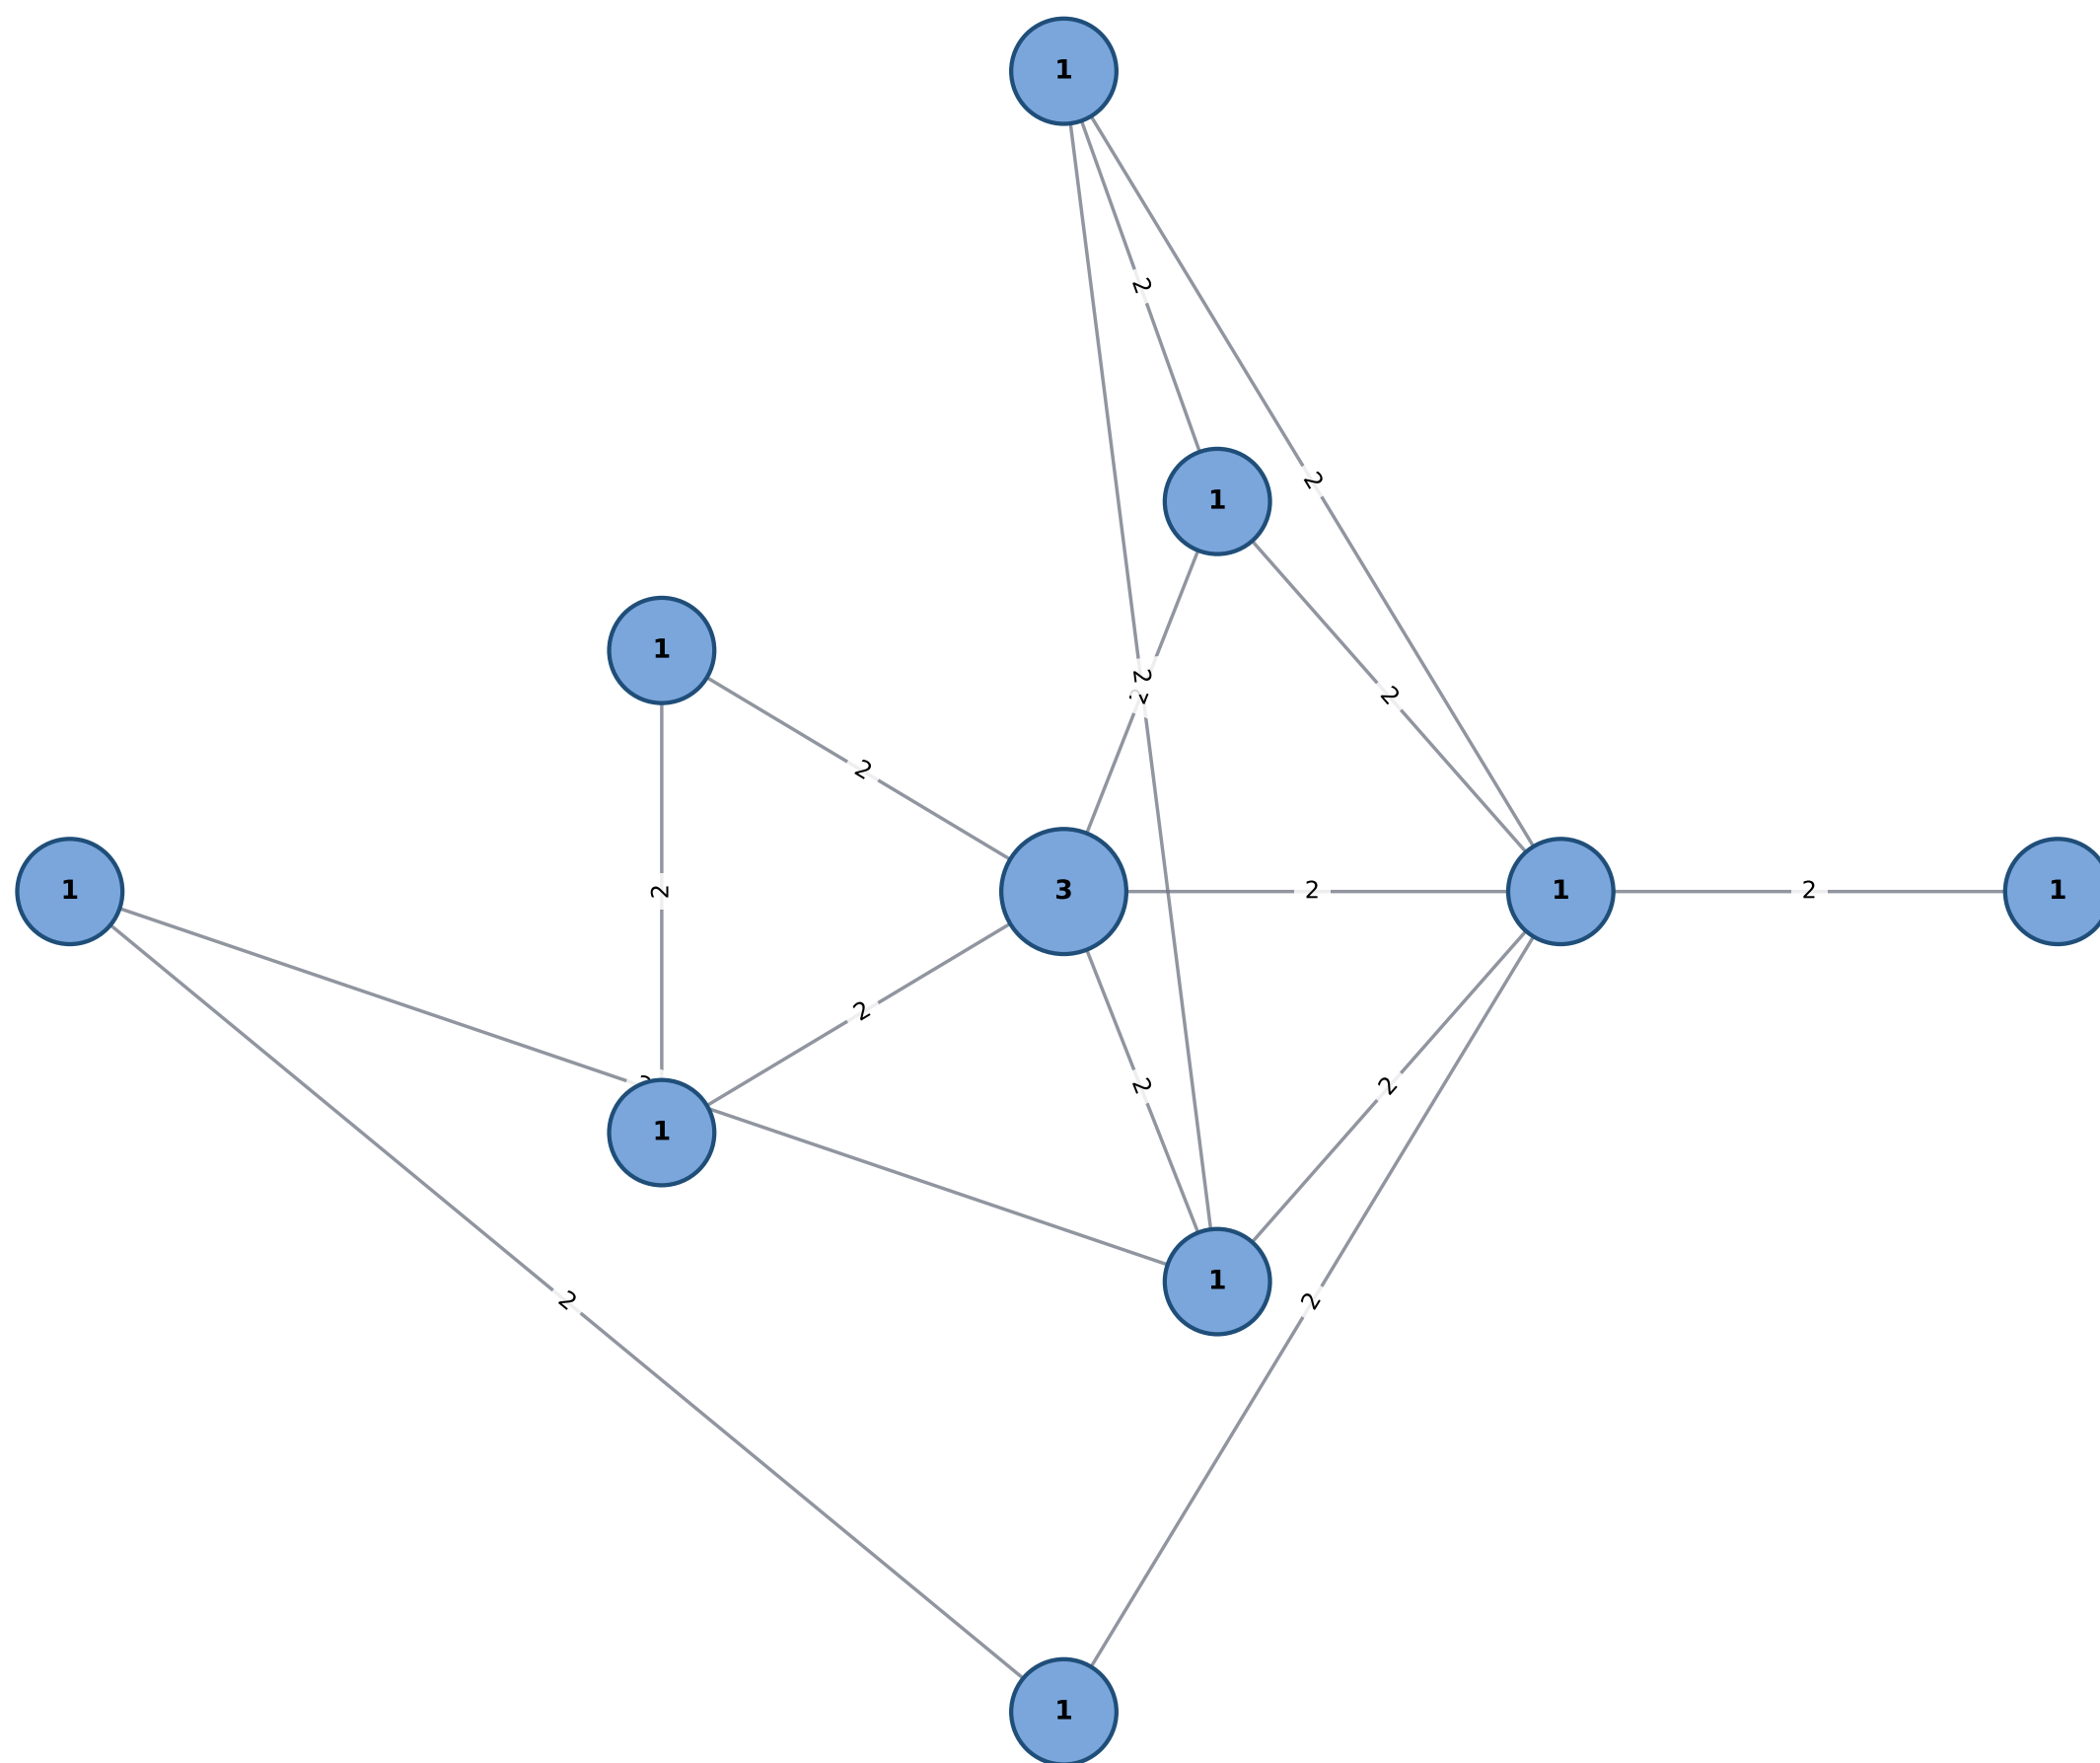

basal ganglia diseases: cluster map (automatic layout, closest connections only)

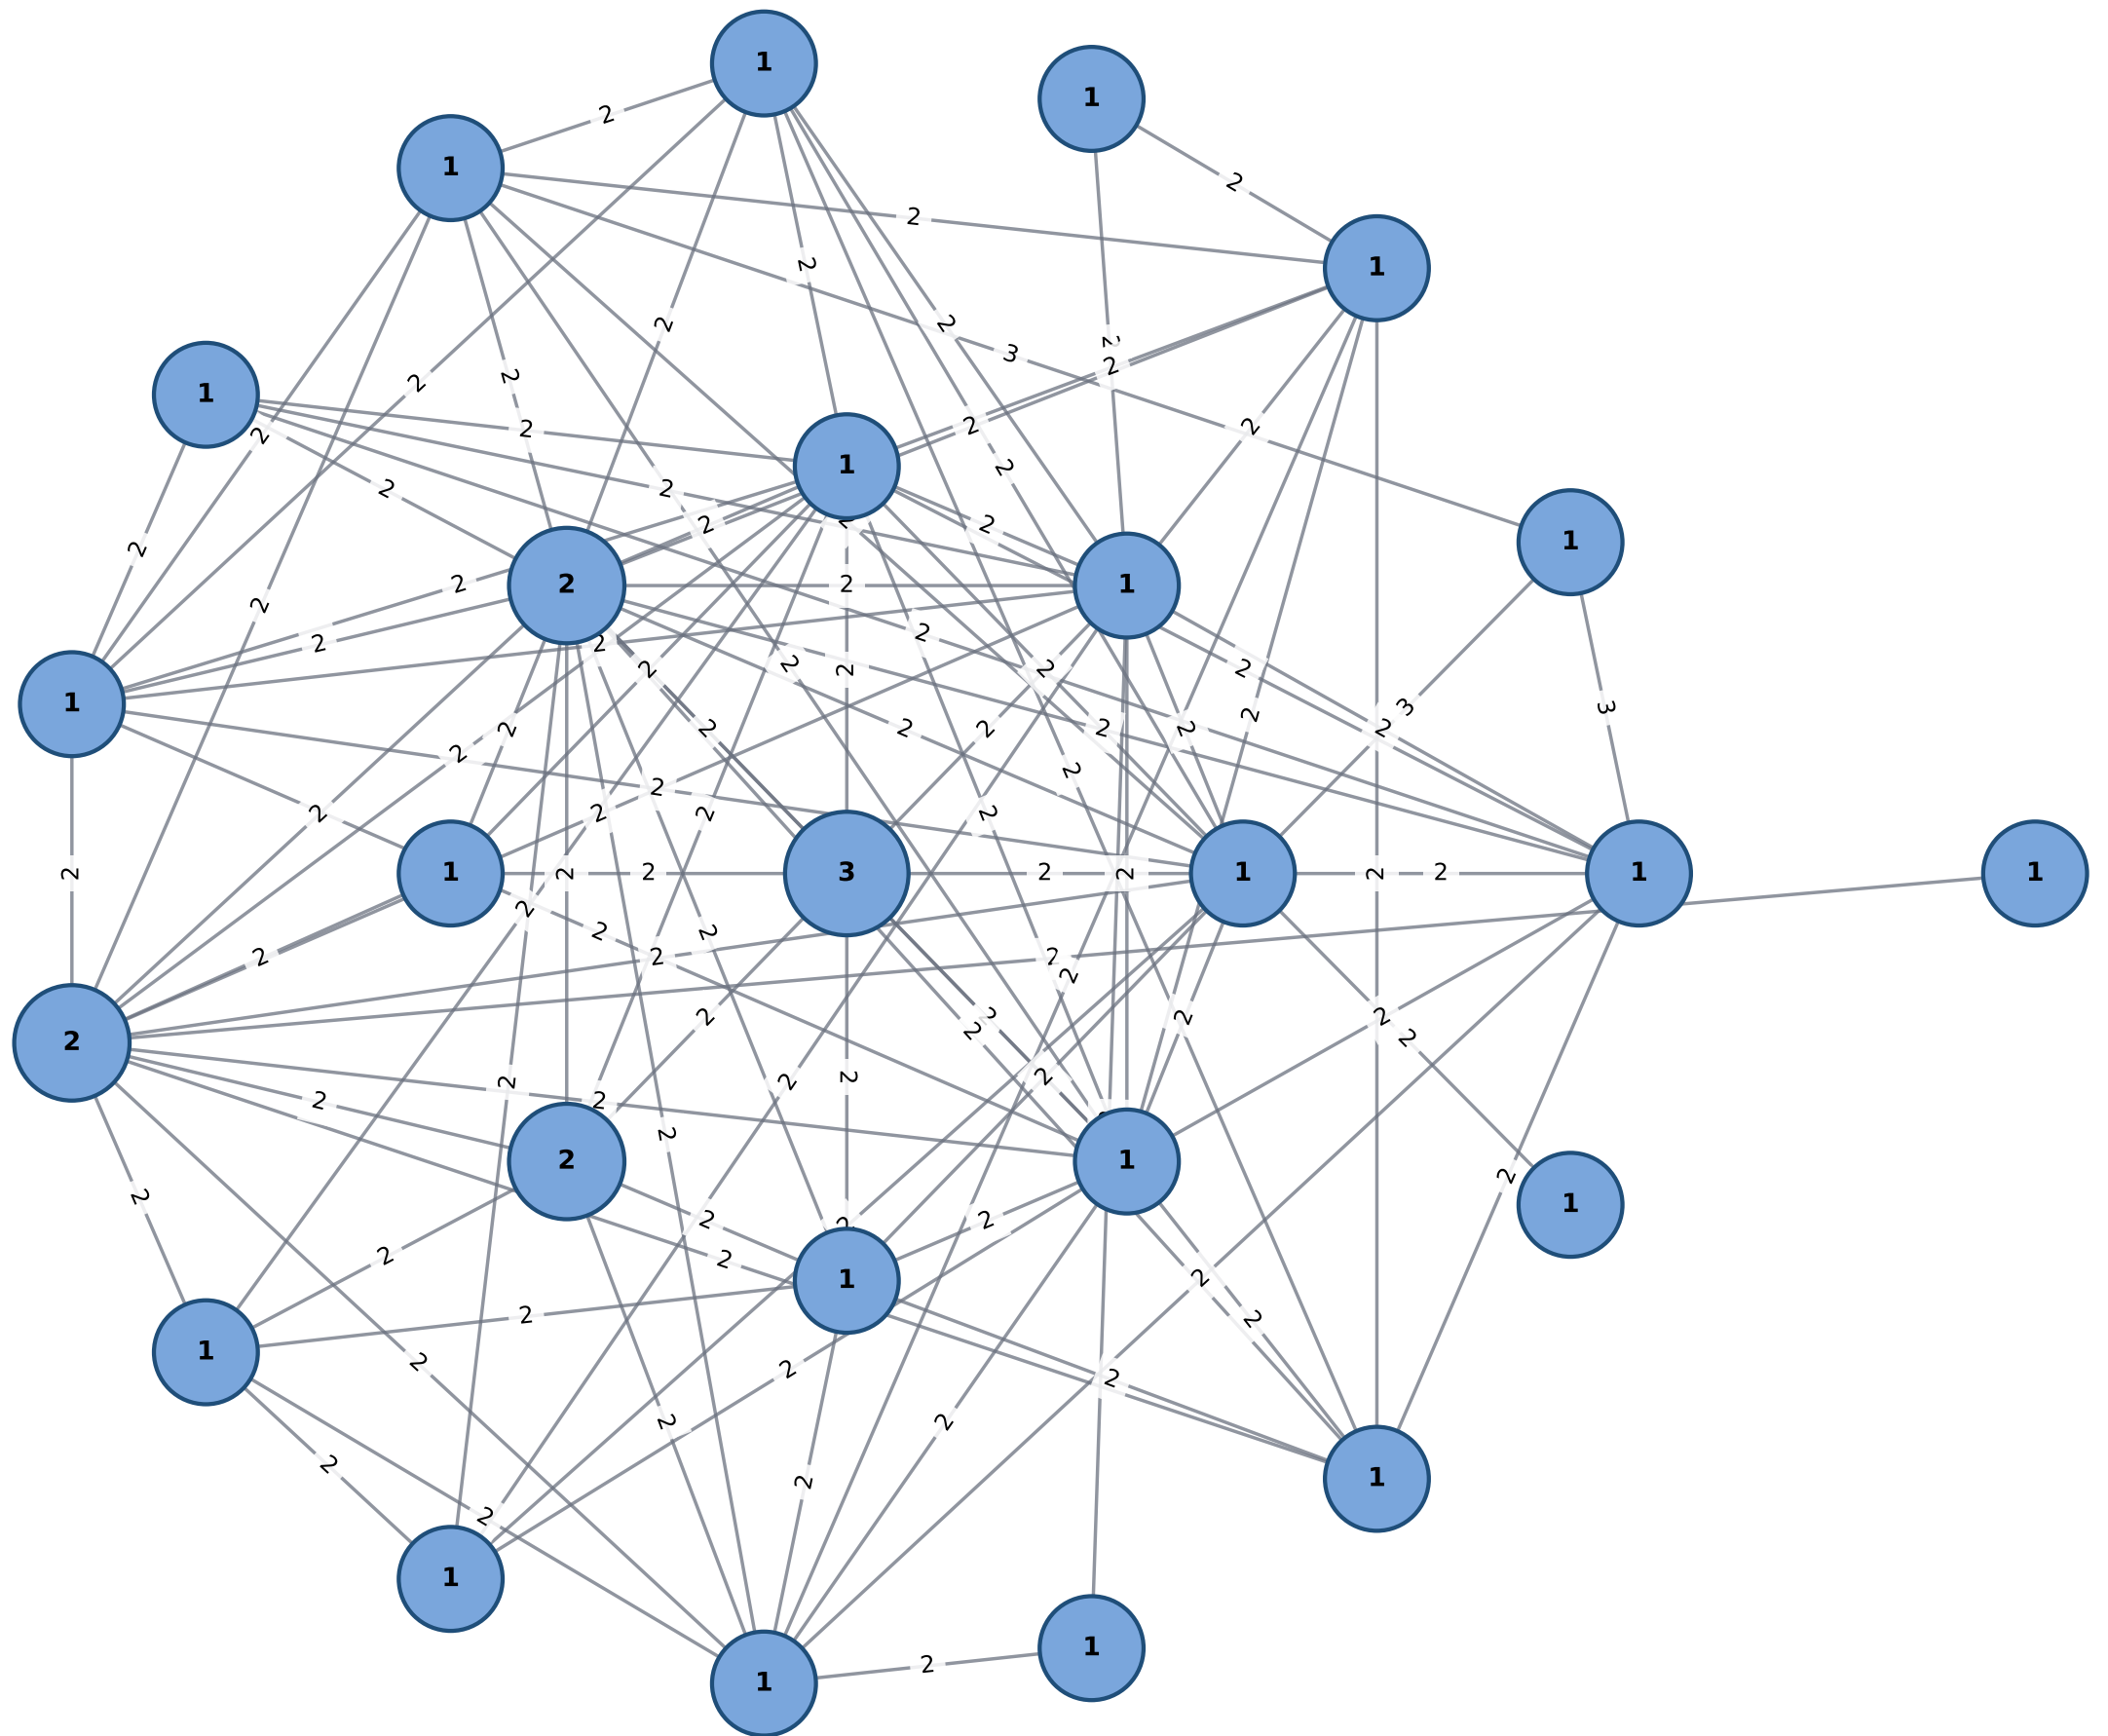

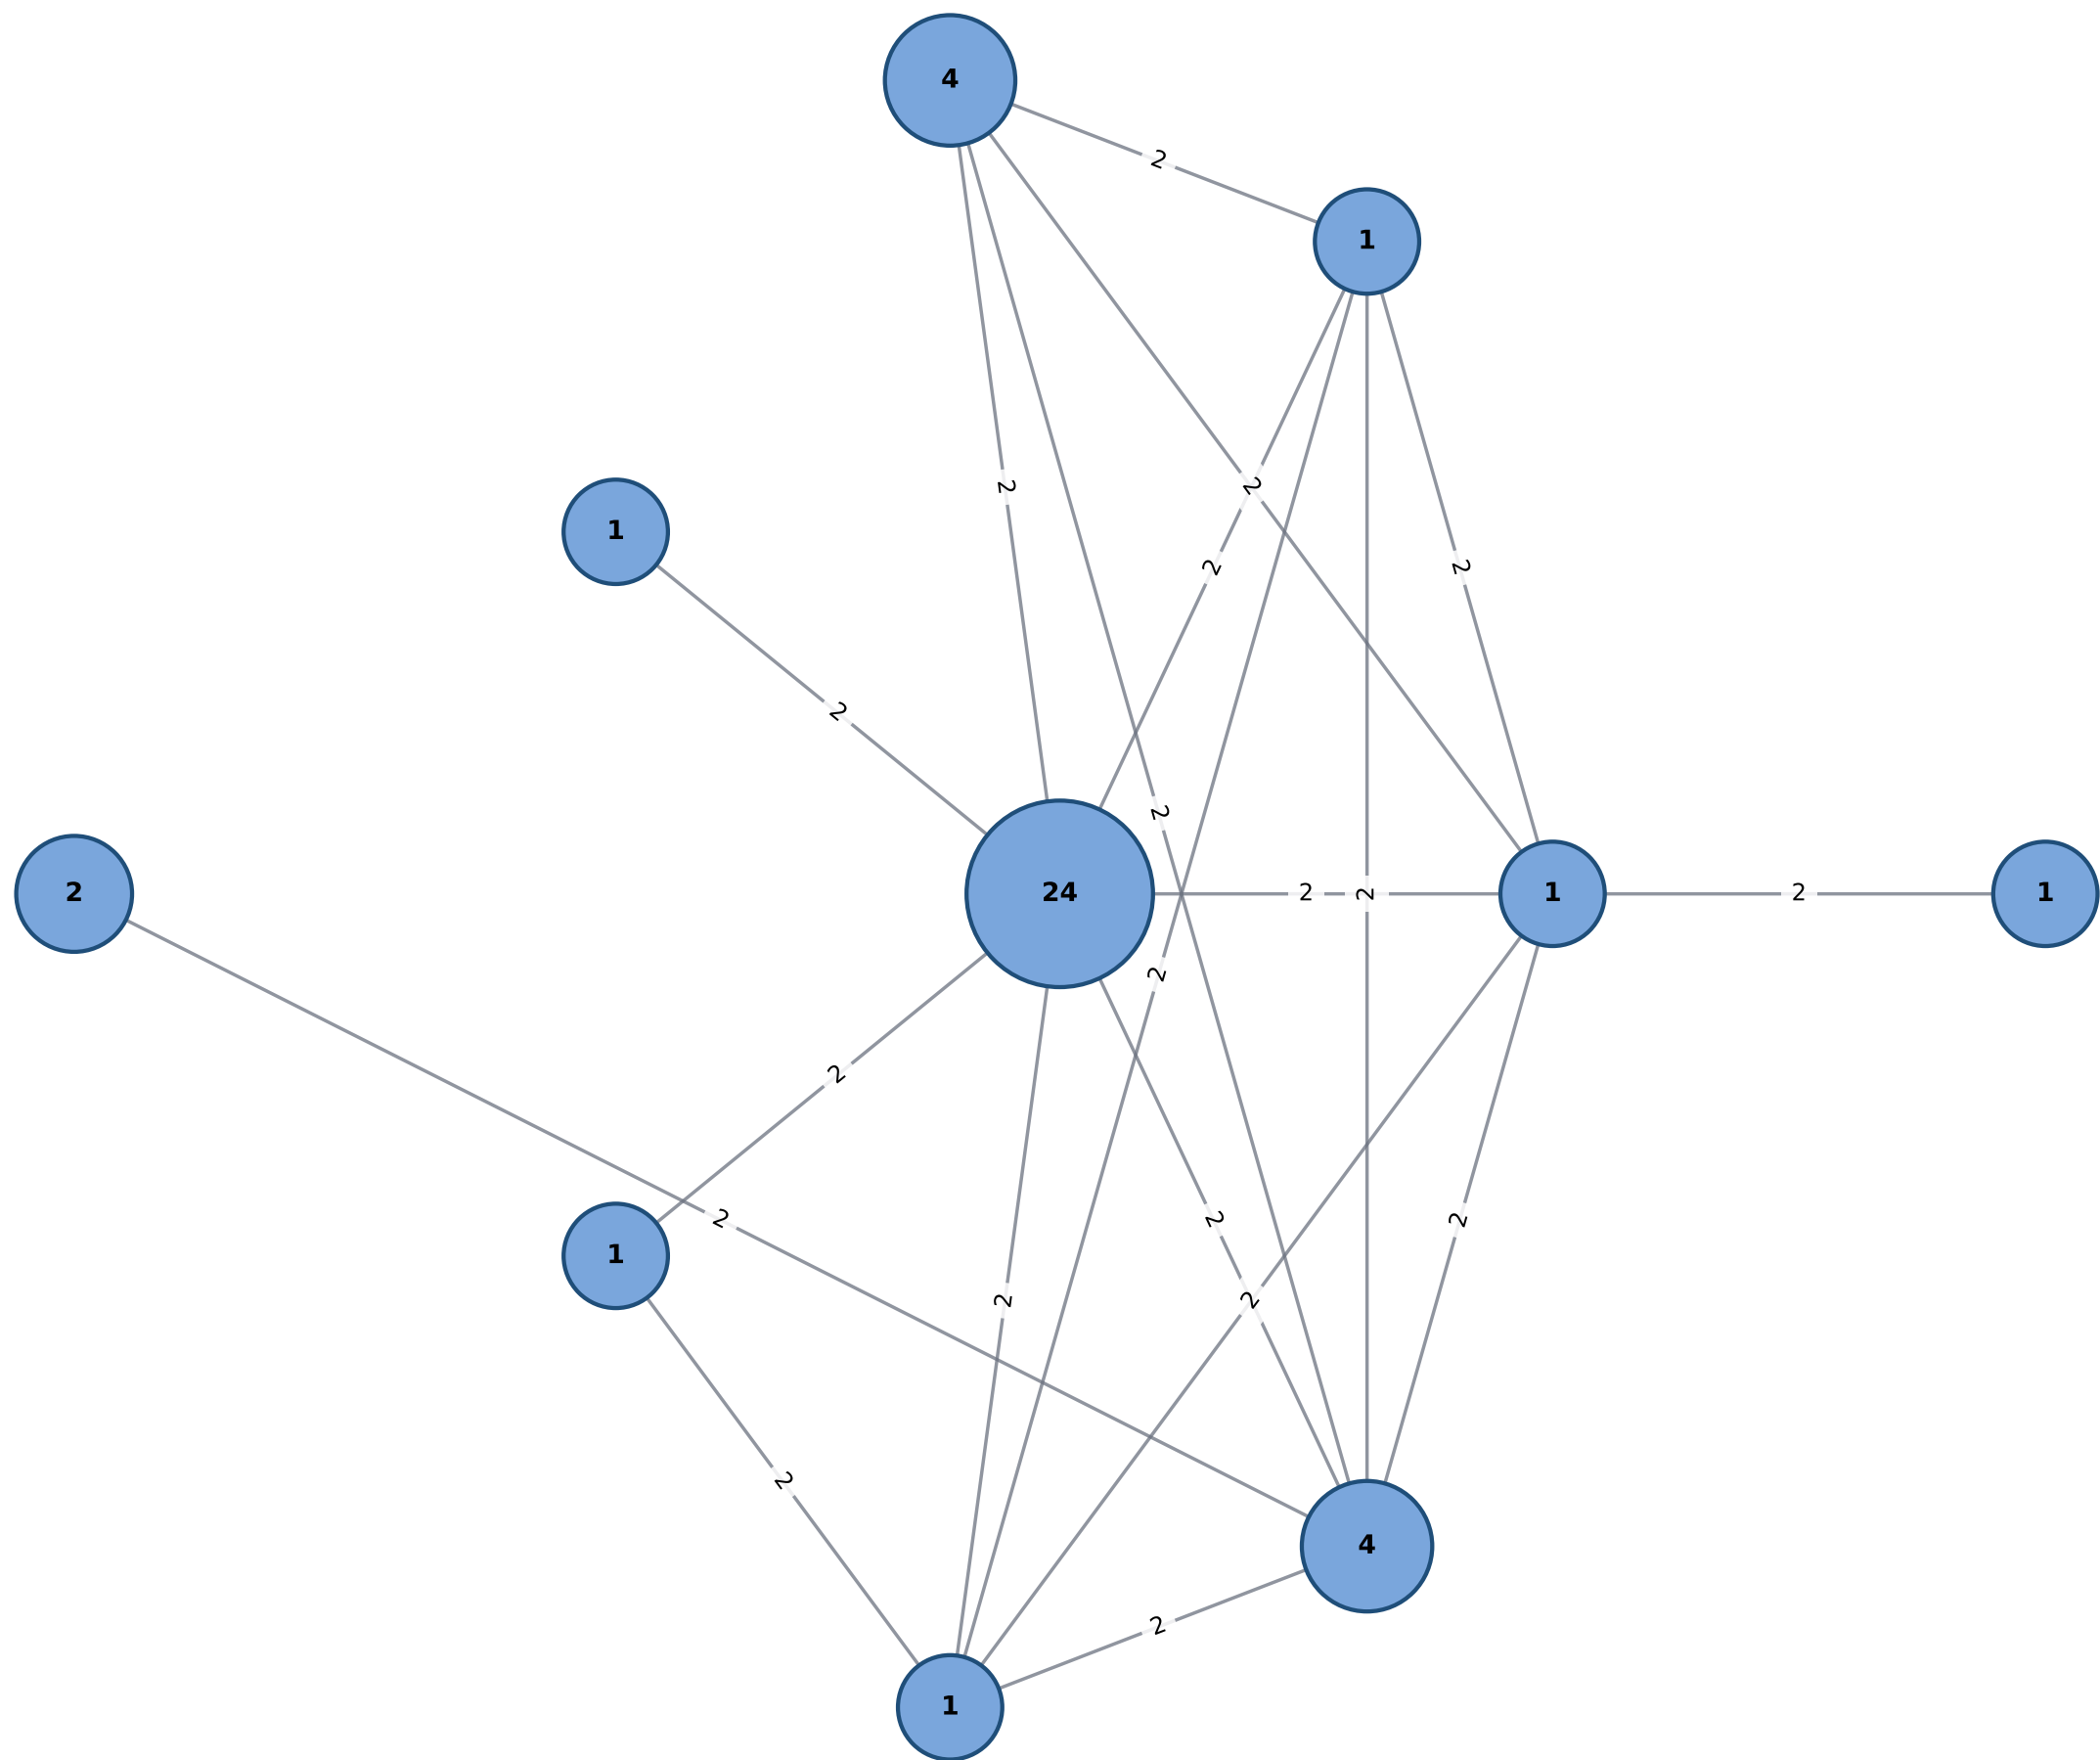

behcet syndrome: cluster map (automatic layout, closest connections only)

bile duct diseases: cluster map (automatic layout, closest connections only)

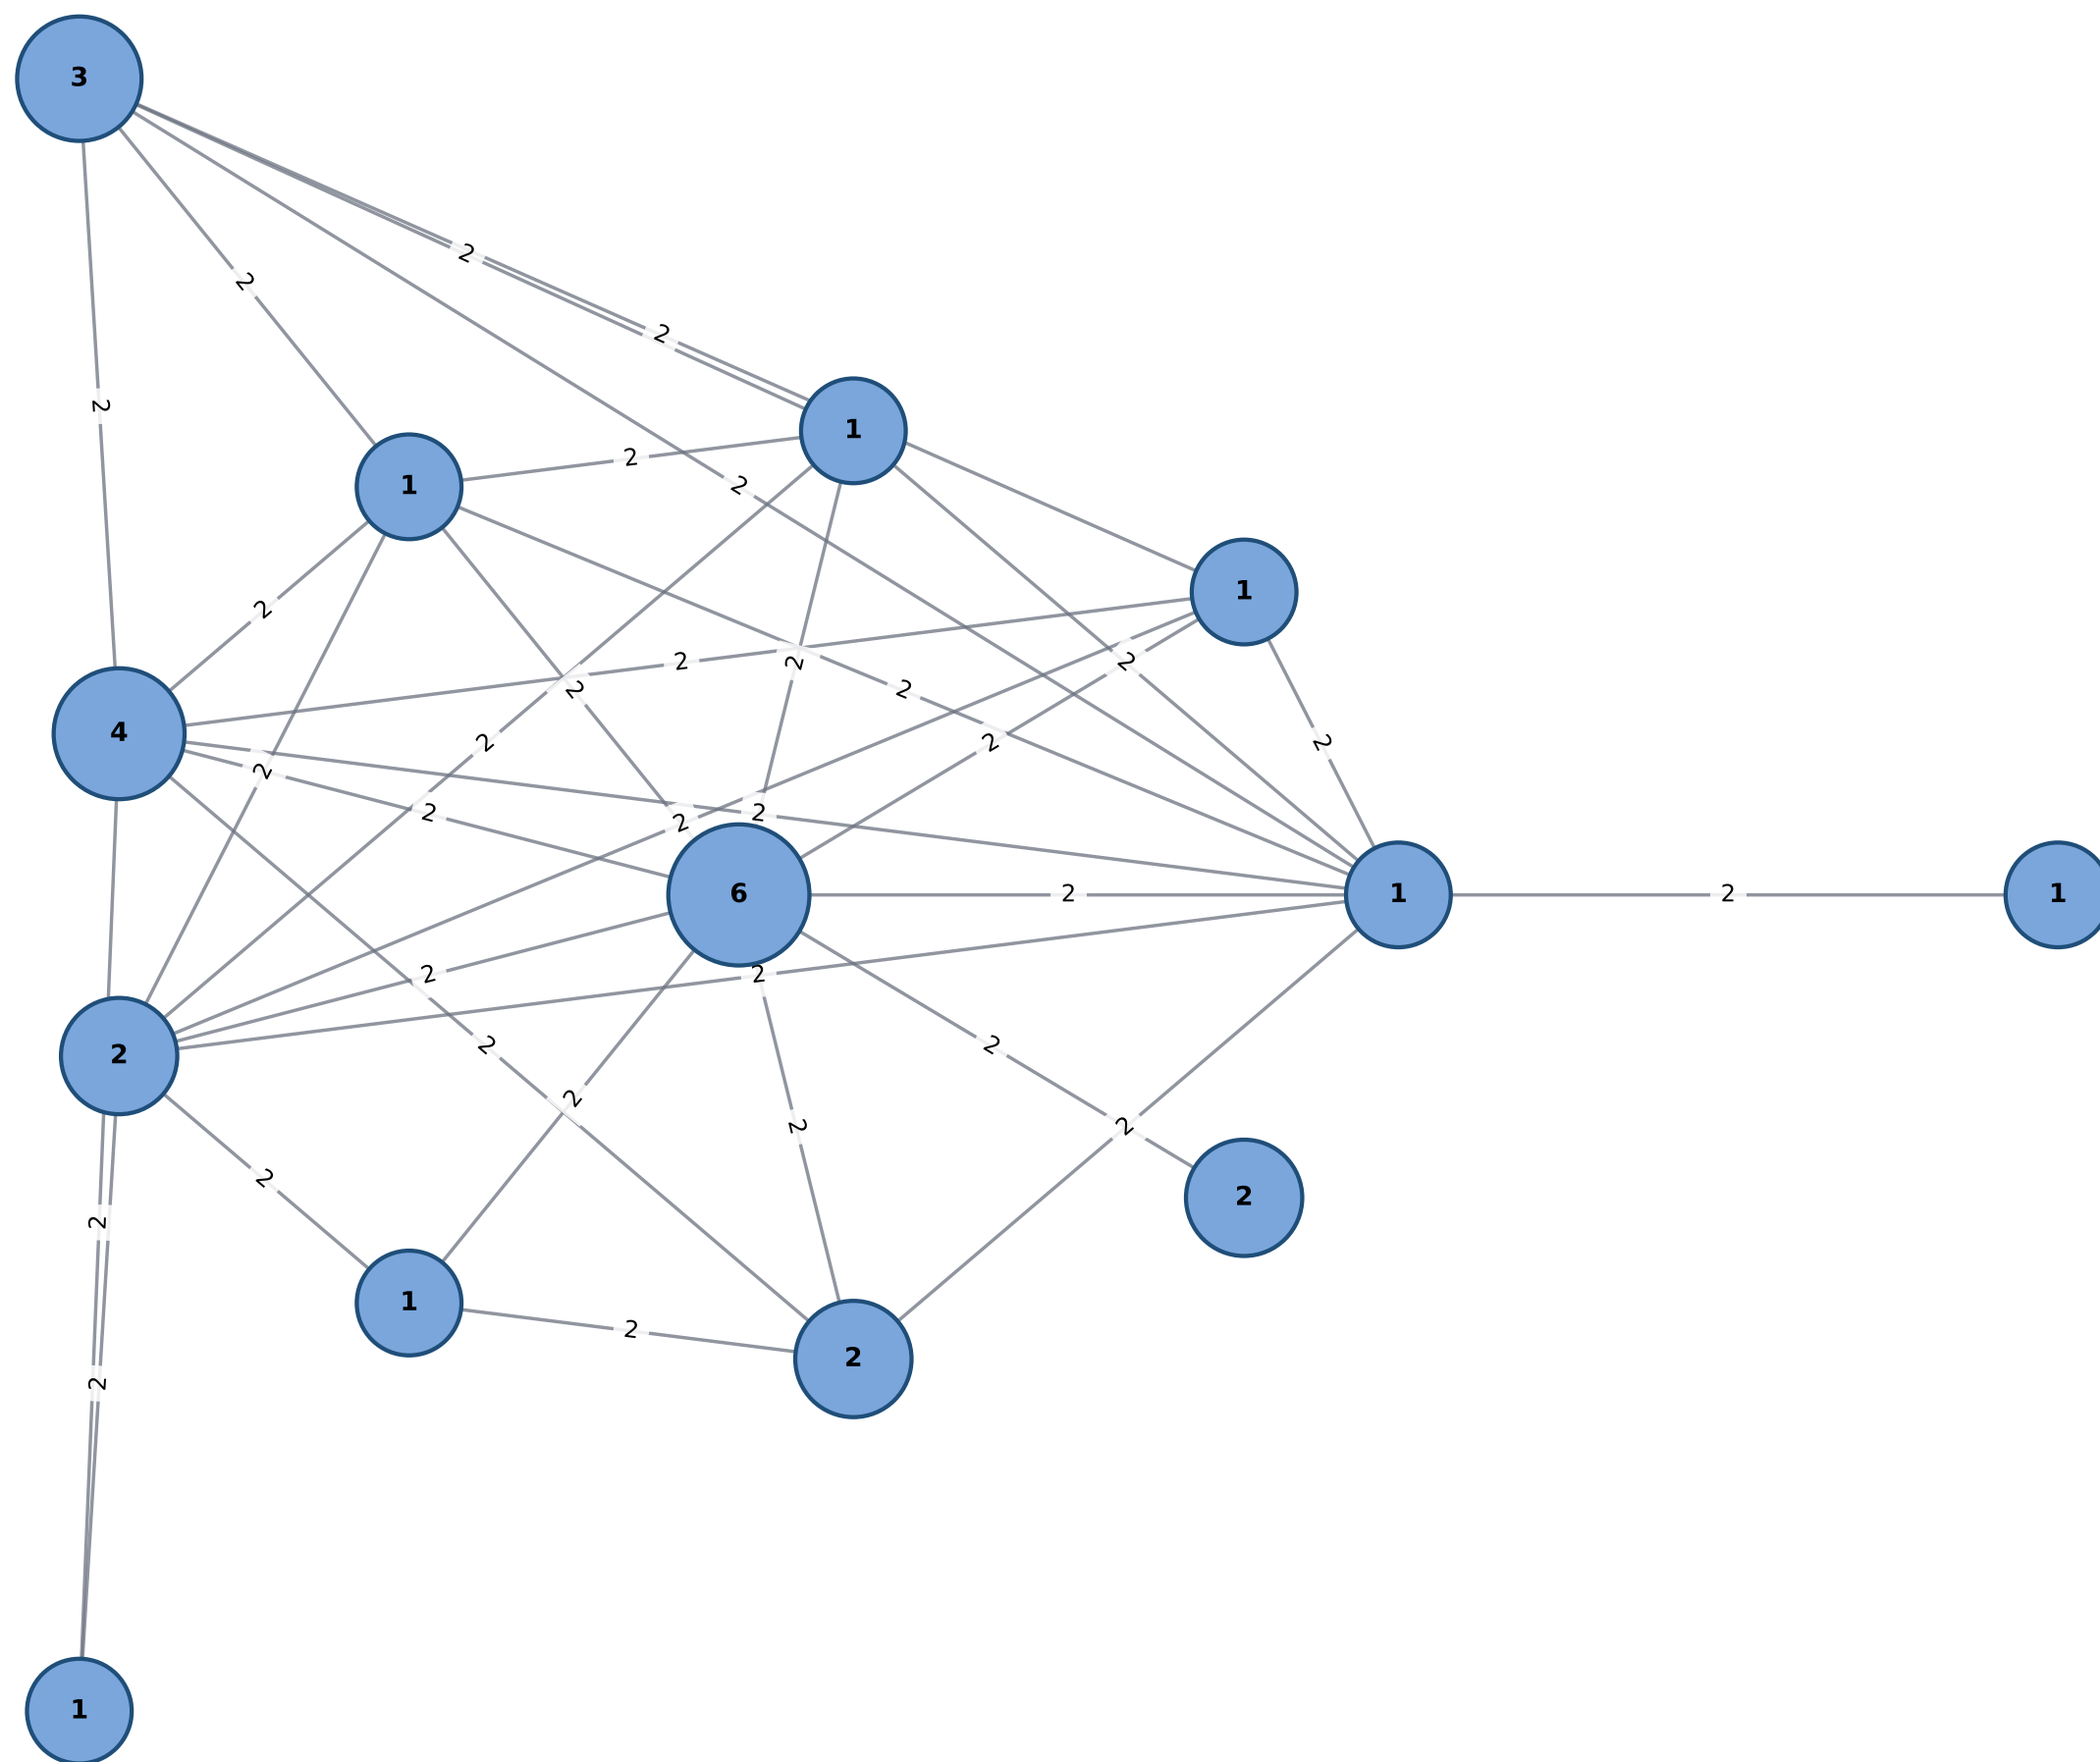

blood coagulation disorders: cluster map (automatic layout, closest connections only)

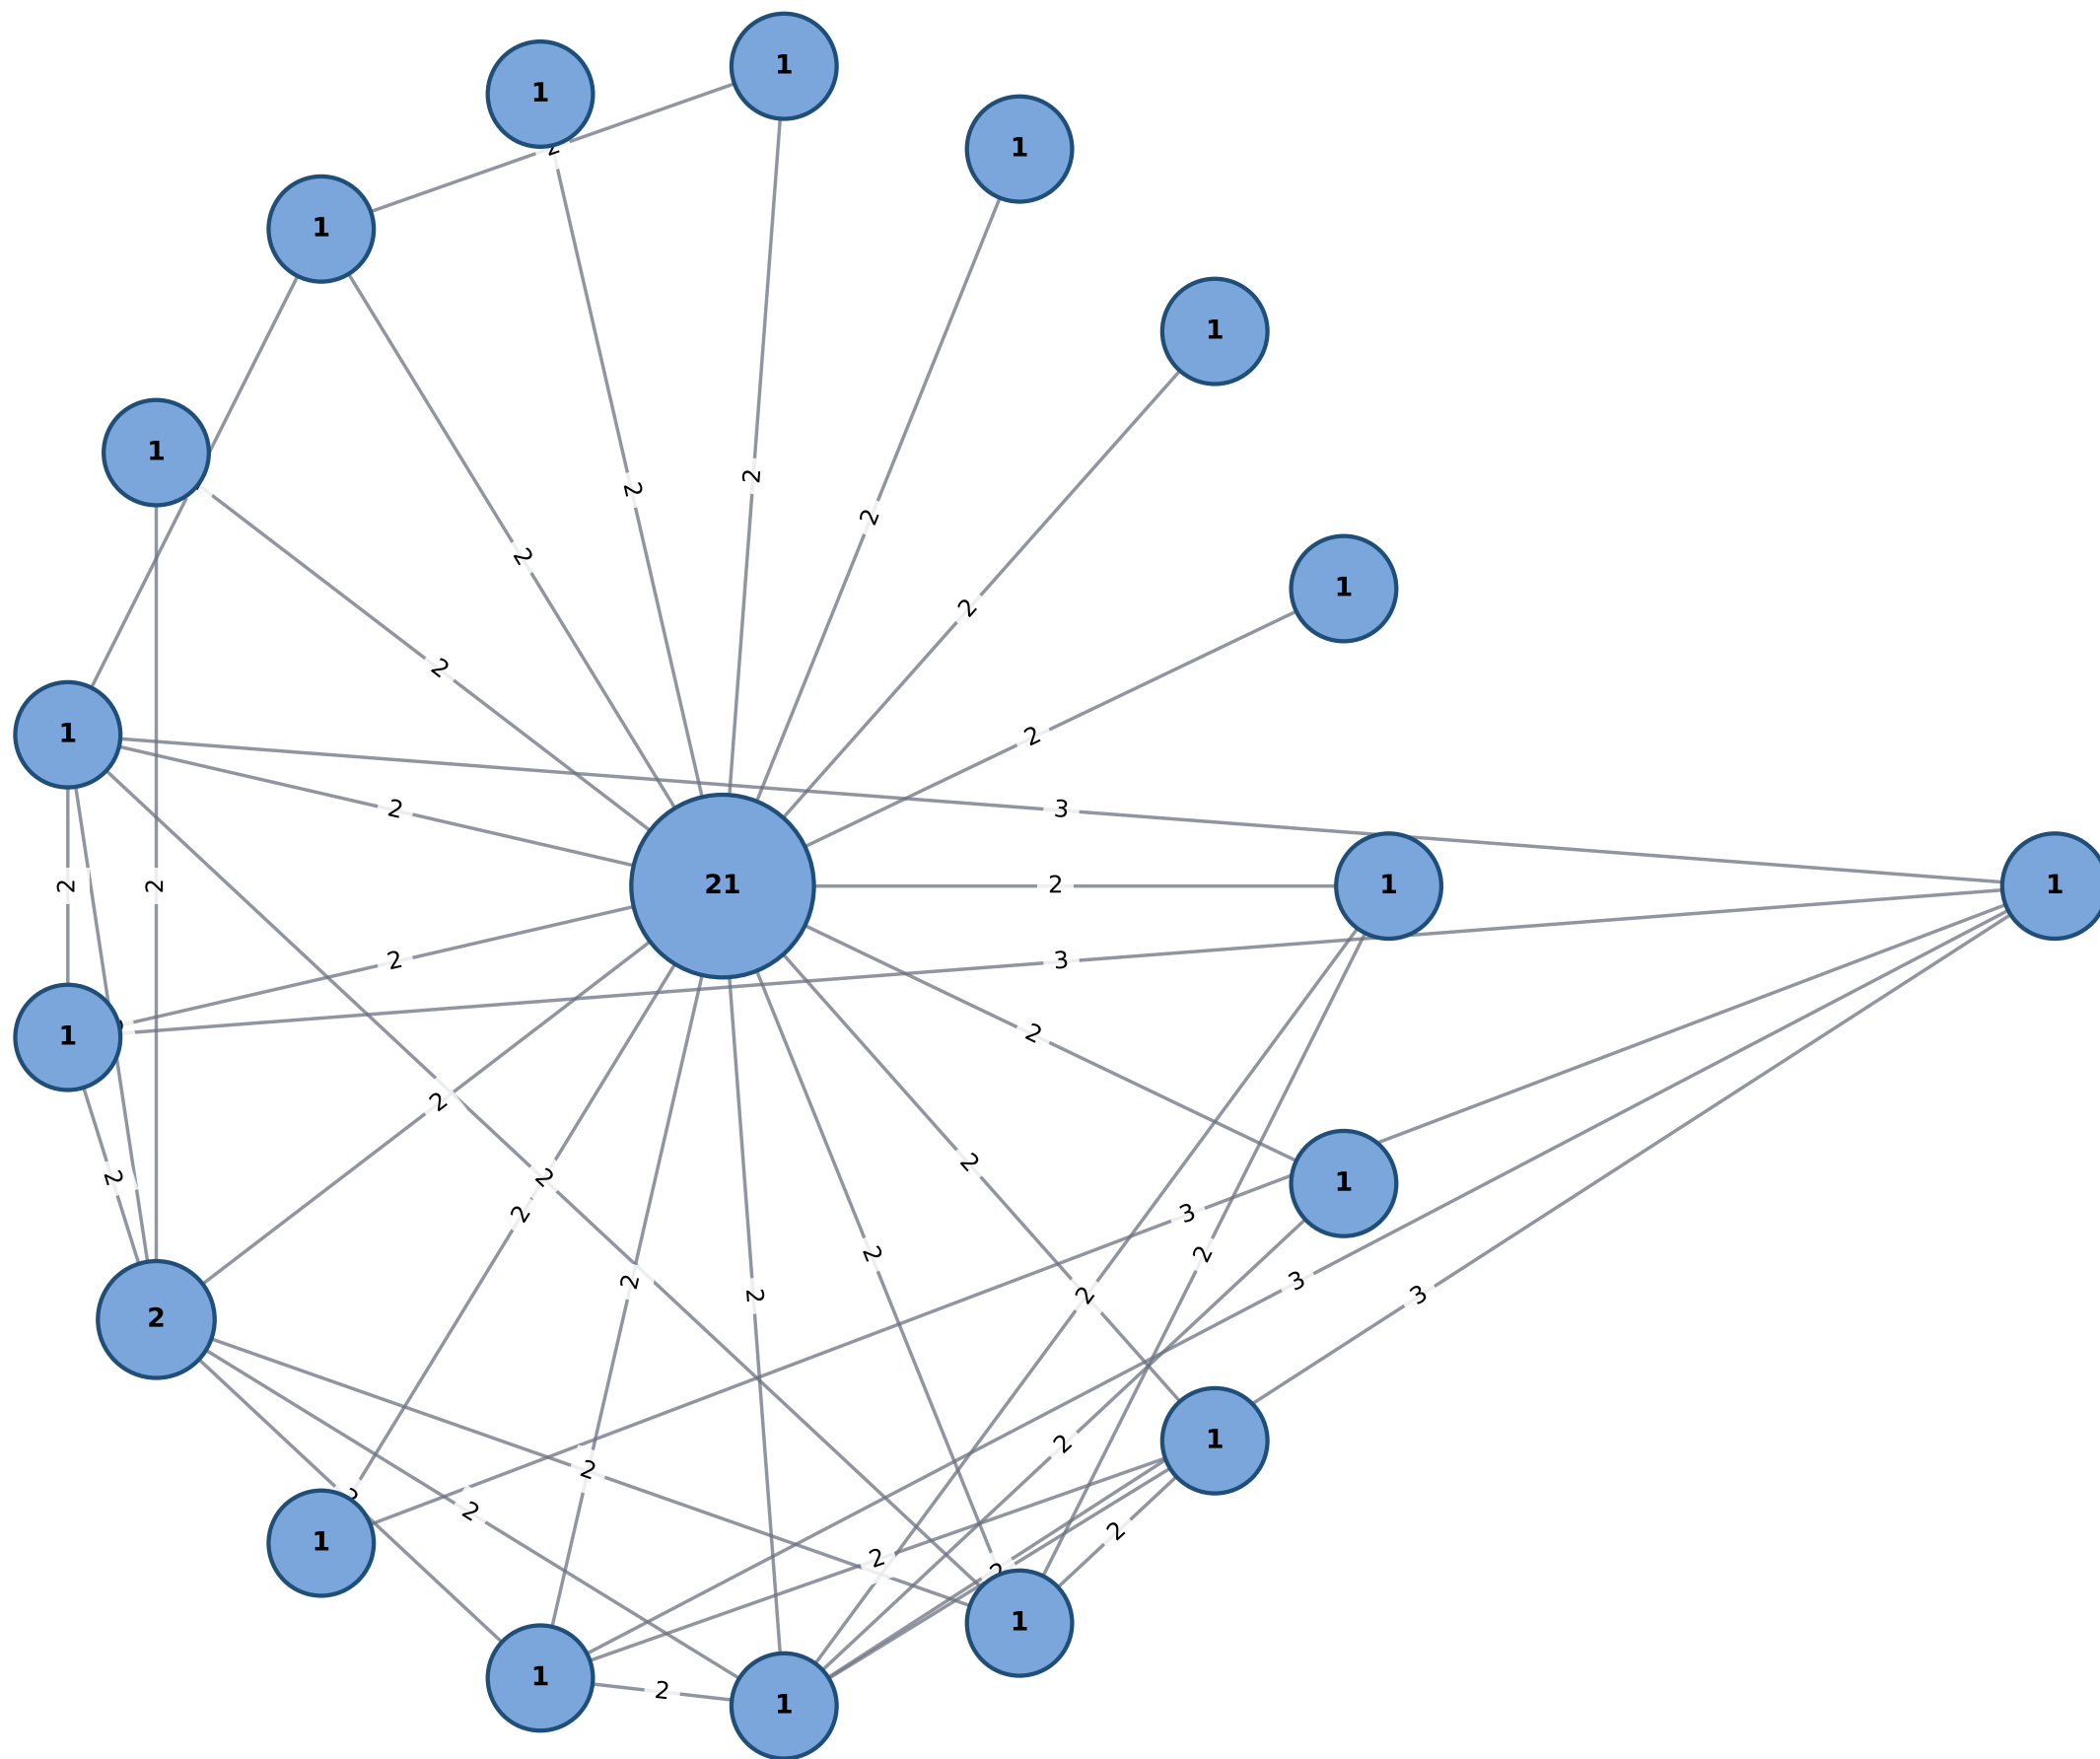

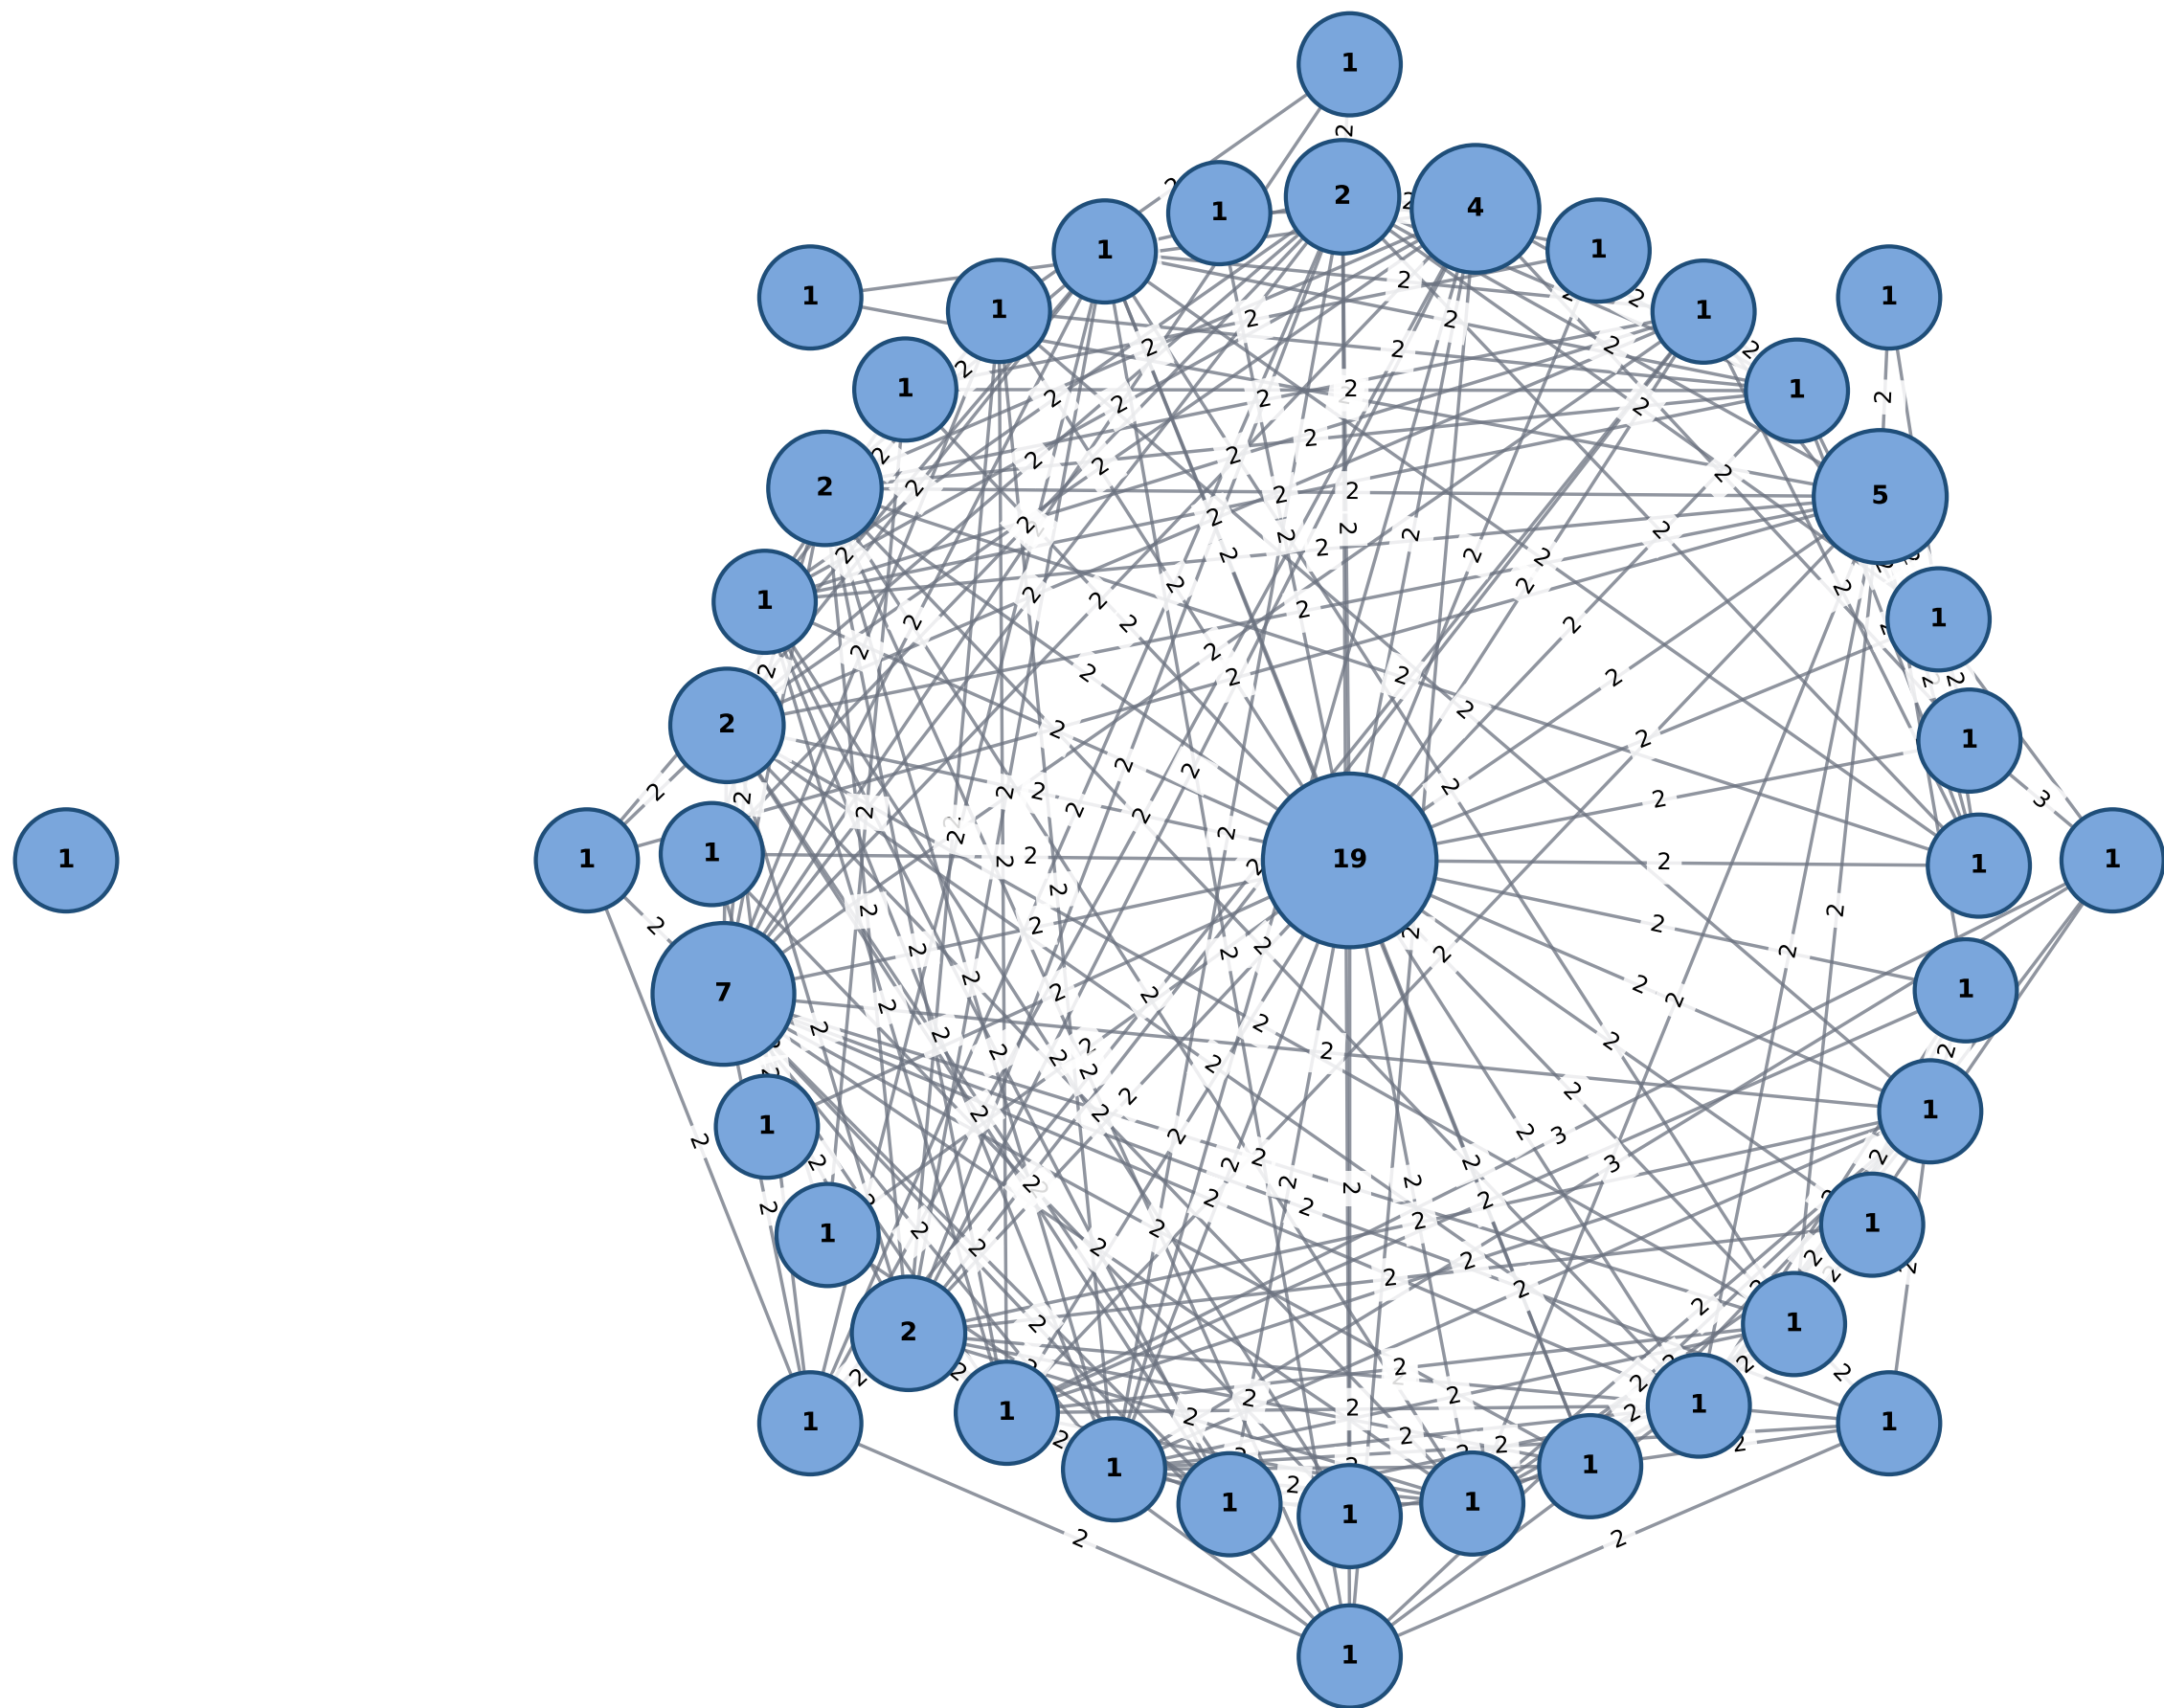

blood platelet disorders: cluster map (automatic layout, closest connections only)

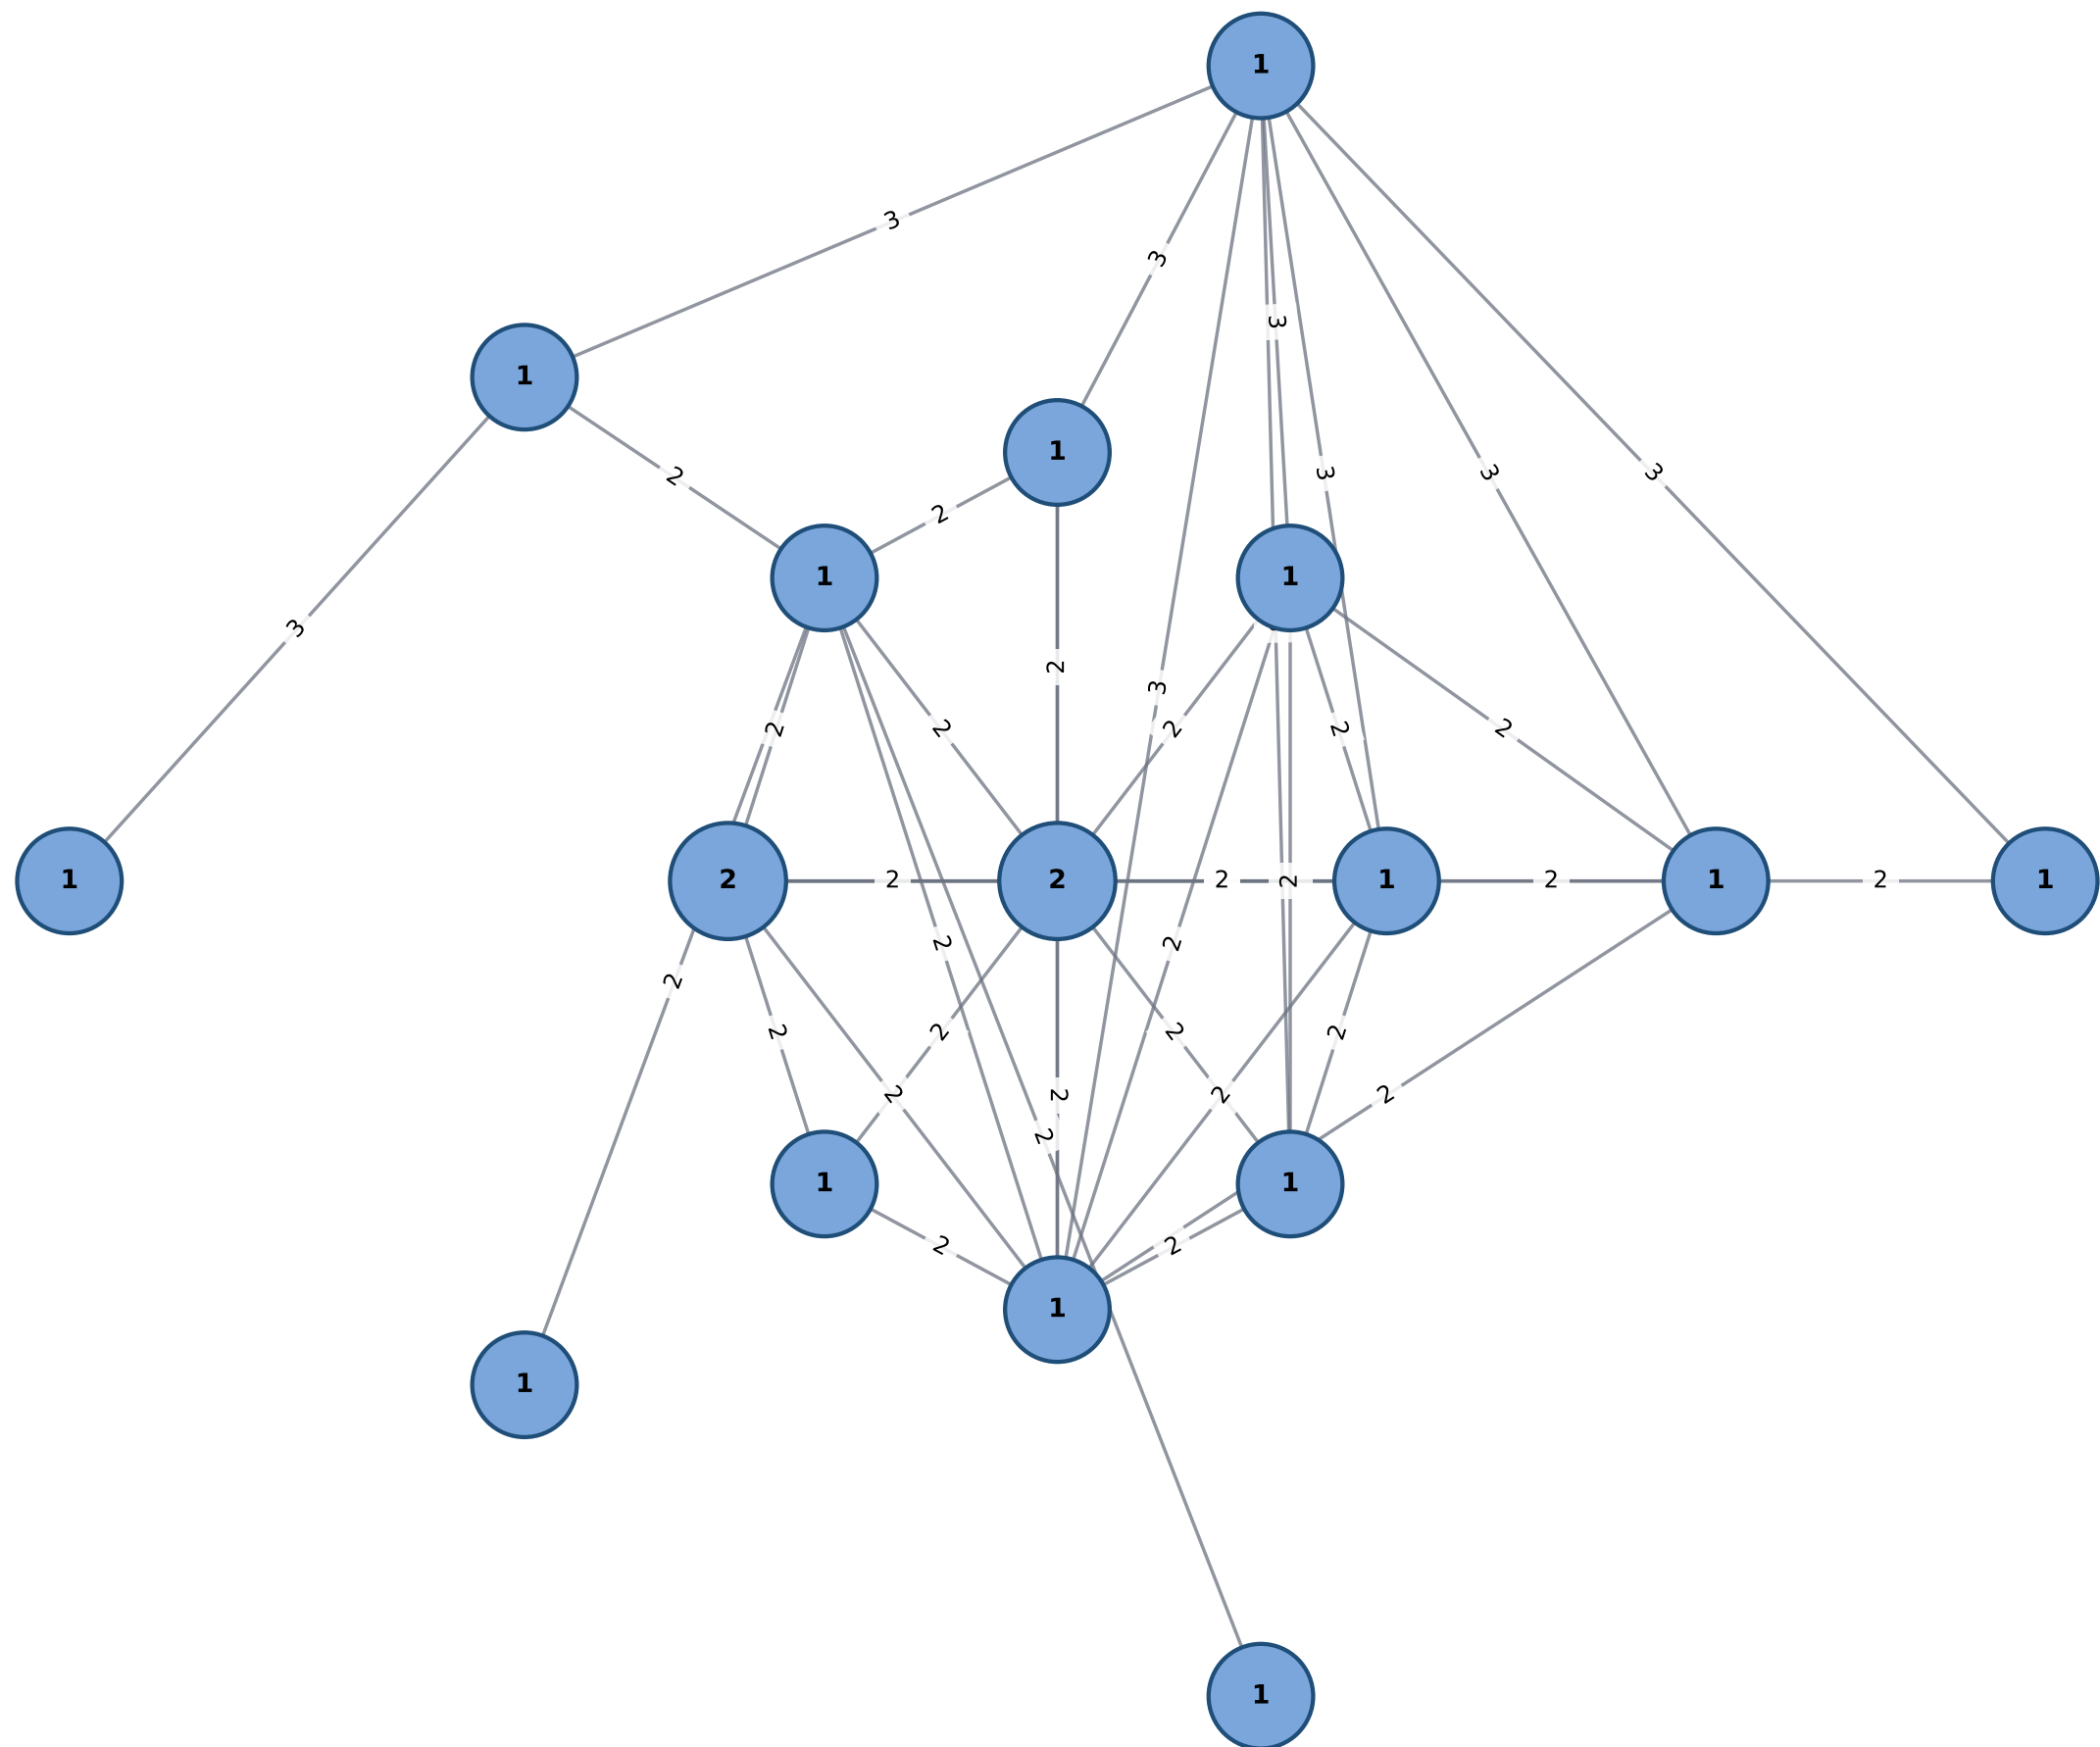

breast neoplasms: cluster map (automatic layout, closest connections only)

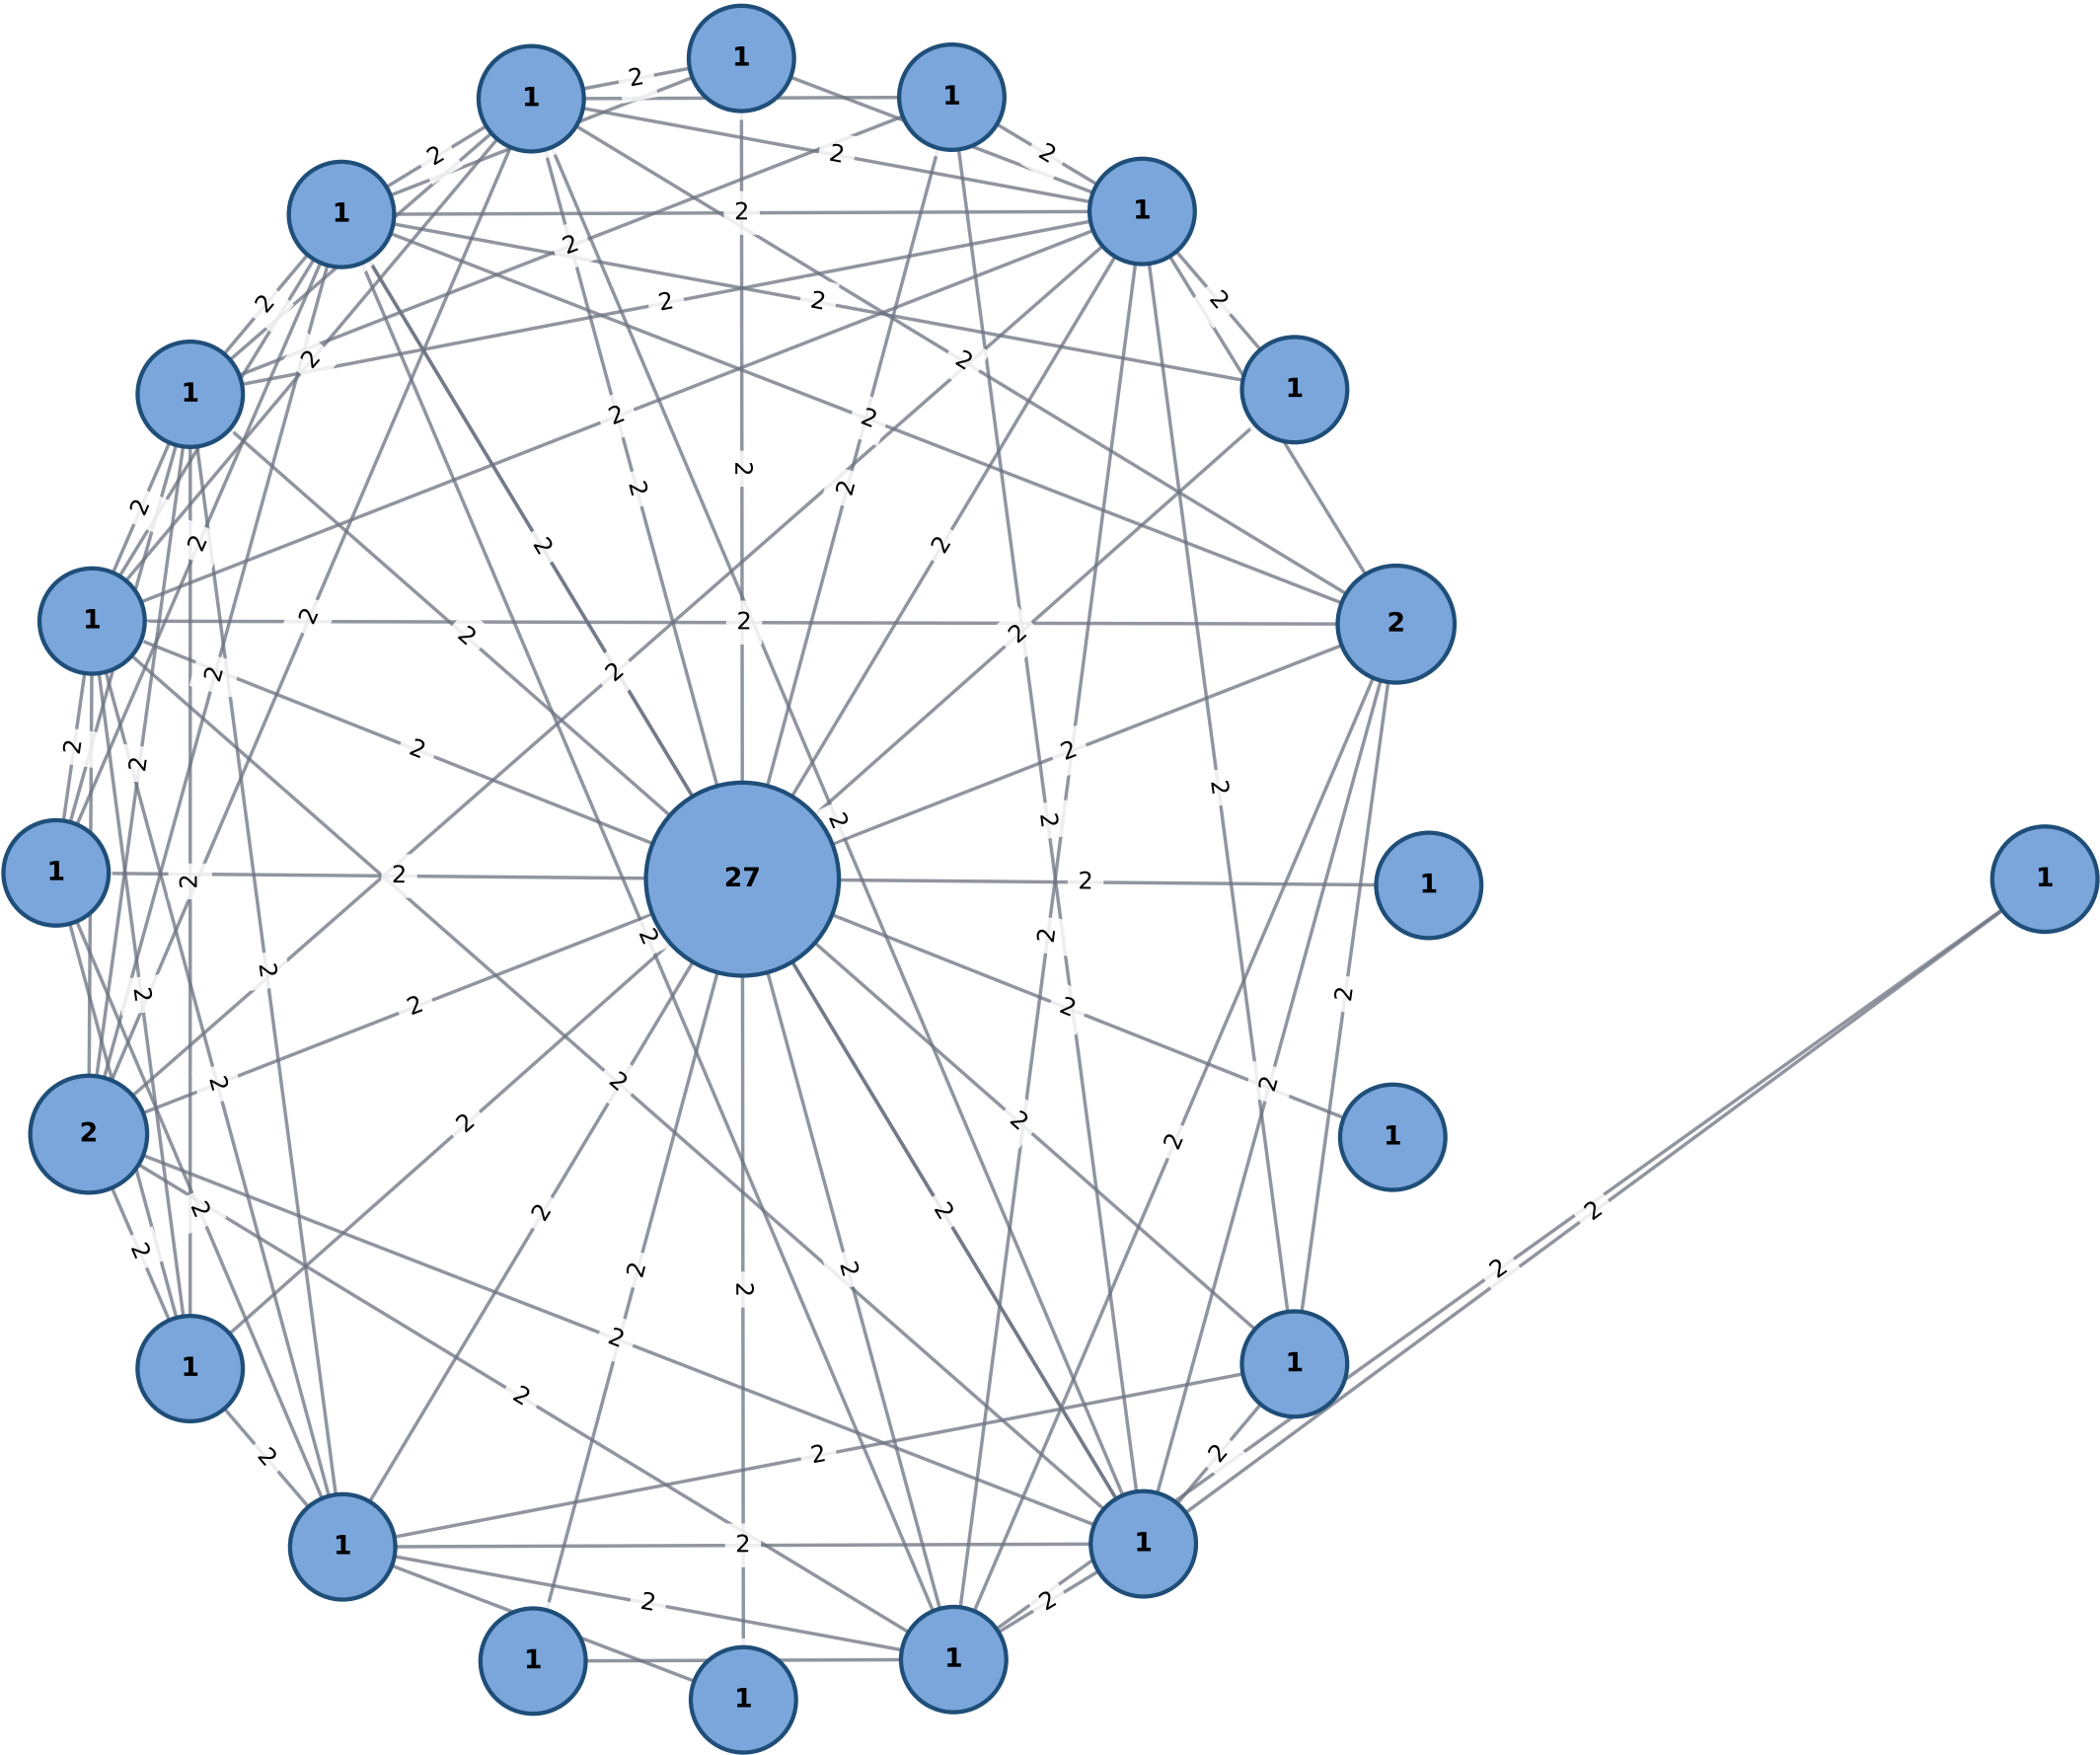

carbohydrate metabolism inborn errors: cluster map (automatic layout, closest connections only)

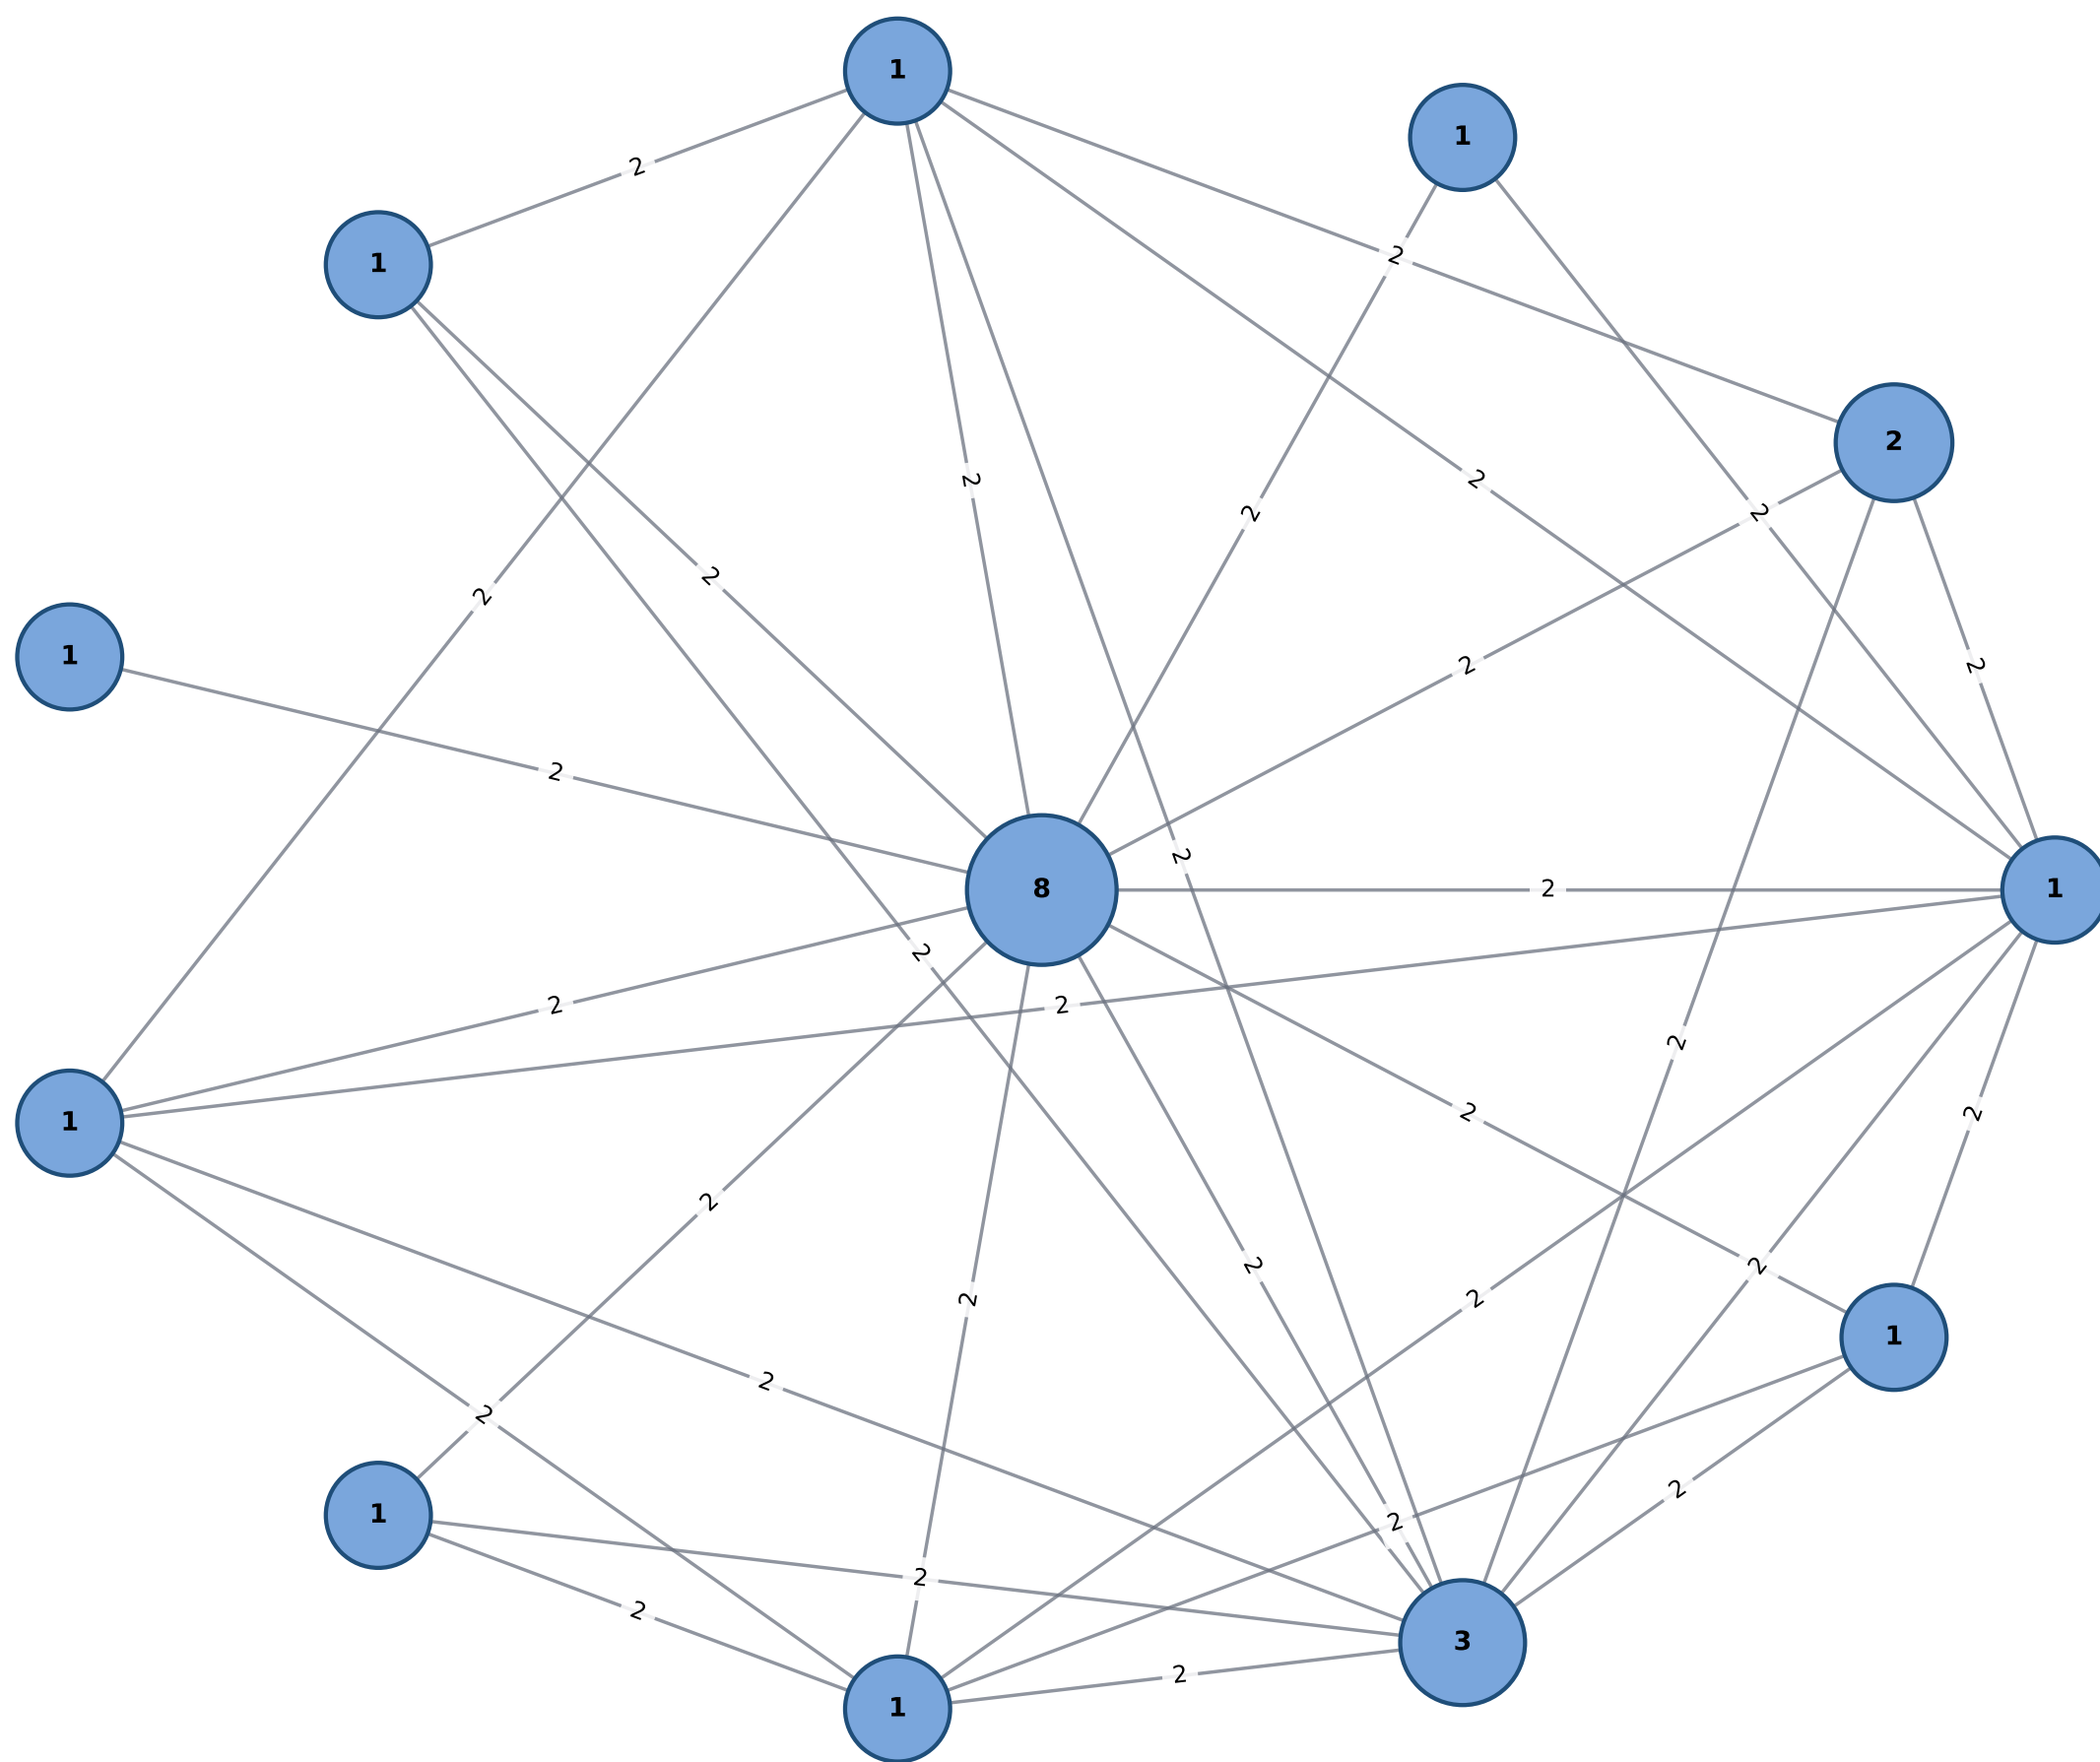

carcinoma renal cell: cluster map (automatic layout, closest connections only)

cardiomyopathies: cluster map (automatic layout, closest connections only)

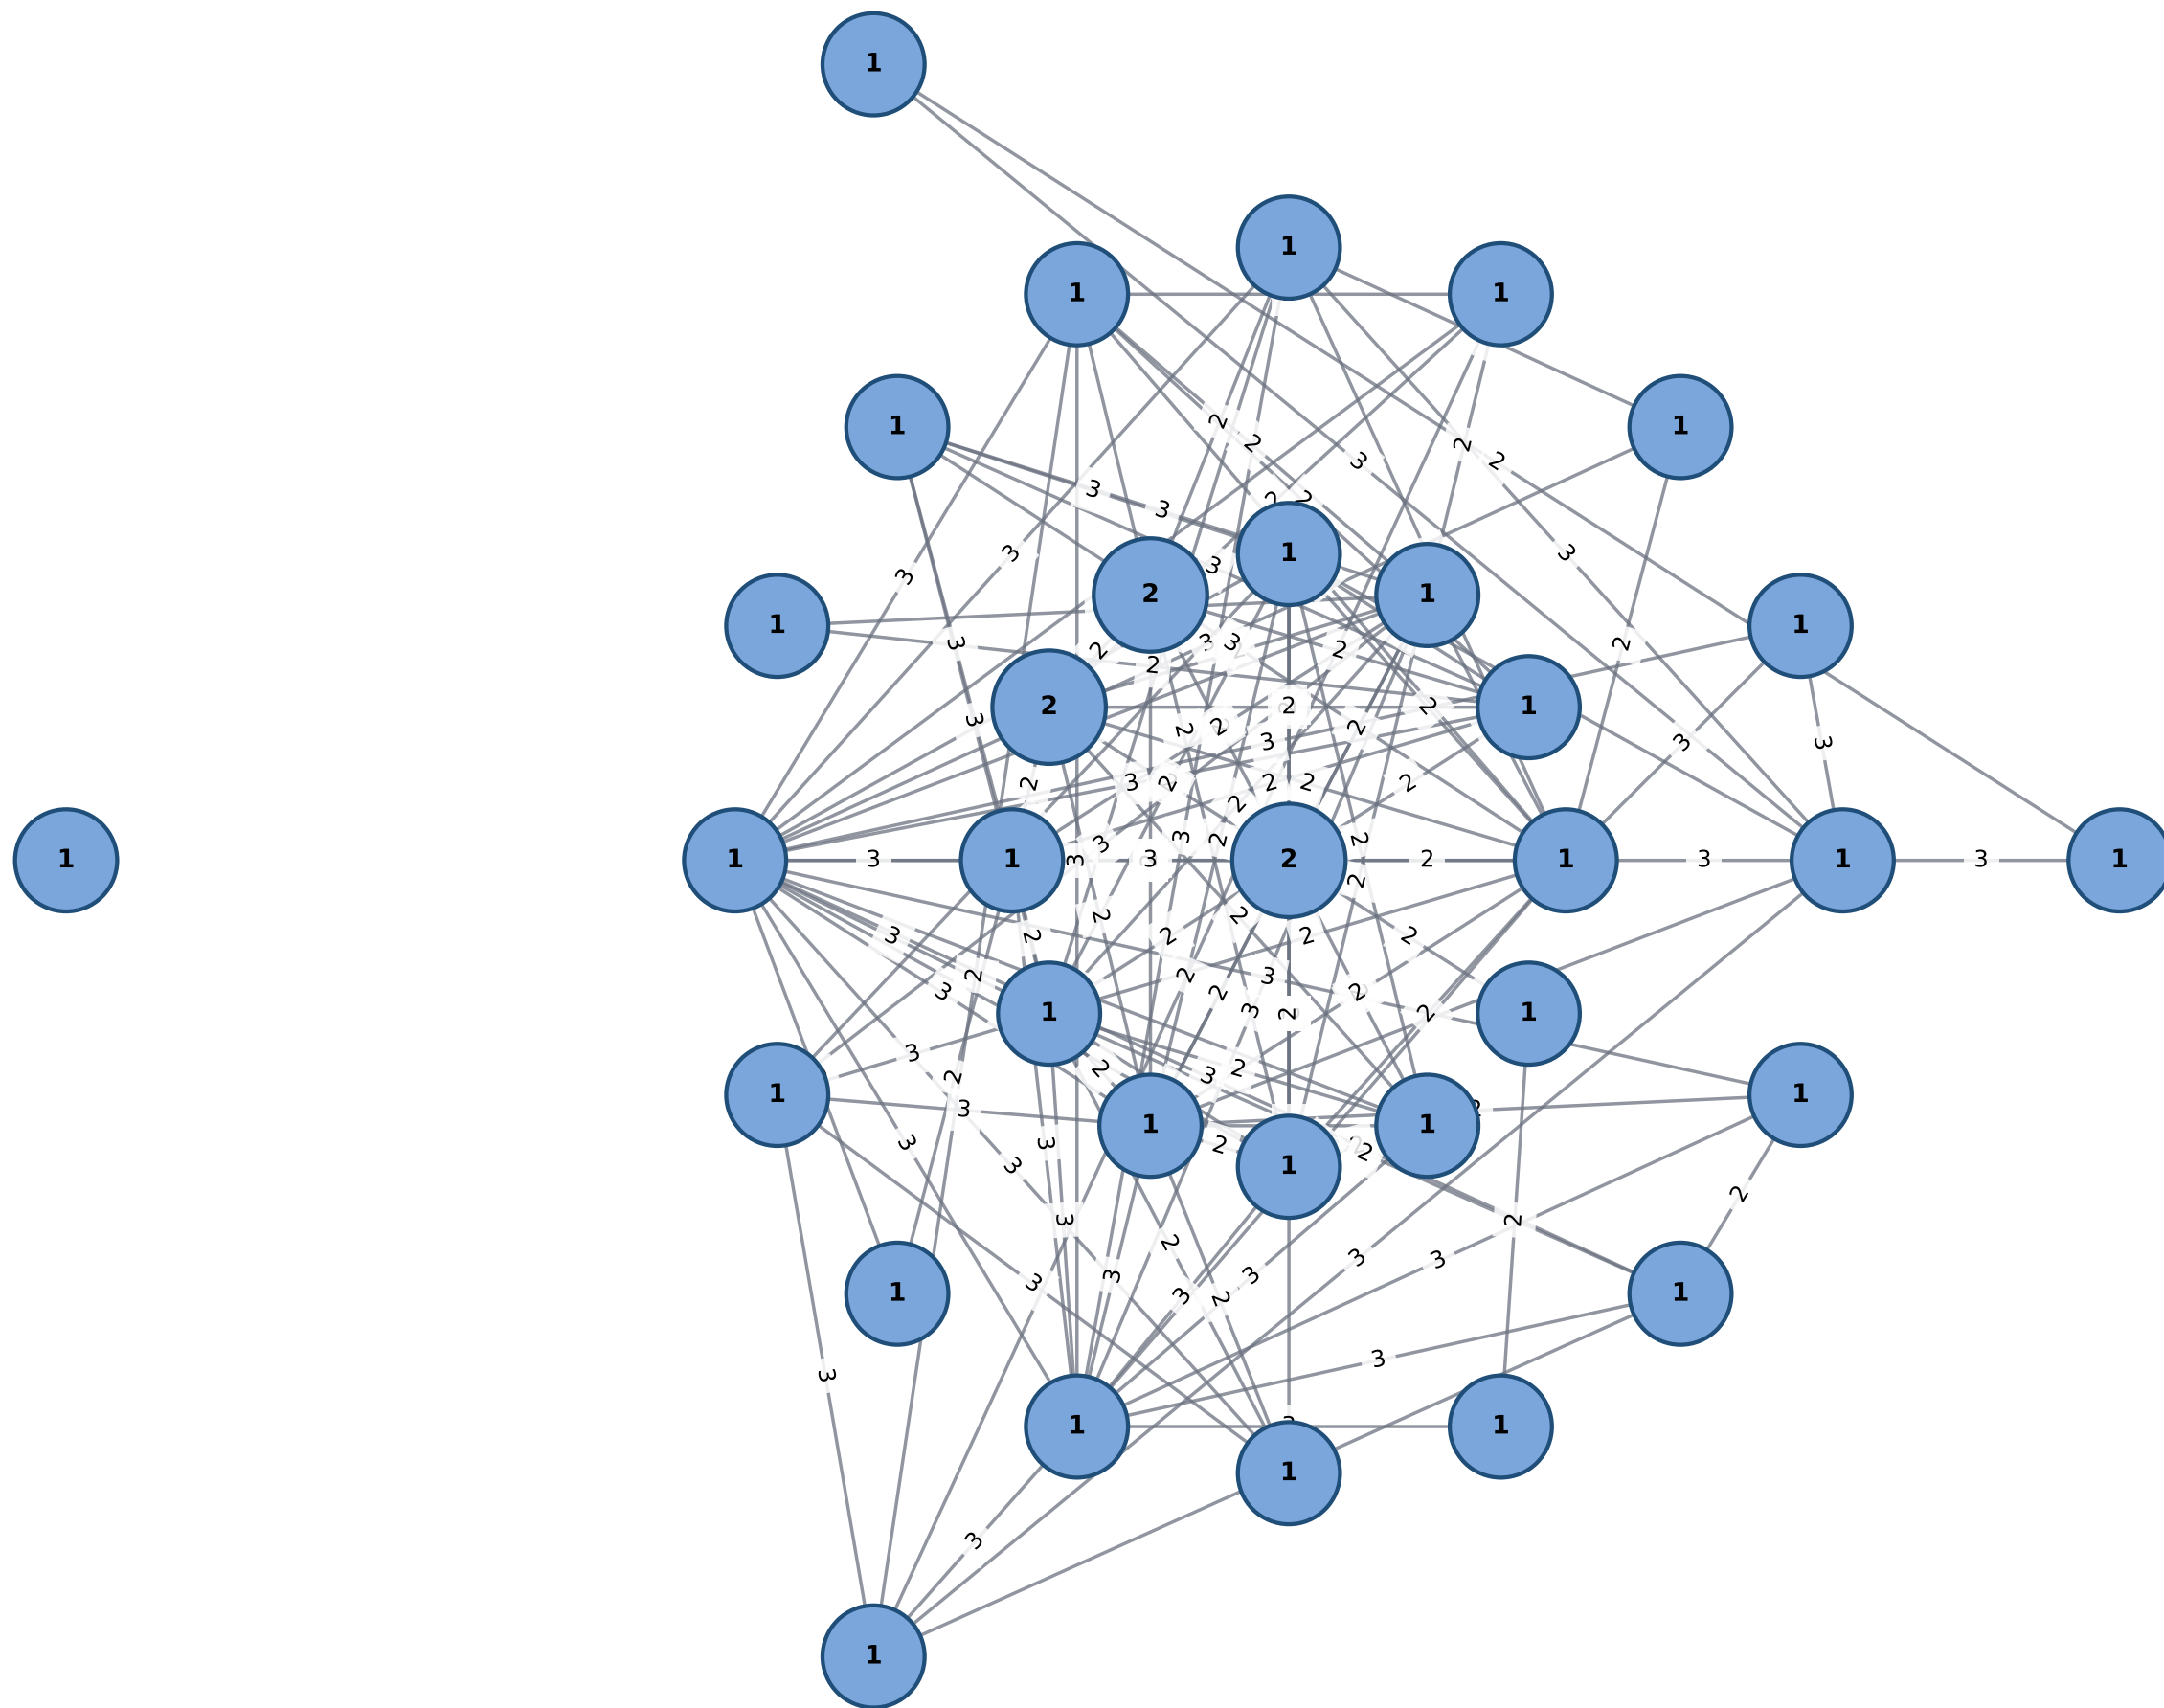

cardiomyopathy hypertrophic: cluster map (automatic layout, closest connections only)

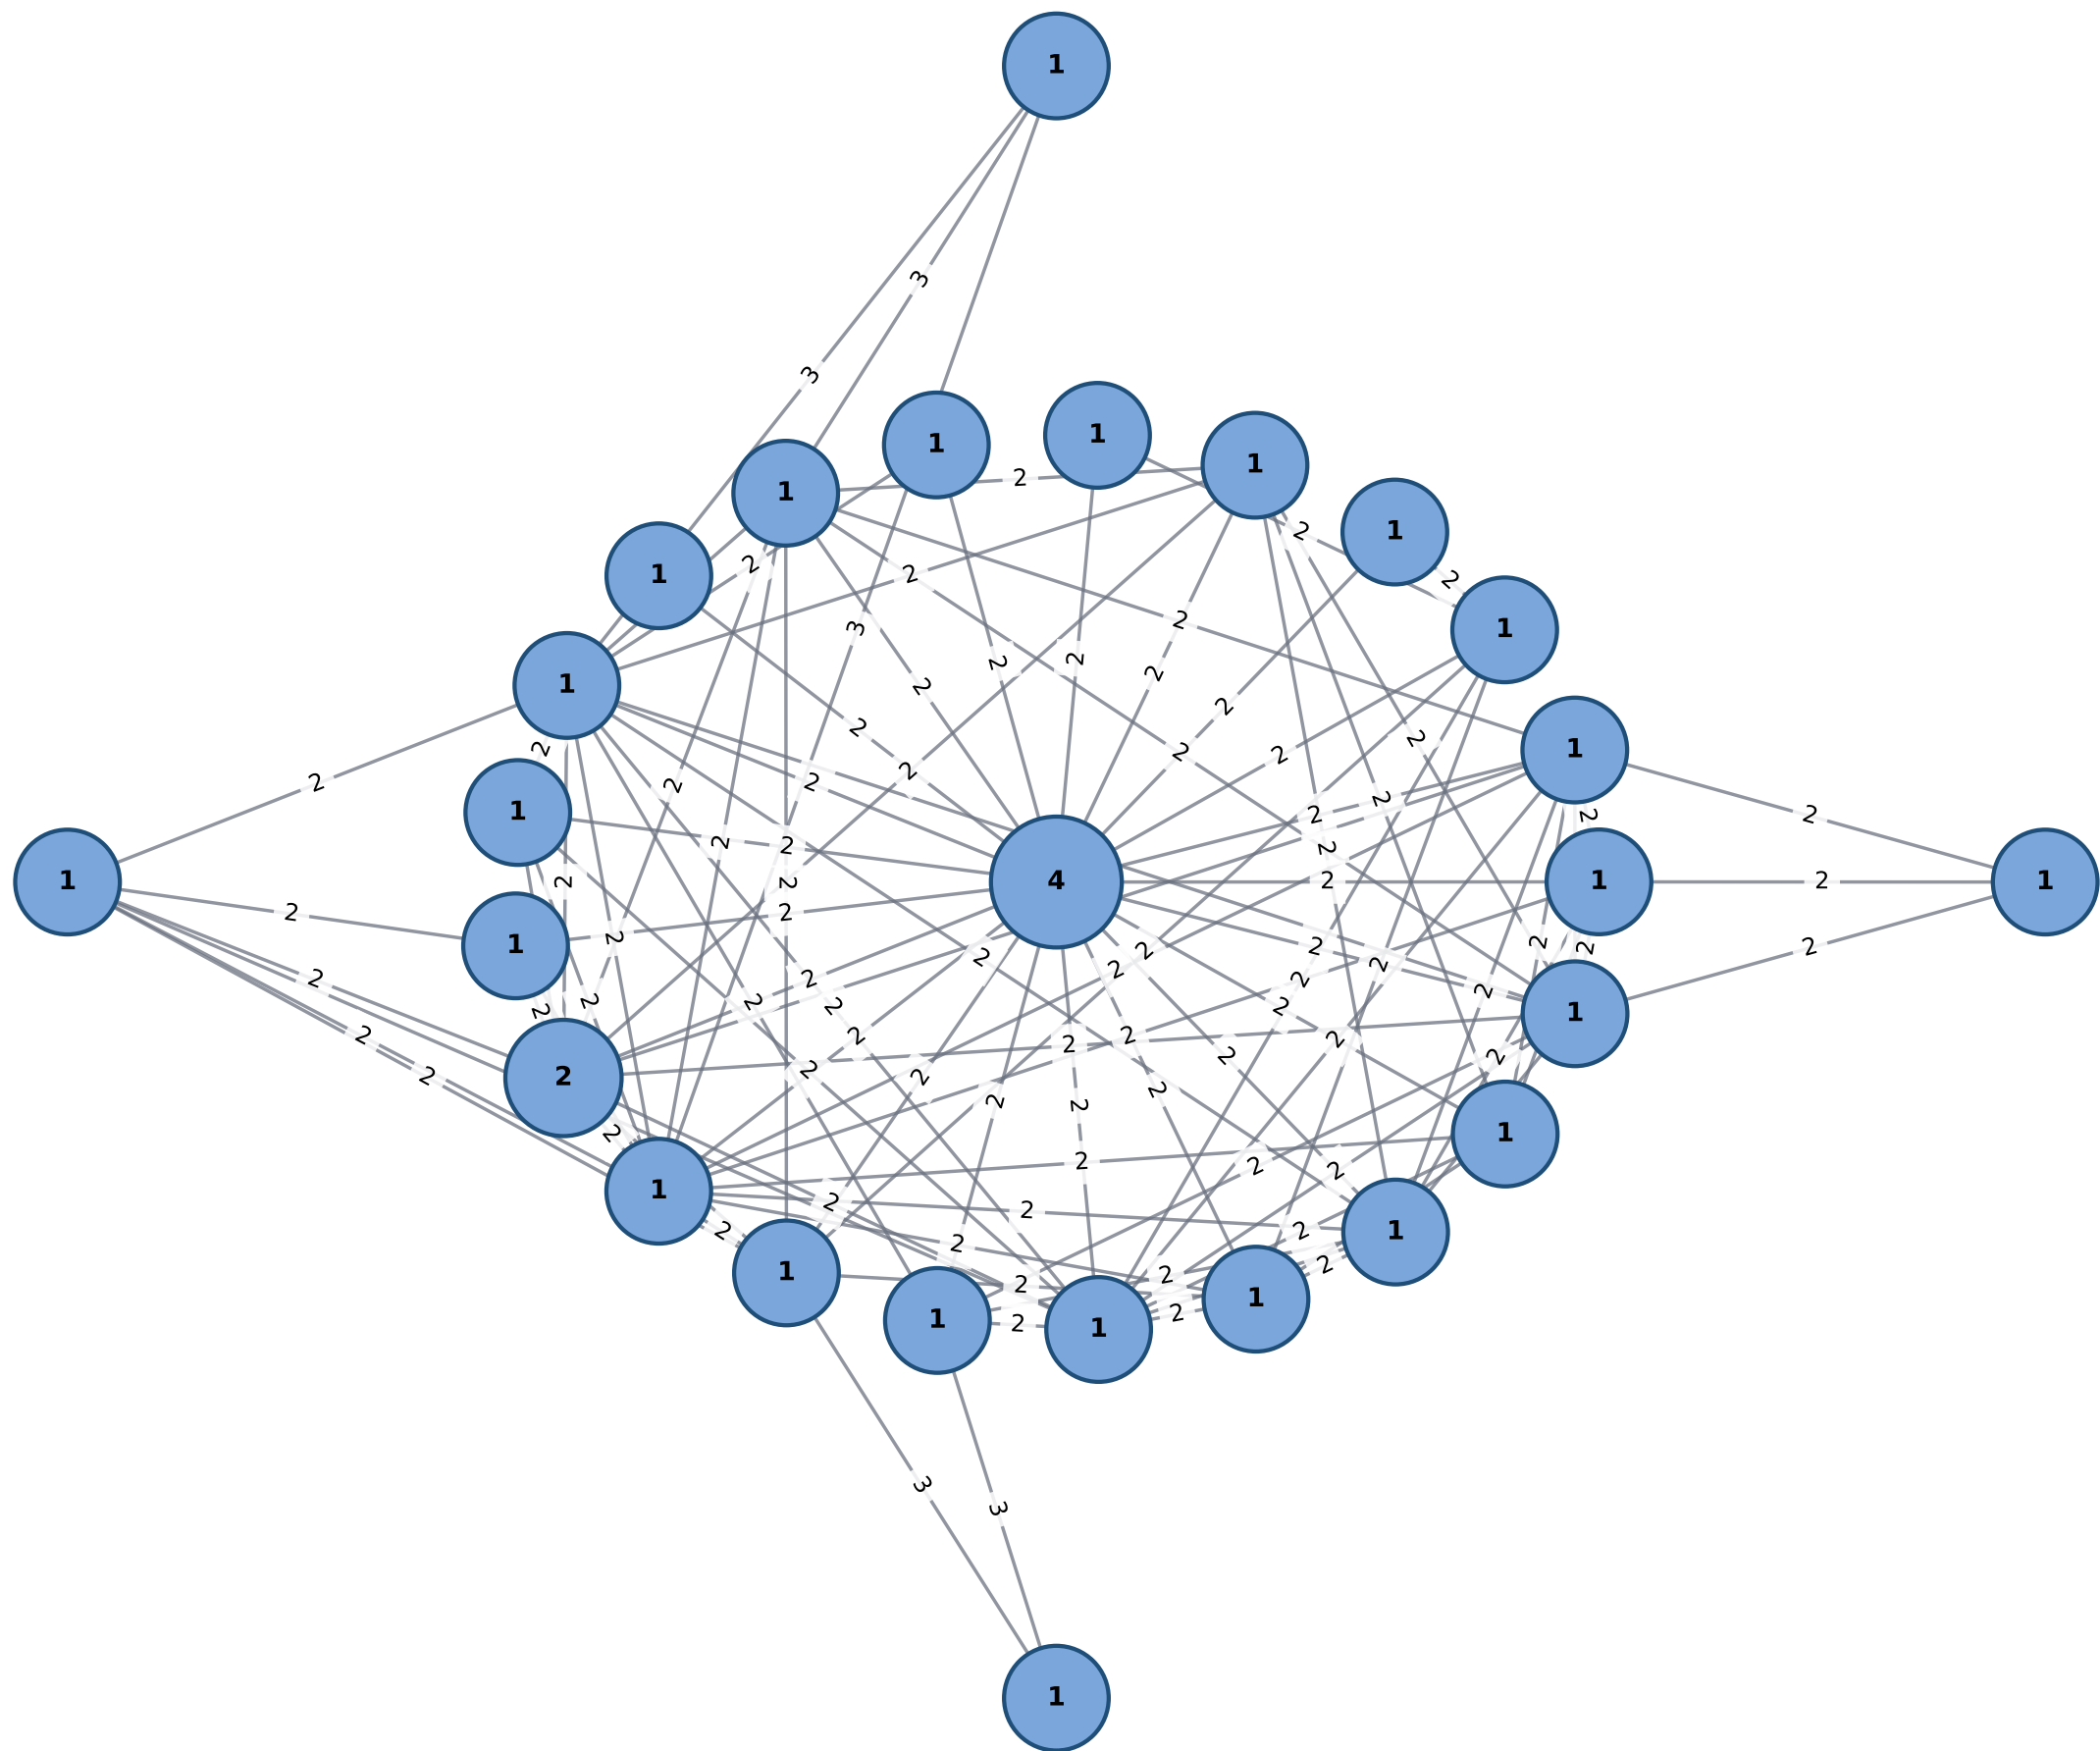

celiac disease: cluster map (automatic layout, closest connections only)

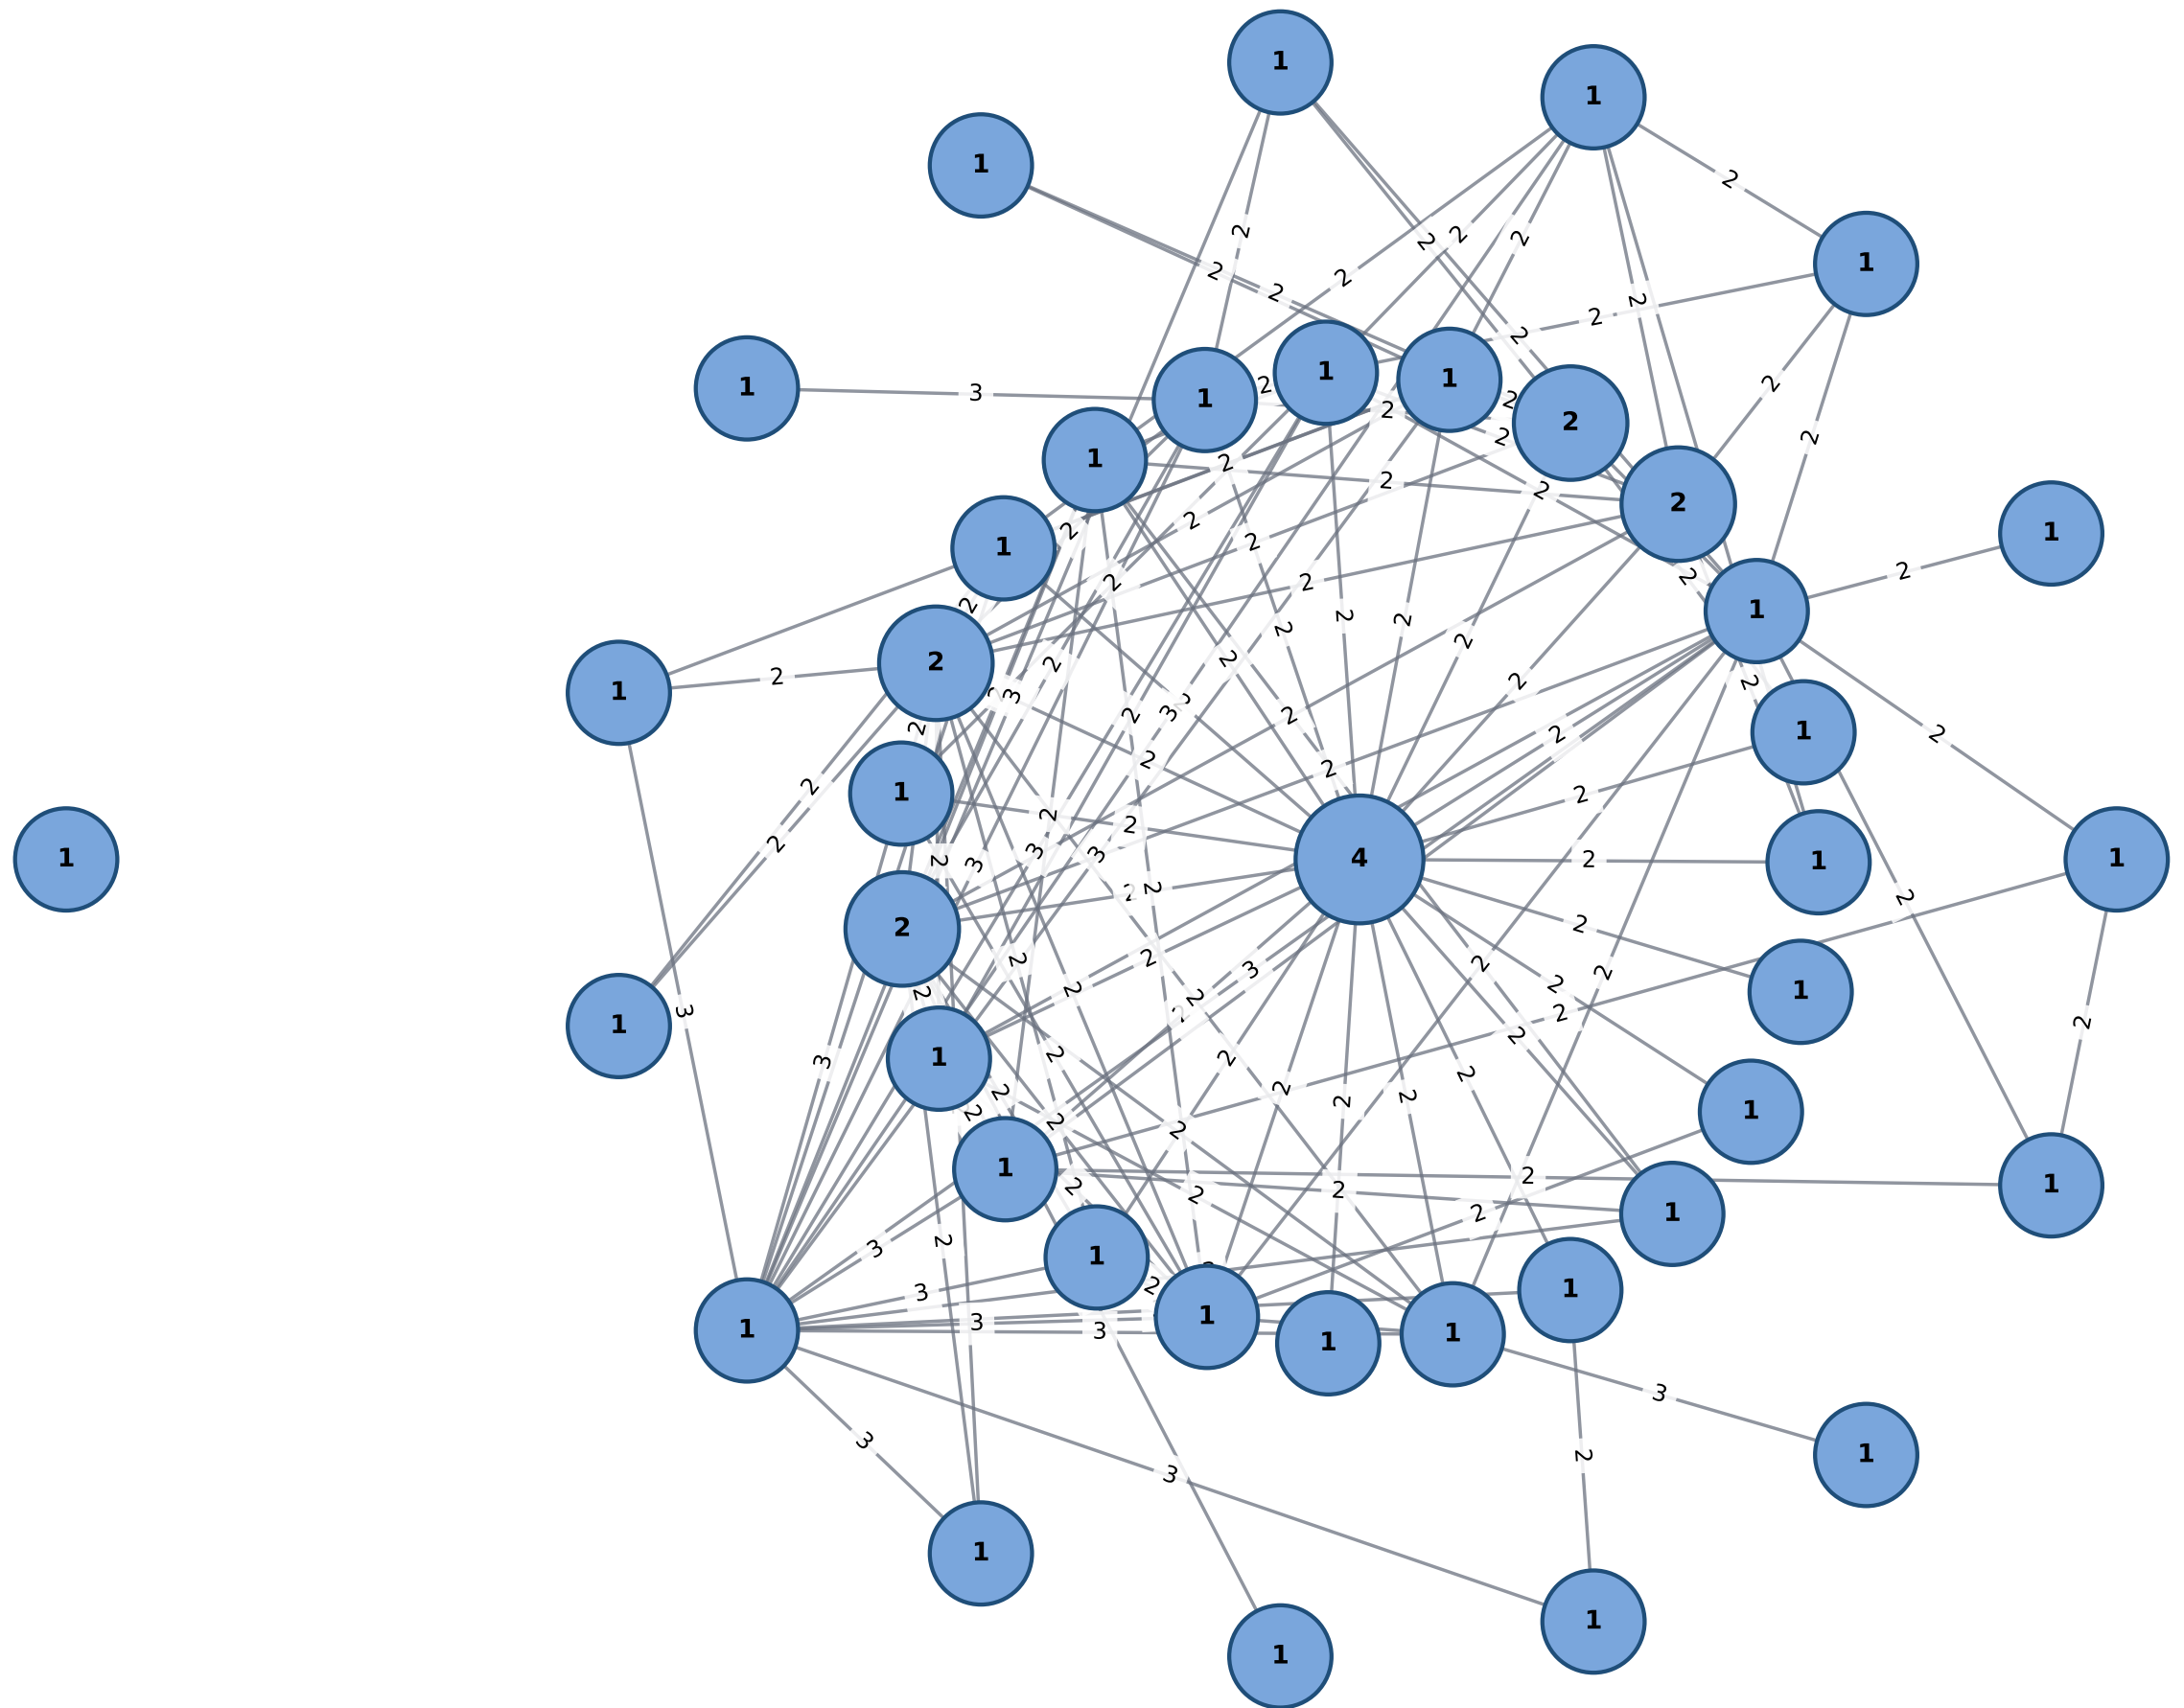

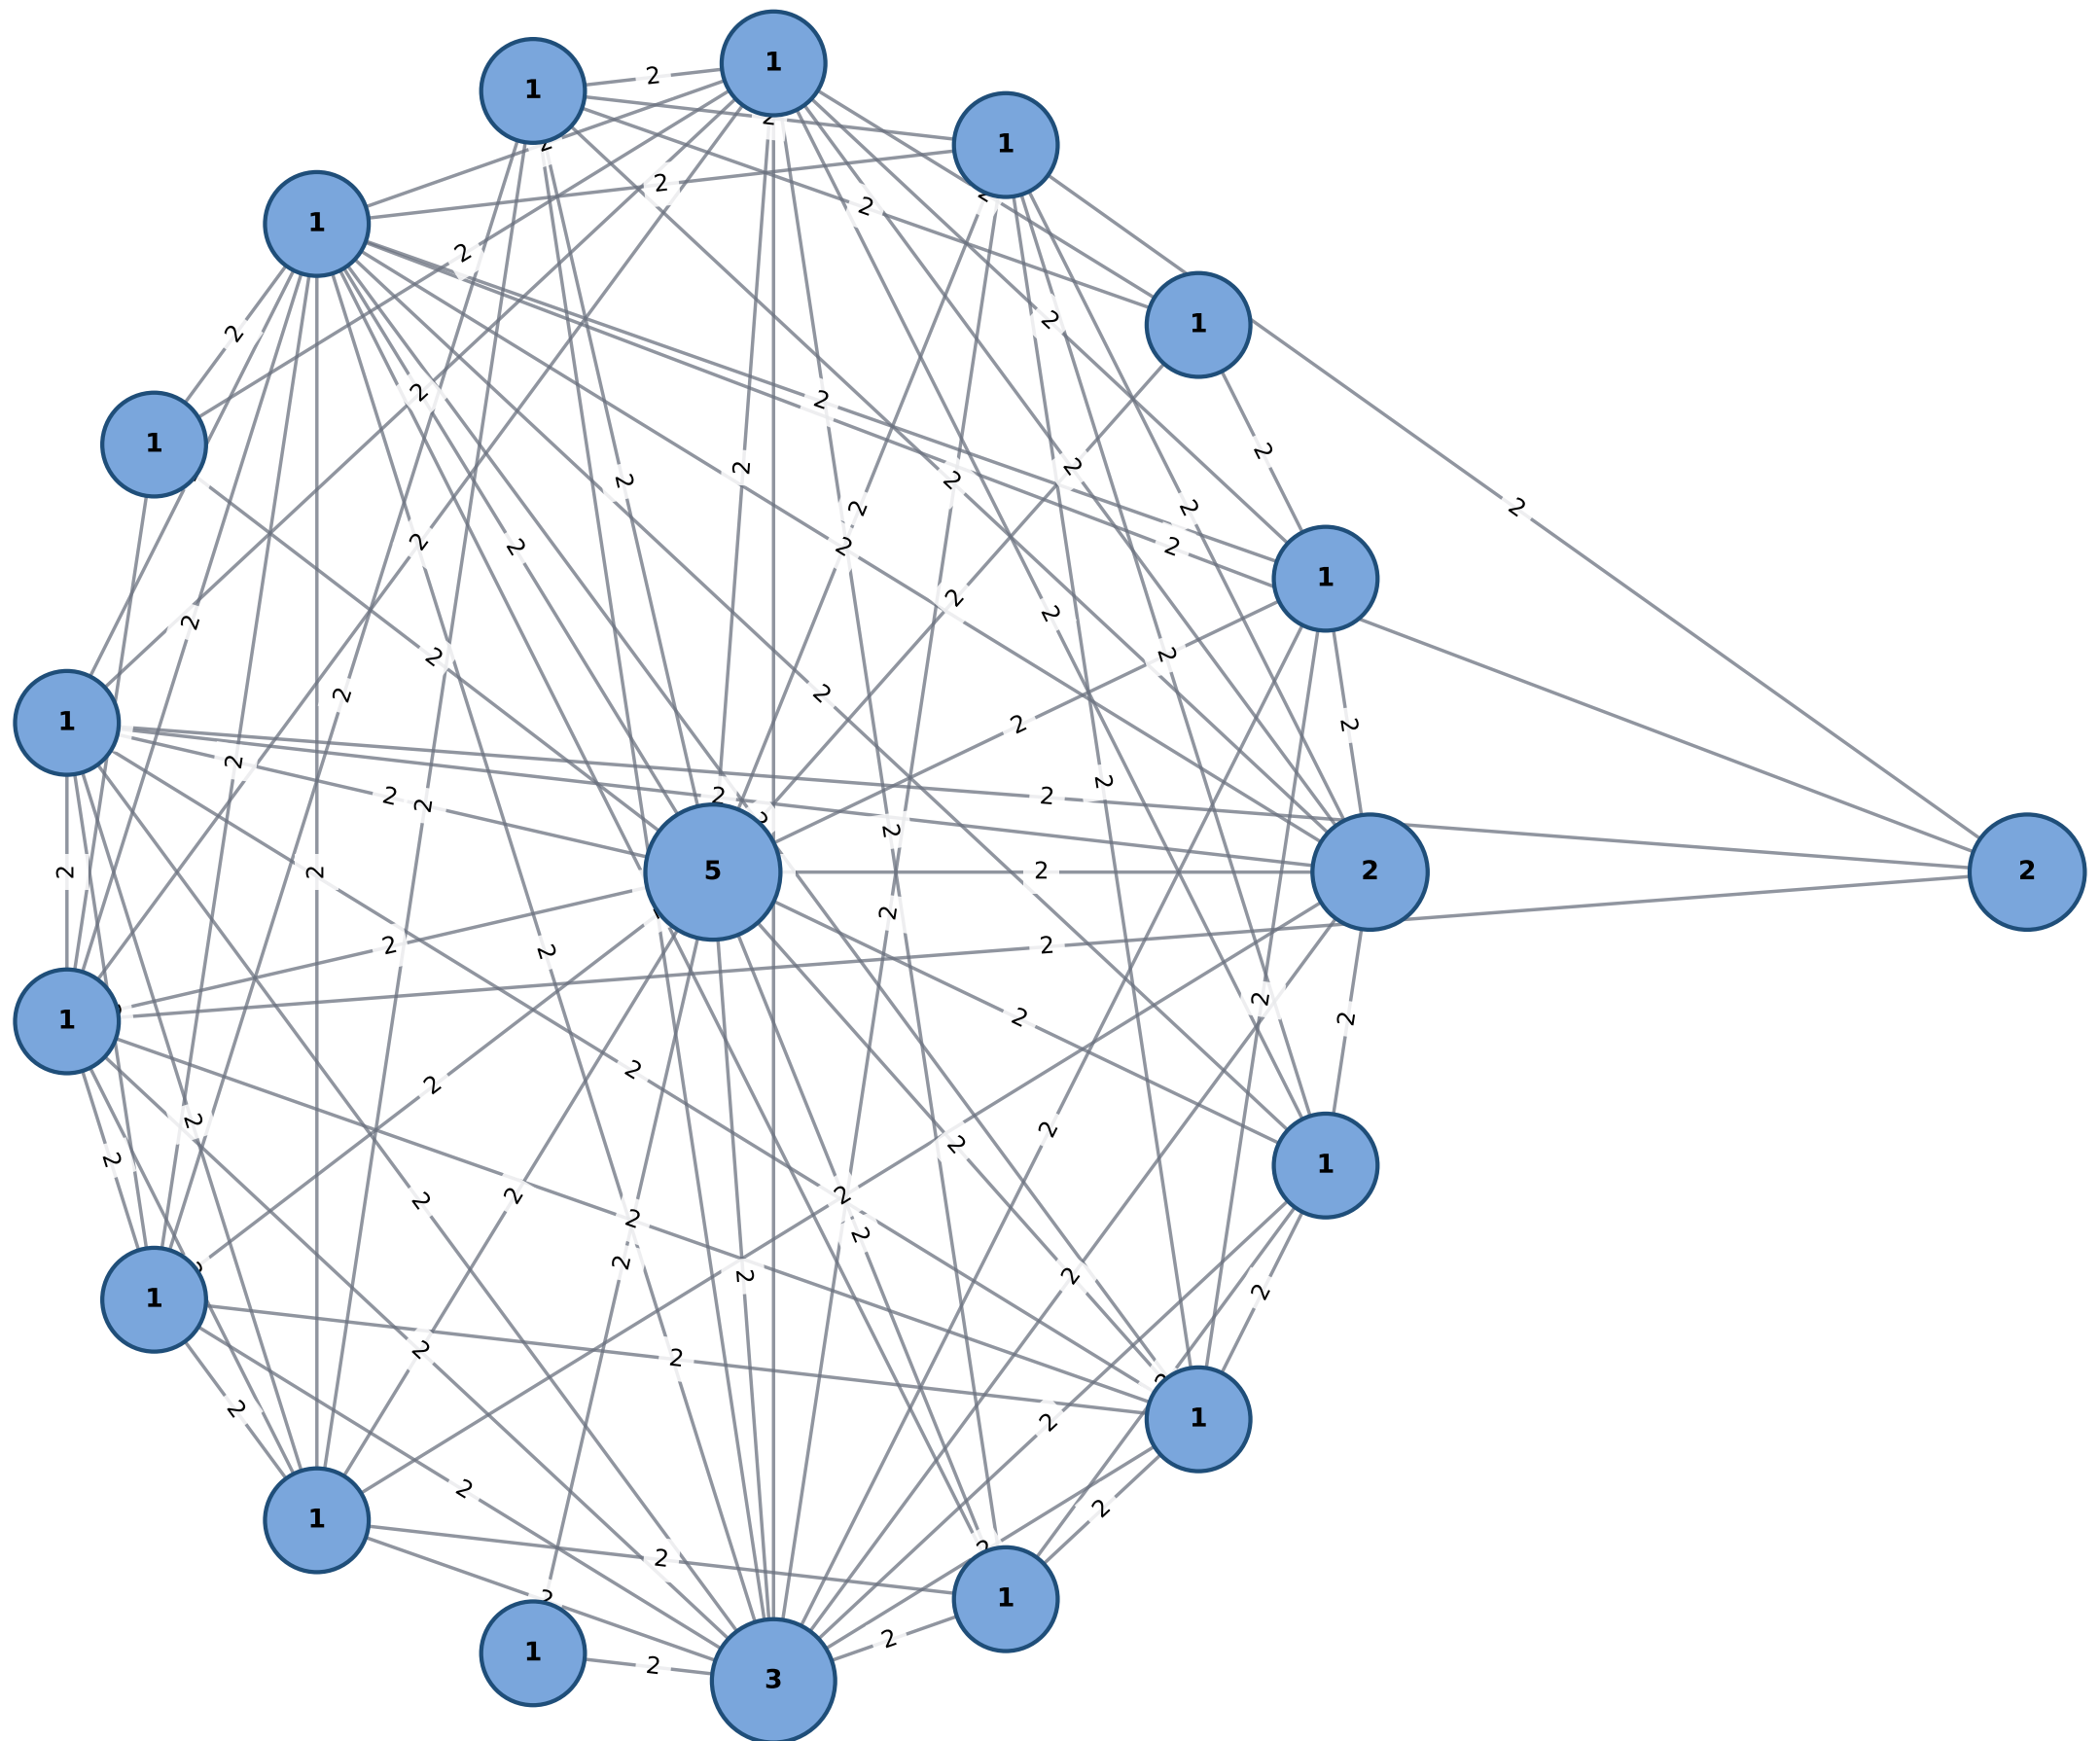

cerebellar ataxia: cluster map (automatic layout, closest connections only)

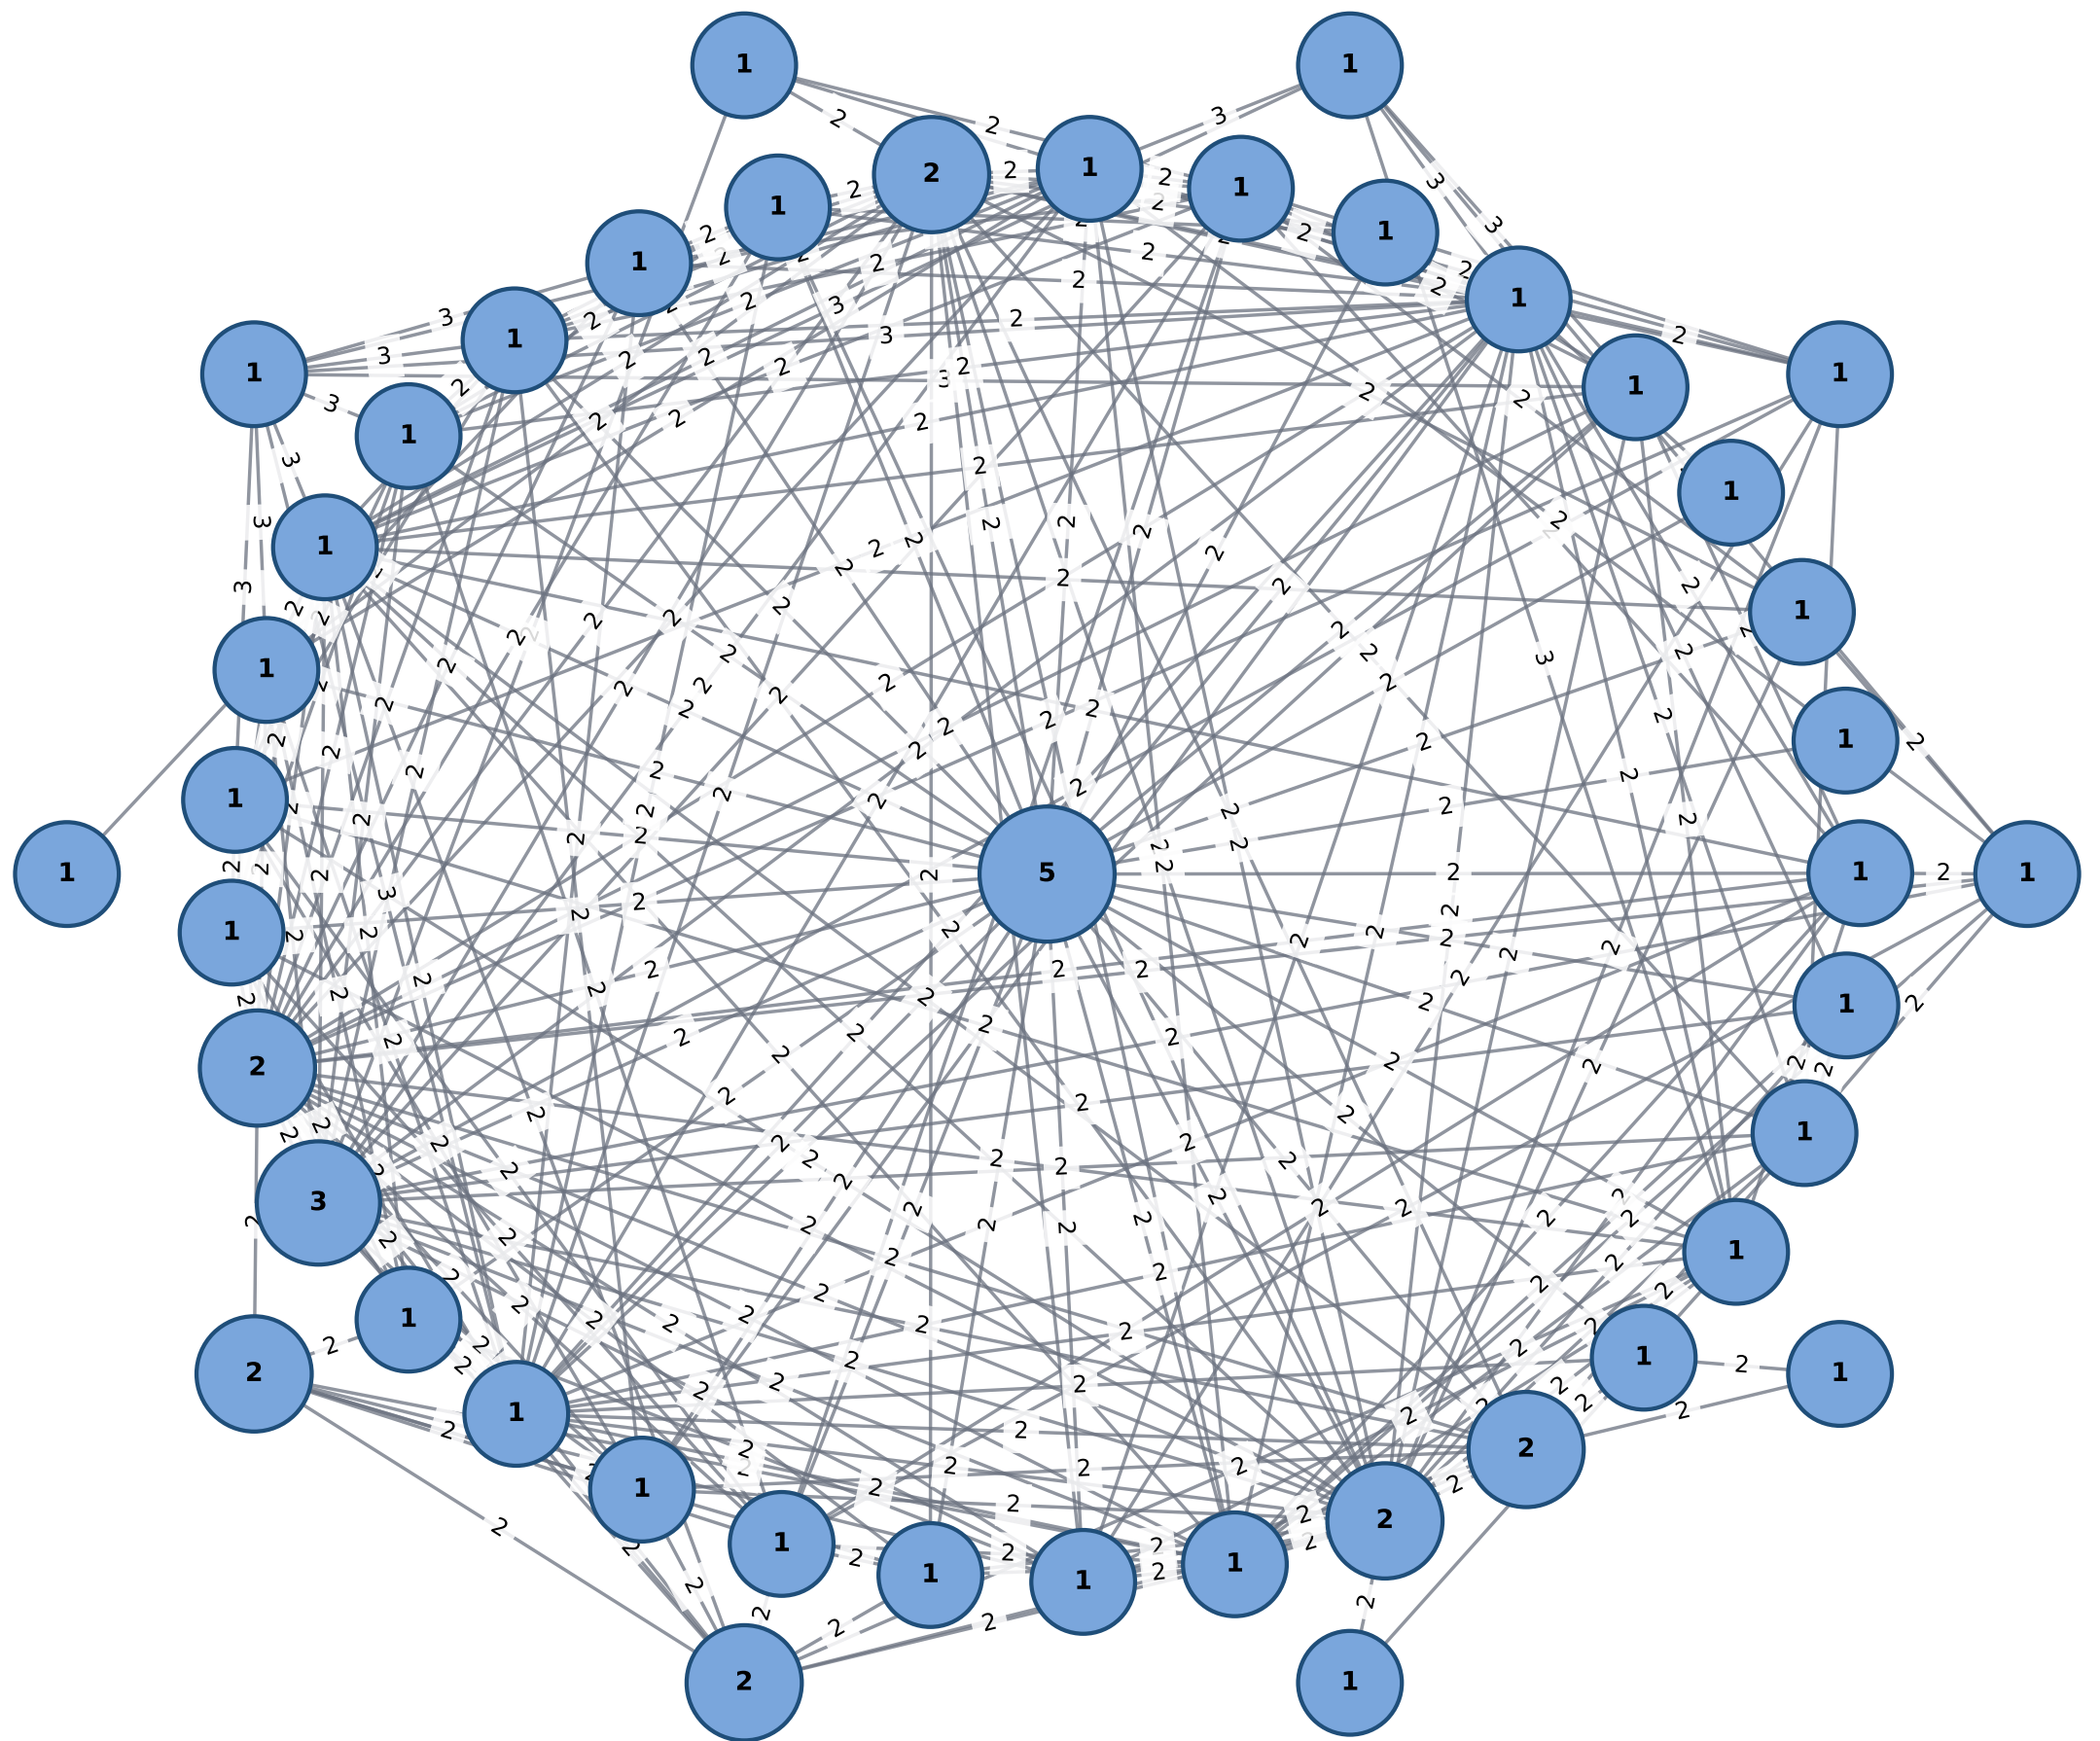

cerebrovascular disorders: cluster map (automatic layout, closest connections only)

charcot-marie-tooth disease: cluster map (automatic layout, closest connections only)

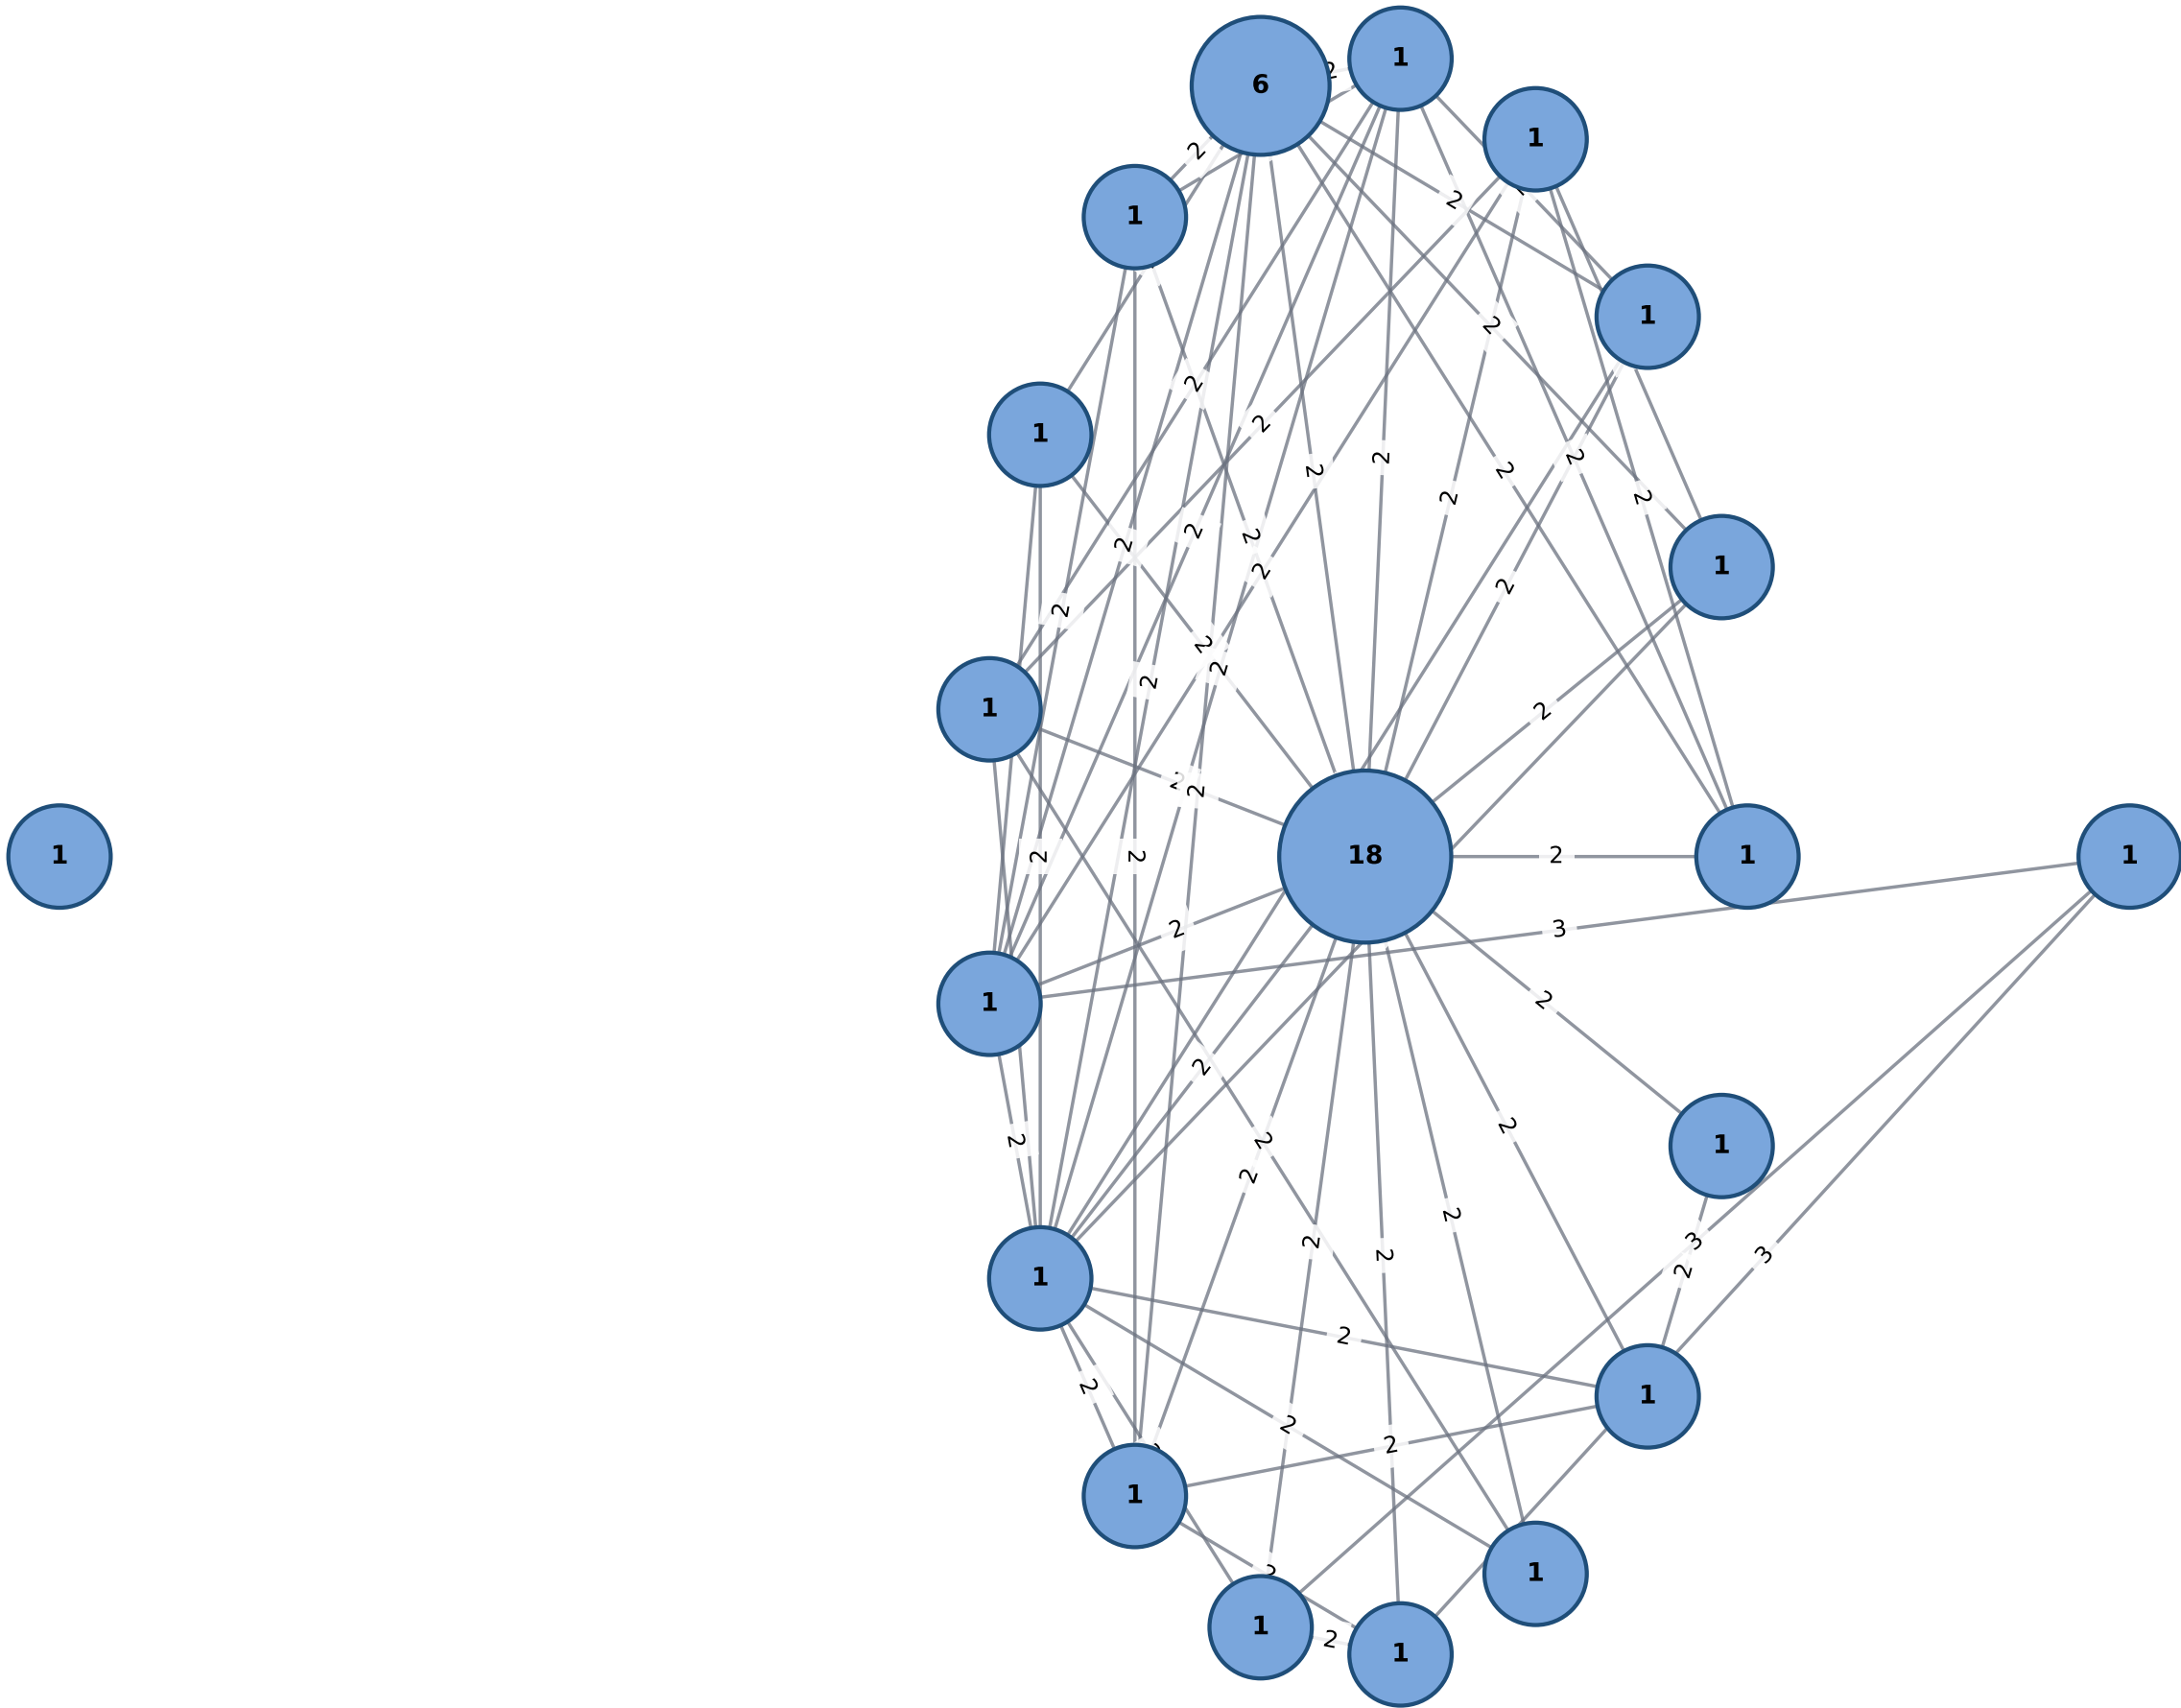

colitis ulcerative: cluster map (automatic layout, closest connections only)

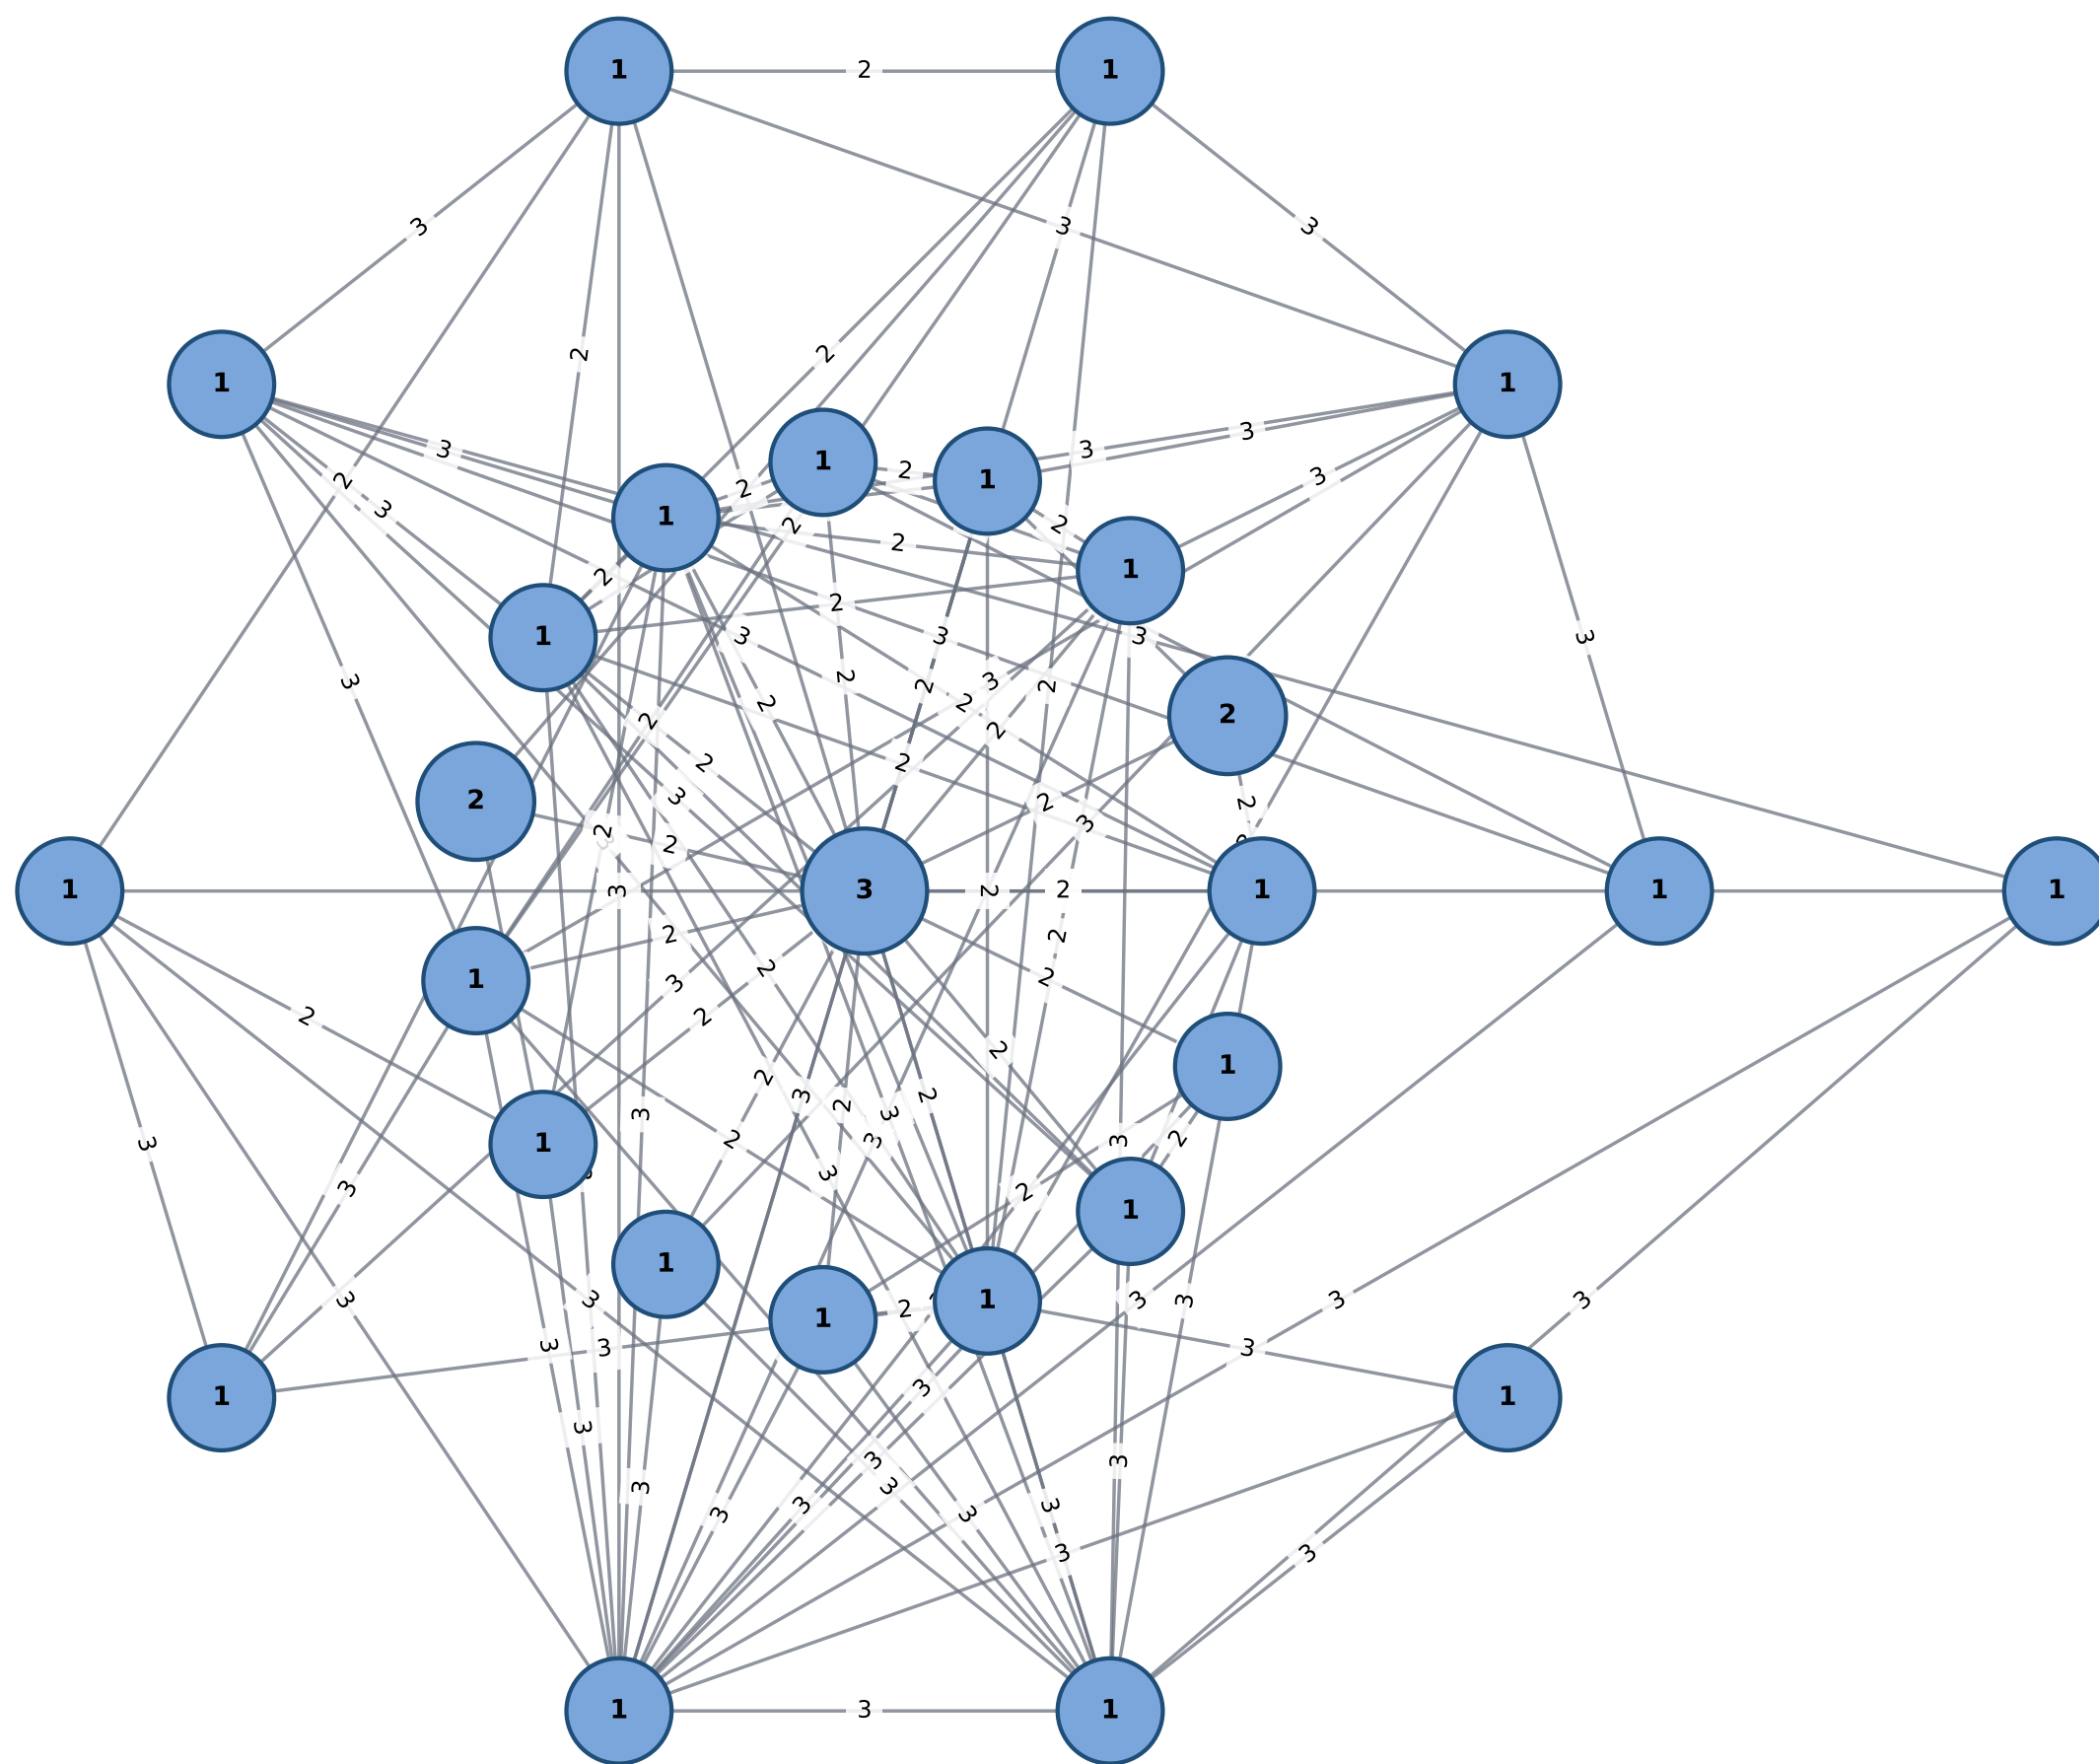

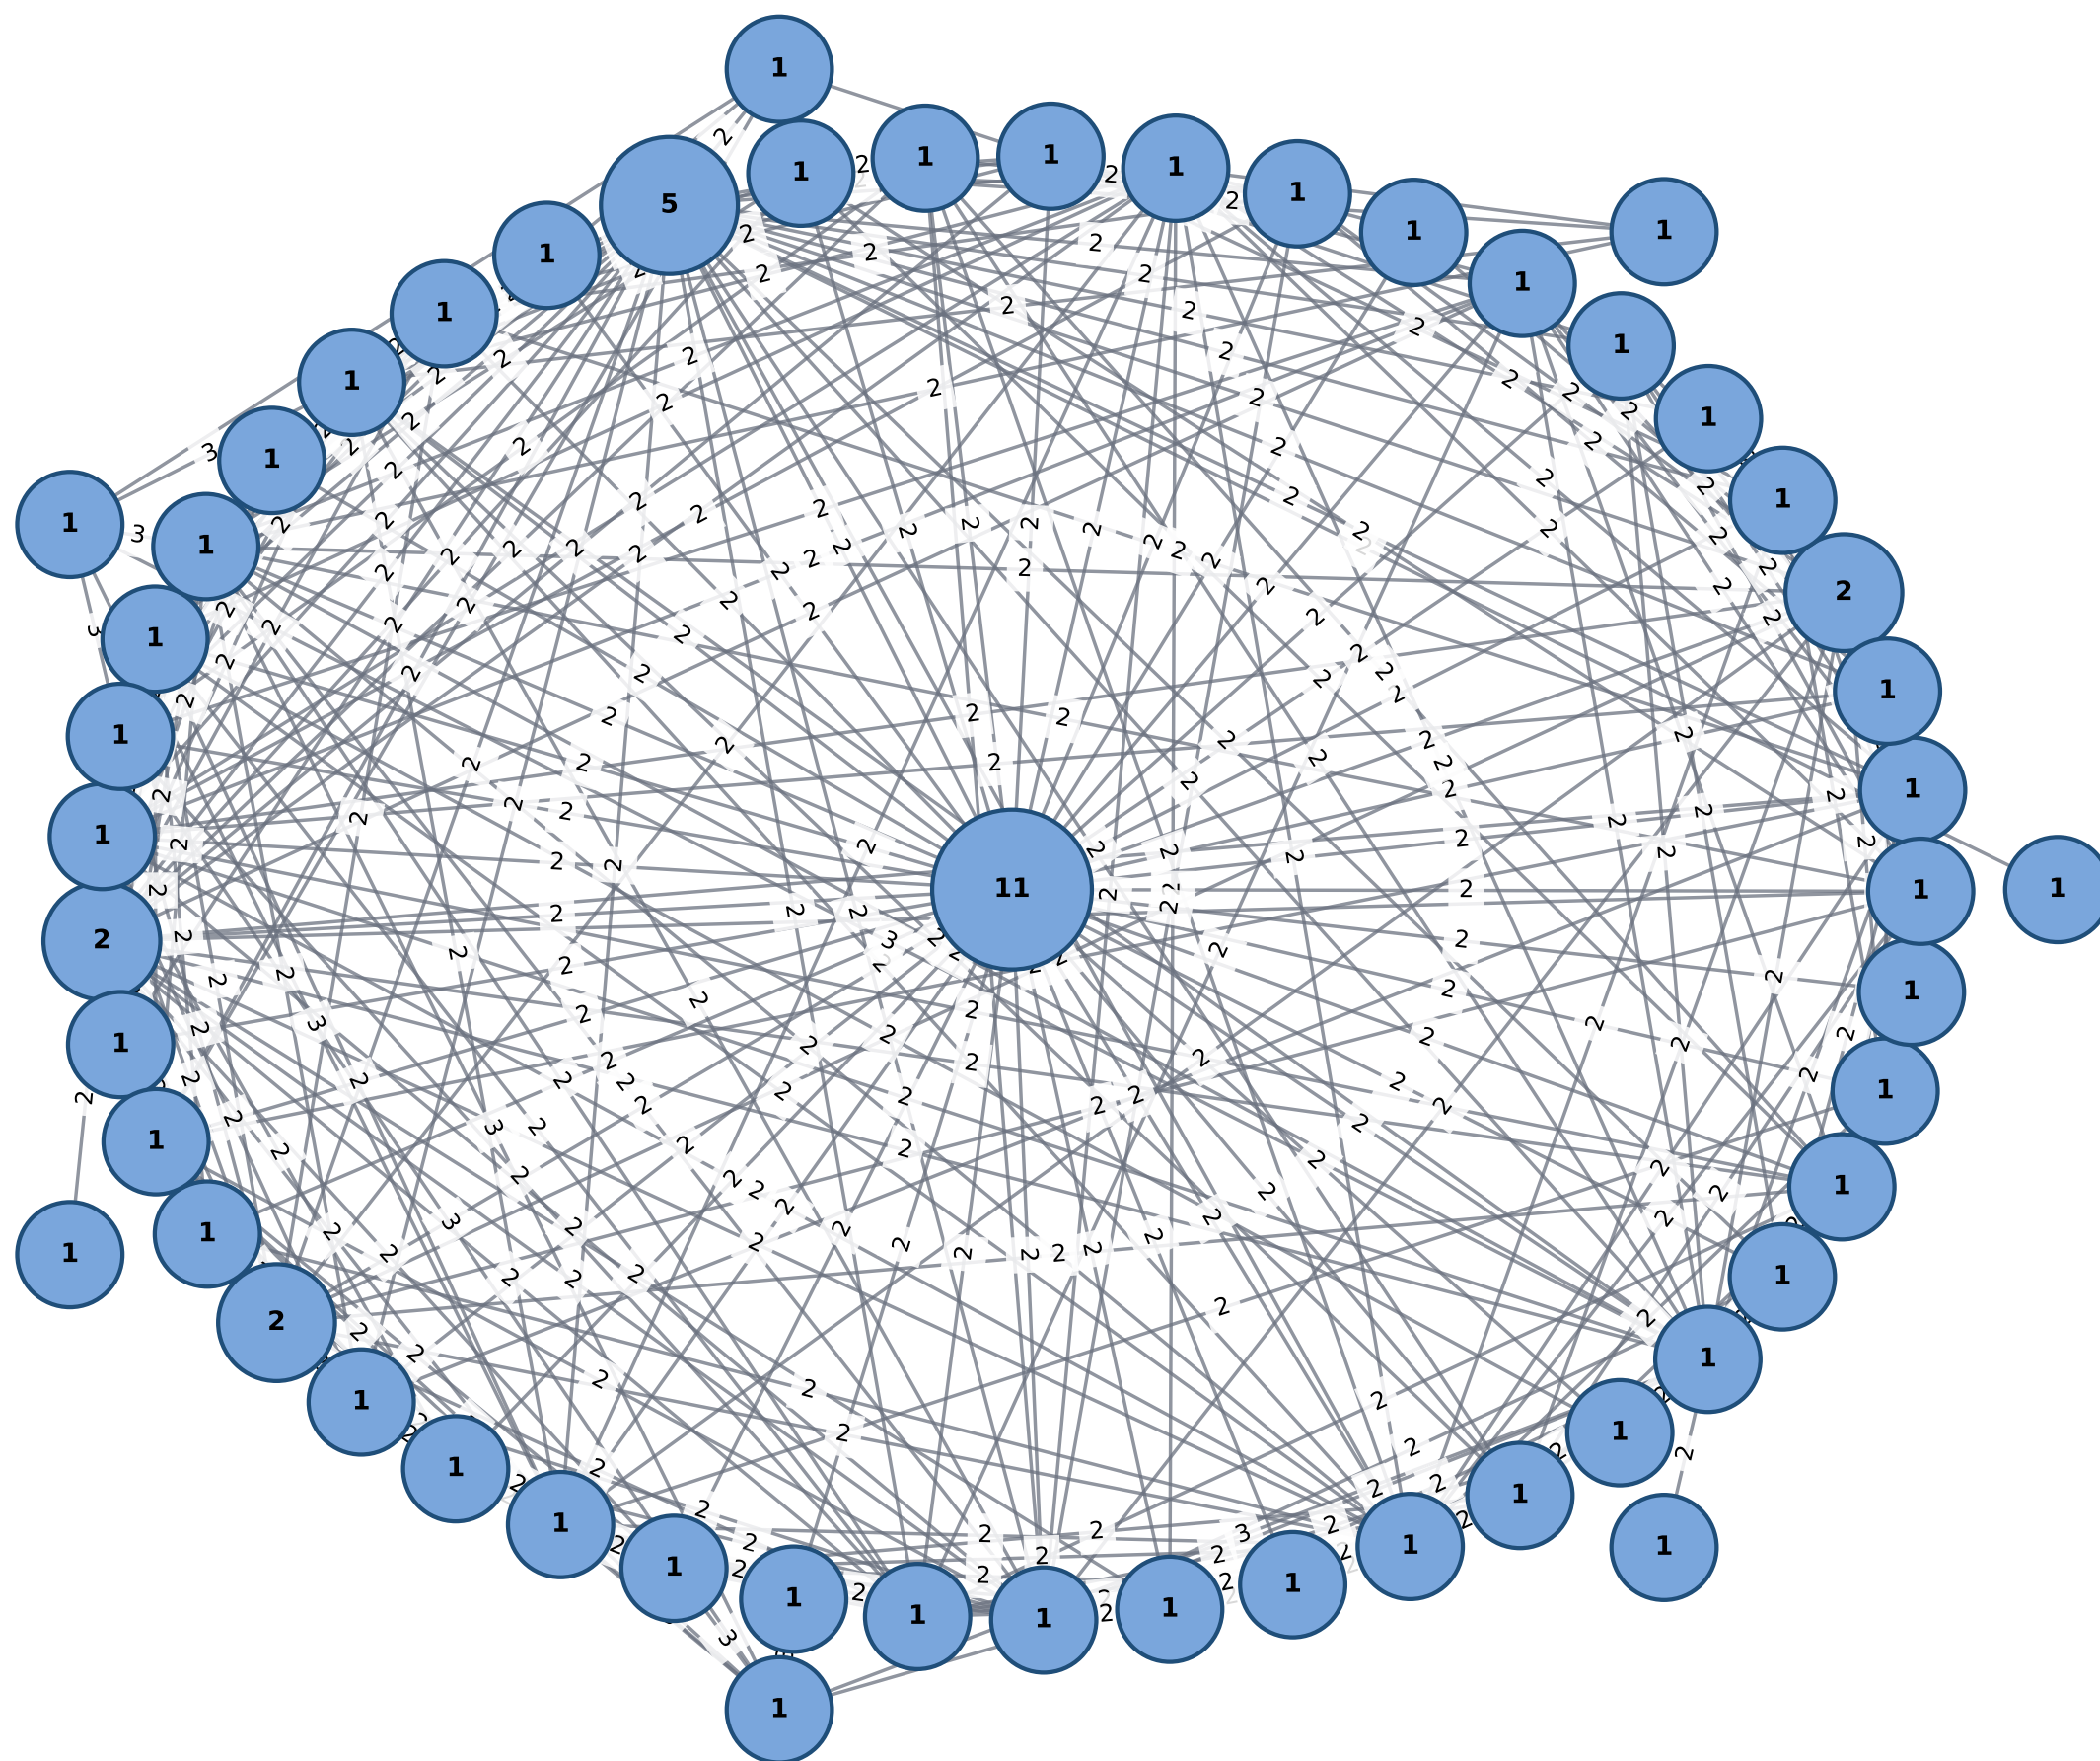

colorectal neoplasms: cluster map (automatic layout, closest connections only)

coronary artery disease: cluster map (automatic layout, closest connections only)

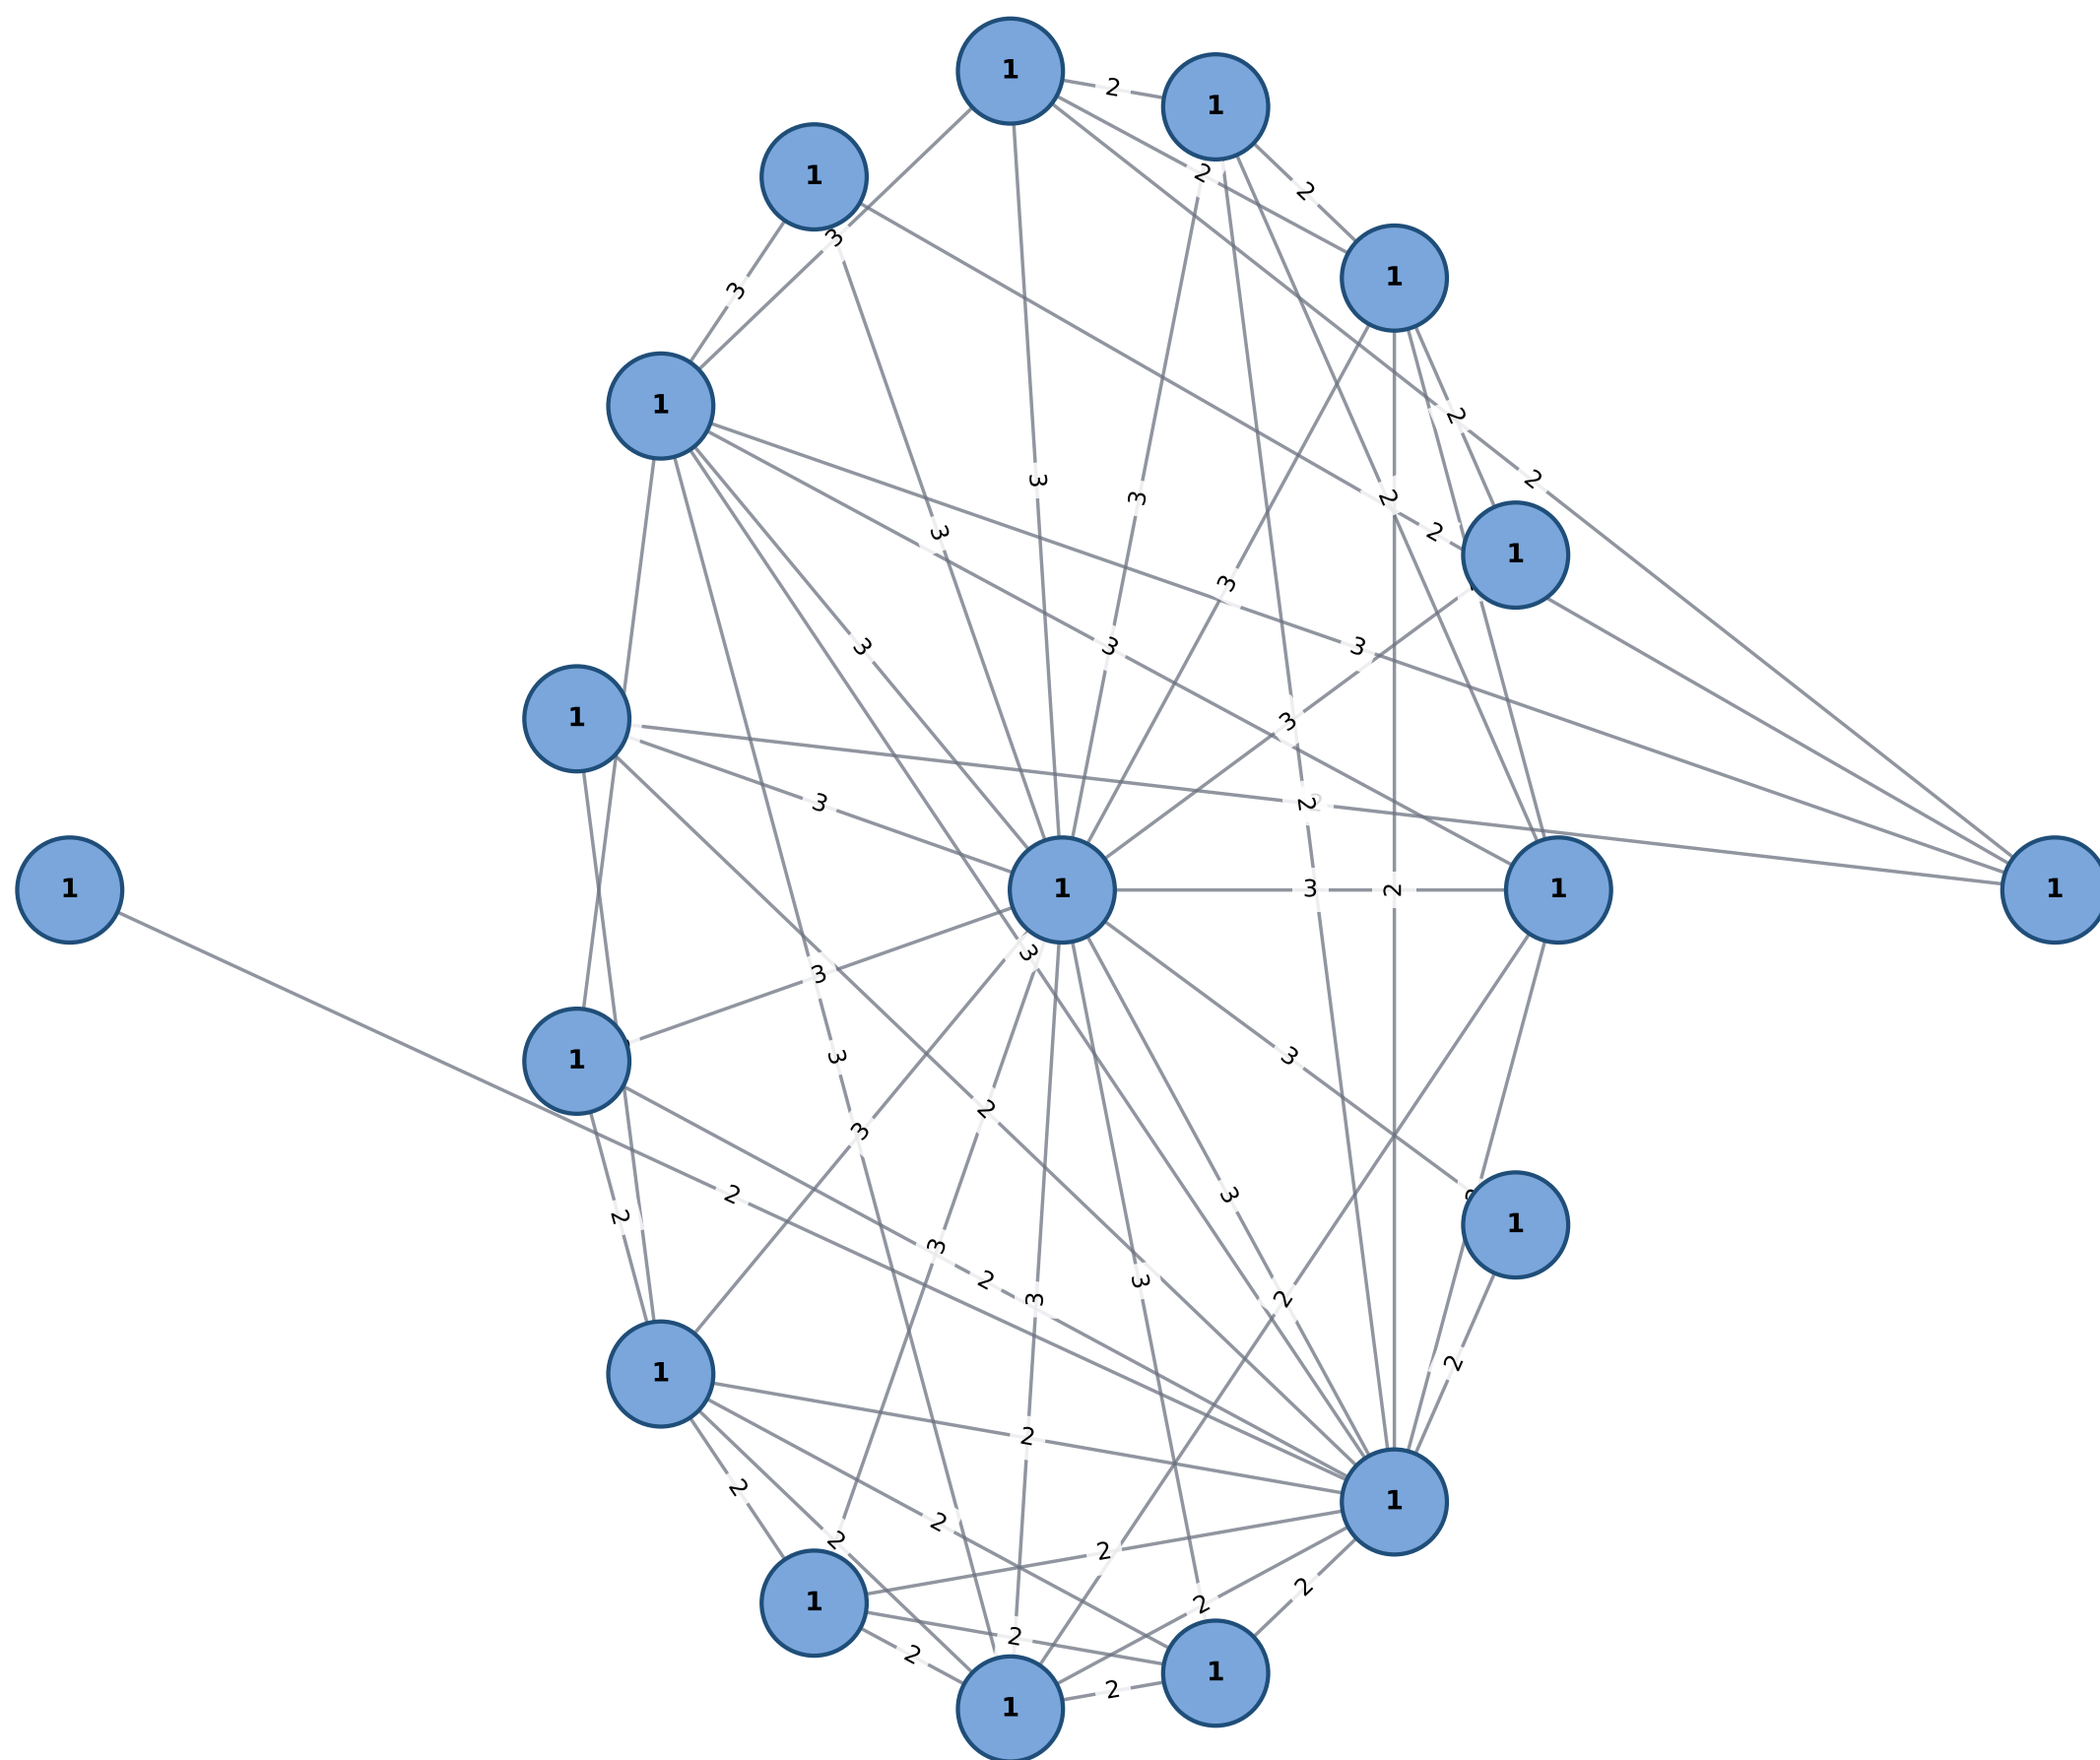

crohn disease: cluster map (automatic layout, closest connections only)

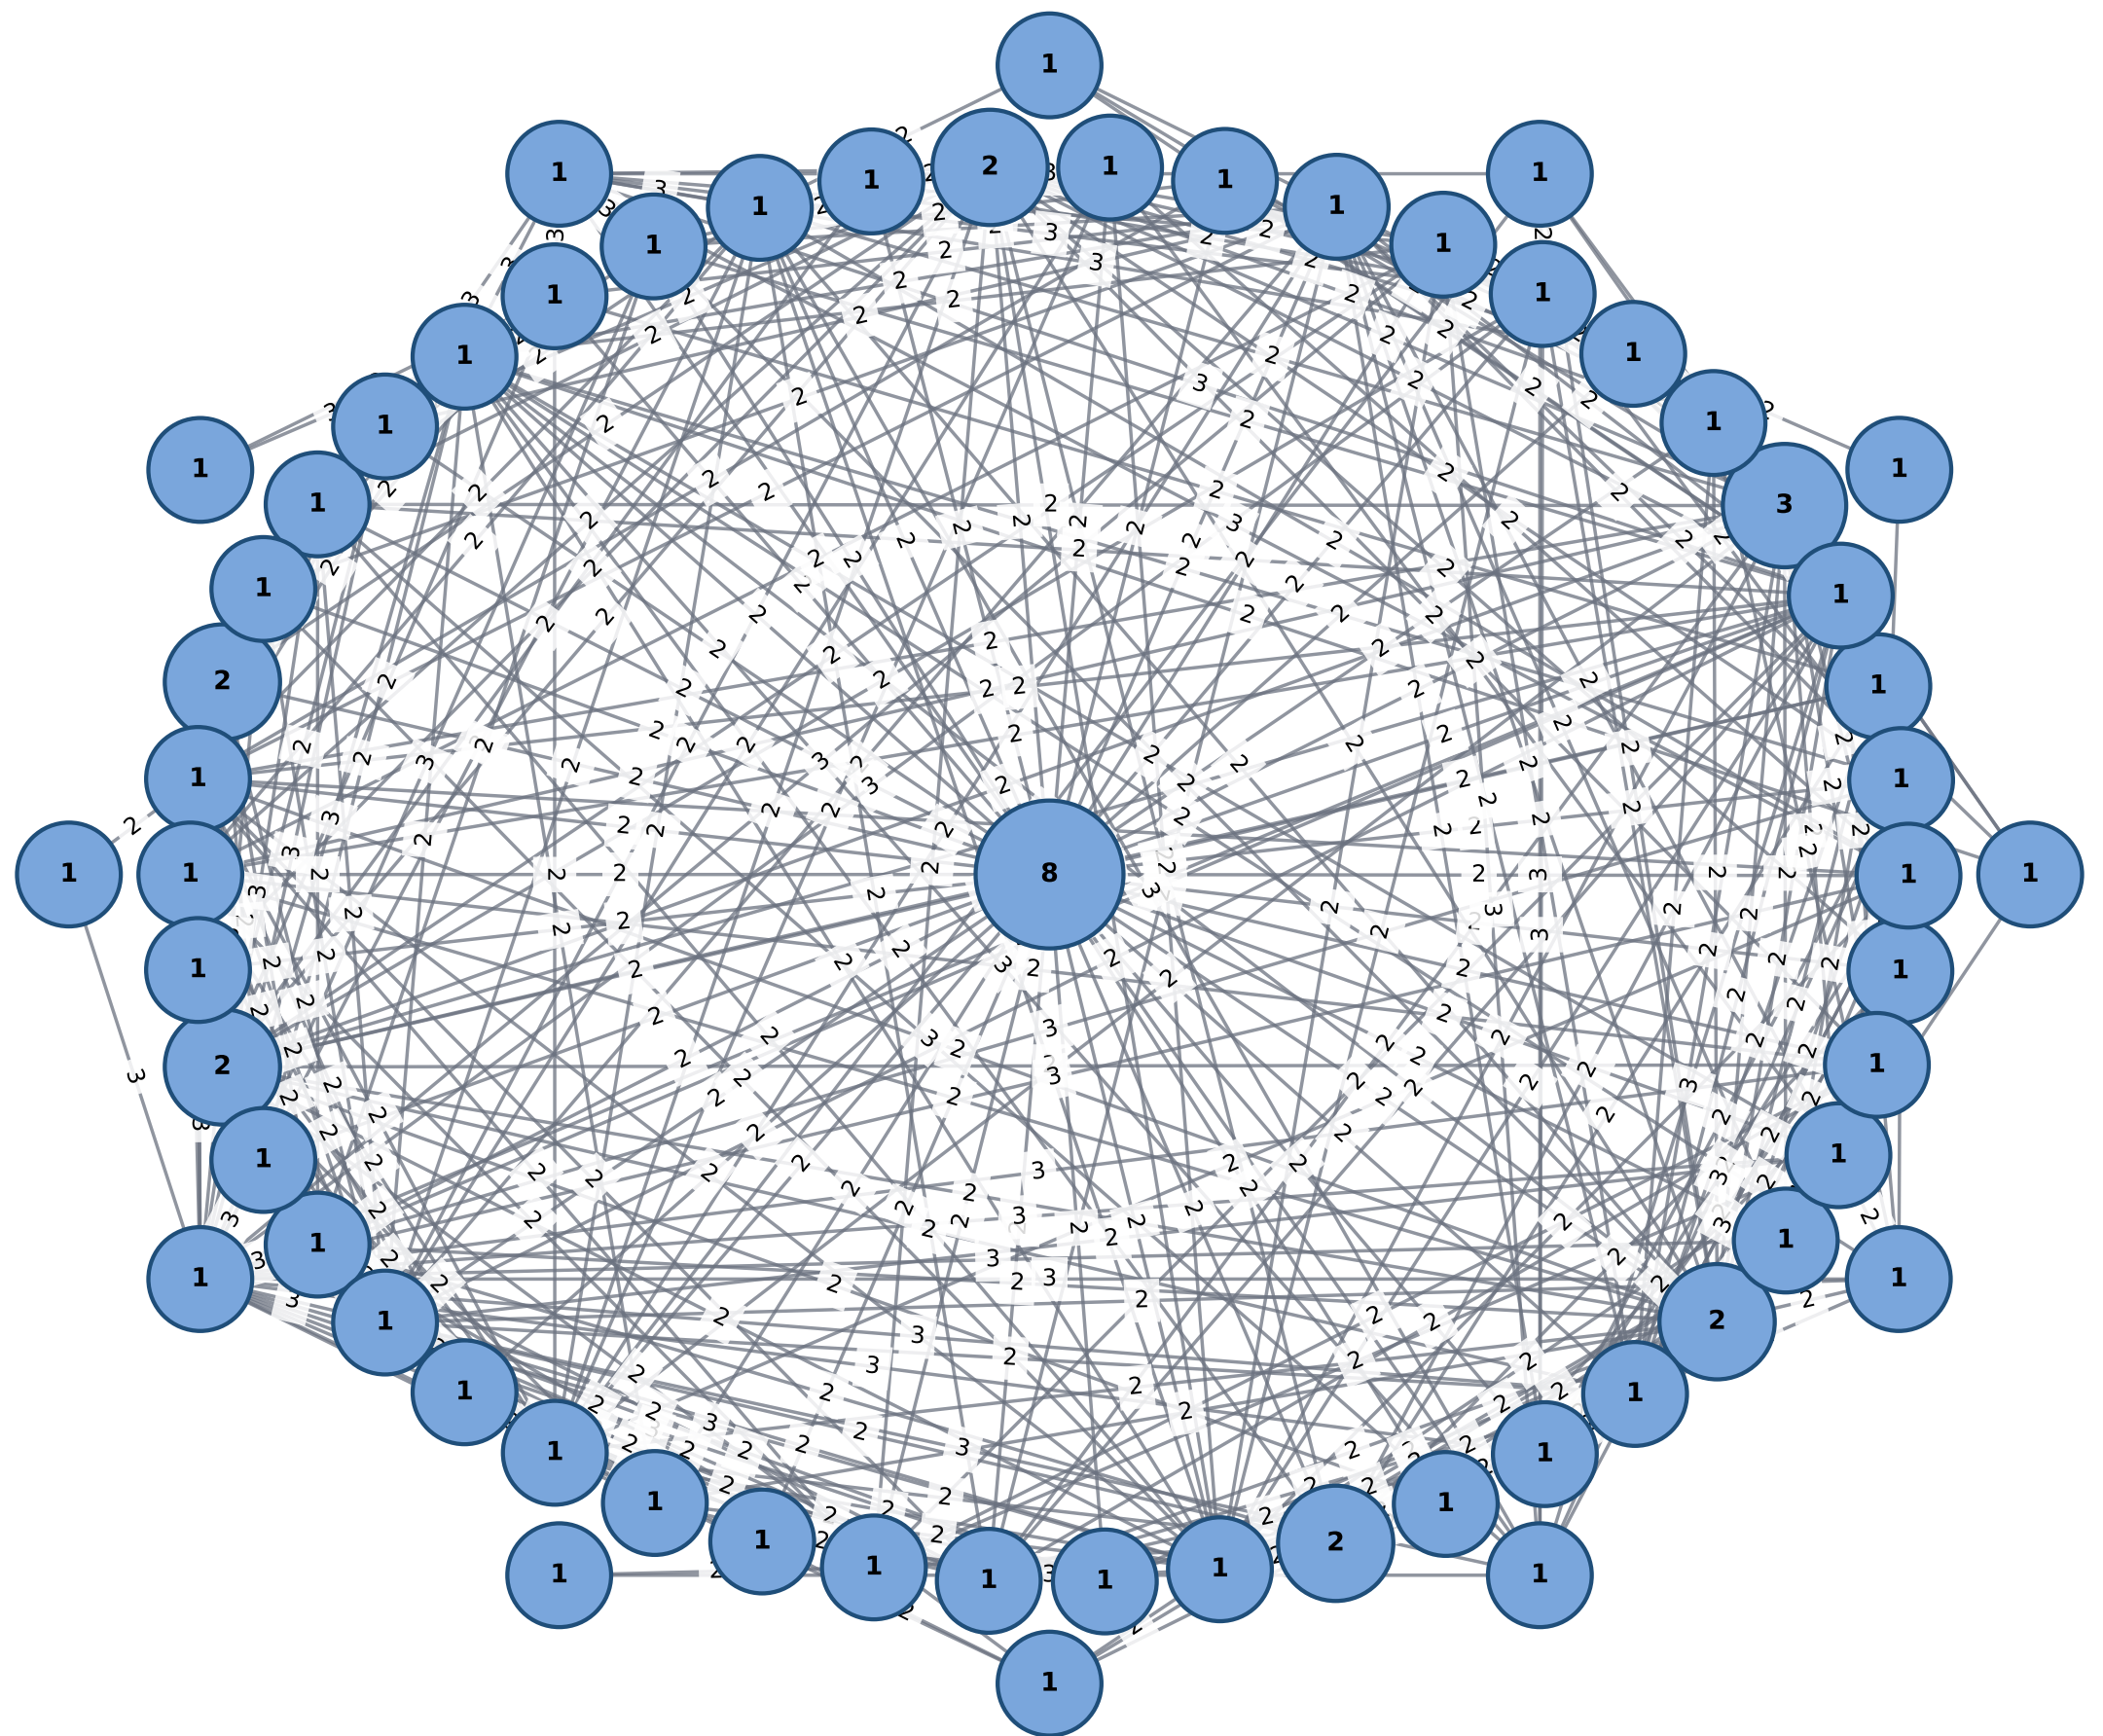

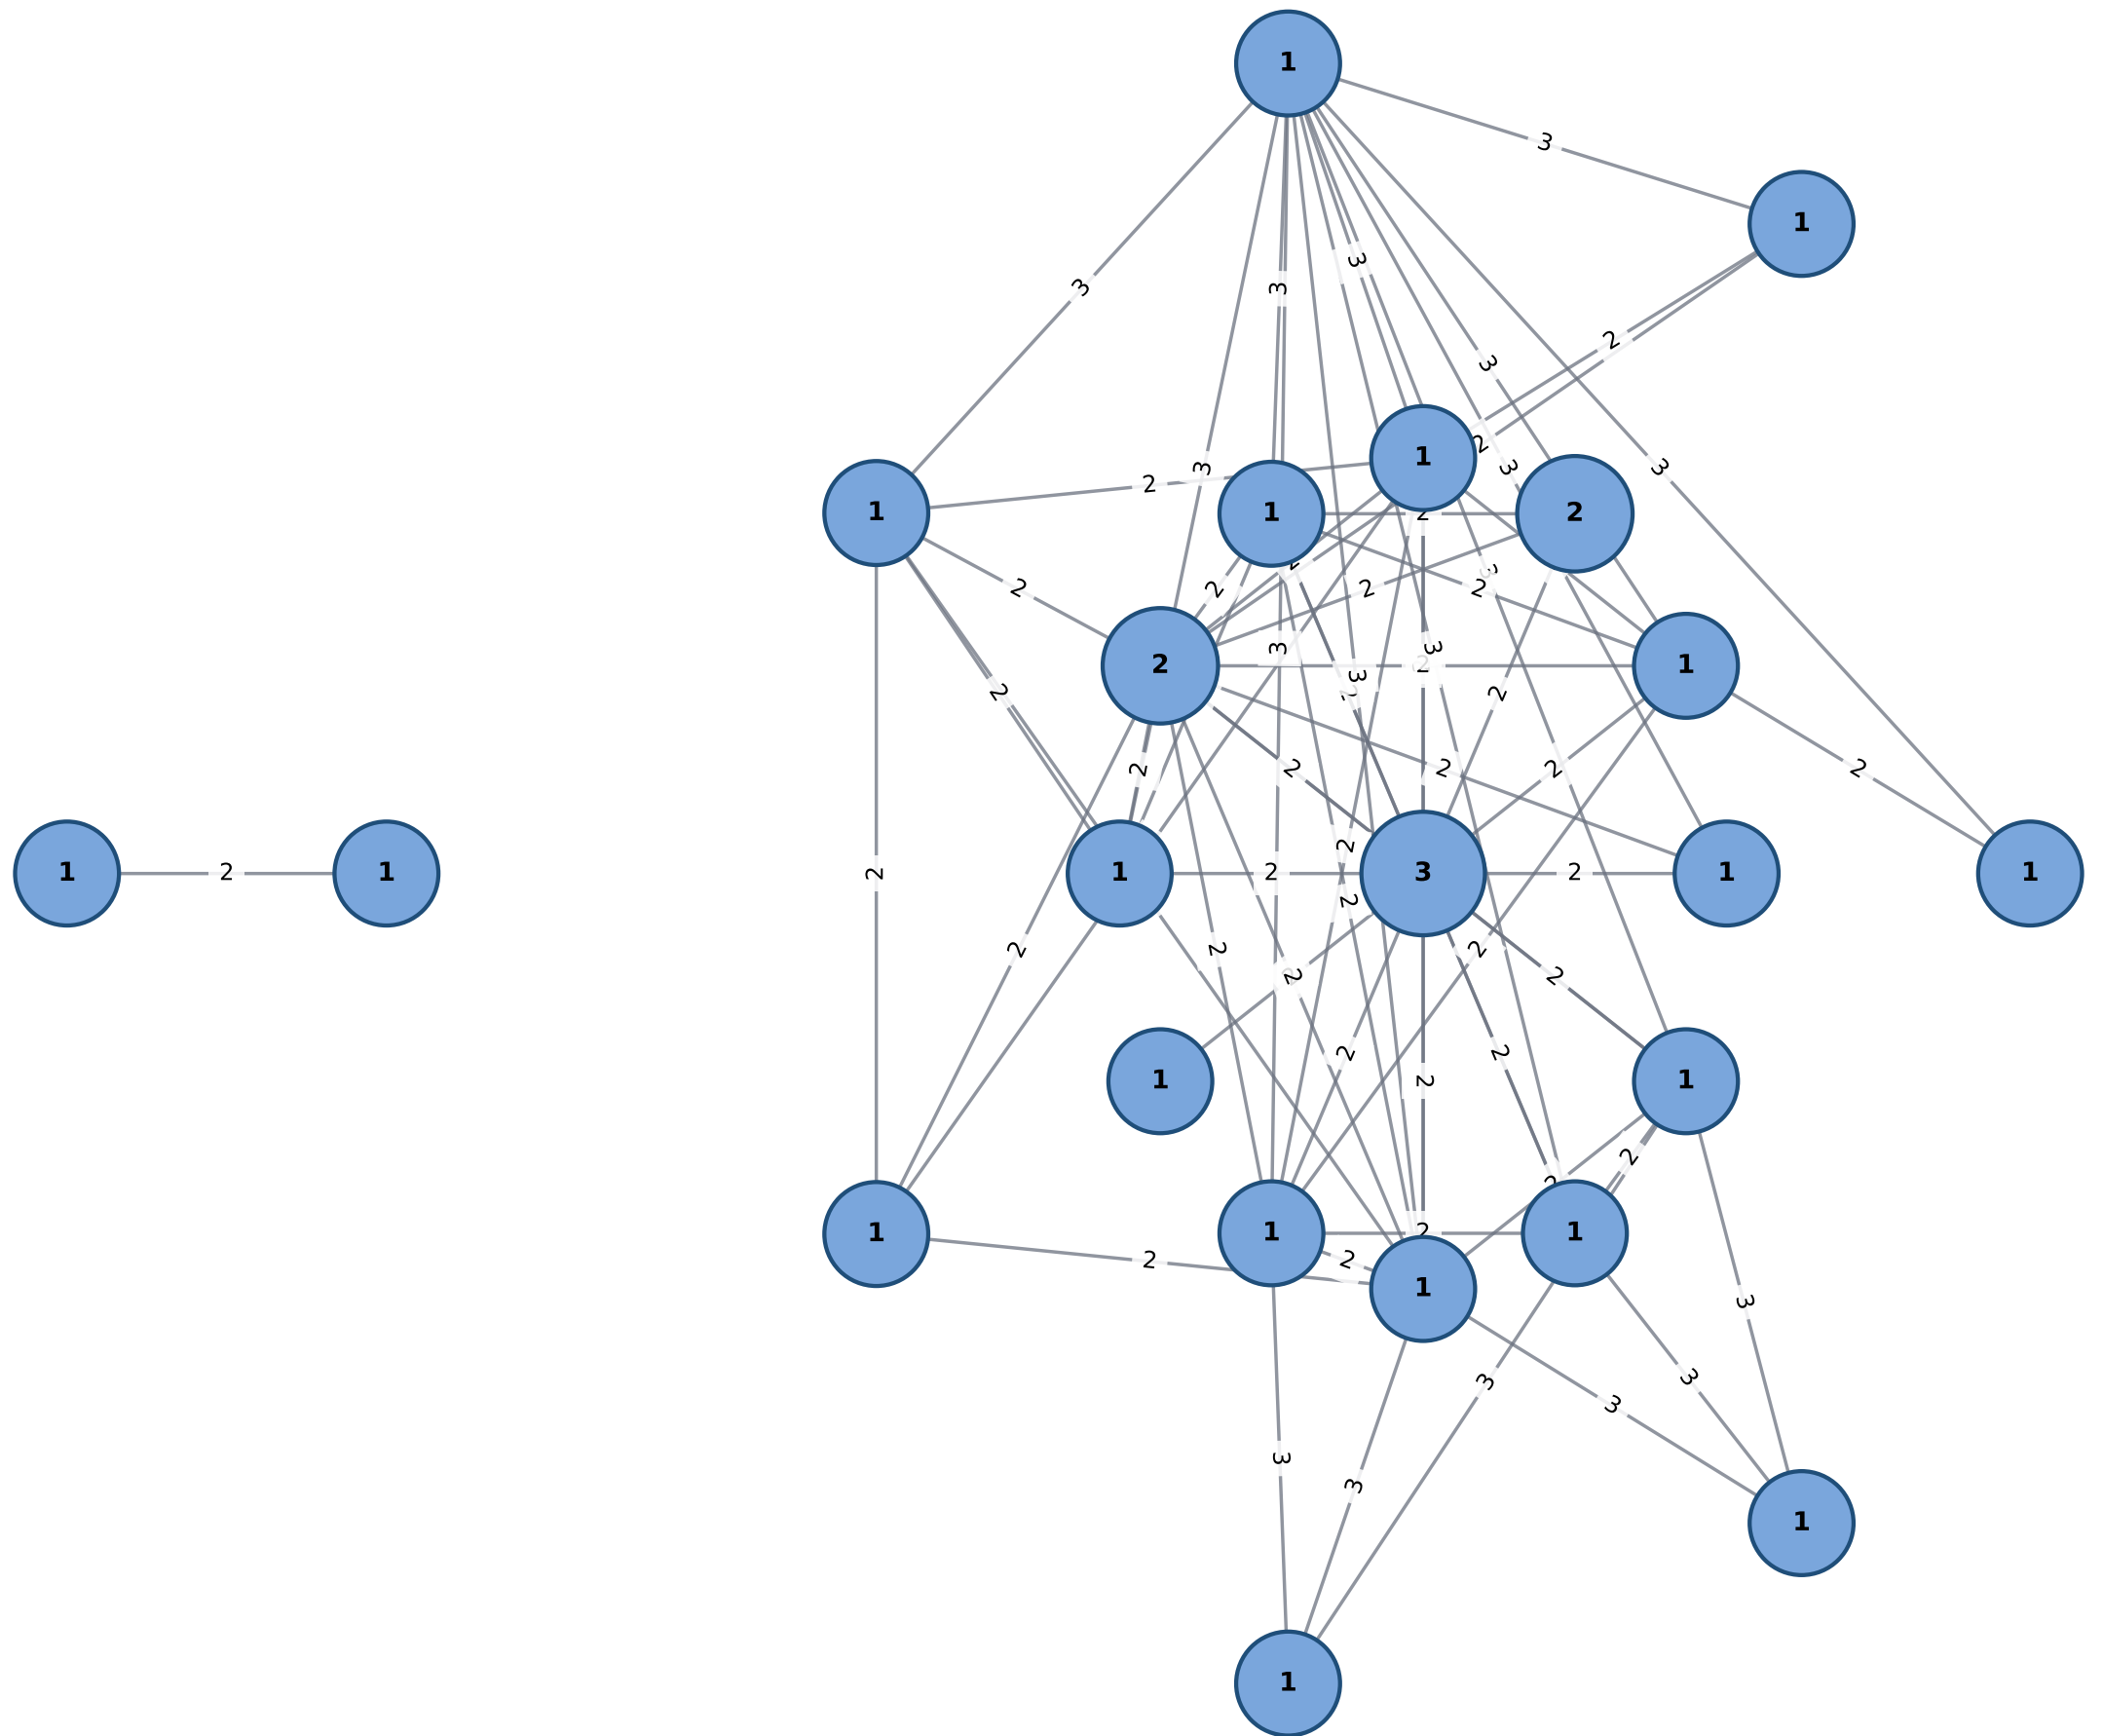

death sudden: cluster map (automatic layout, closest connections only)

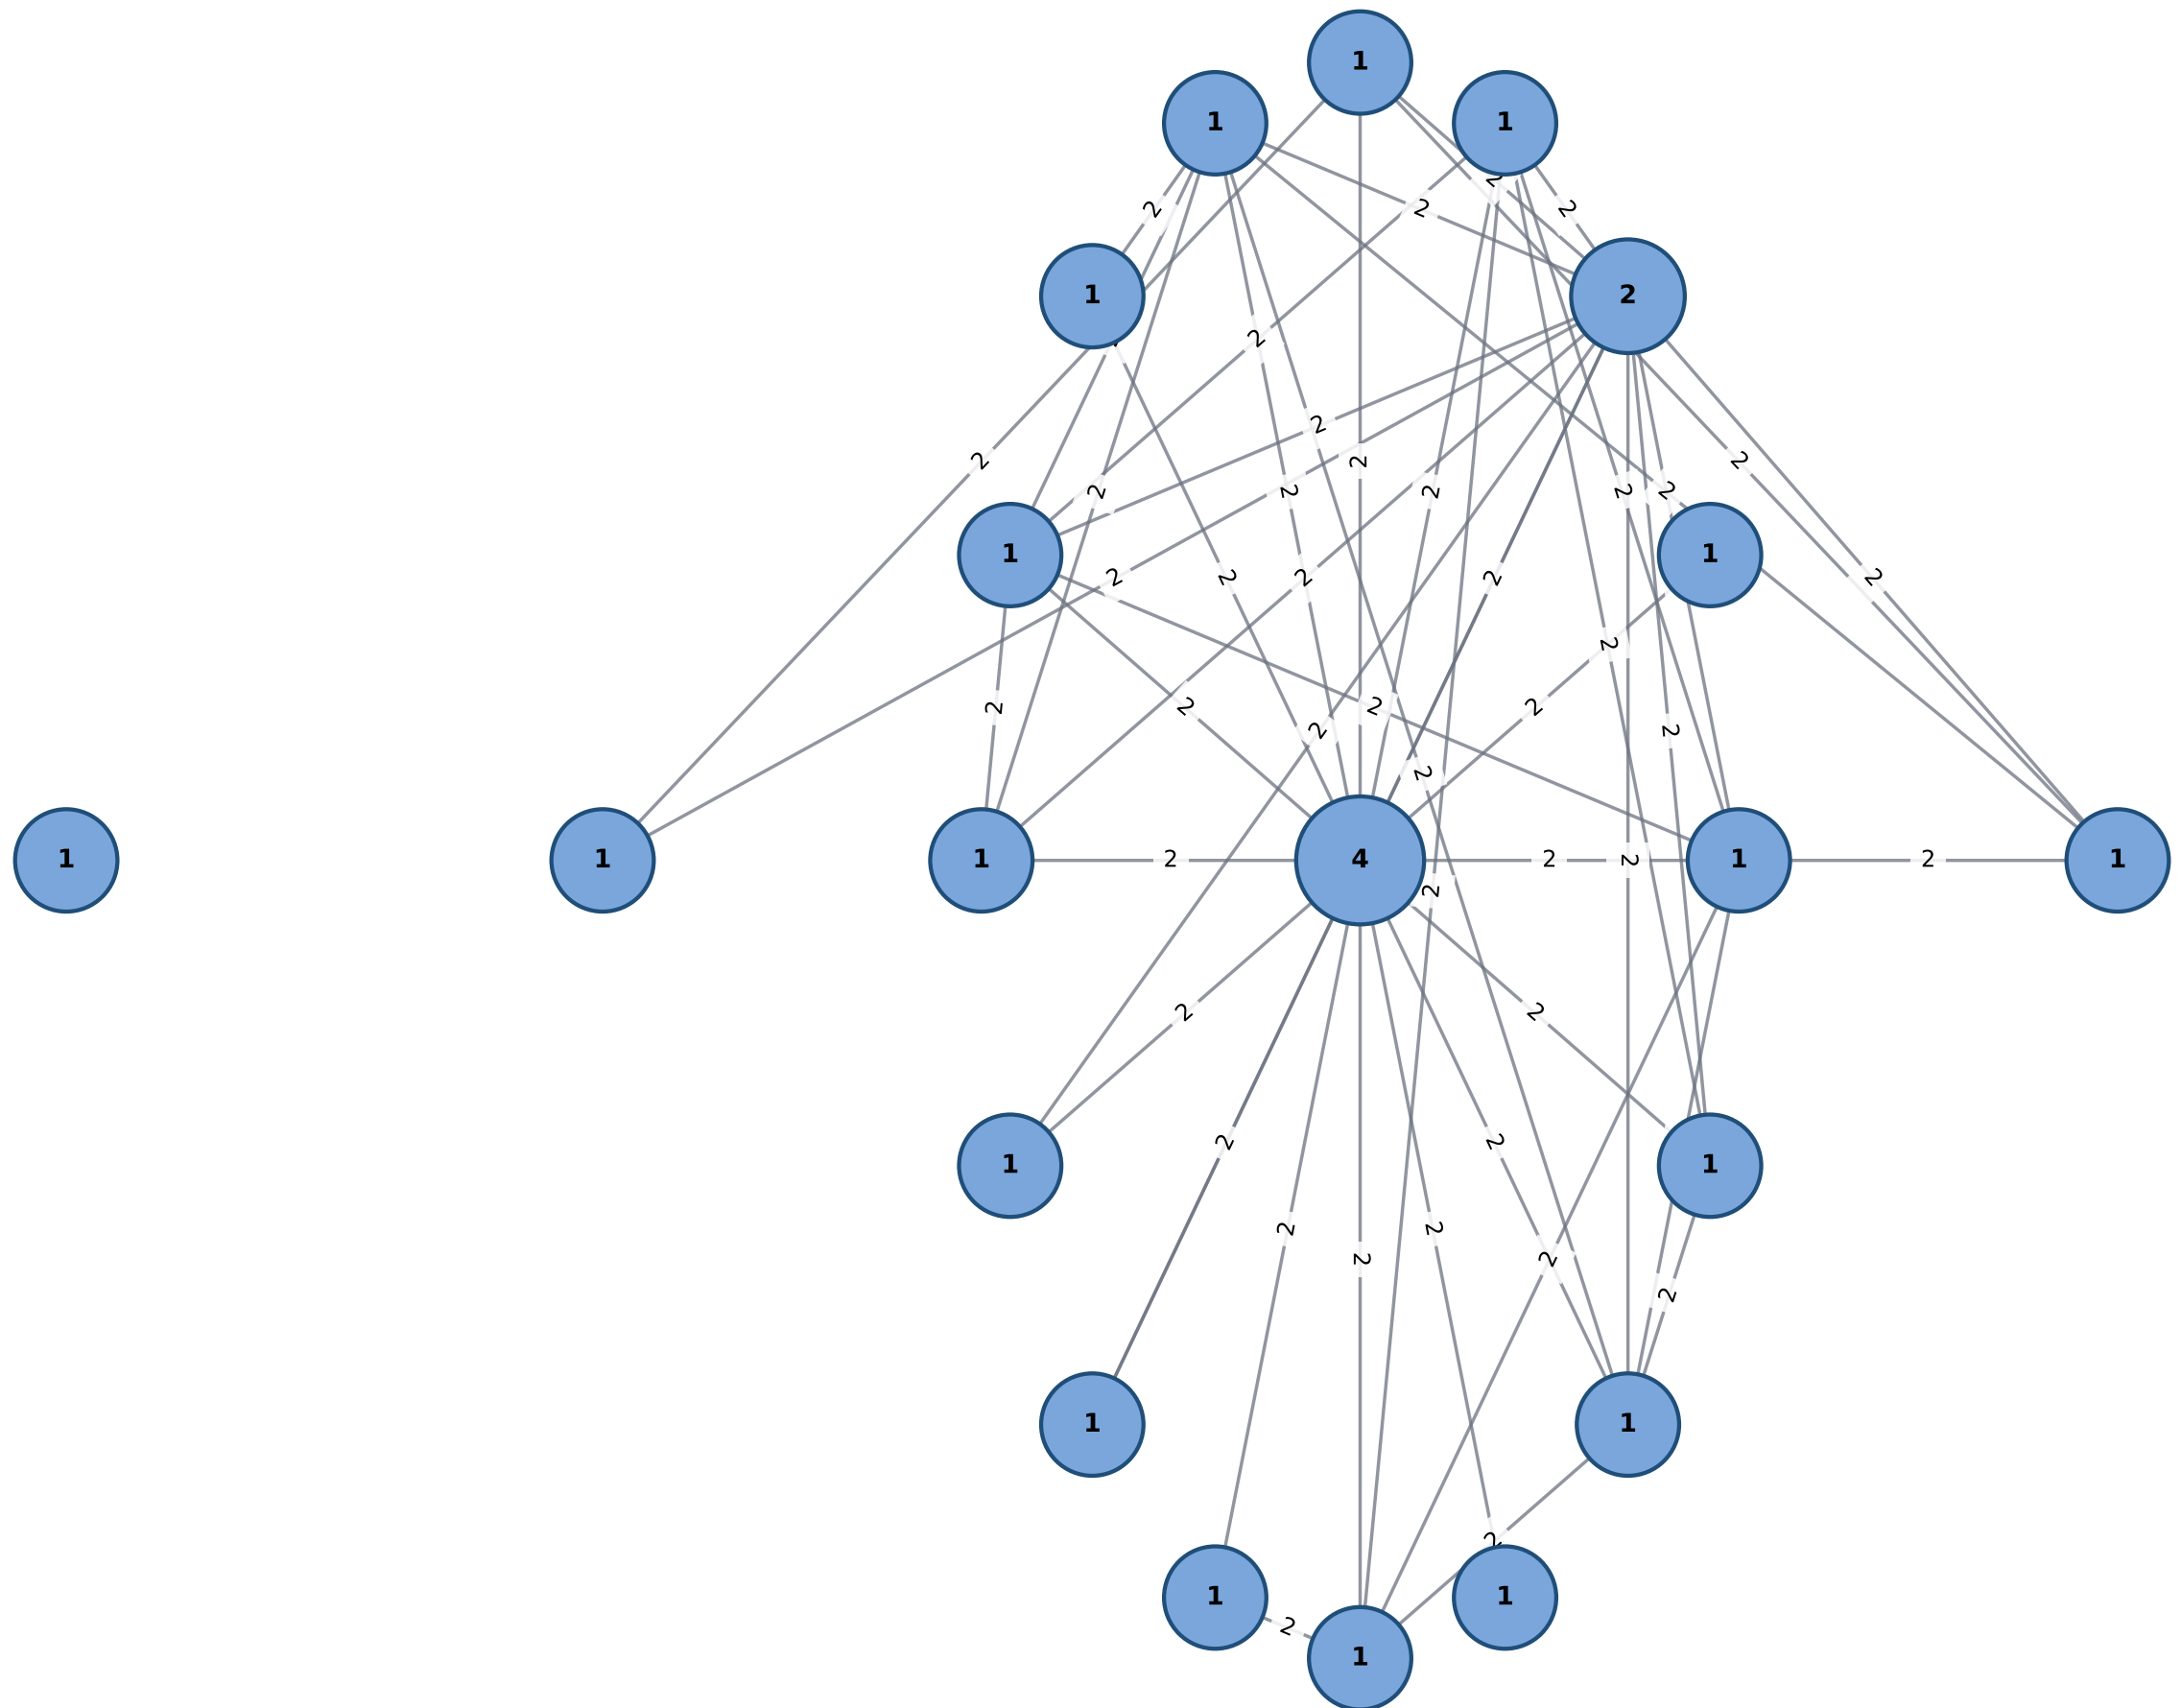

diabetes mellitus type 2: cluster map (automatic layout, closest connections only)

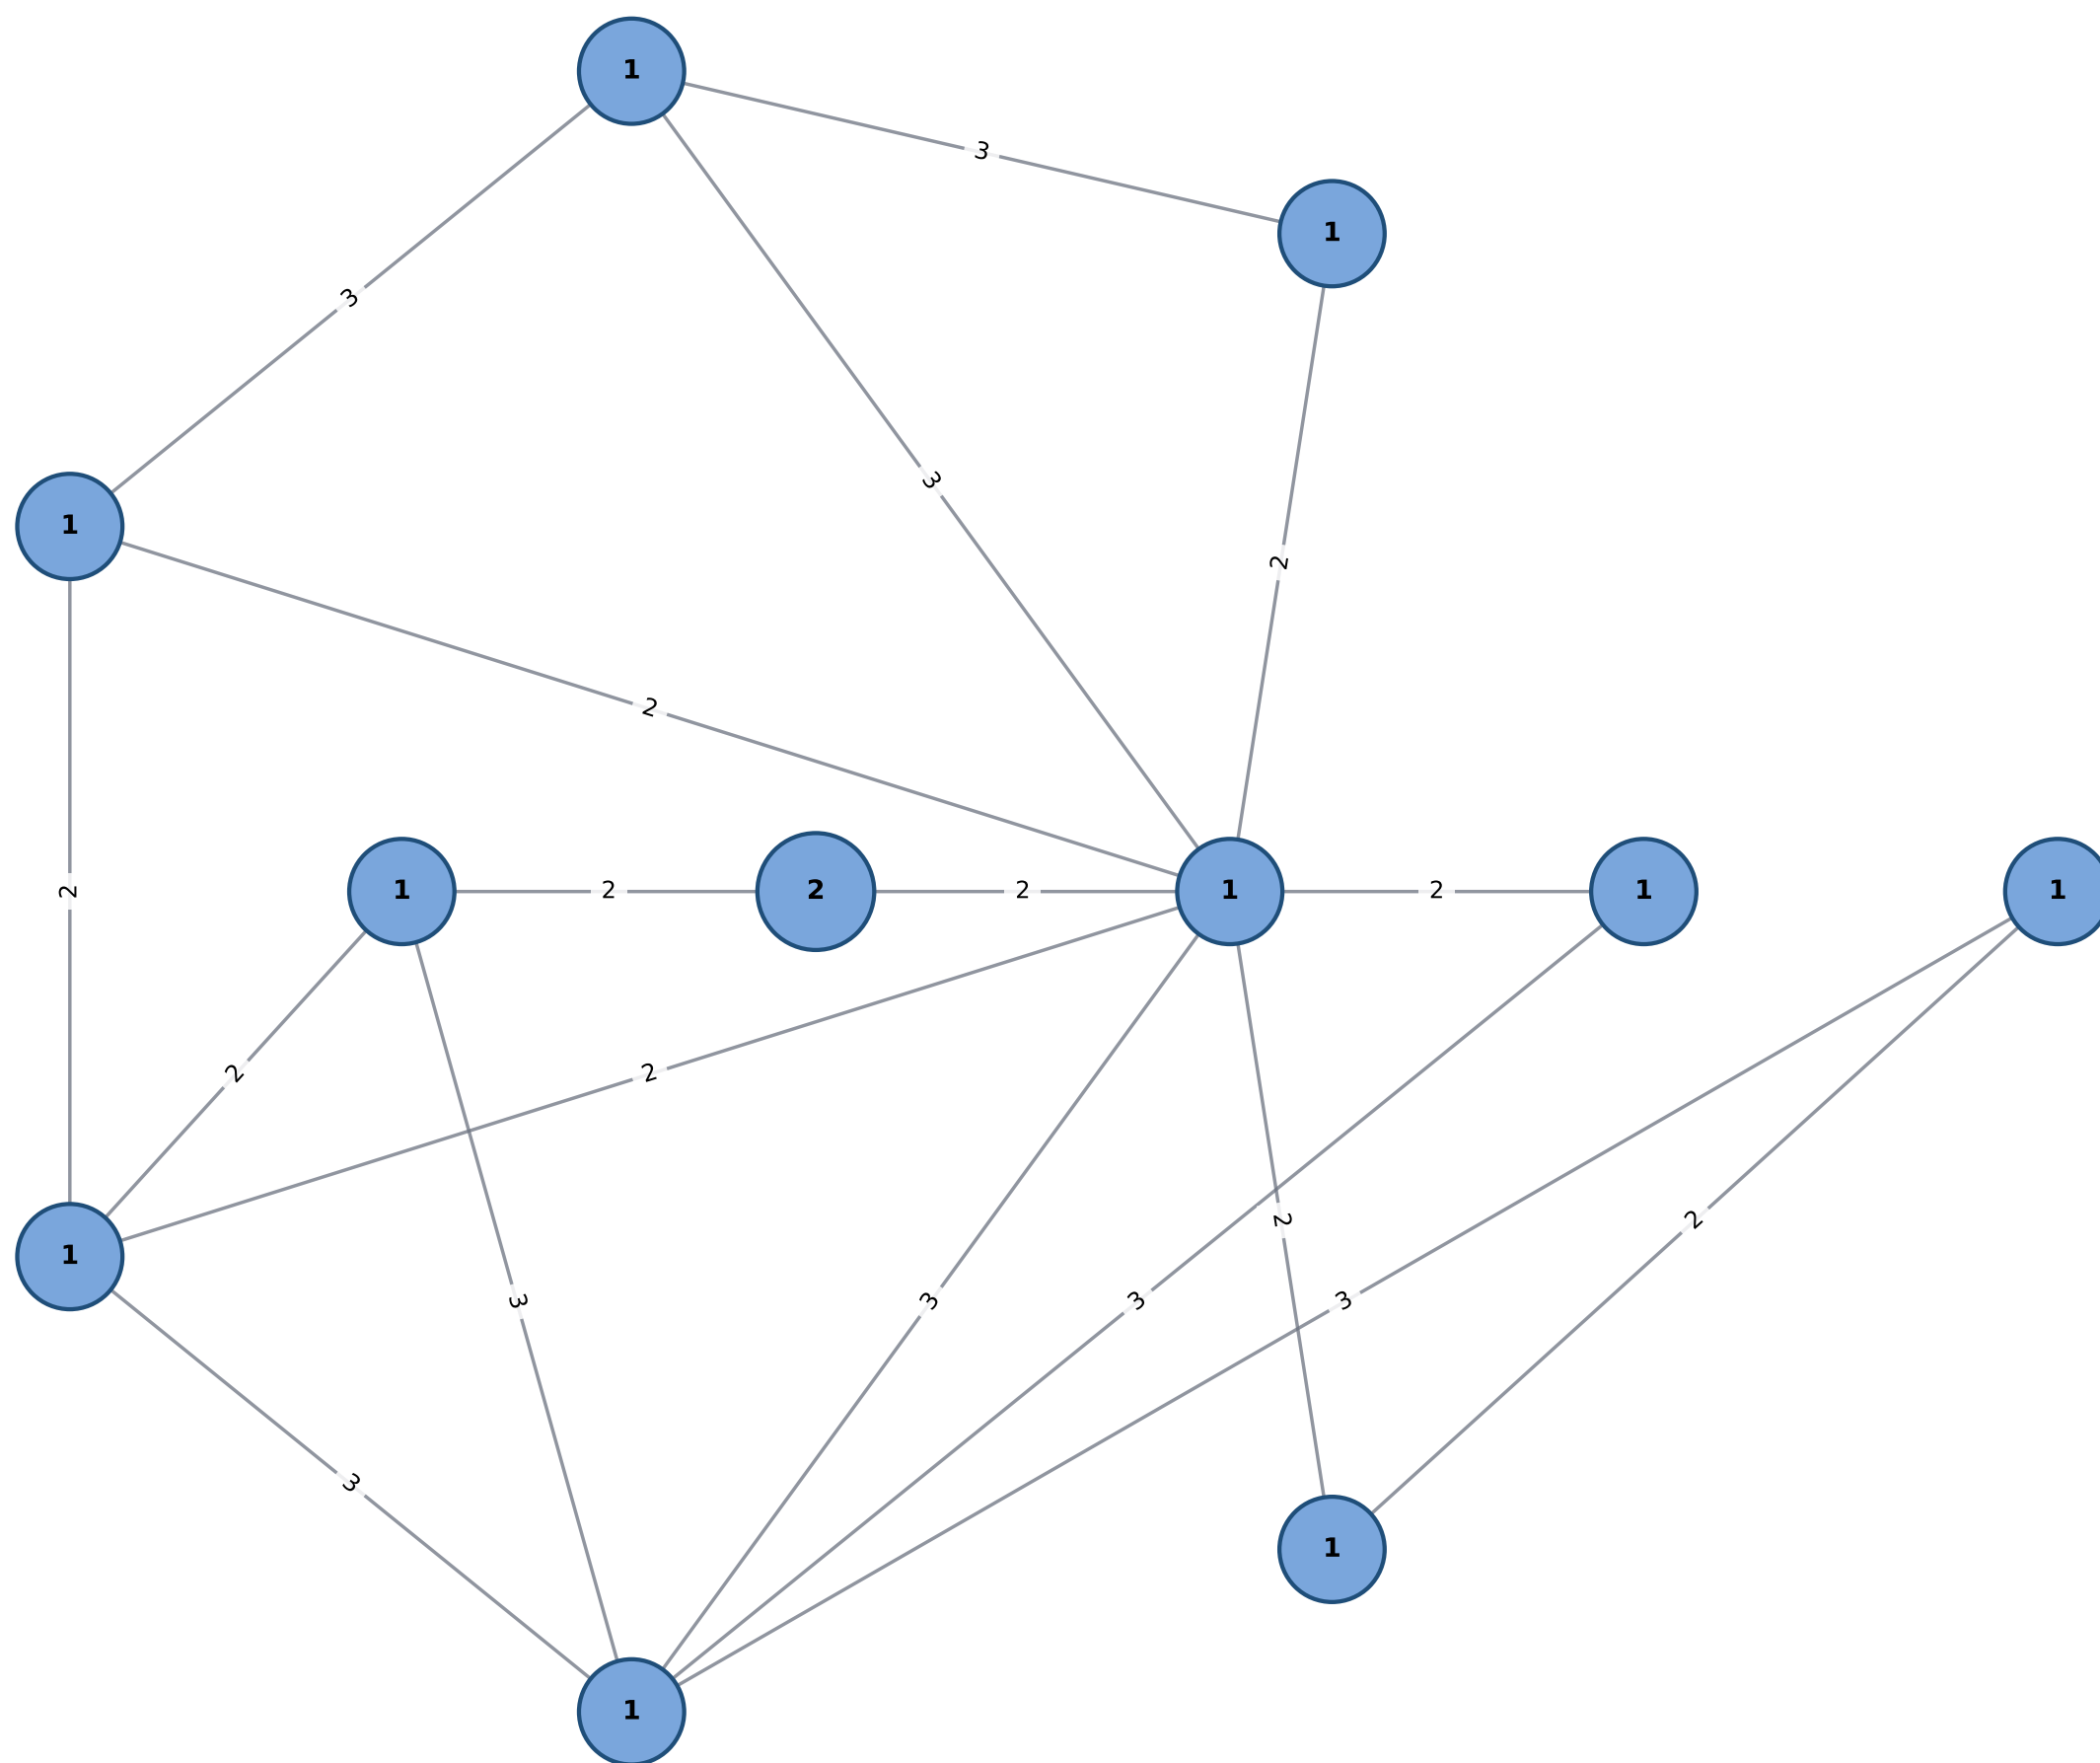

dwarfism: cluster map (automatic layout, closest connections only)

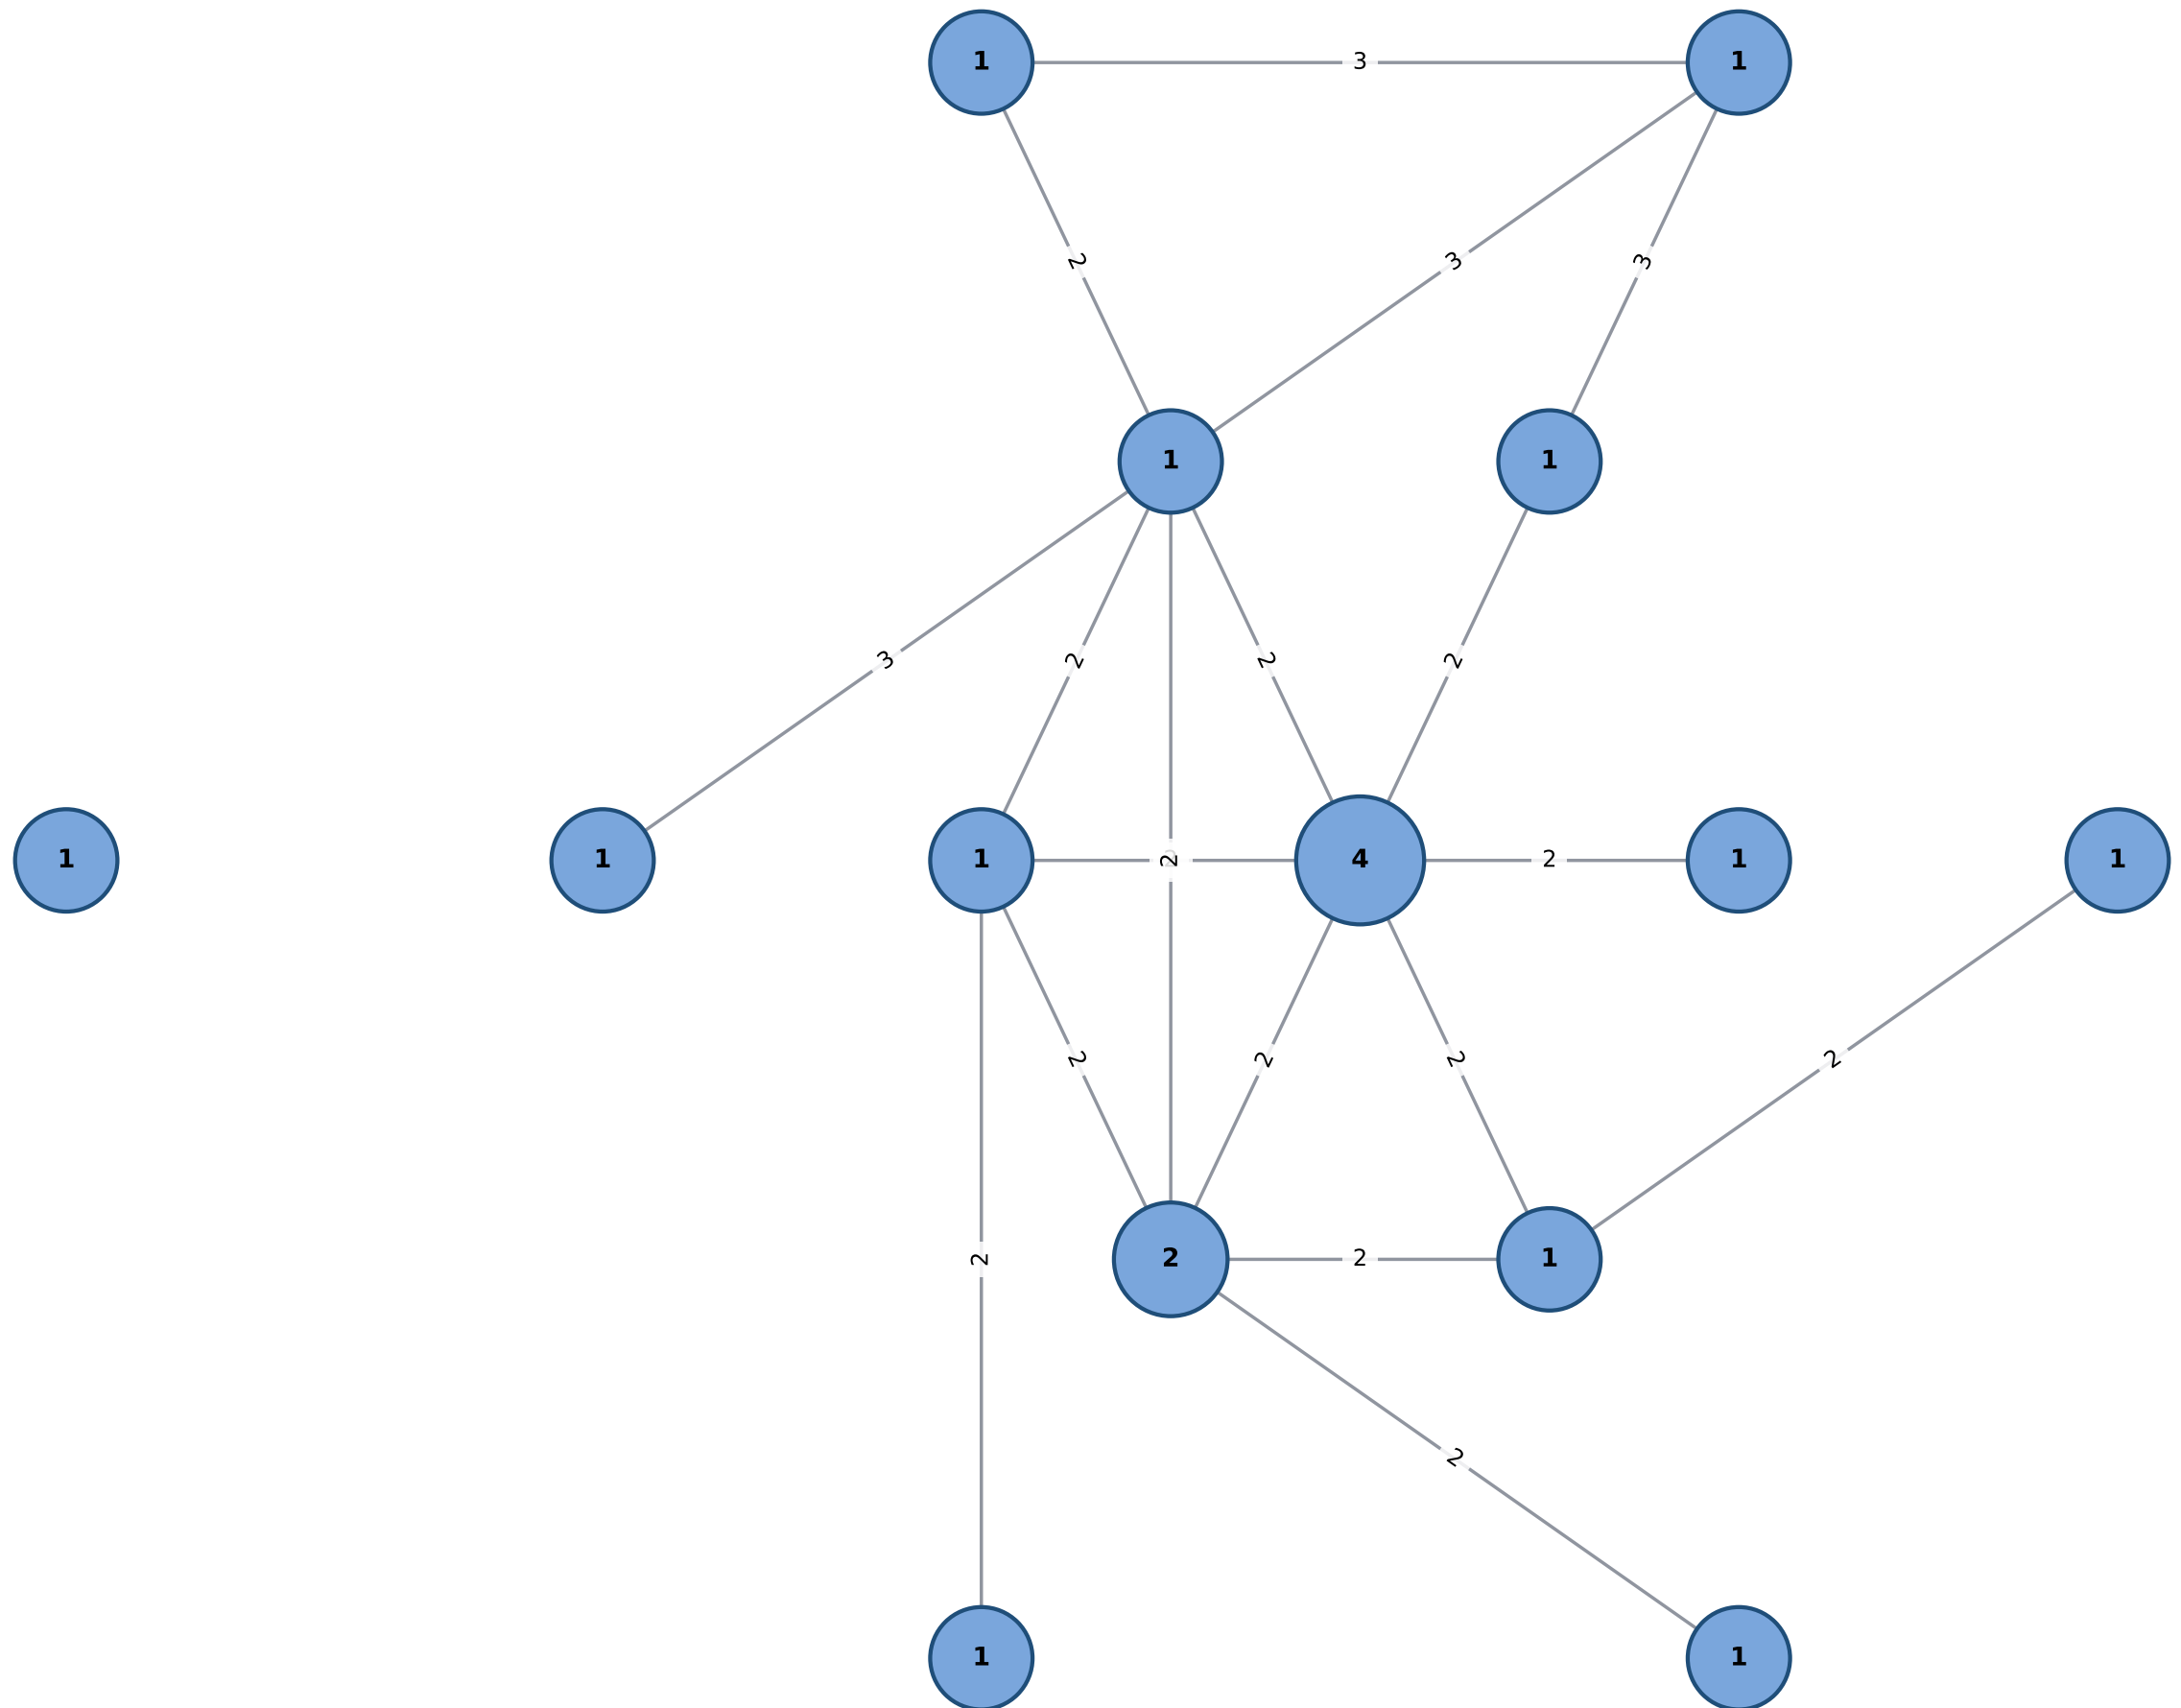

esophageal diseases: cluster map (automatic layout, closest connections only)

exophthalmos: cluster map (automatic layout, closest connections only)

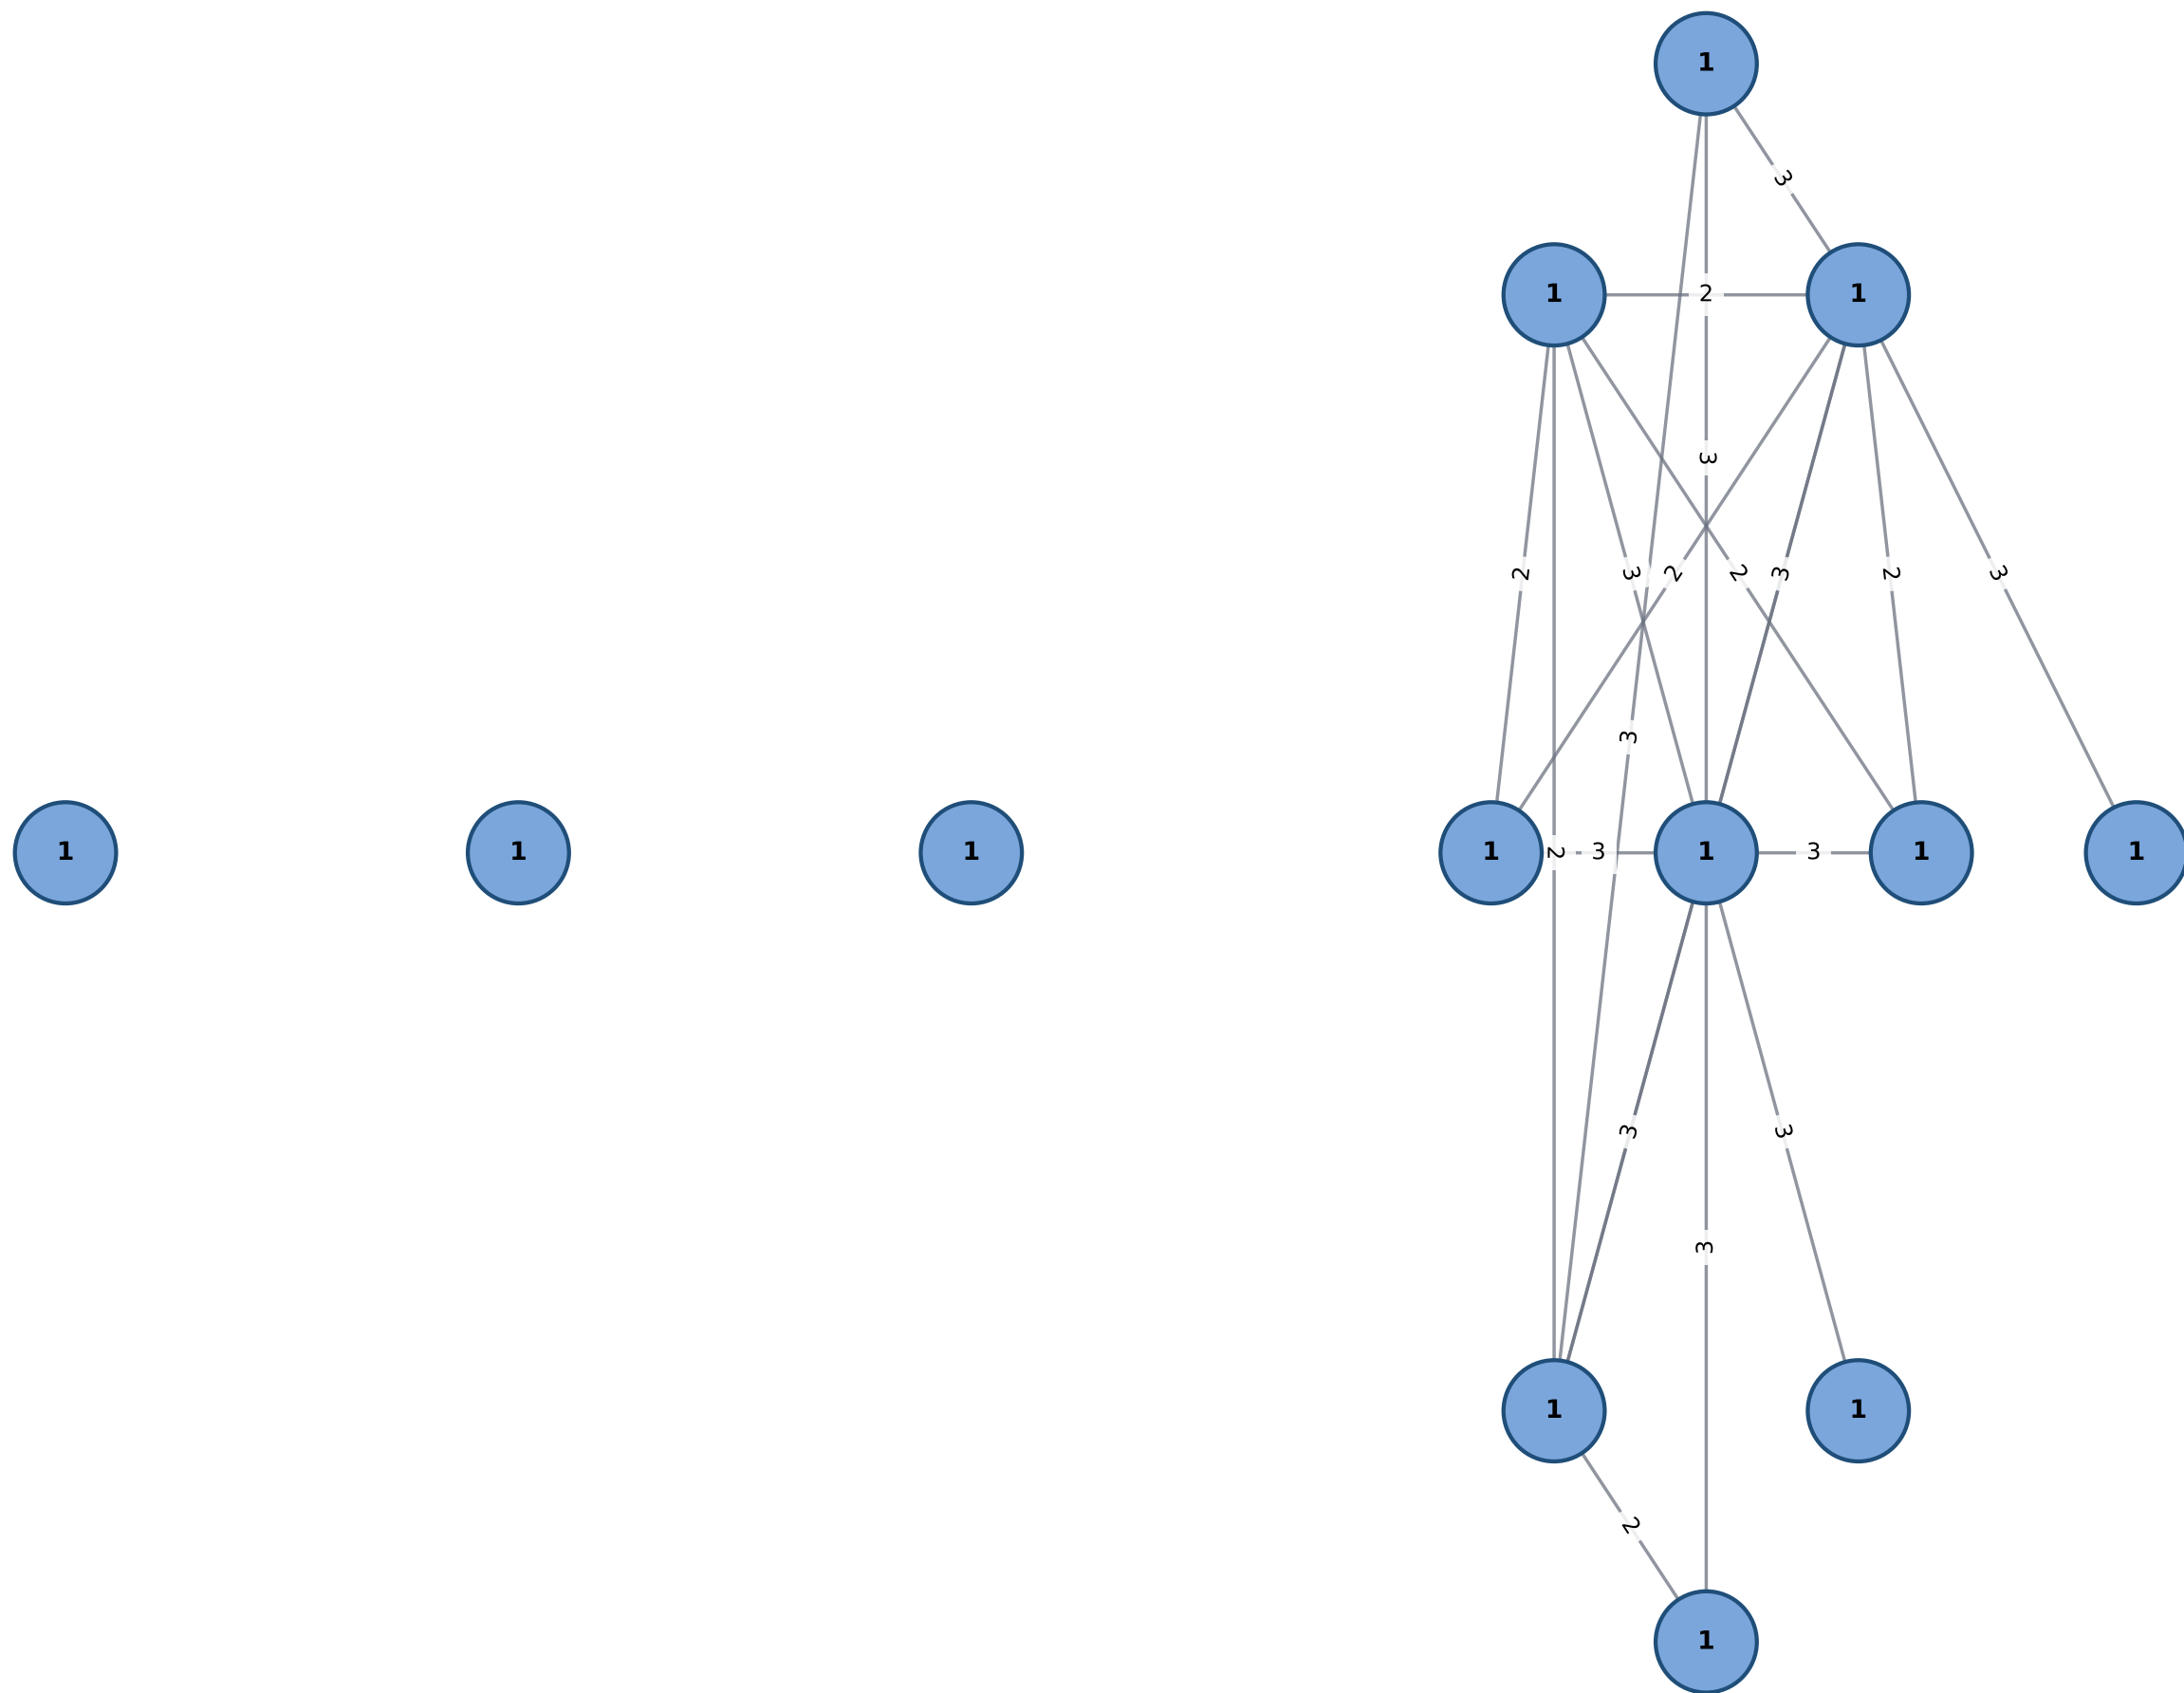

glomerulonephritis: cluster map (automatic layout, closest connections only)

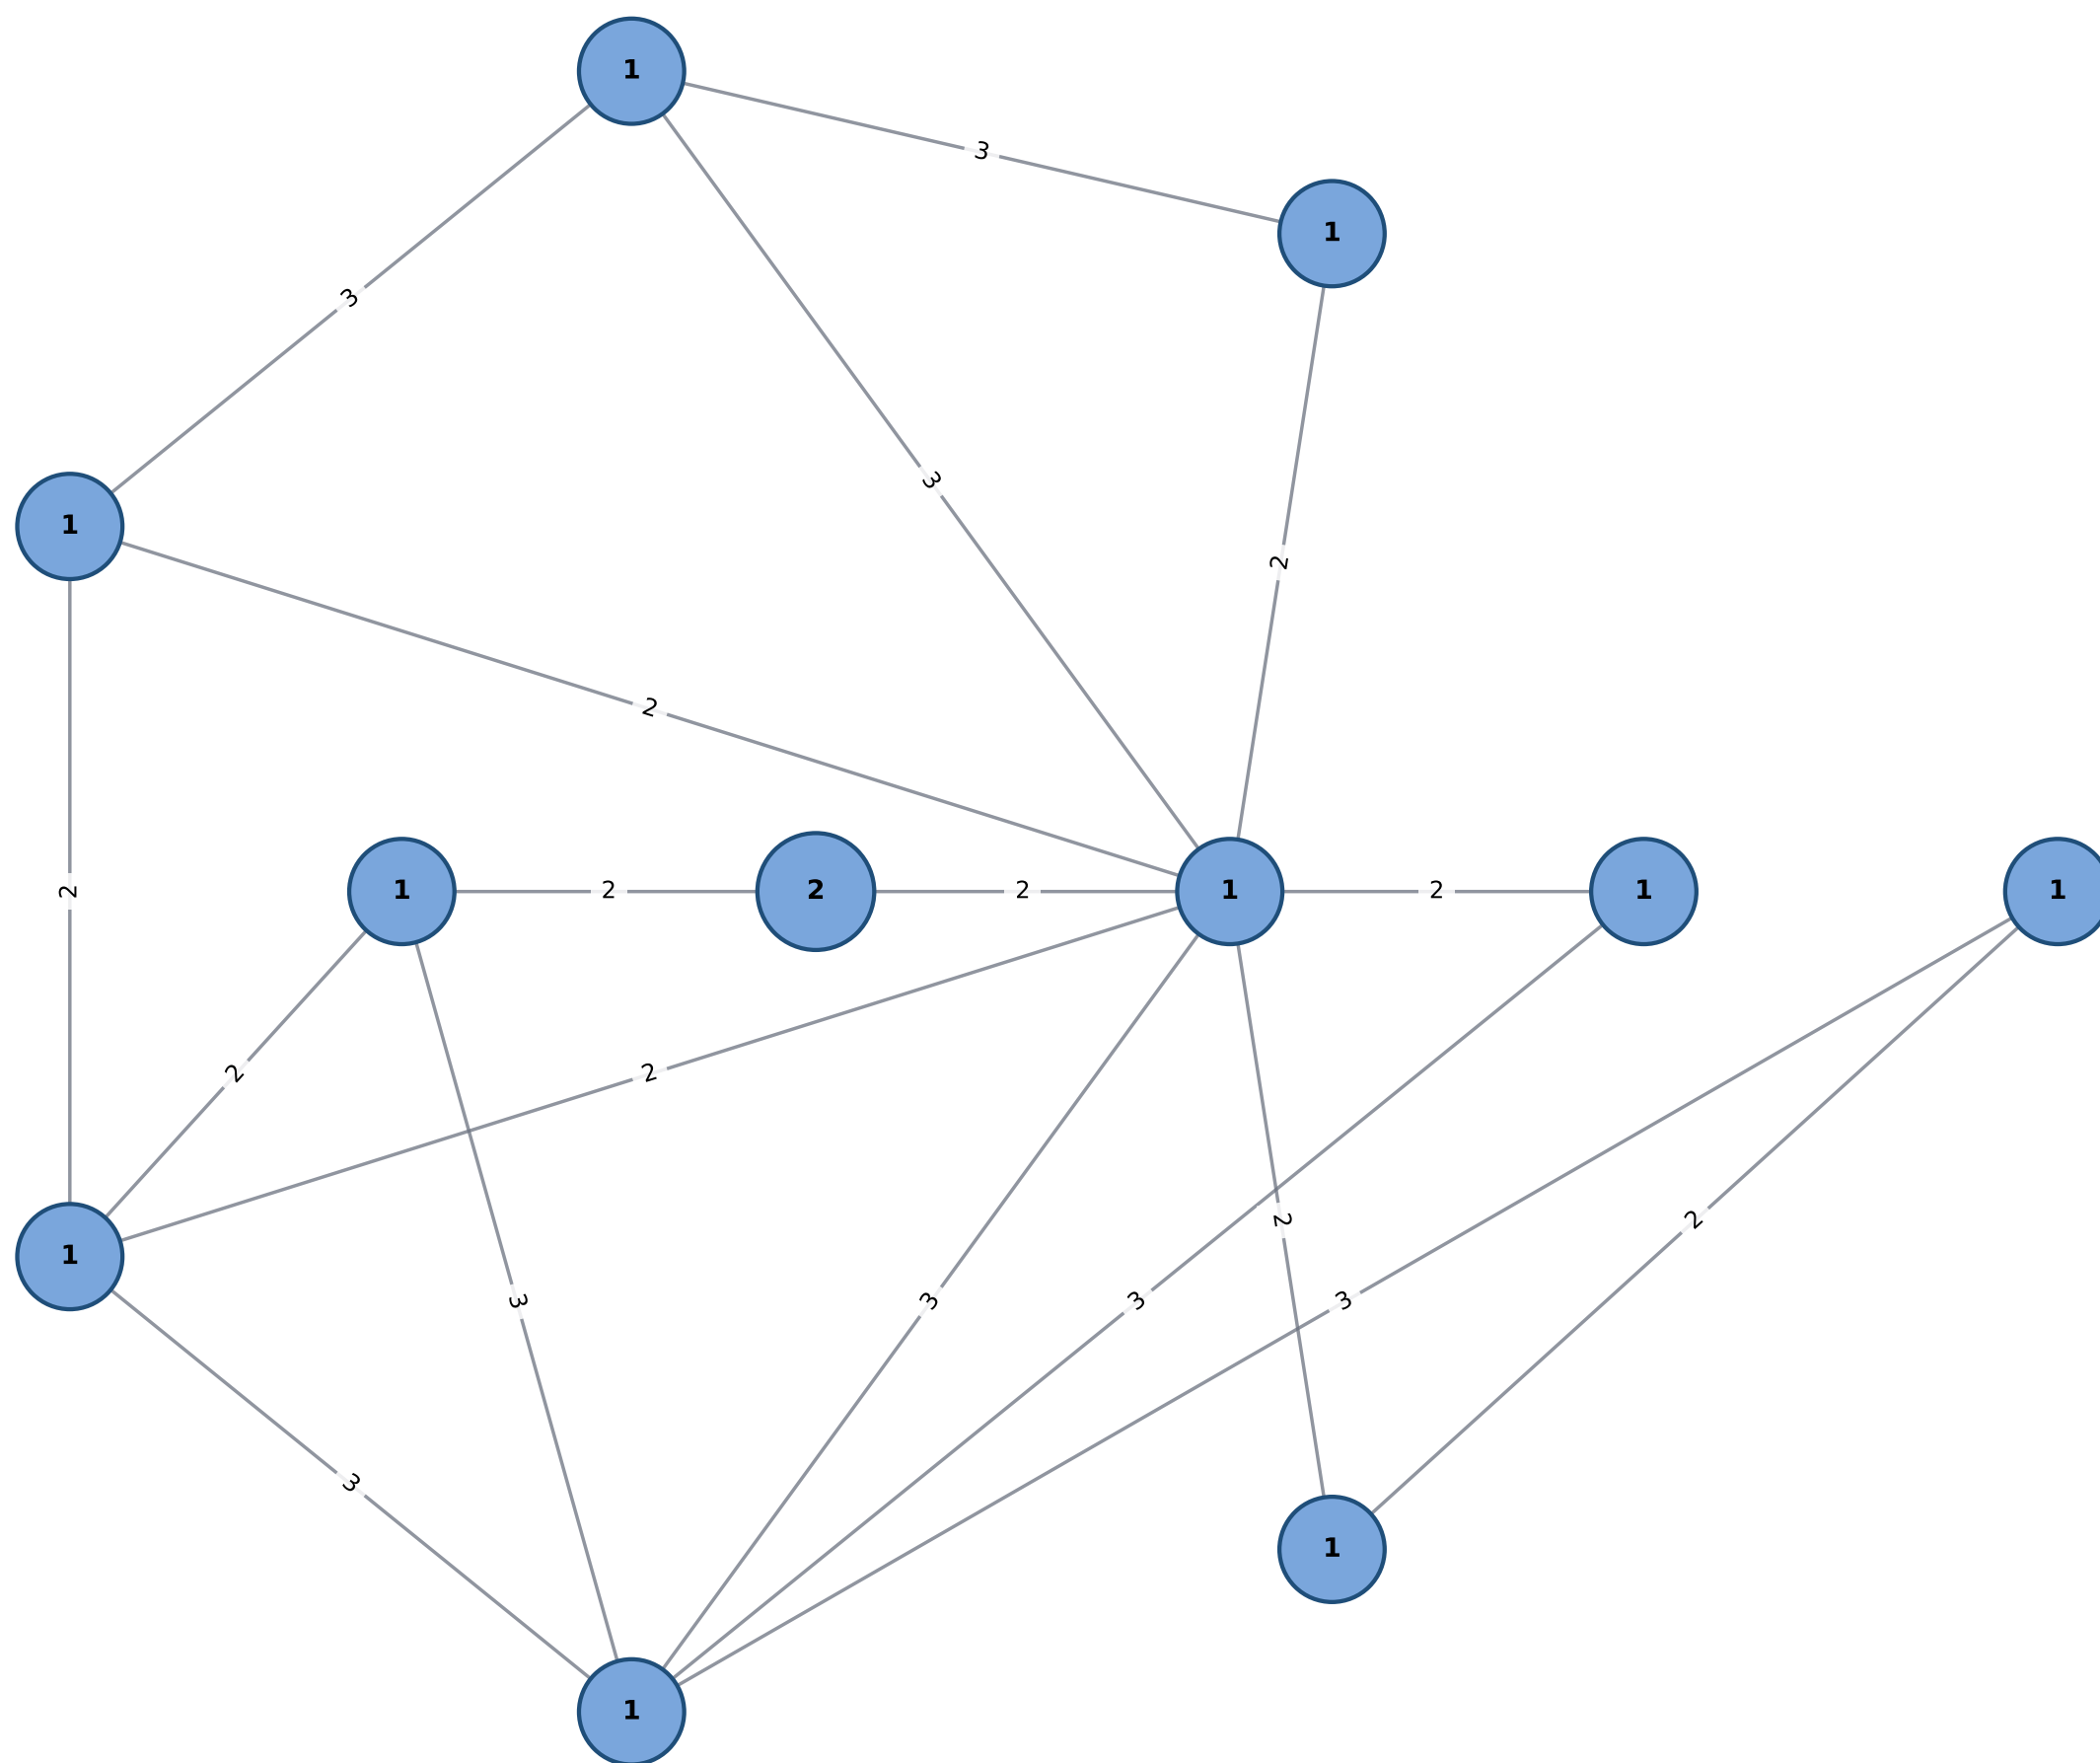

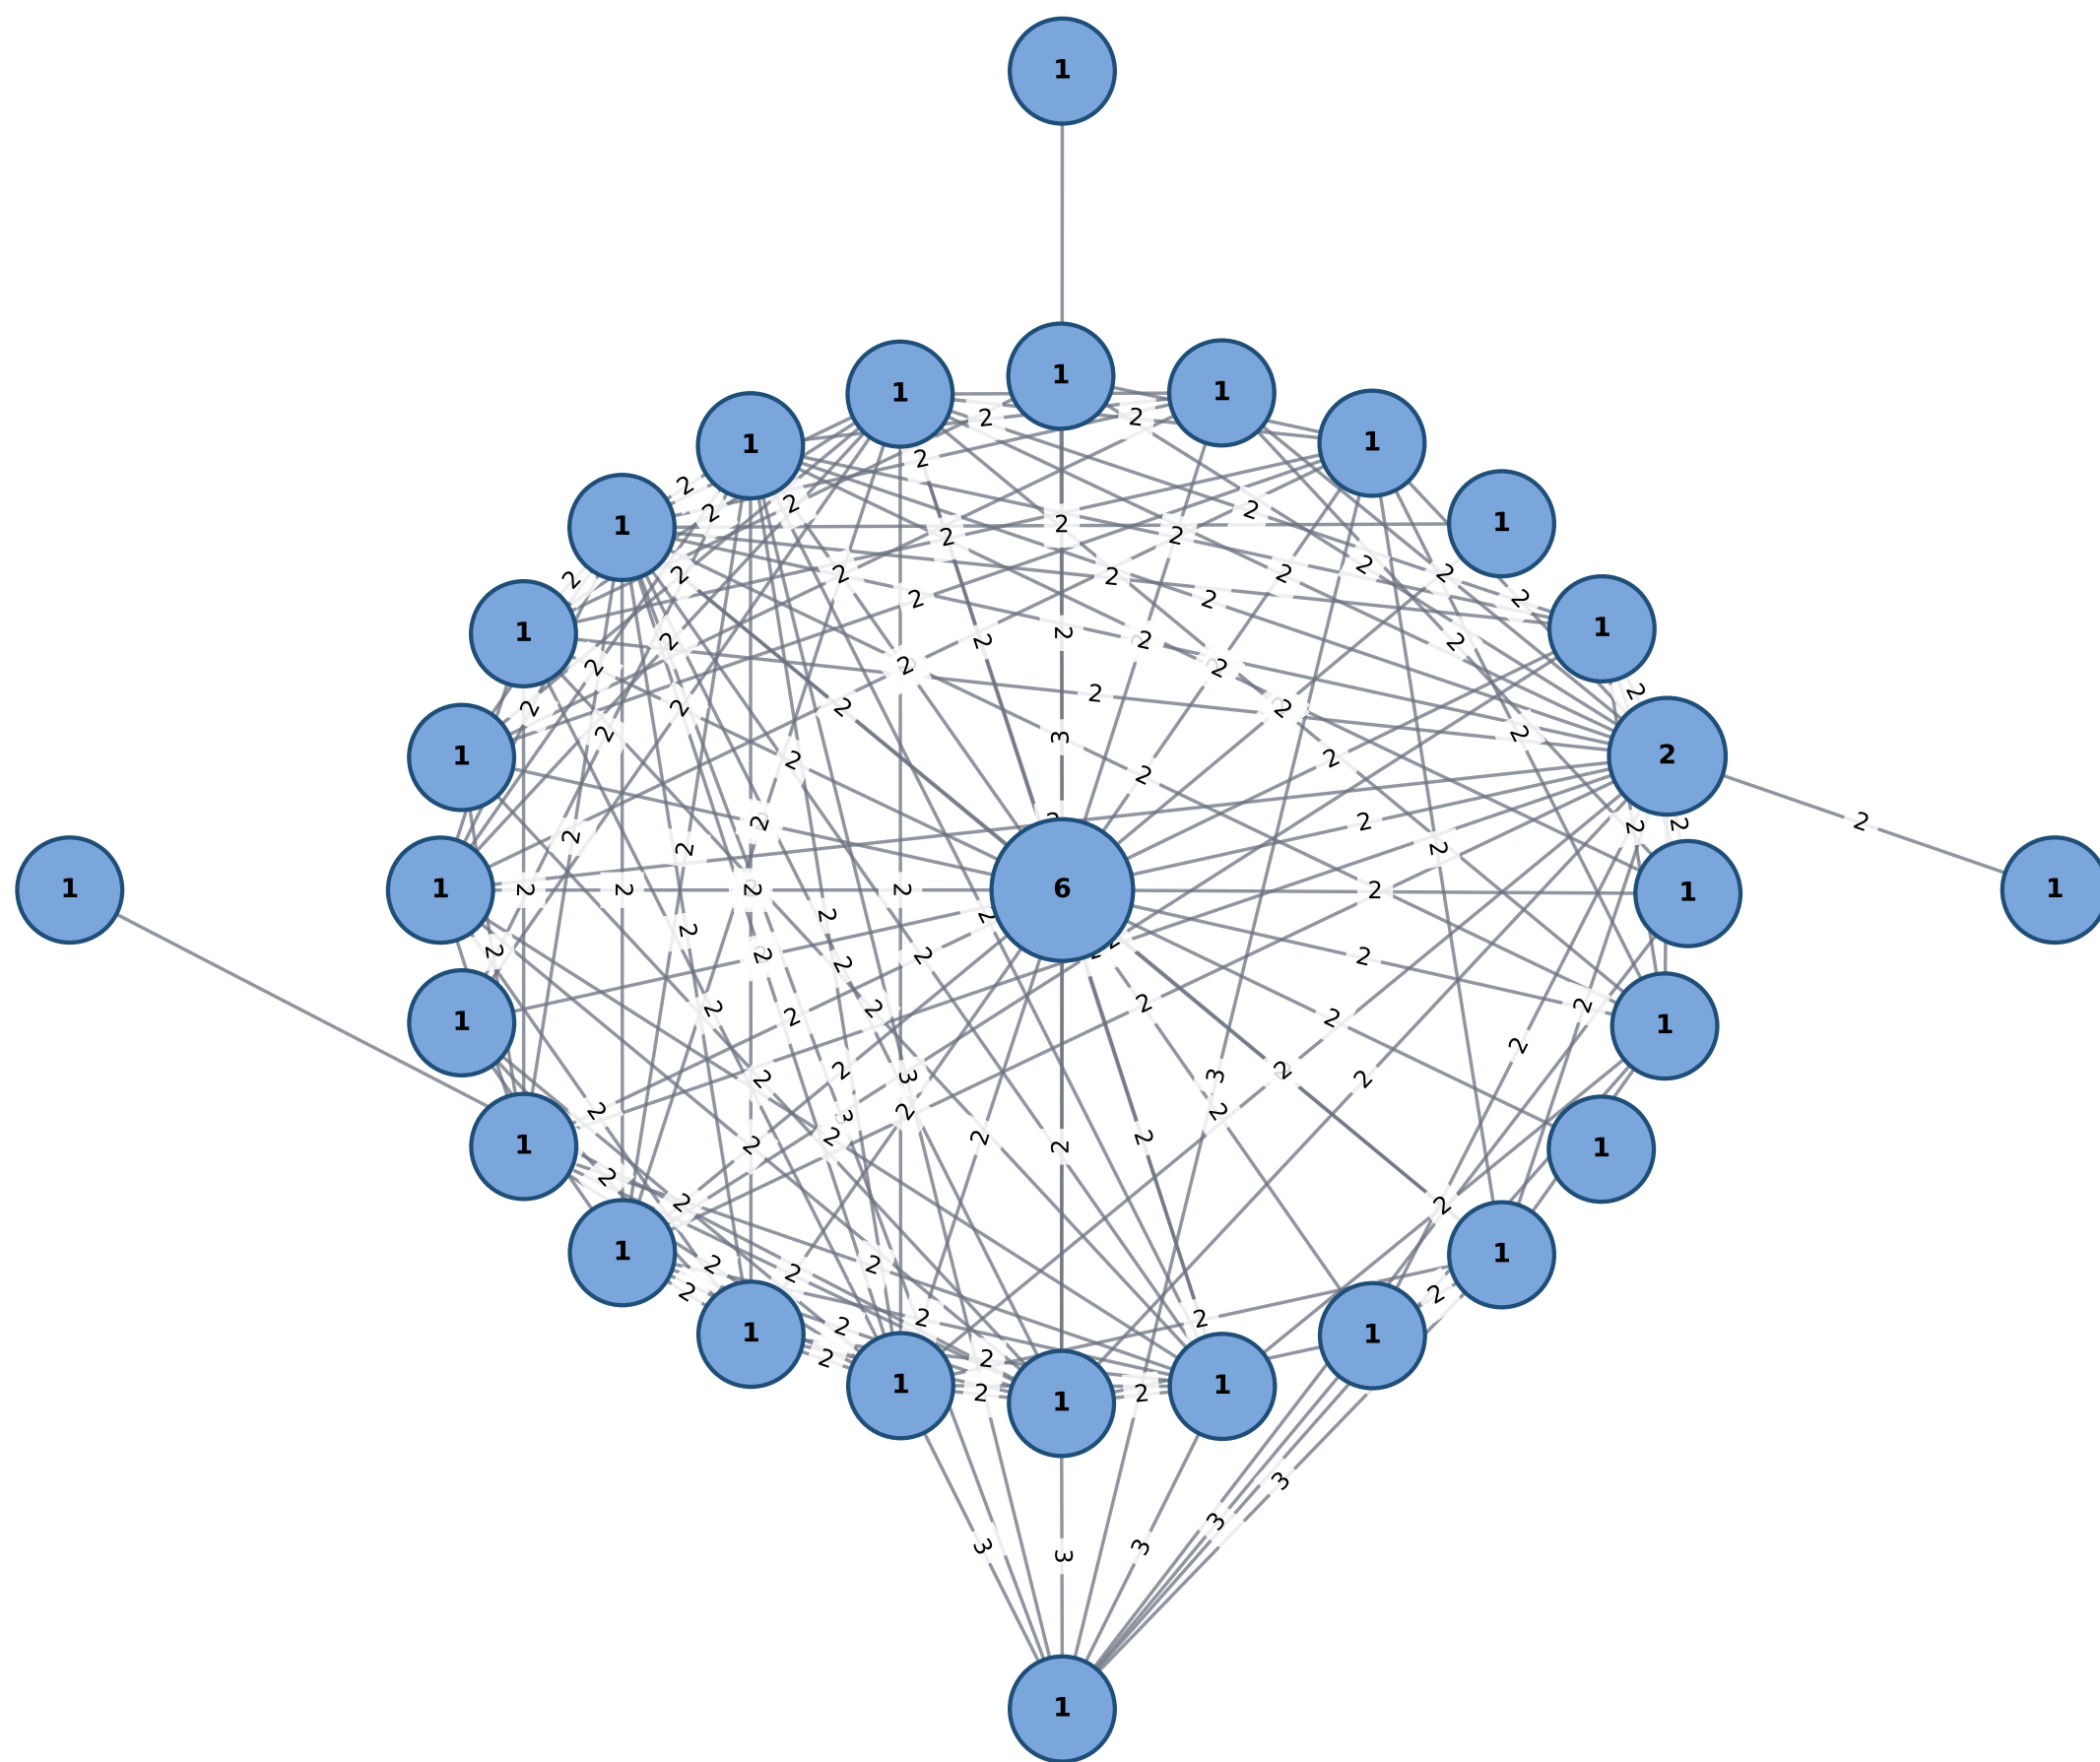

gout: cluster map (automatic layout, closest connections only)

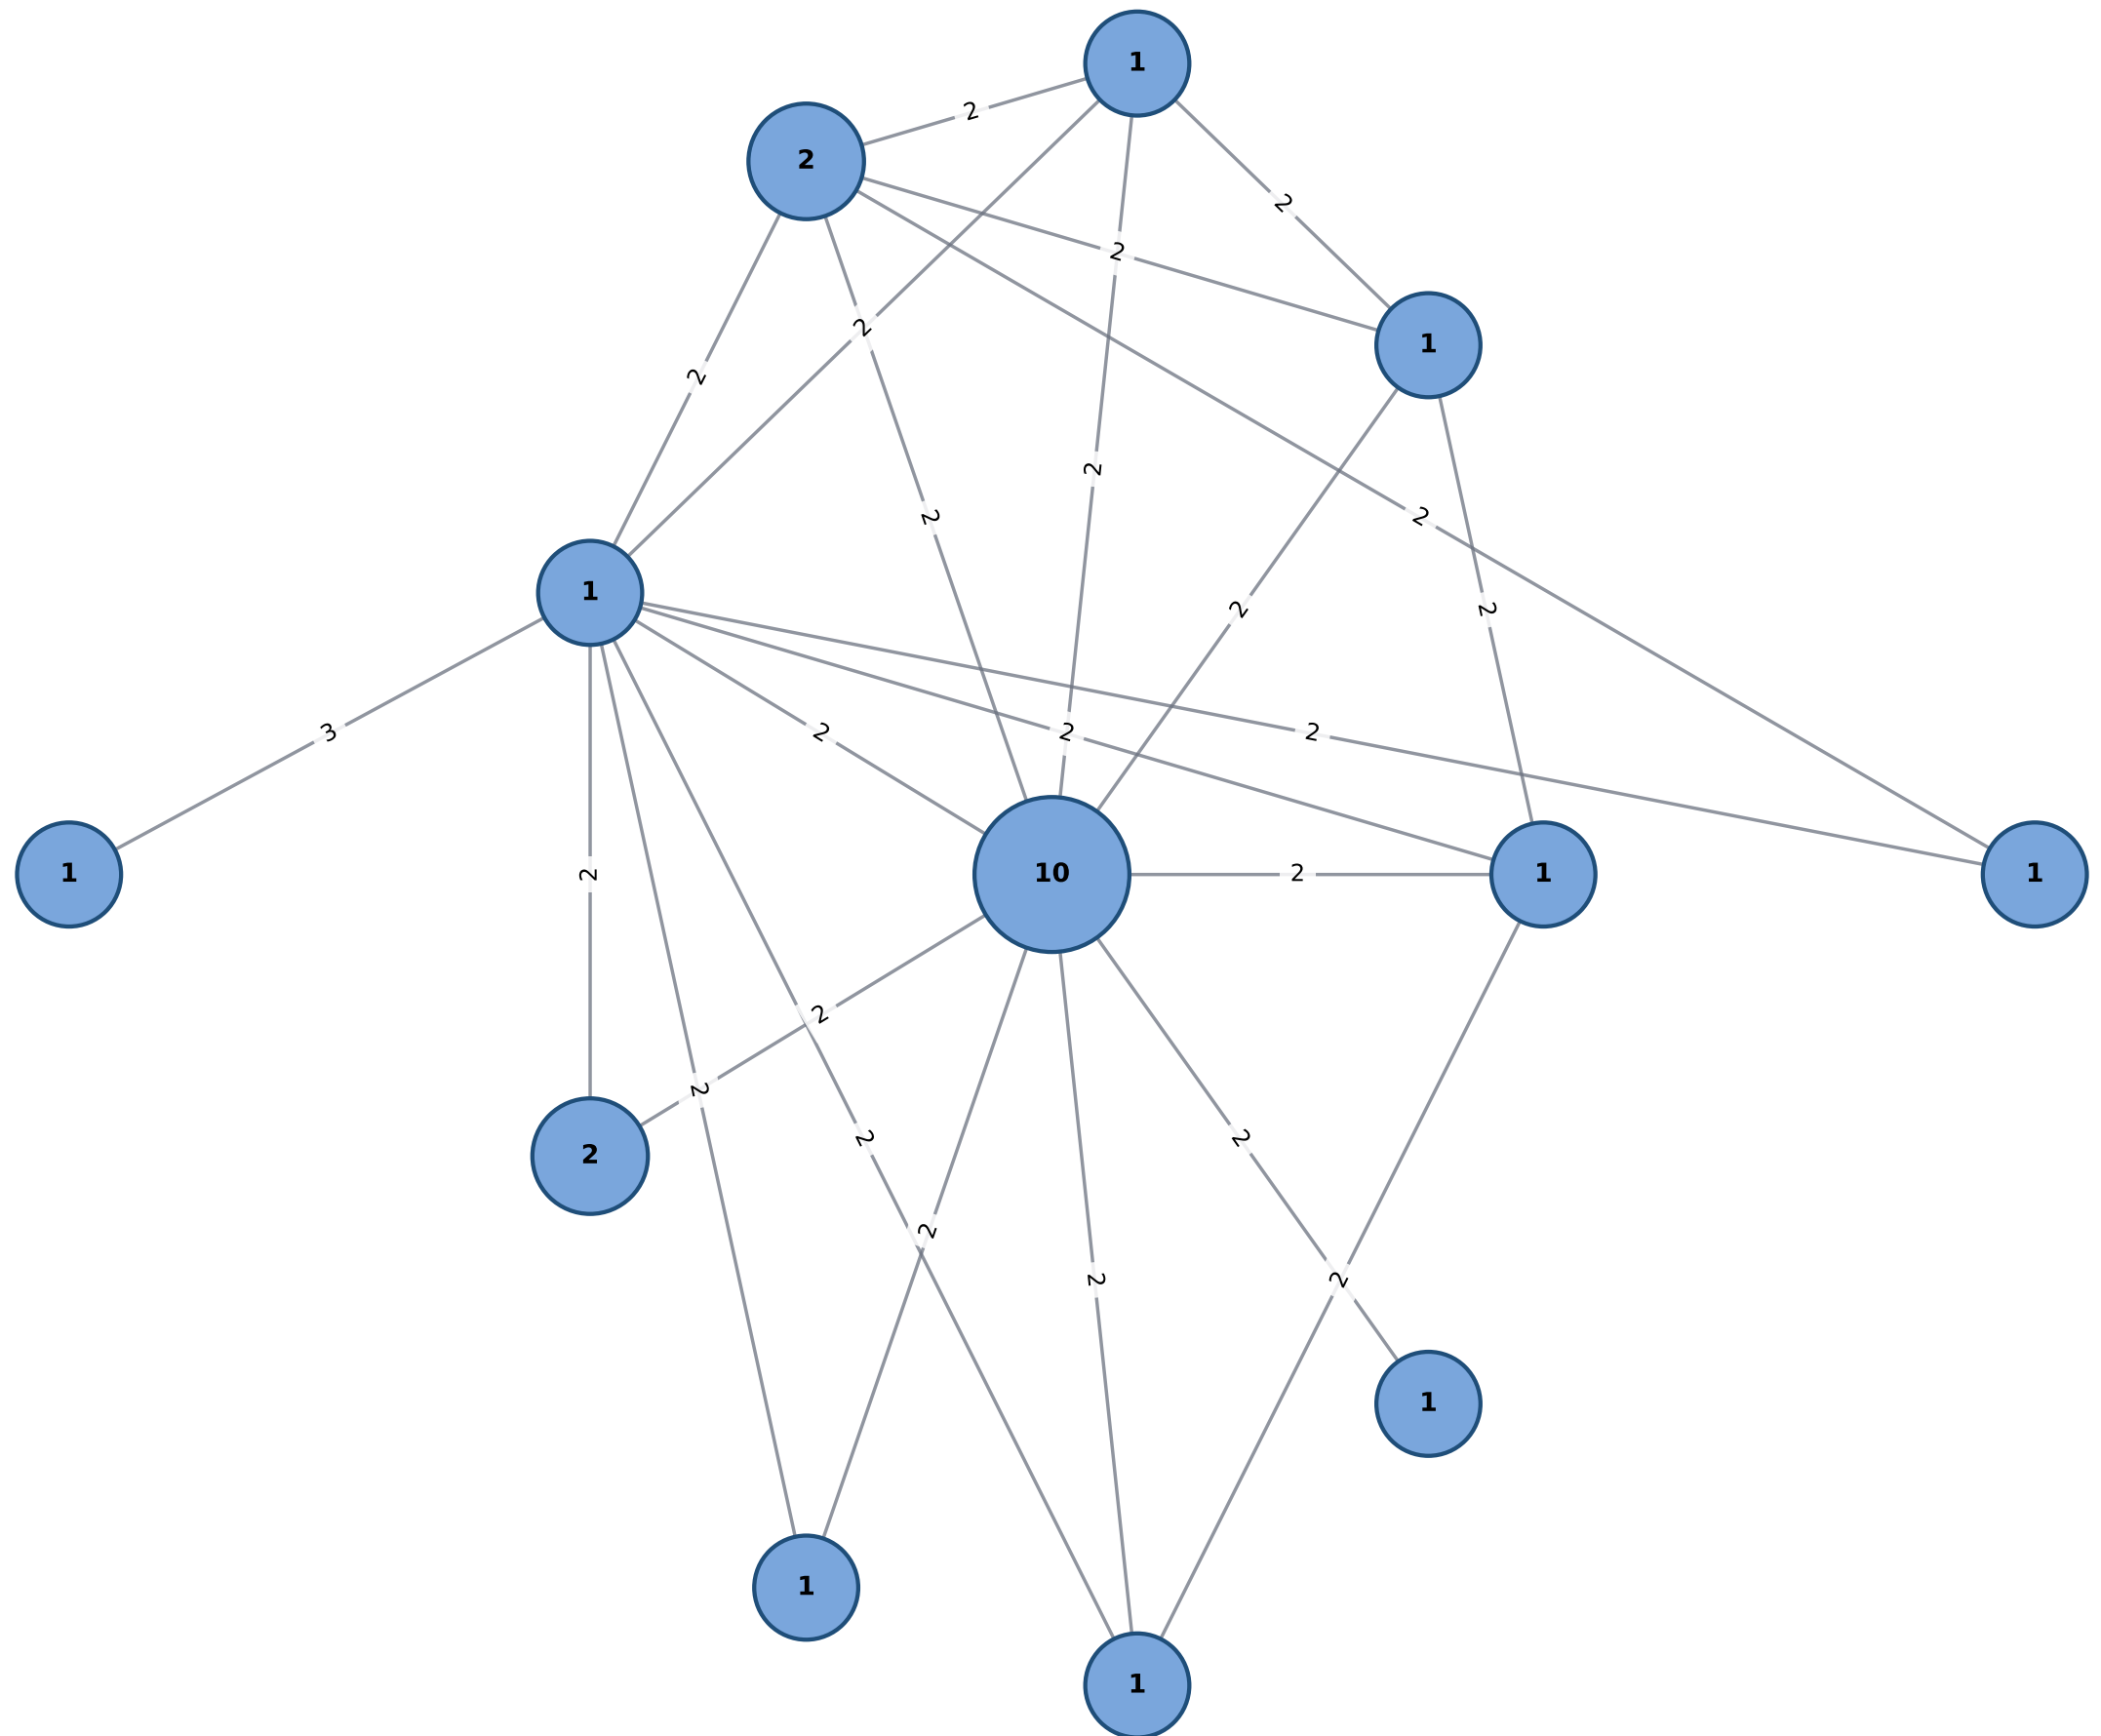

graves disease: cluster map (automatic layout, closest connections only)

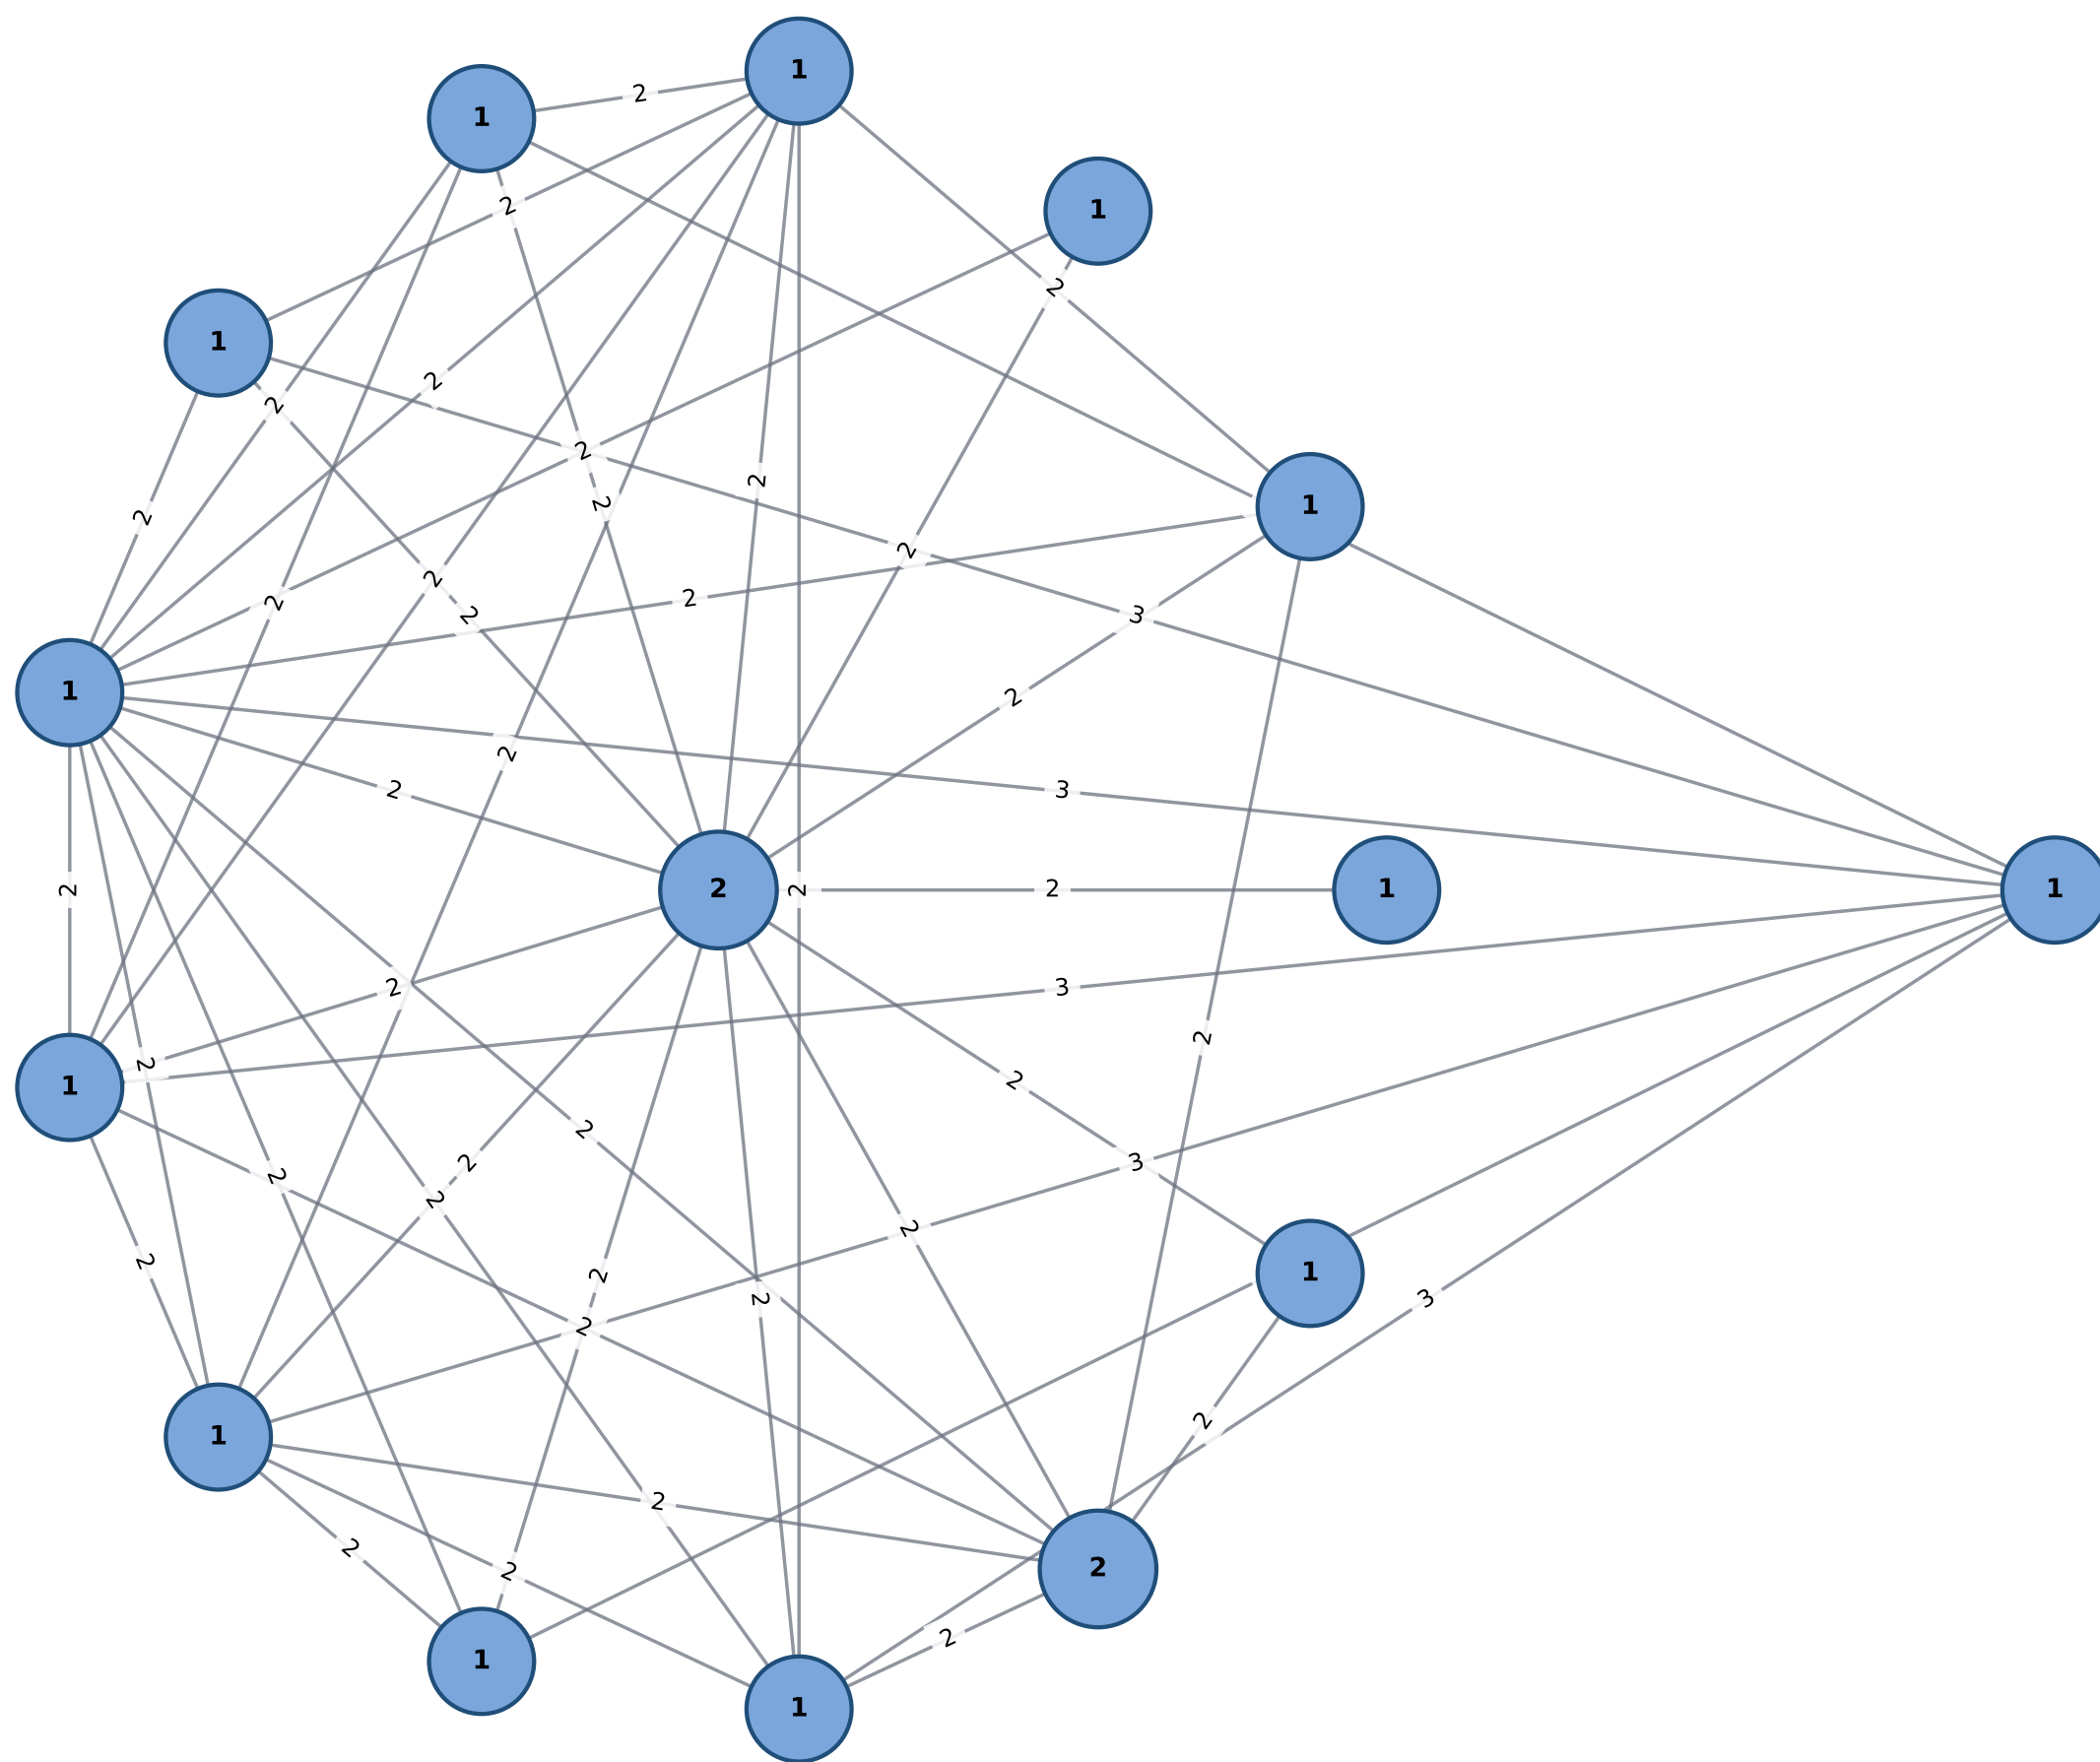

head and neck neoplasms: cluster map (automatic layout, closest connections only)

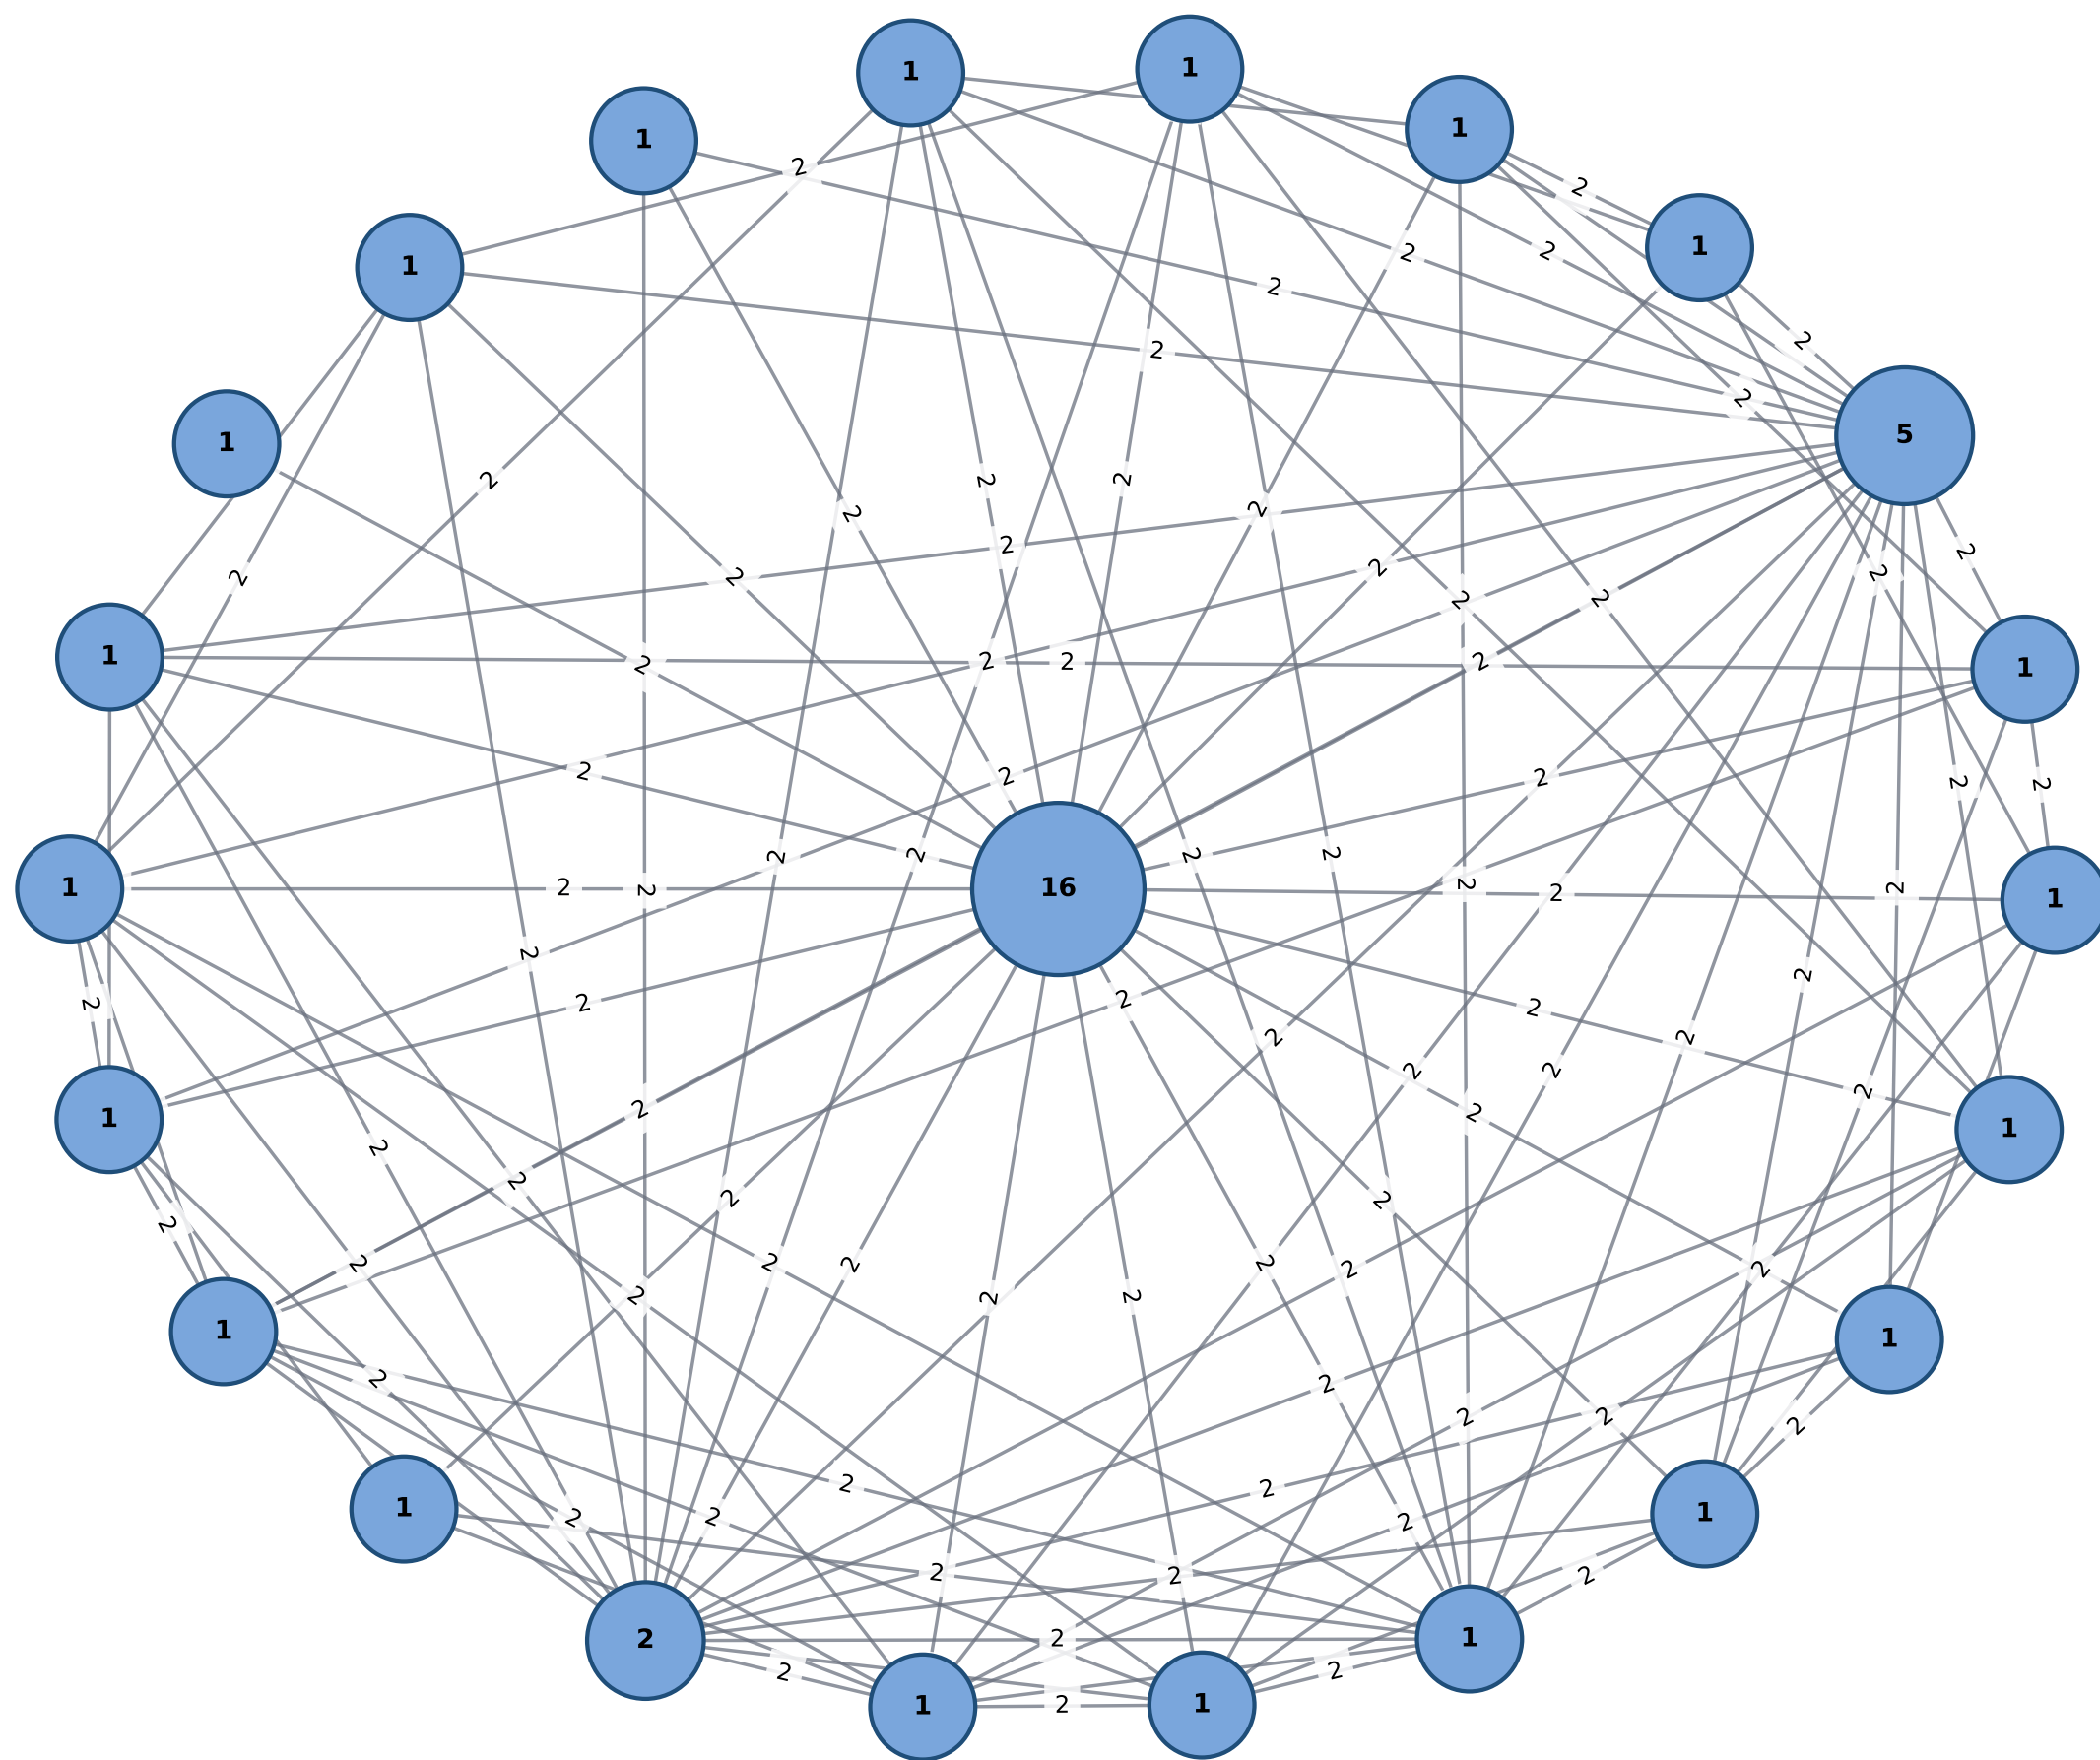

hypothalamic diseases: cluster map (automatic layout, closest connections only)

leukemia b-cell: cluster map (automatic layout, closest connections only)

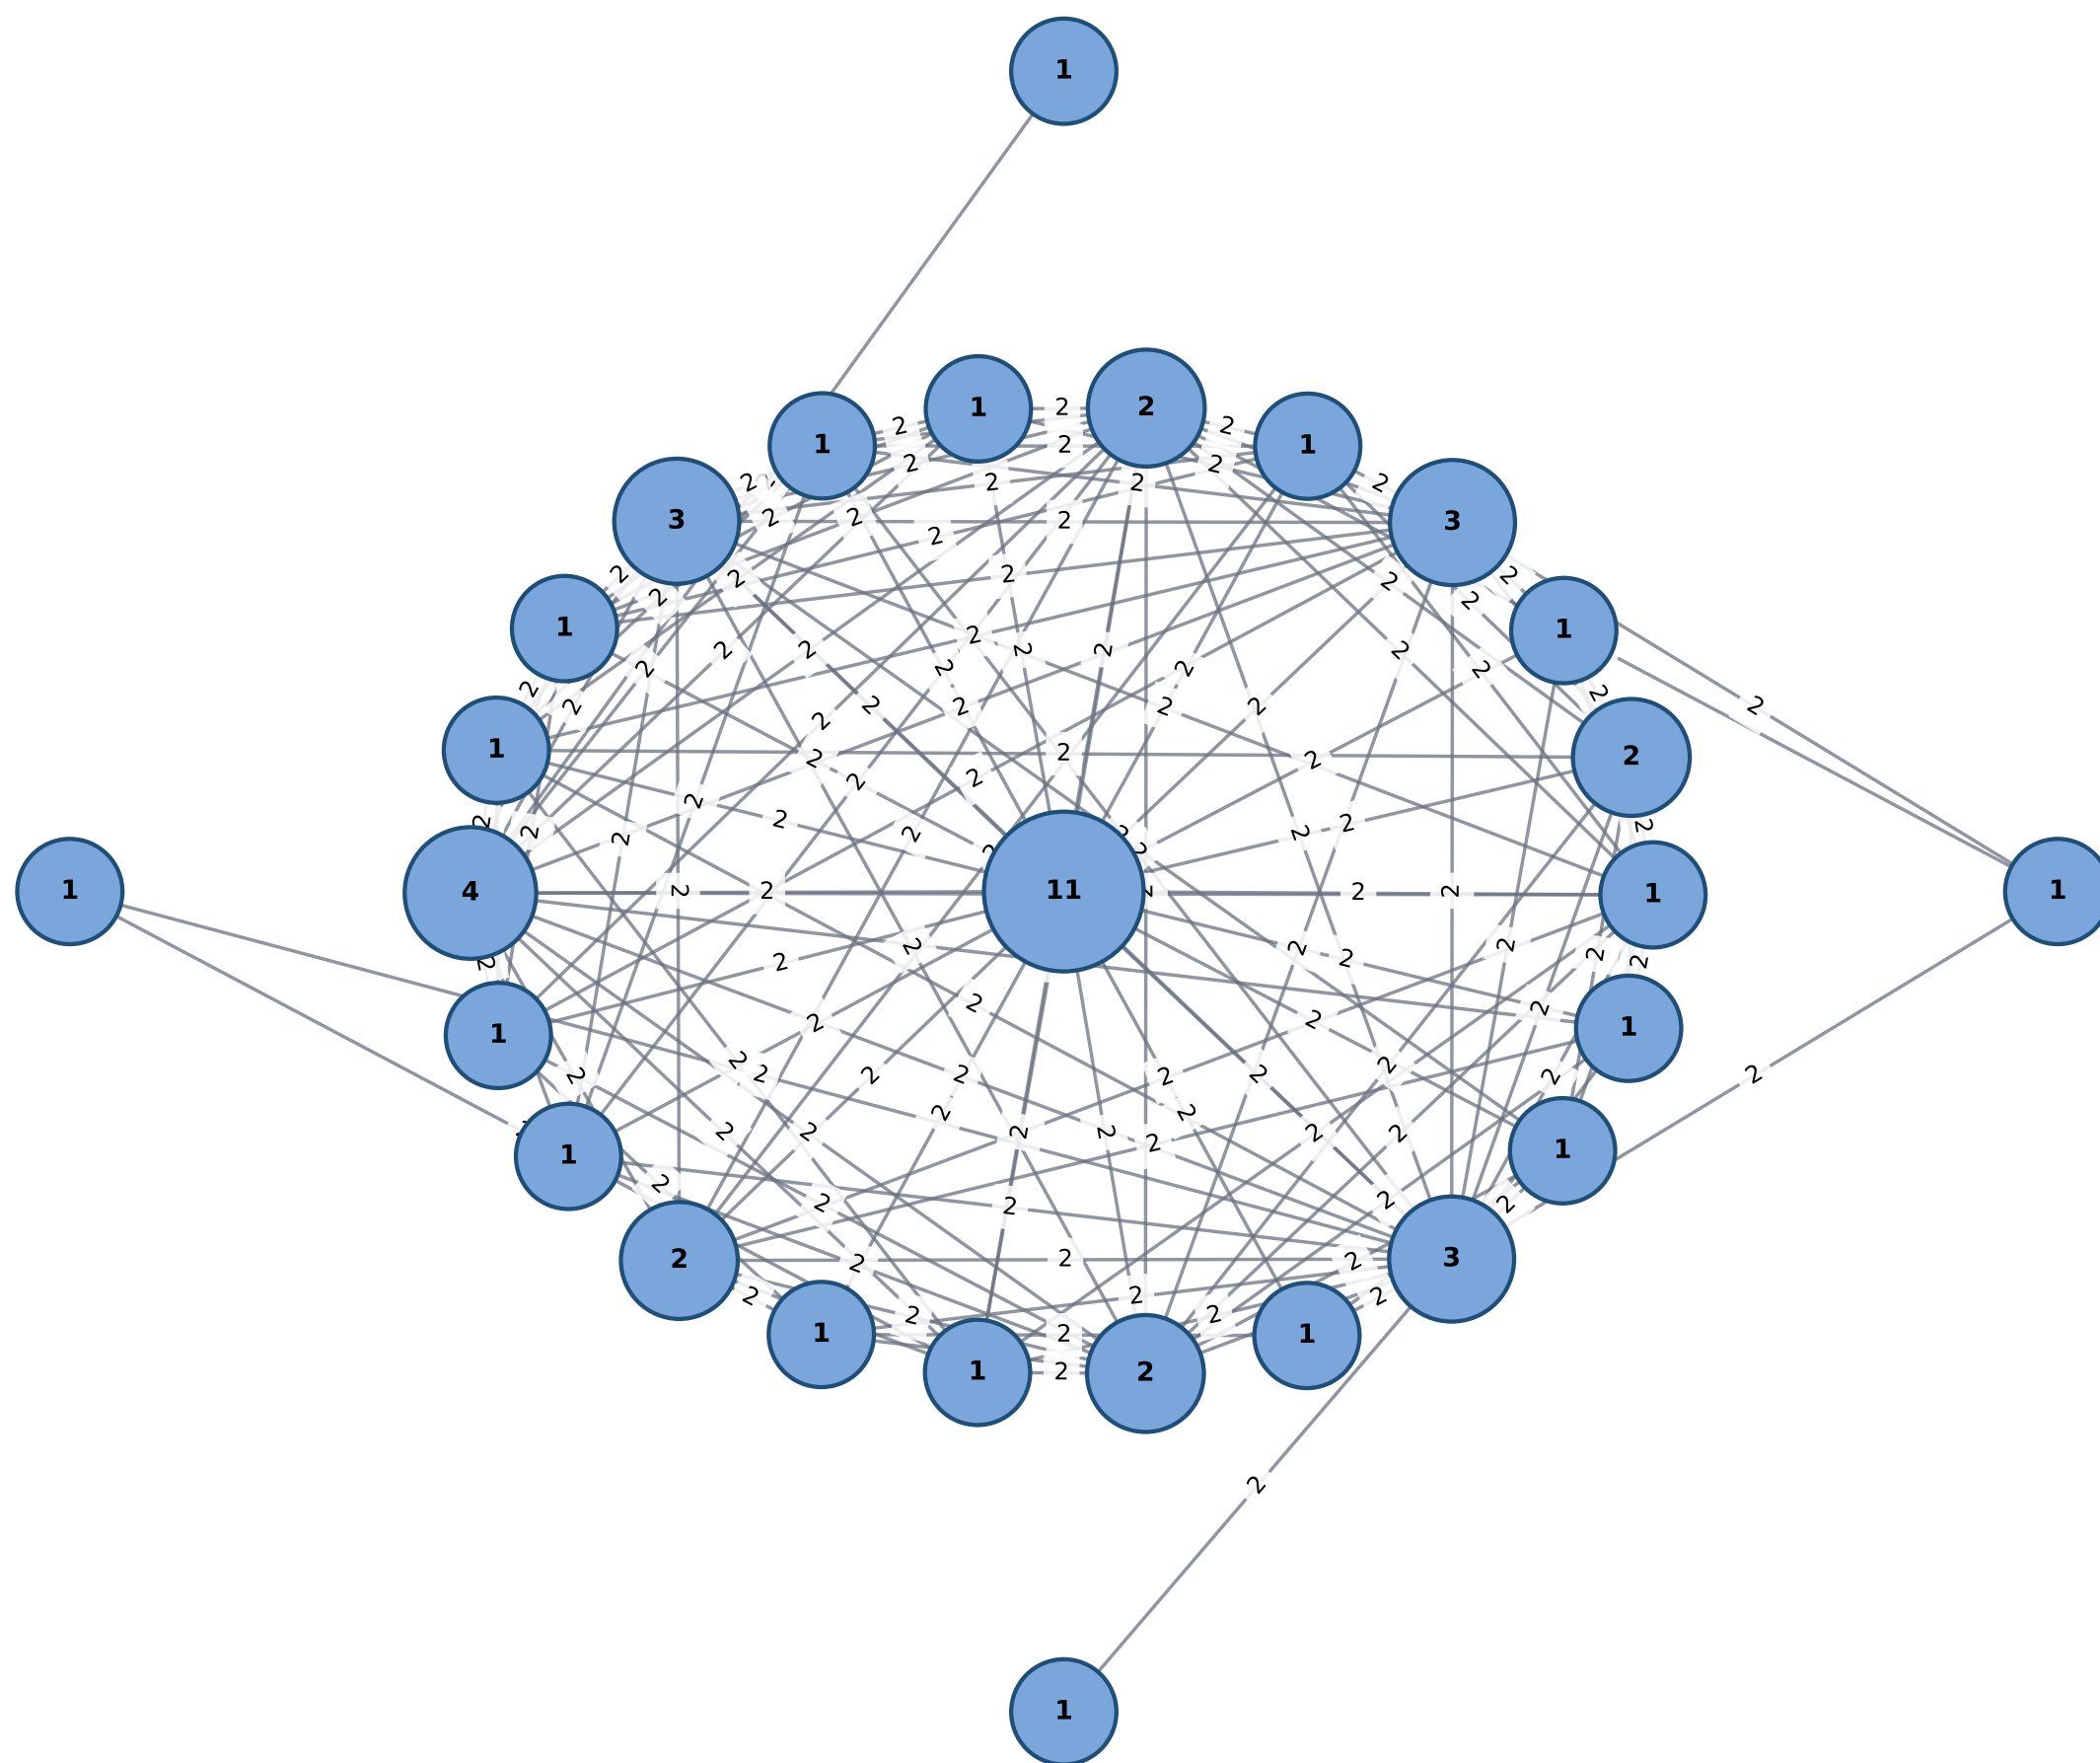

leukemia myeloid: cluster map (automatic layout, closest connections only)

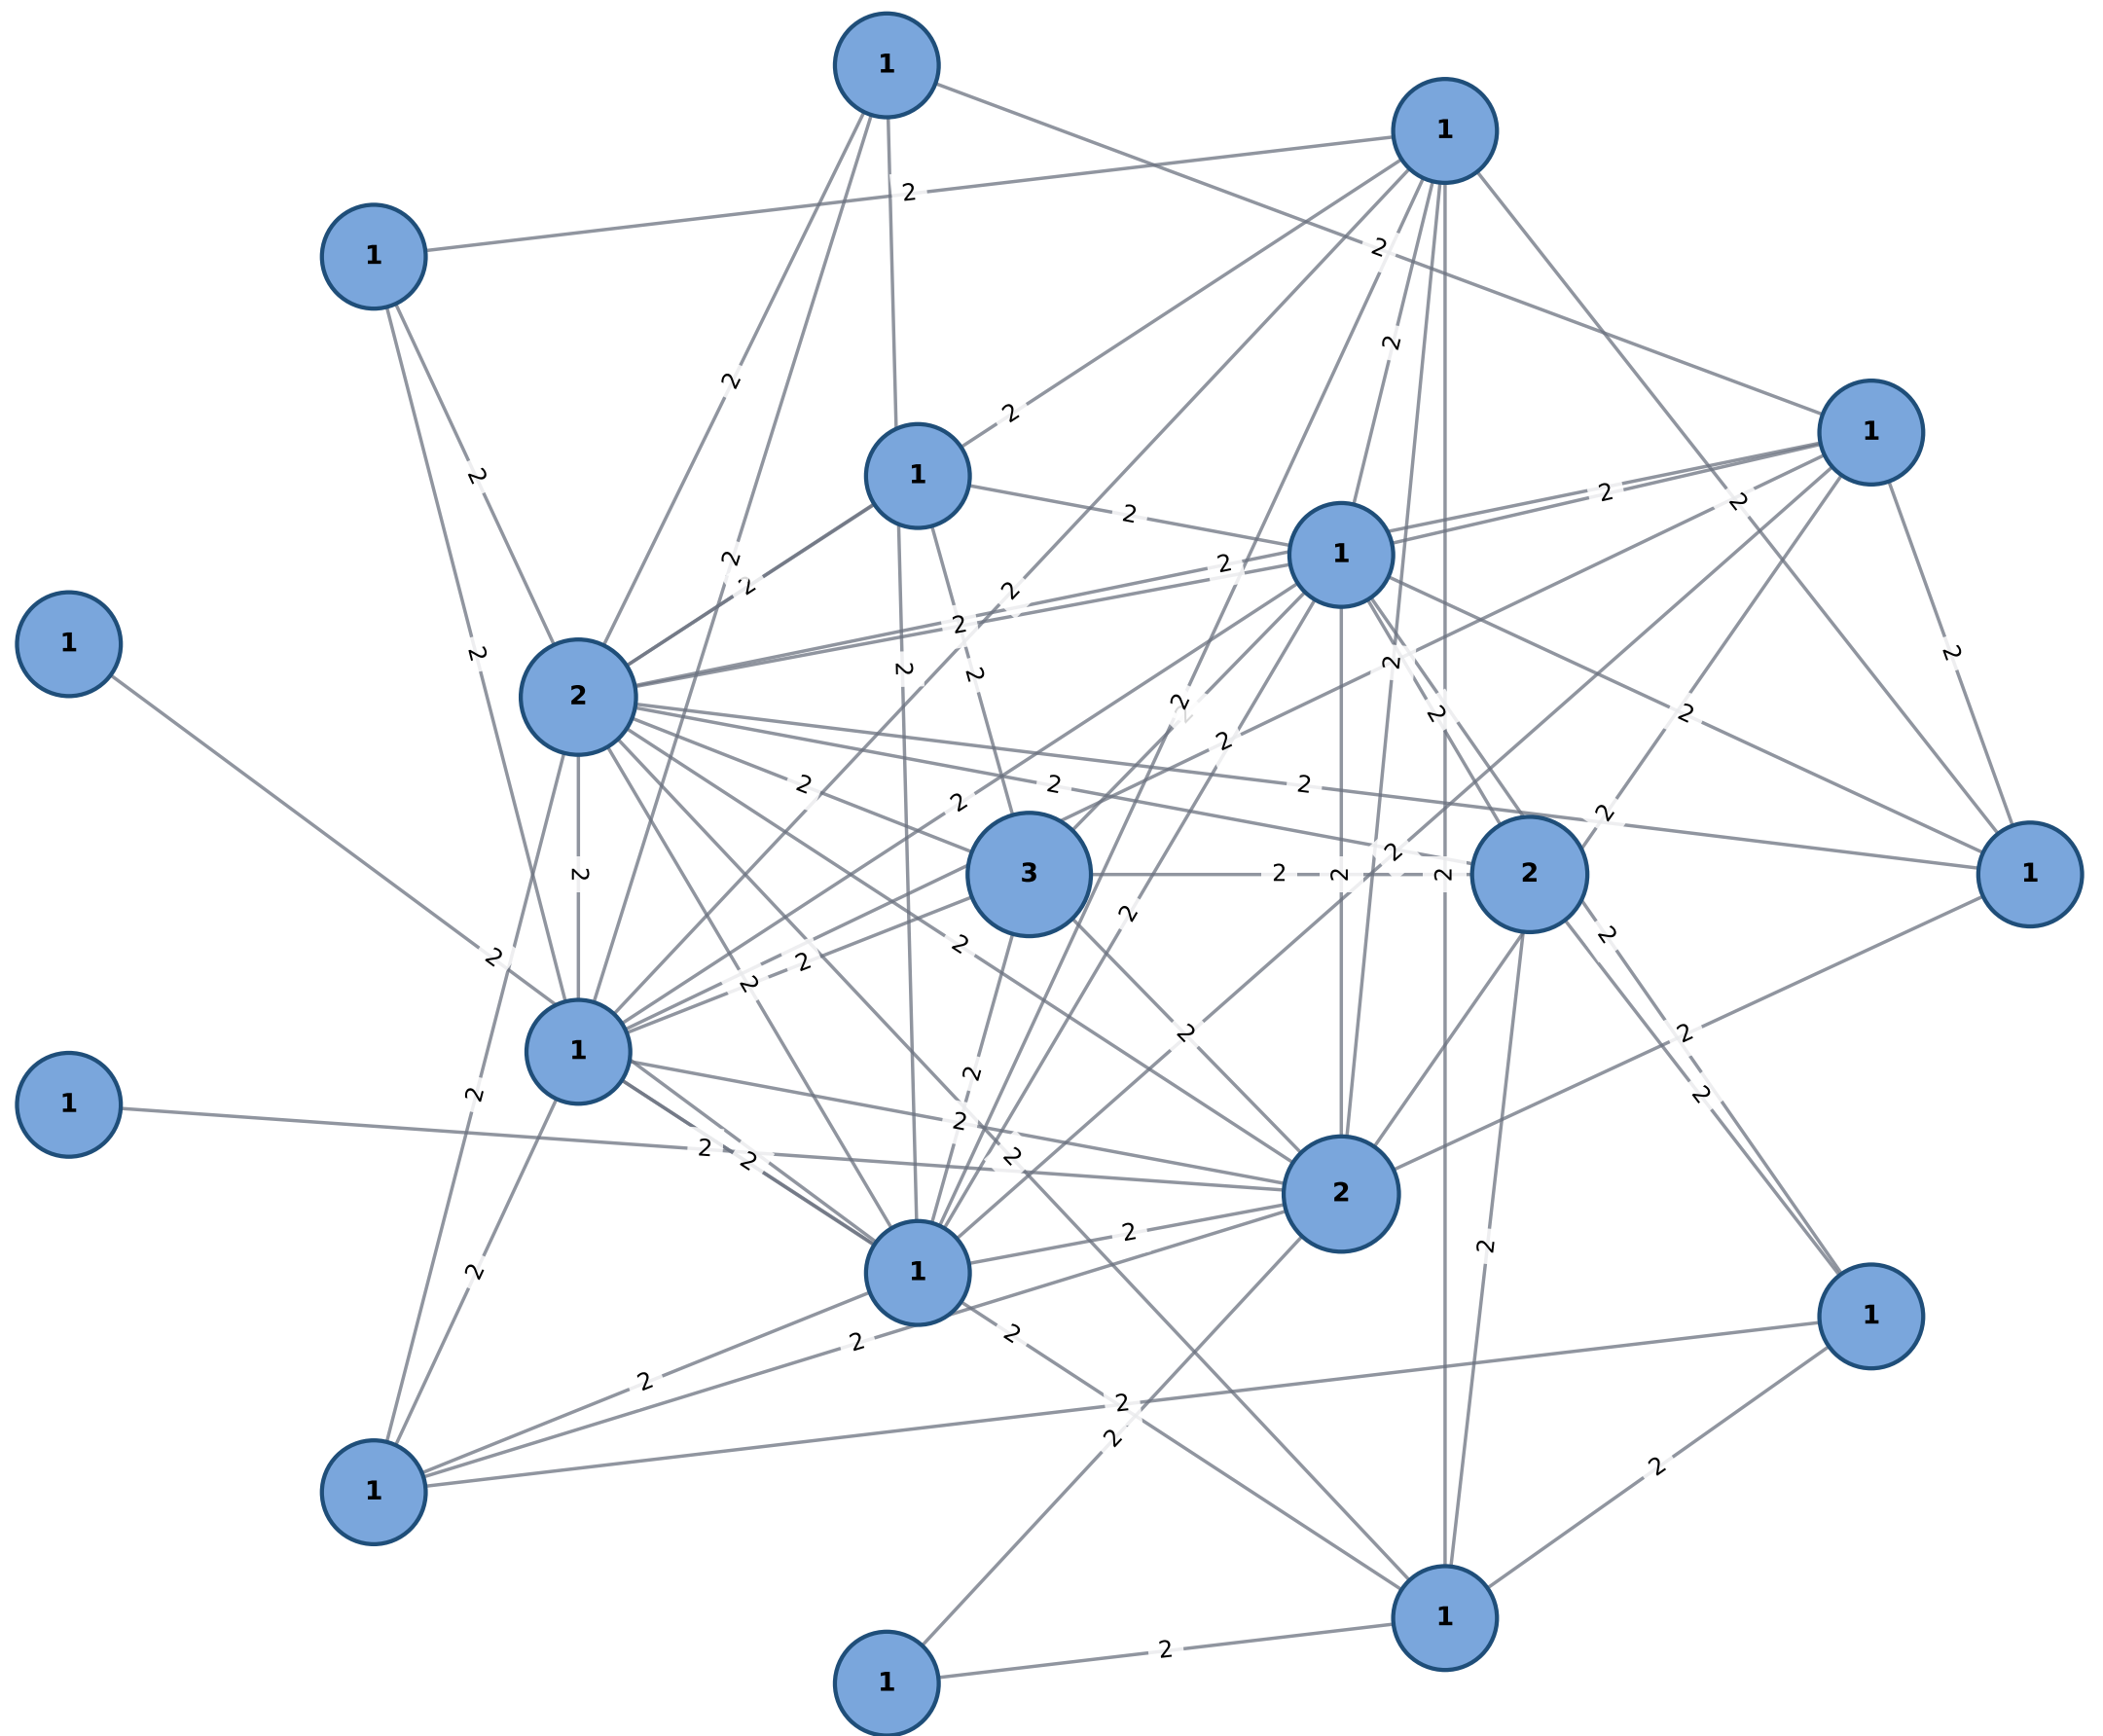

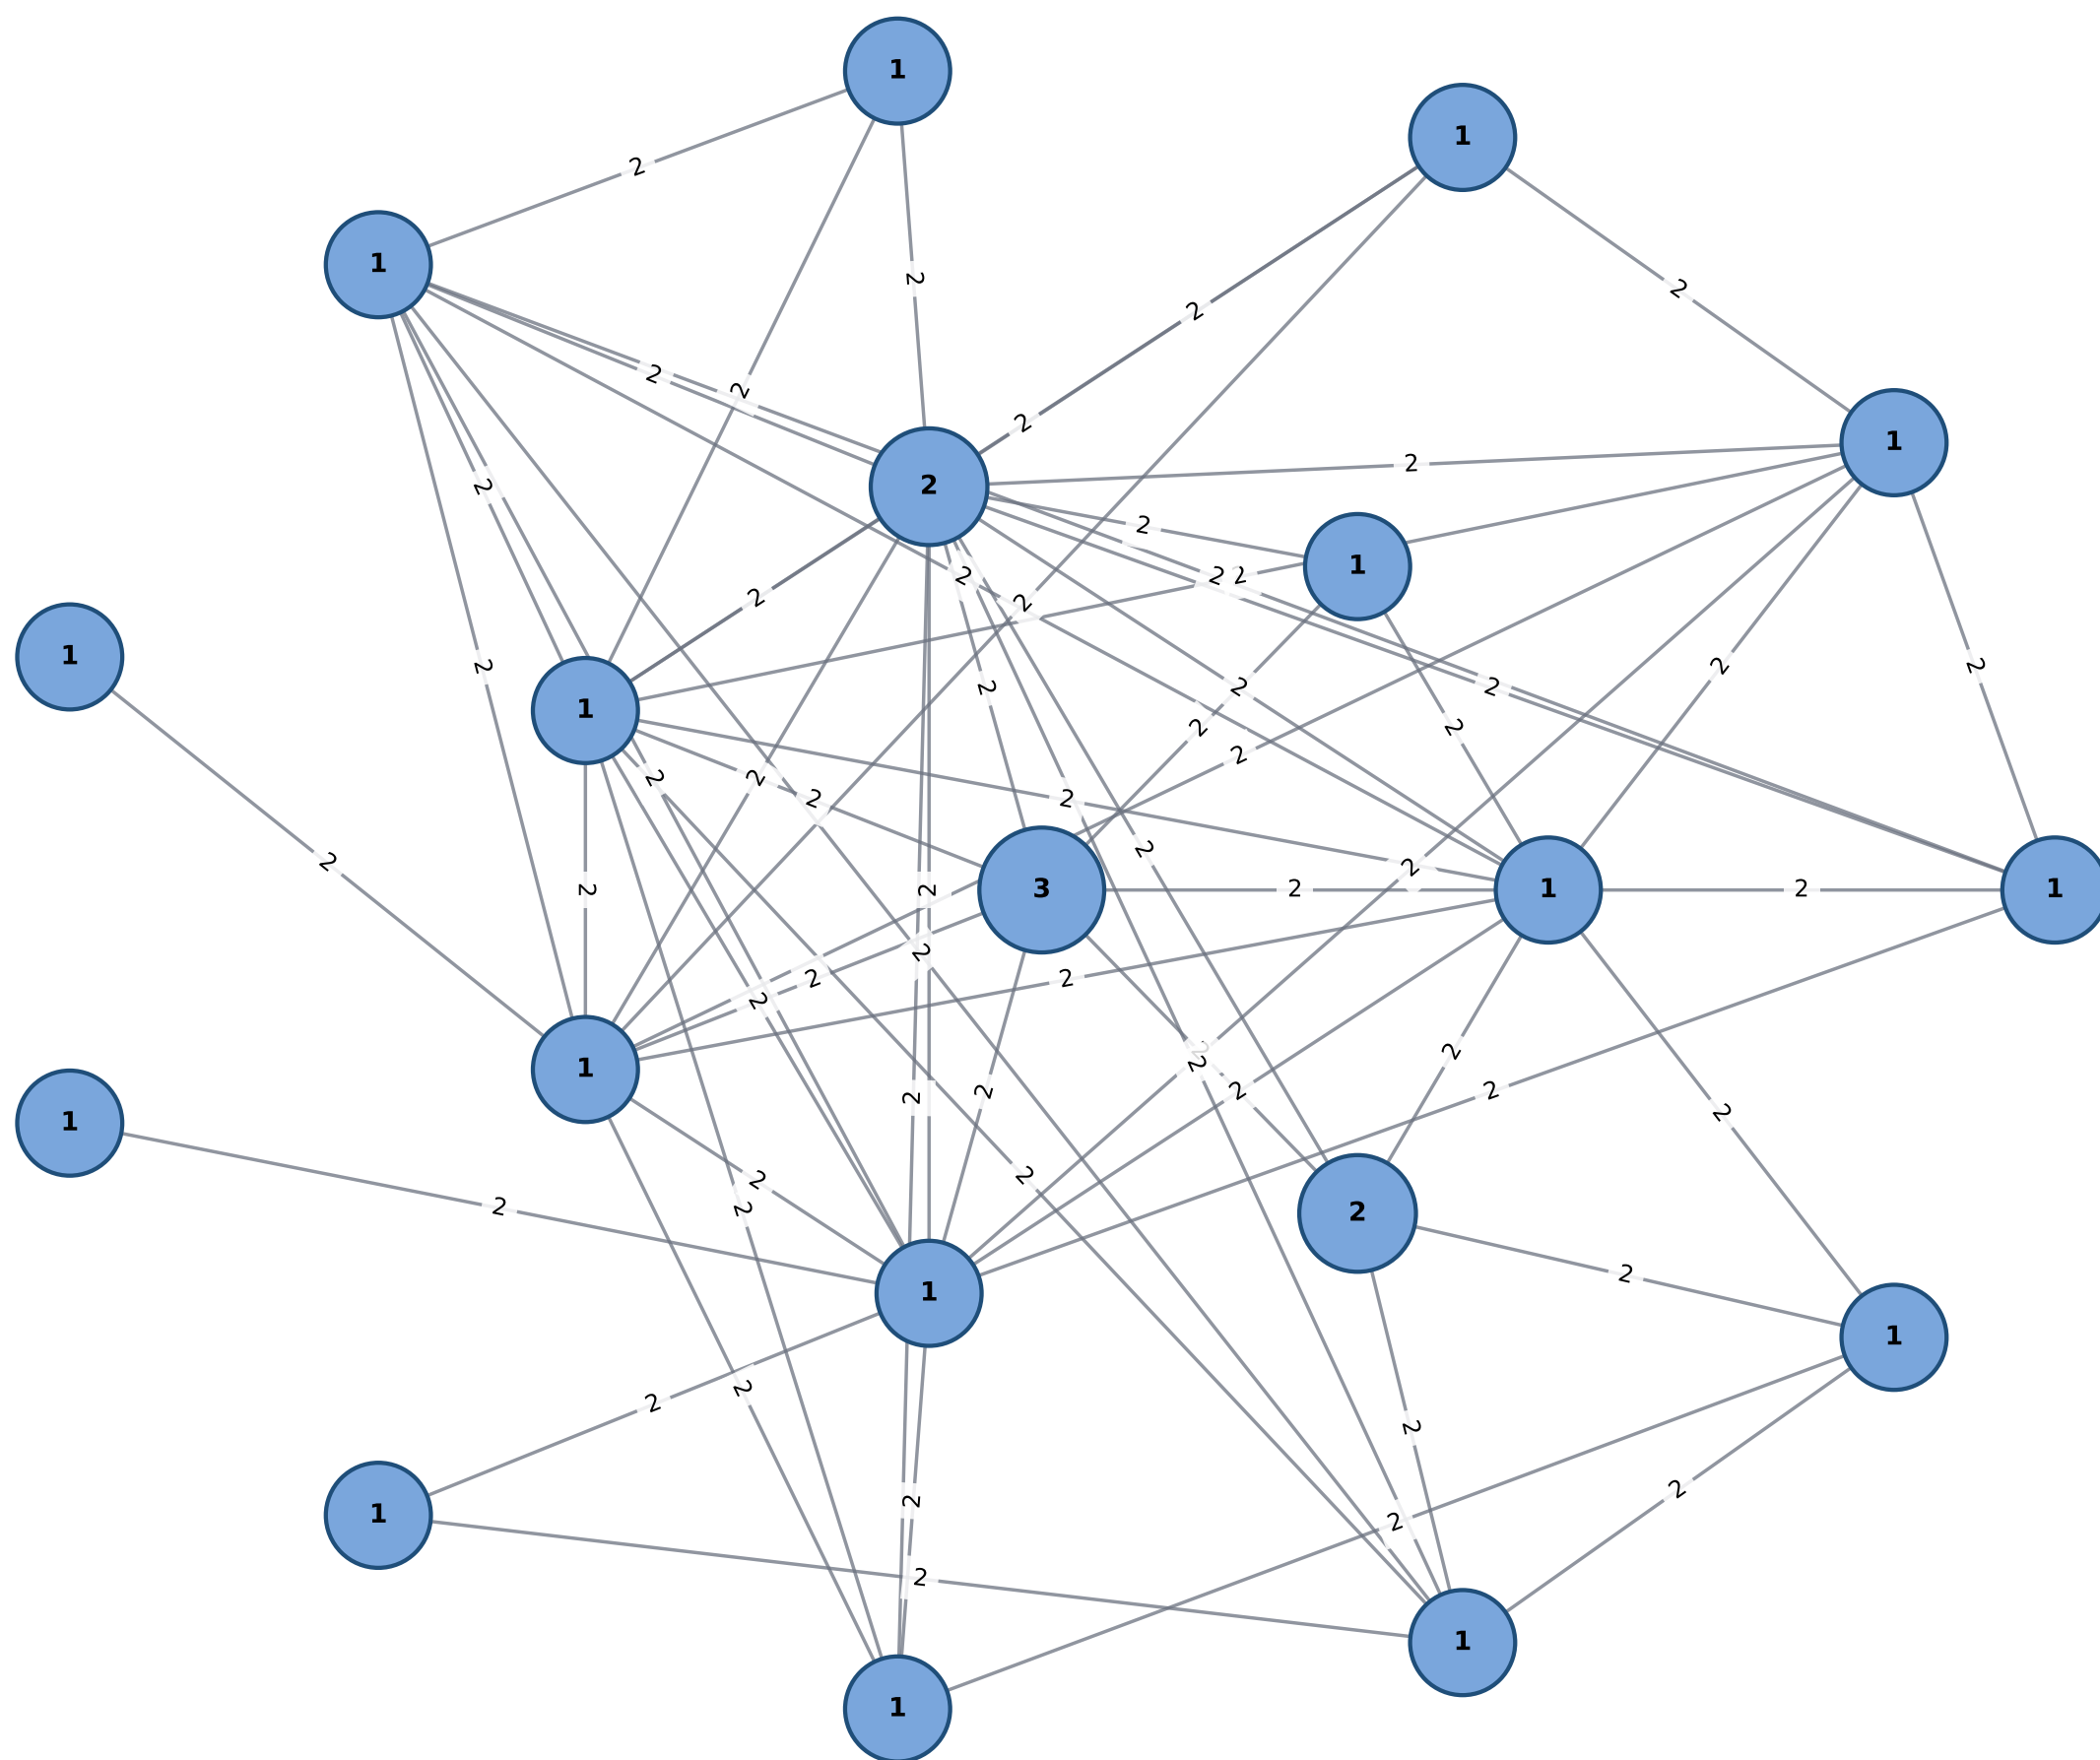

lipid metabolism disorders: cluster map (automatic layout, closest connections only)

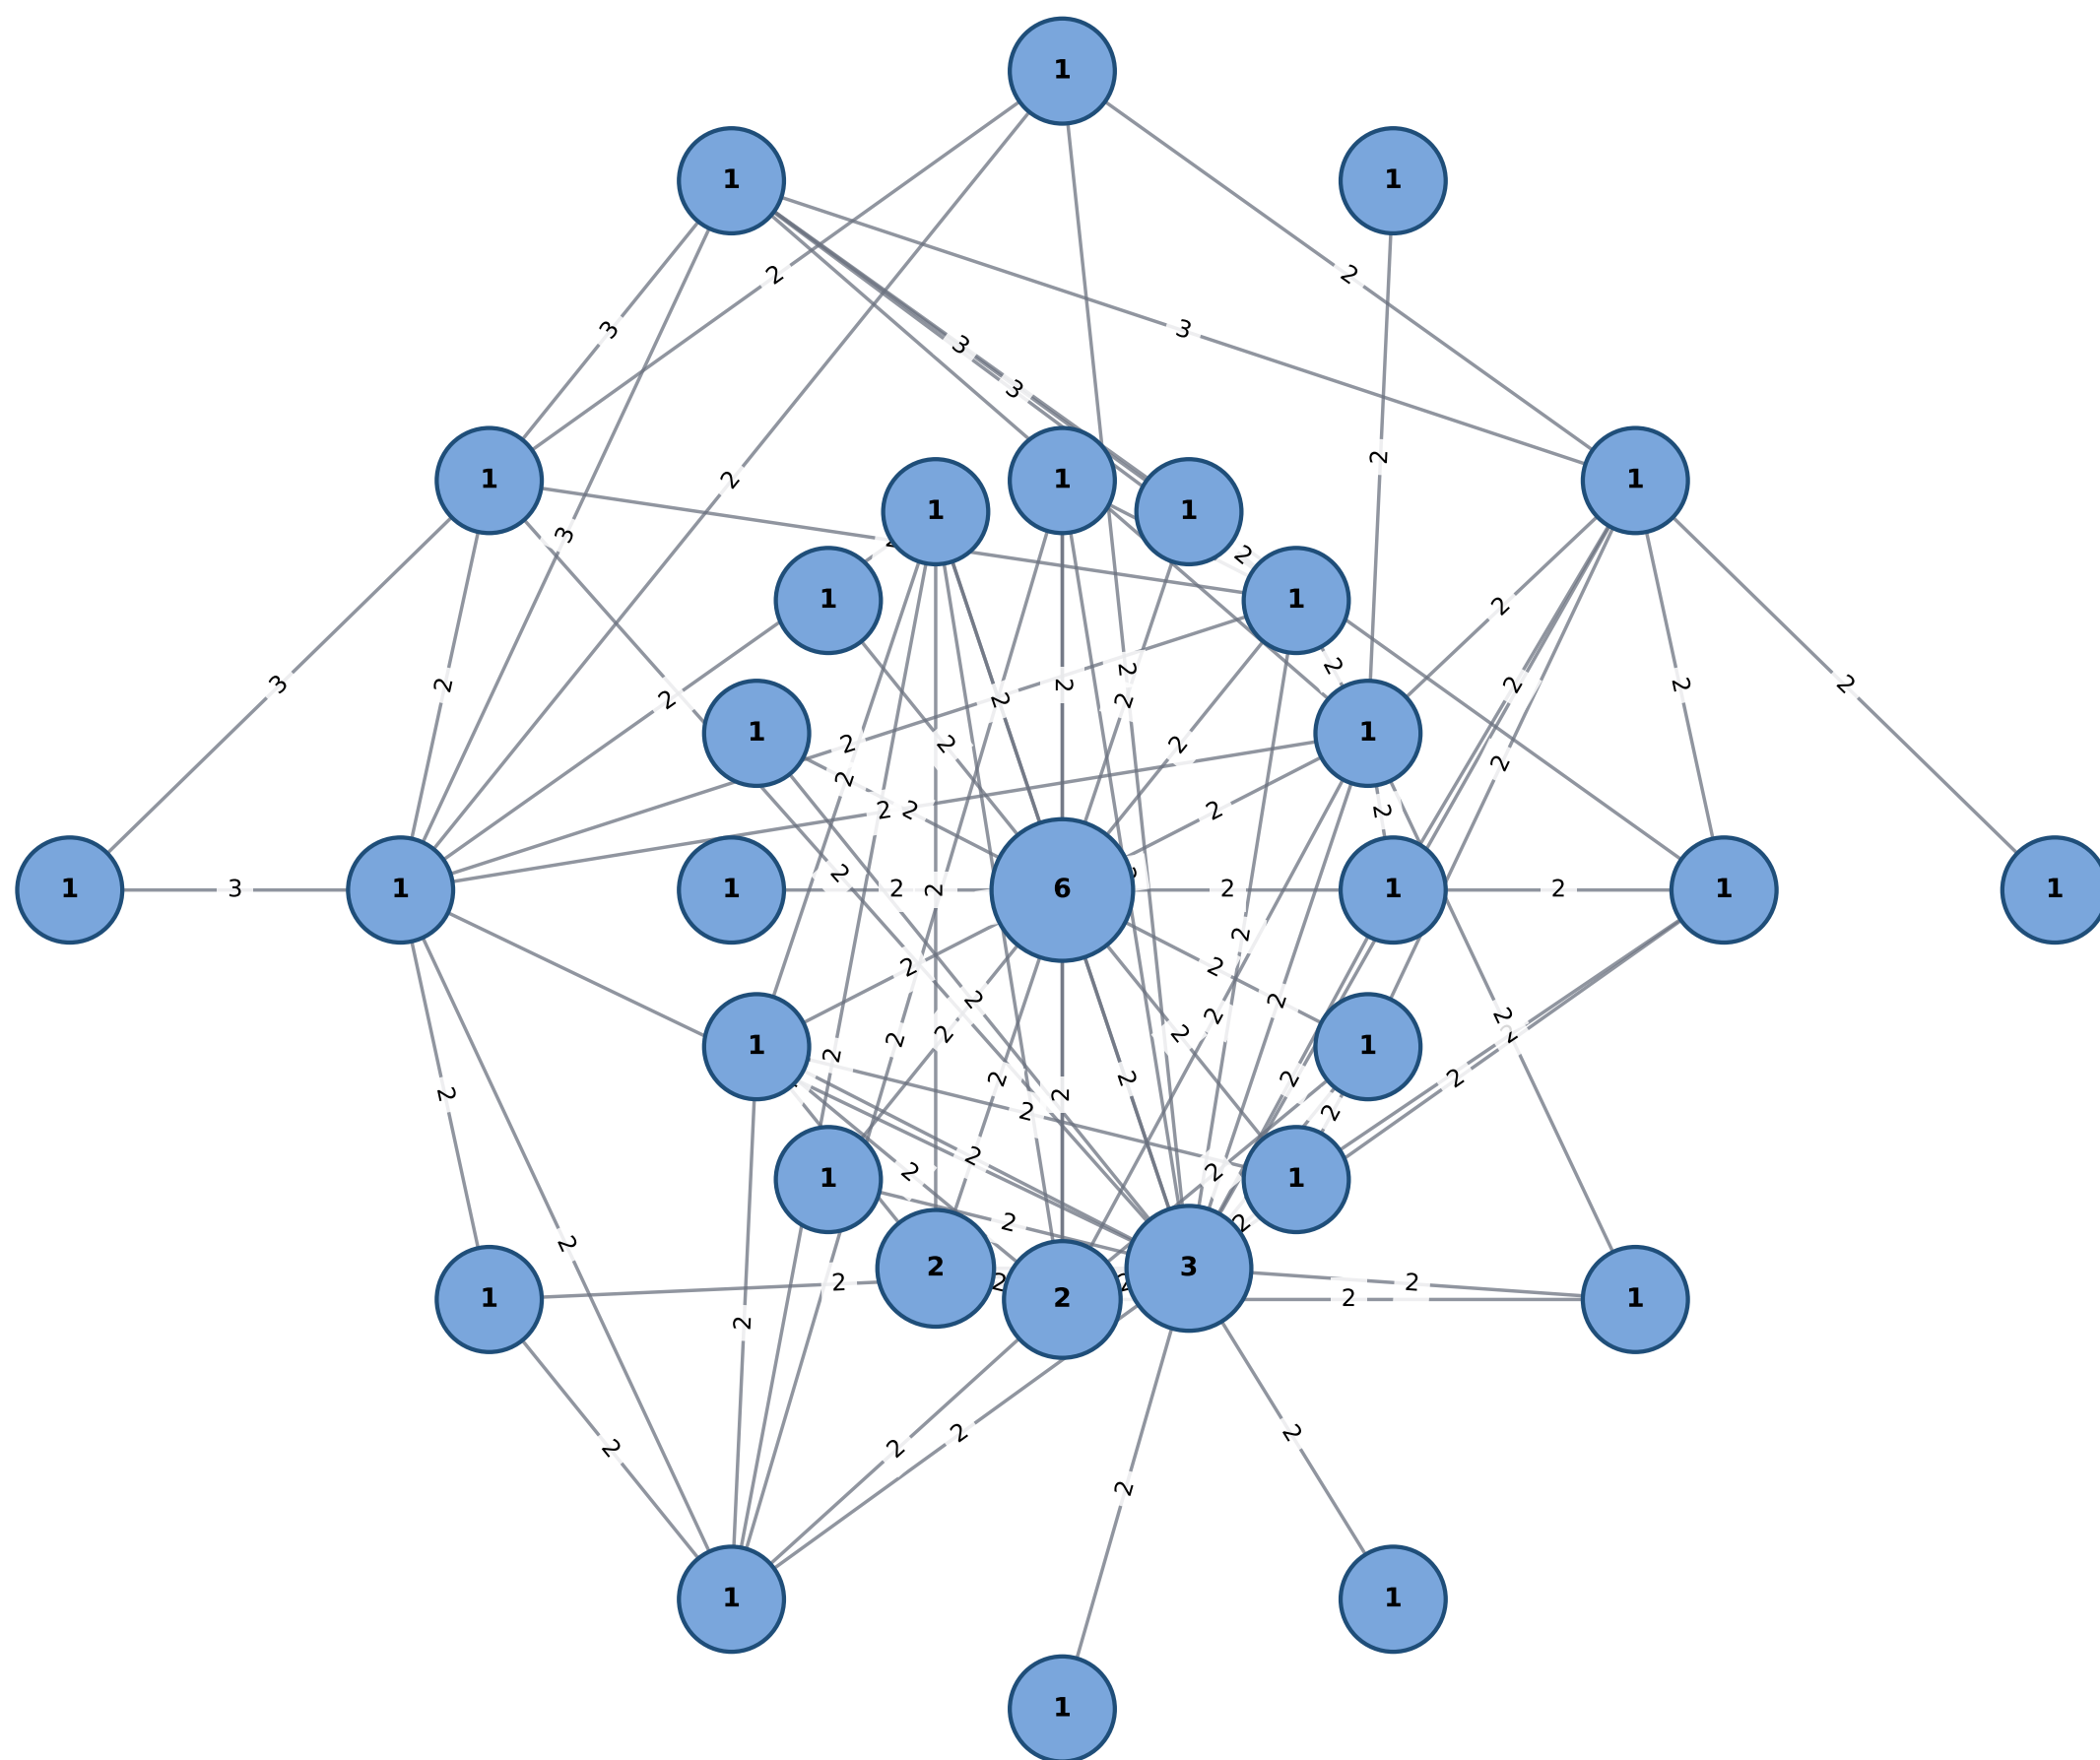

liver cirrhosis: cluster map (automatic layout, closest connections only)

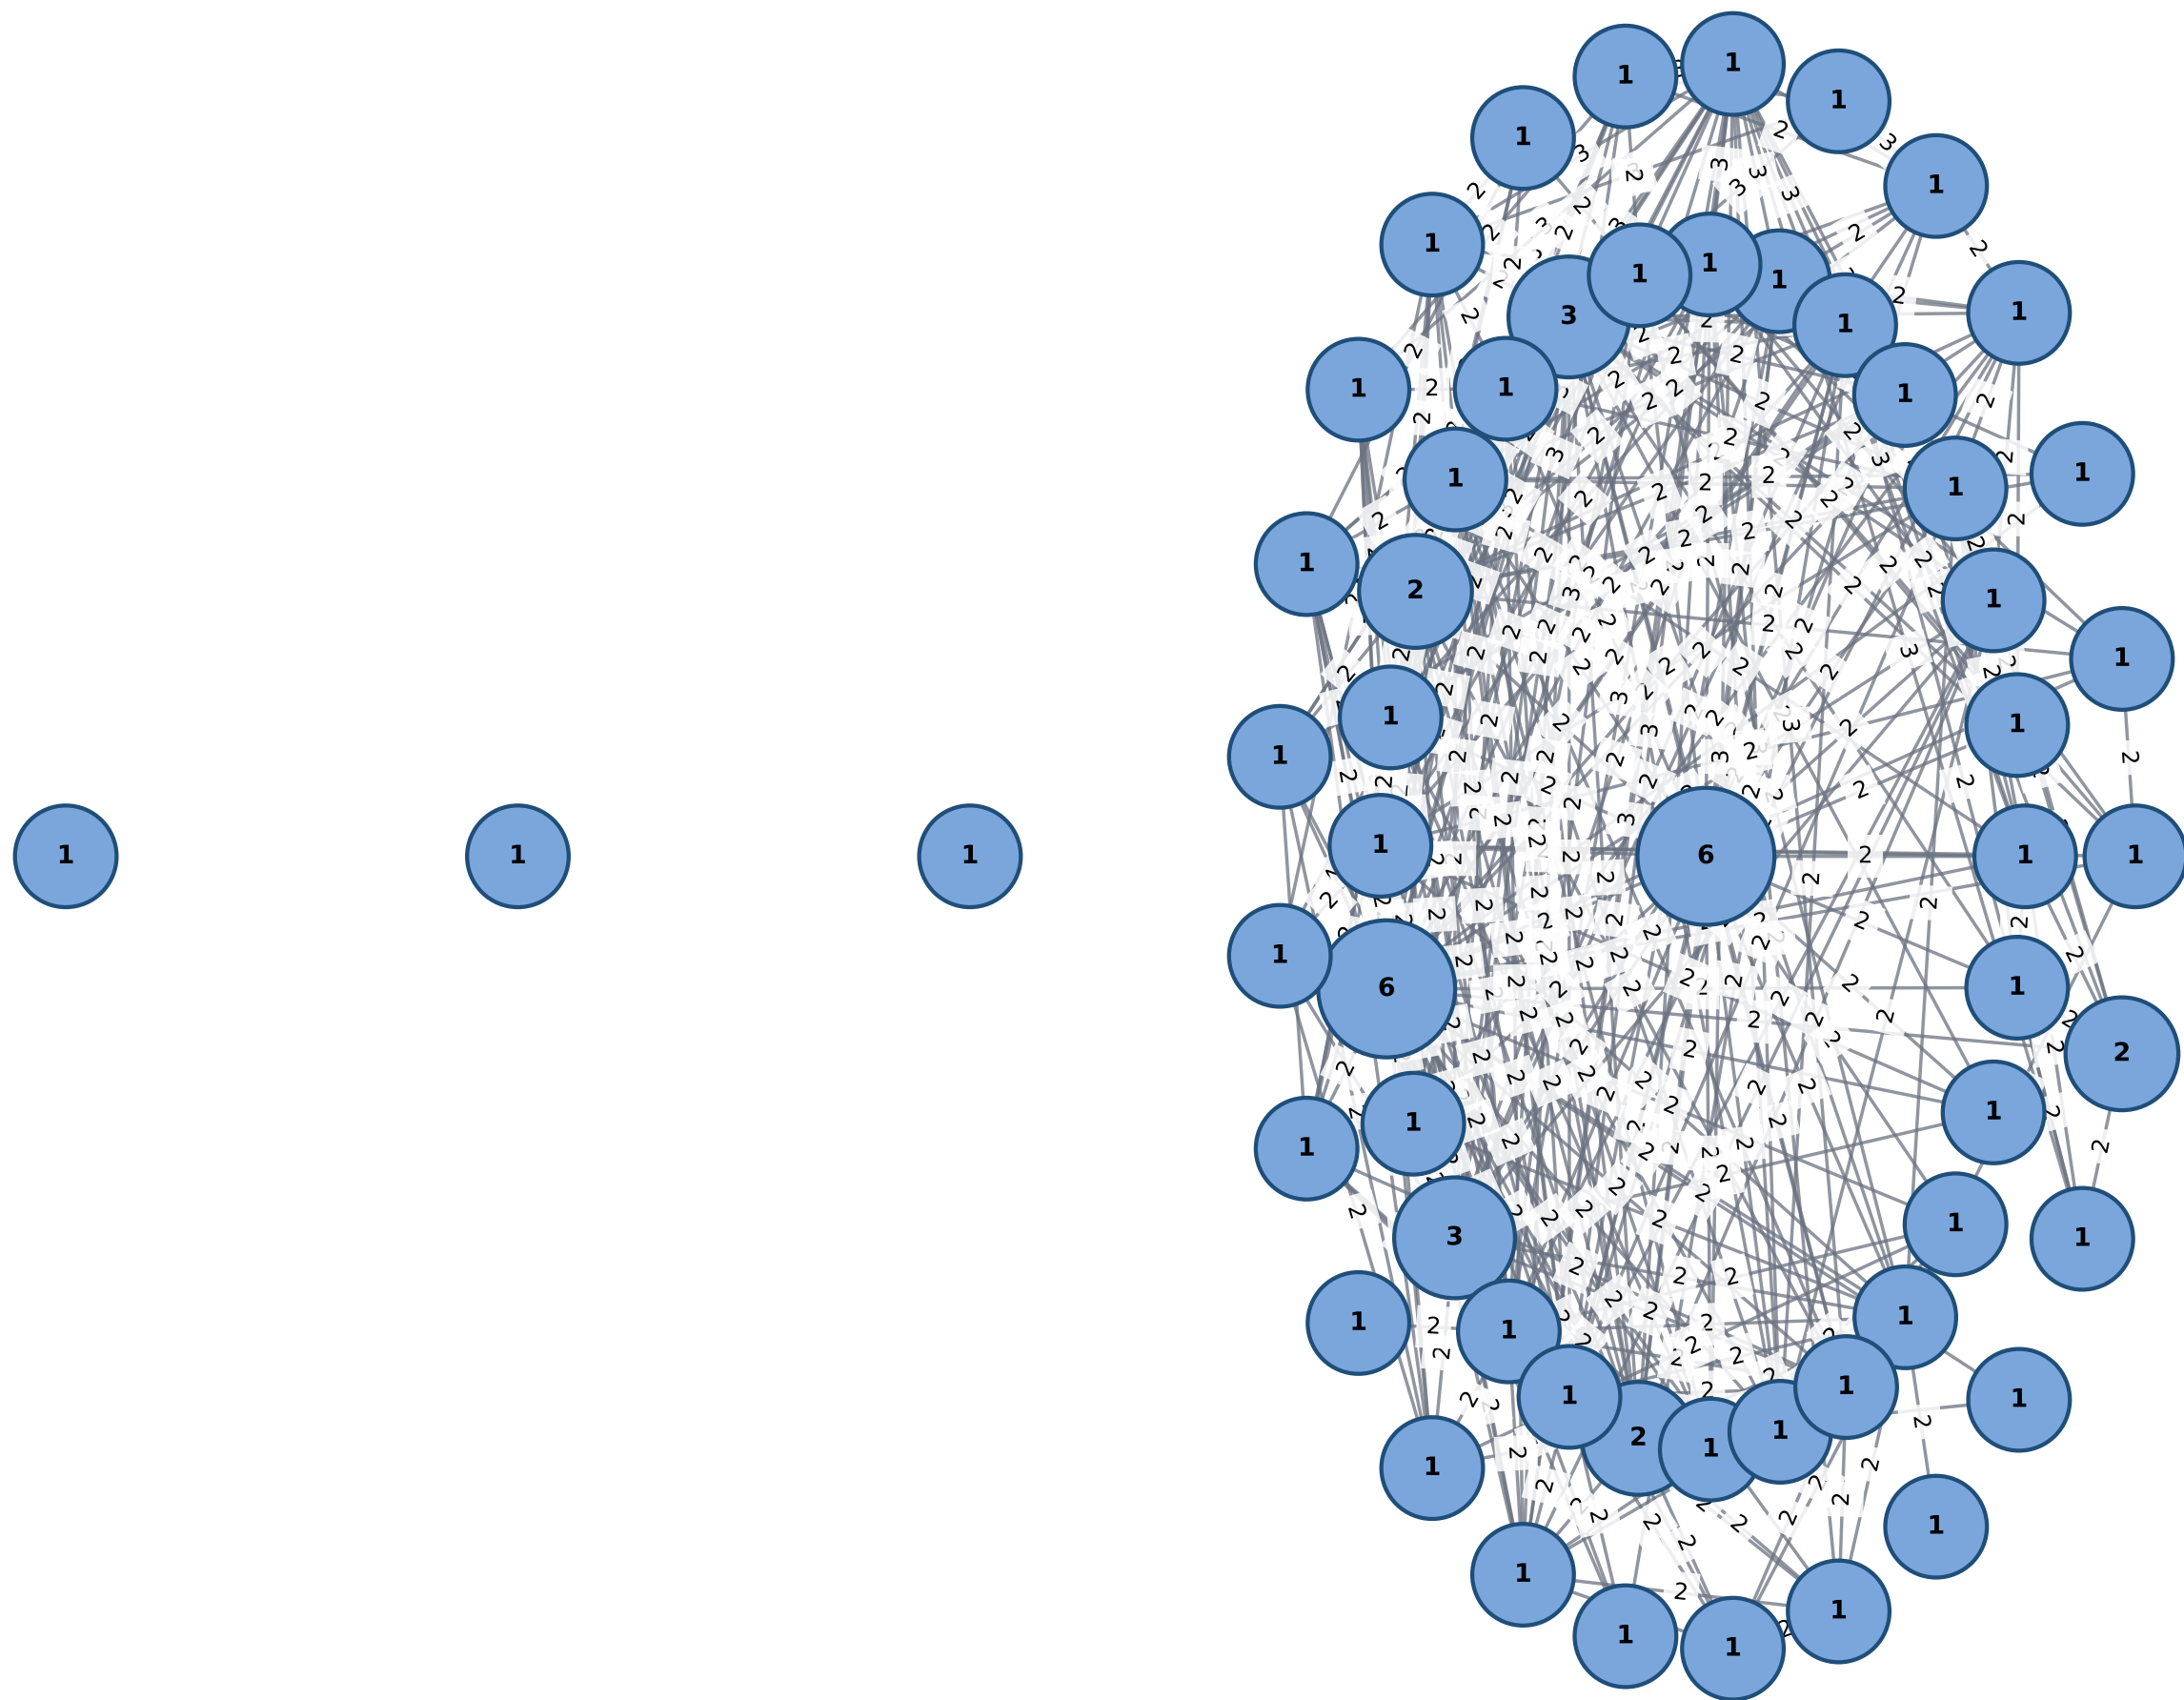

liver cirrhosis biliary: cluster map (automatic layout, closest connections only)

lung diseases obstructive: cluster map (automatic layout, closest connections only)

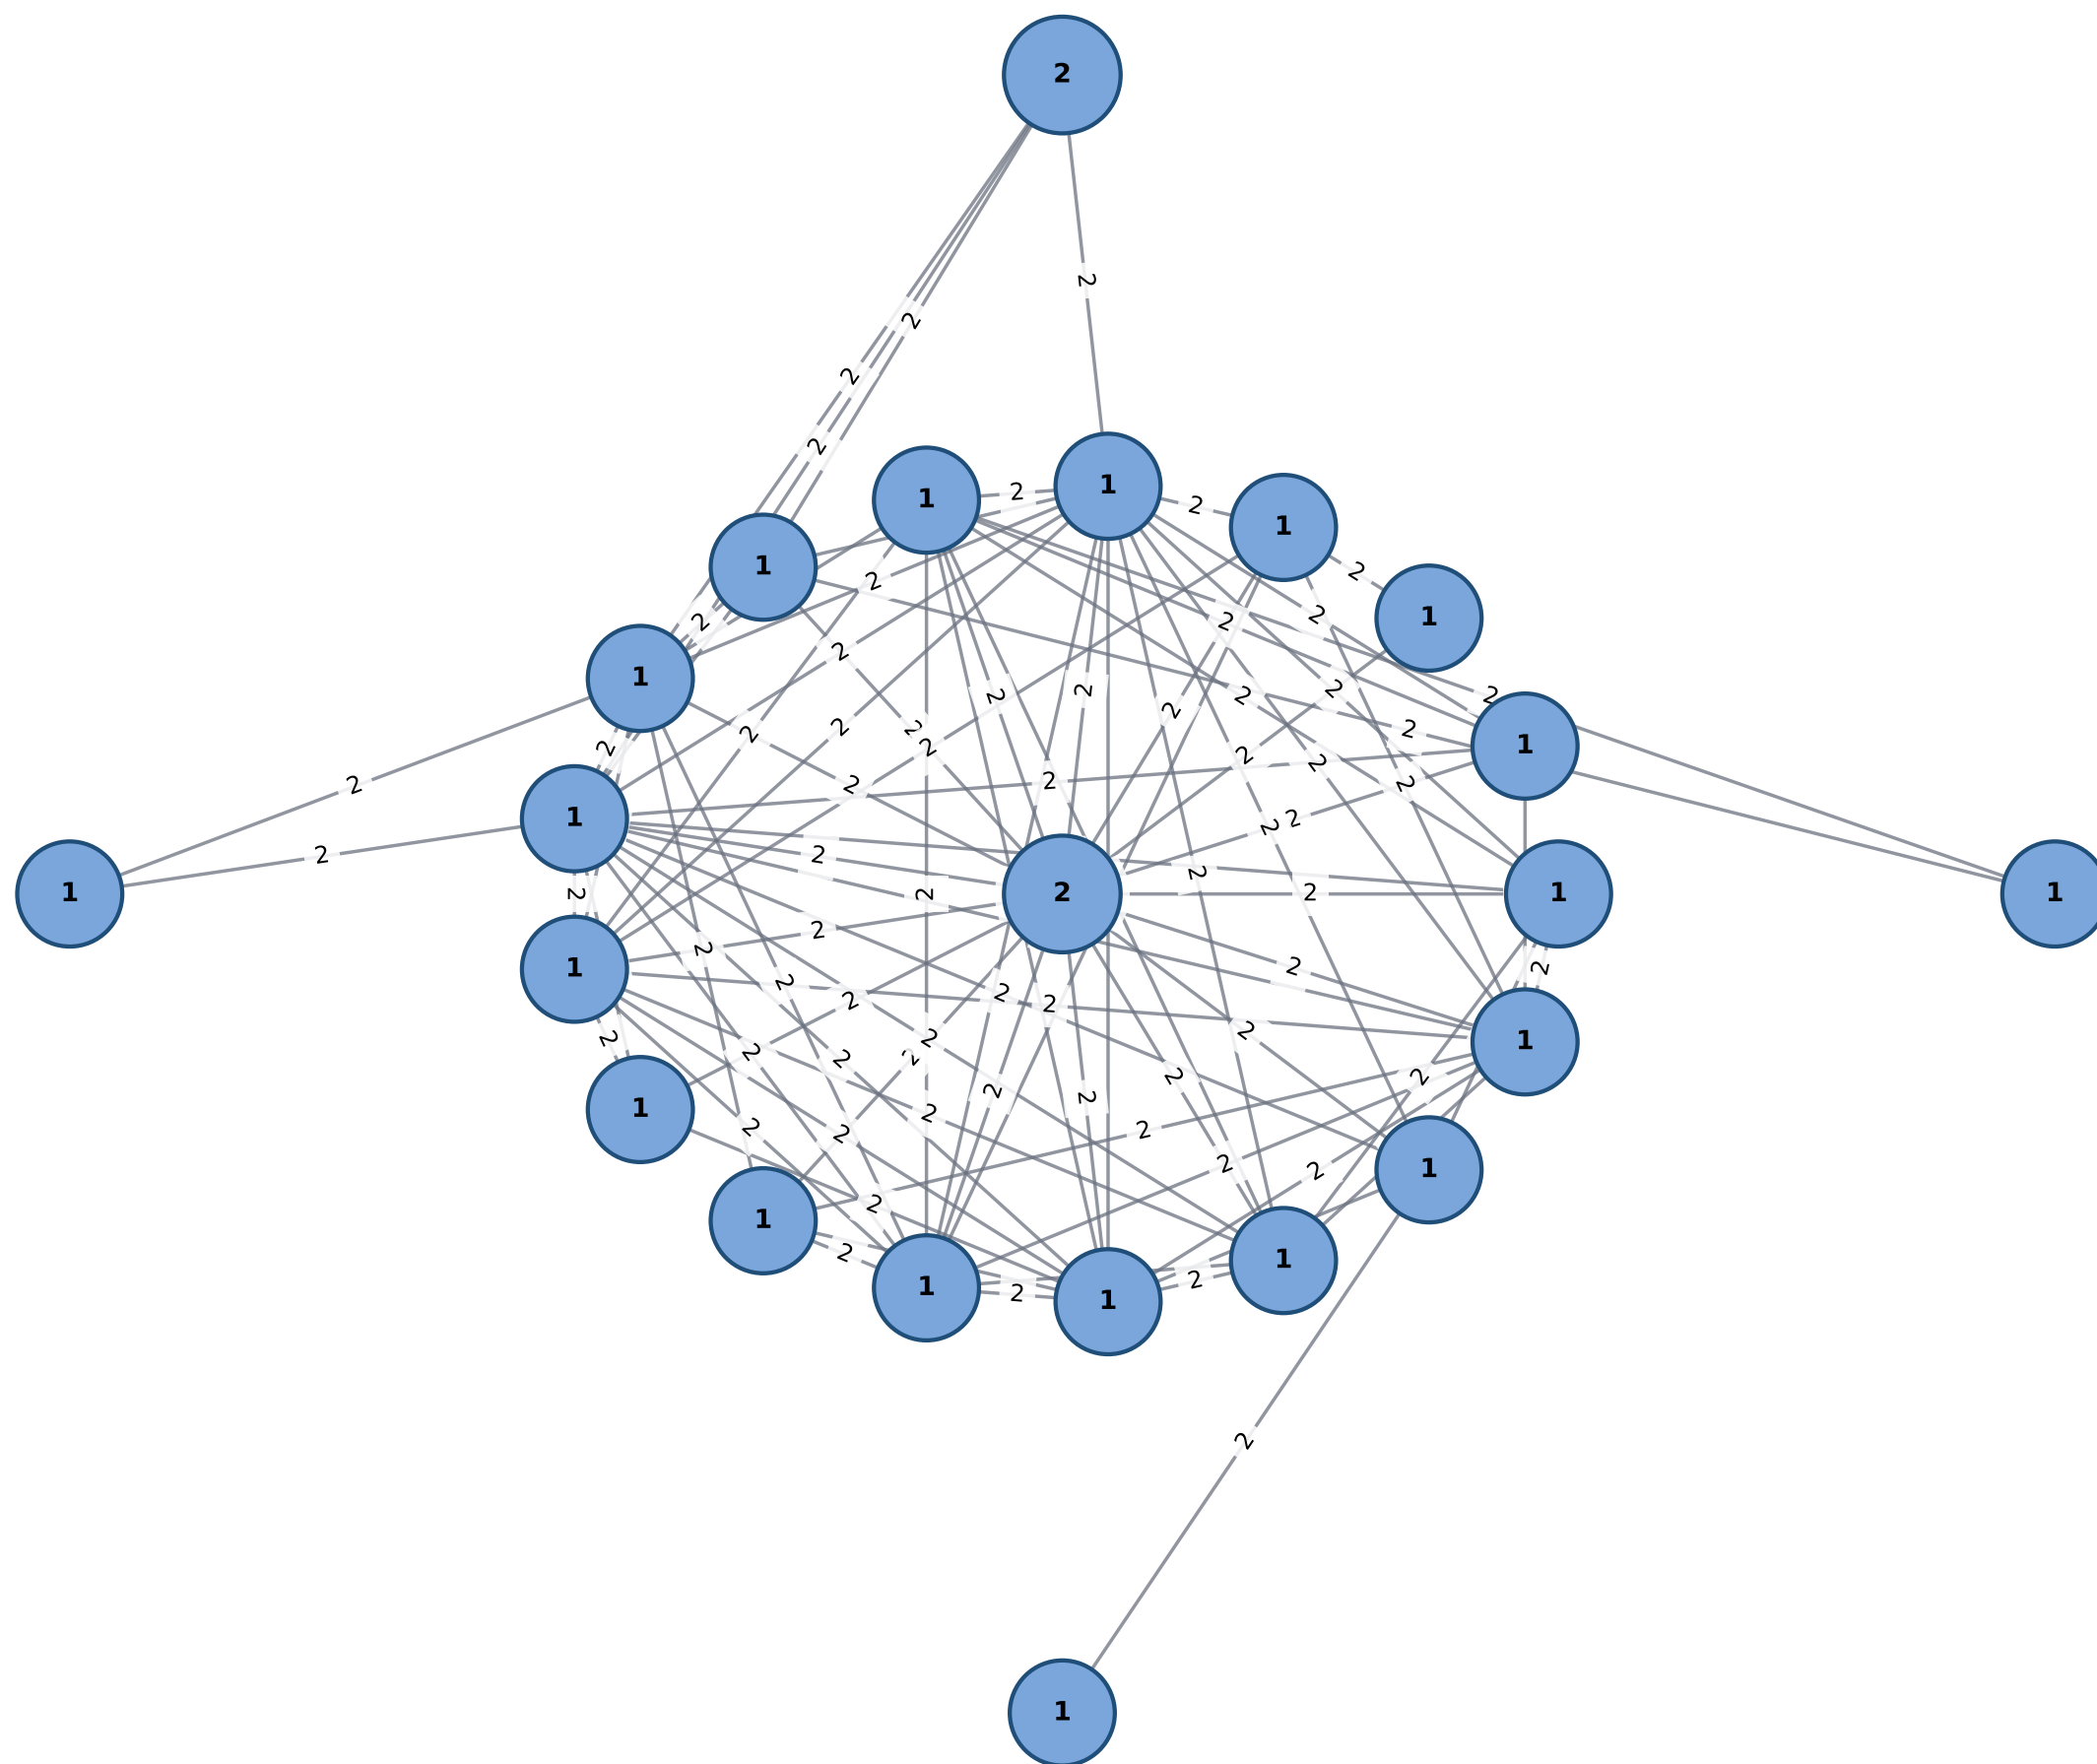

lupus erythematosus: cluster map (automatic layout, closest connections only)

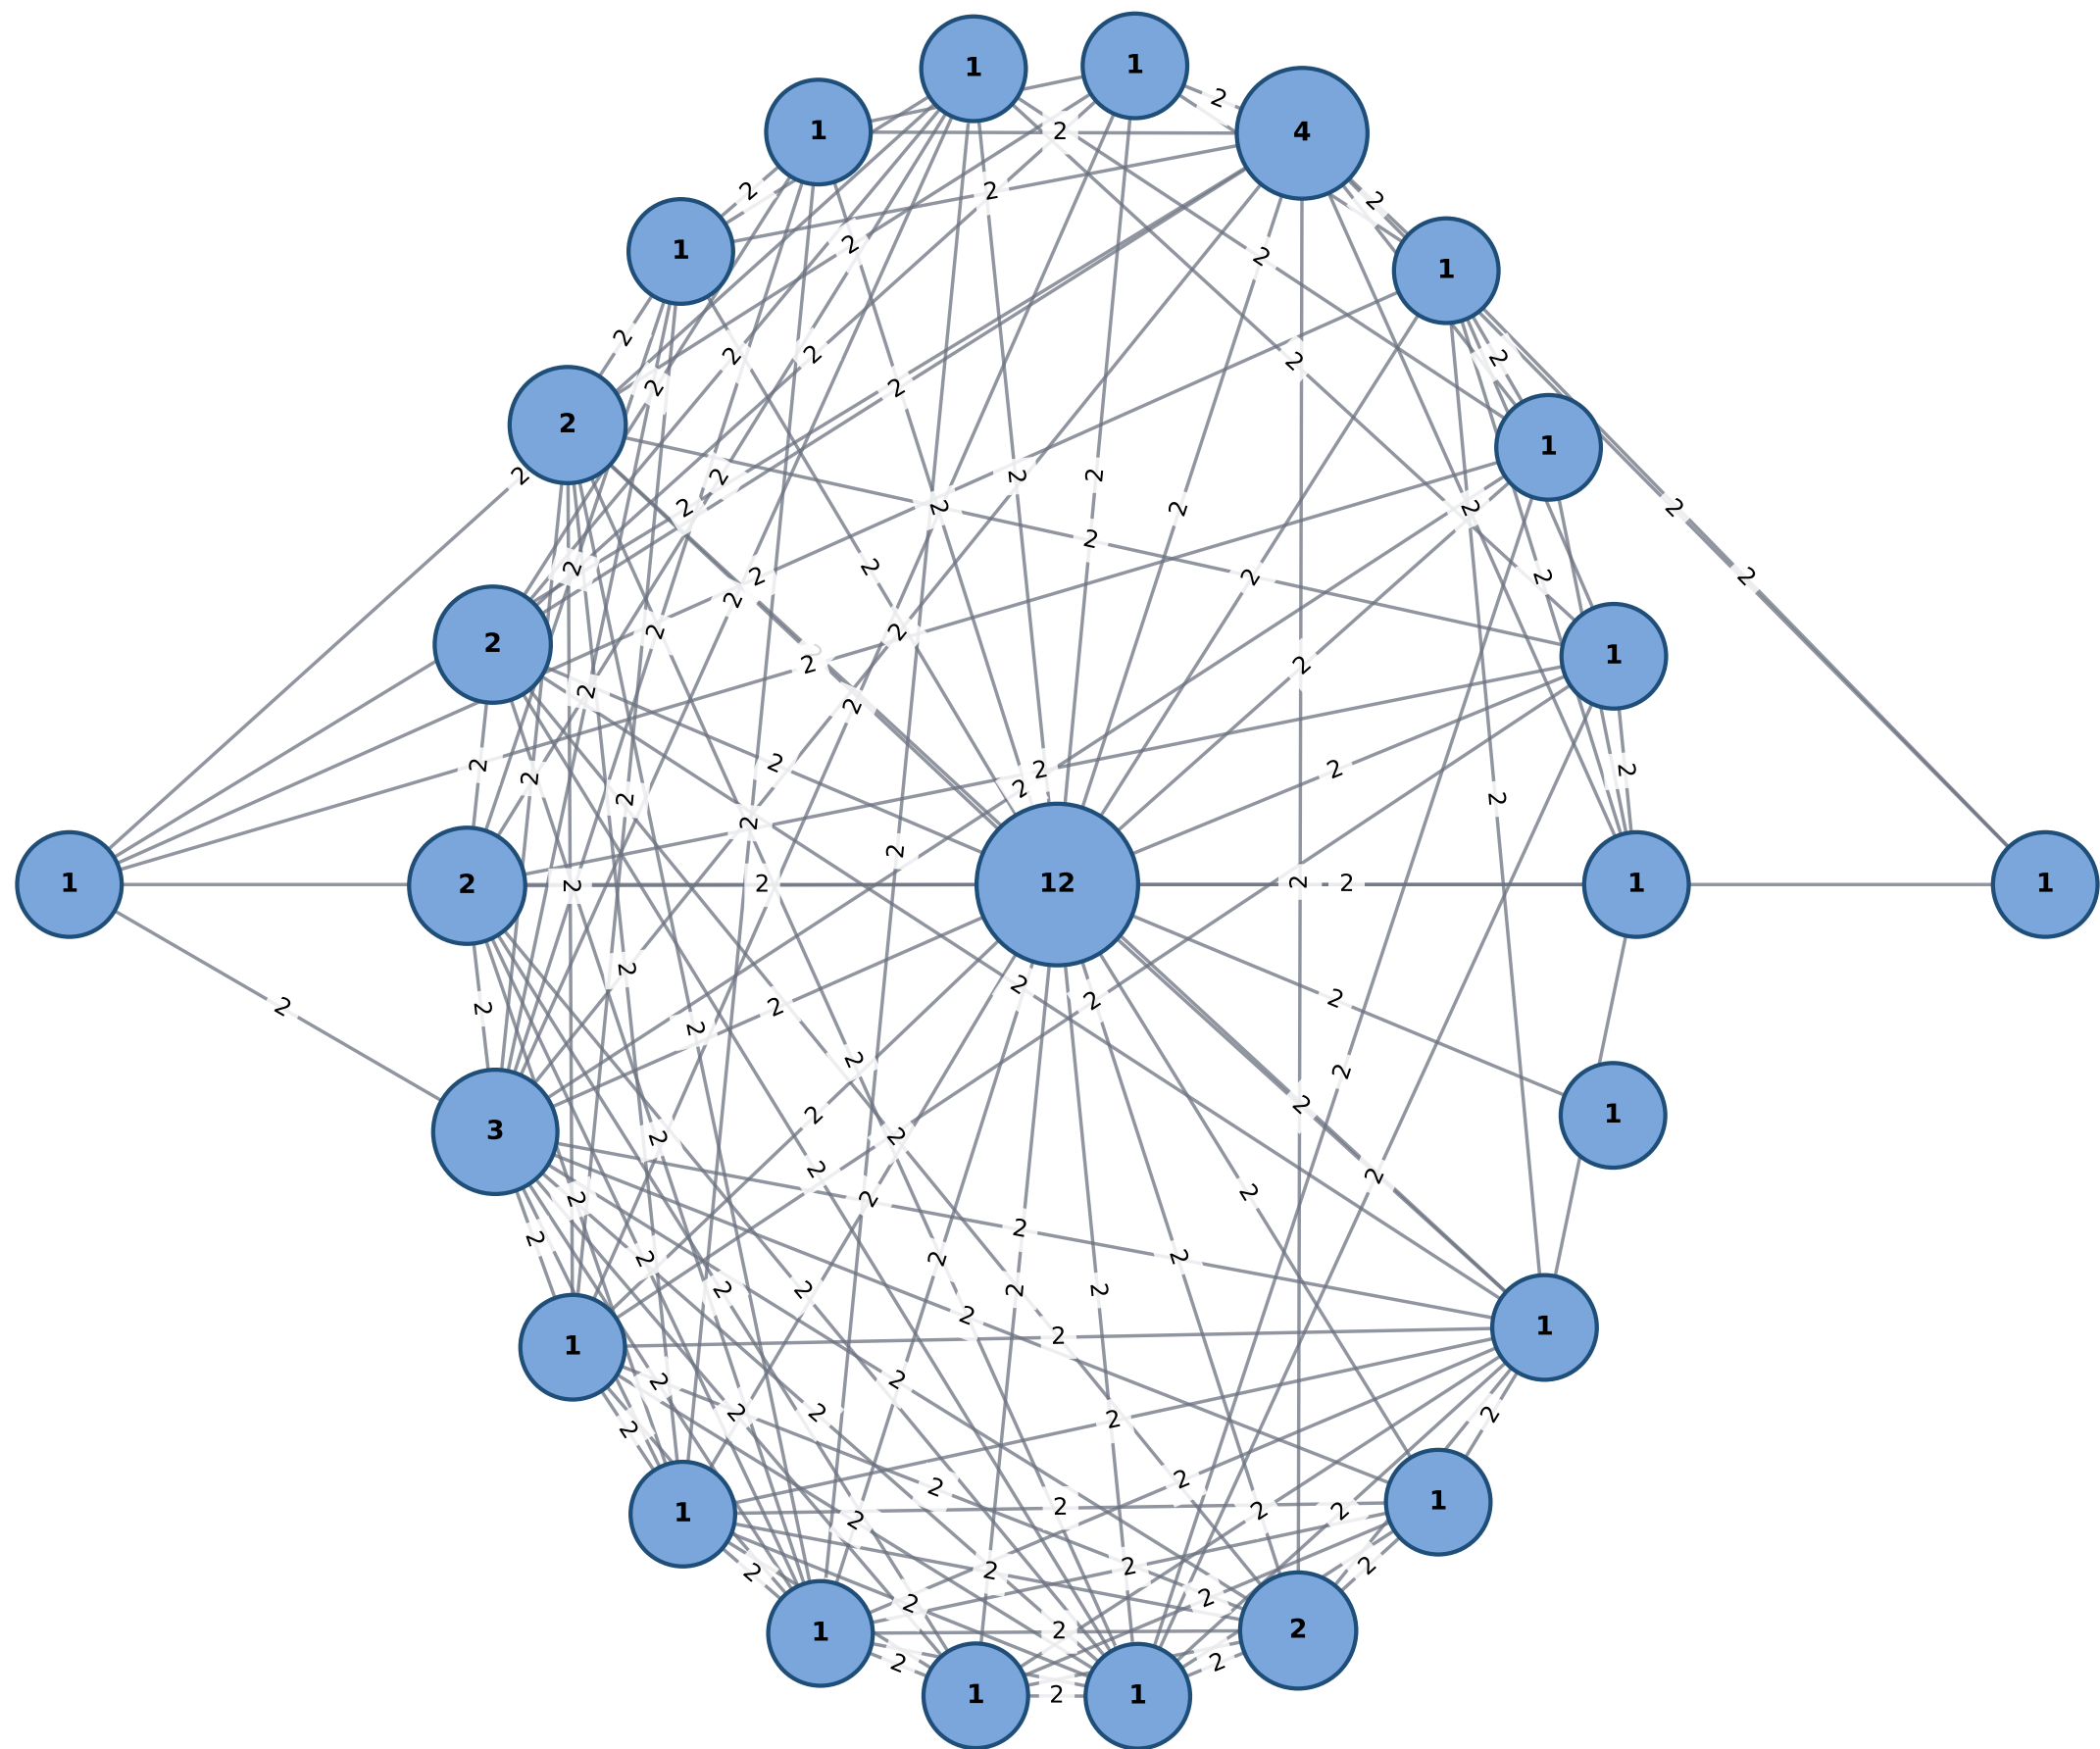

lymphoma: cluster map (automatic layout, closest connections only)

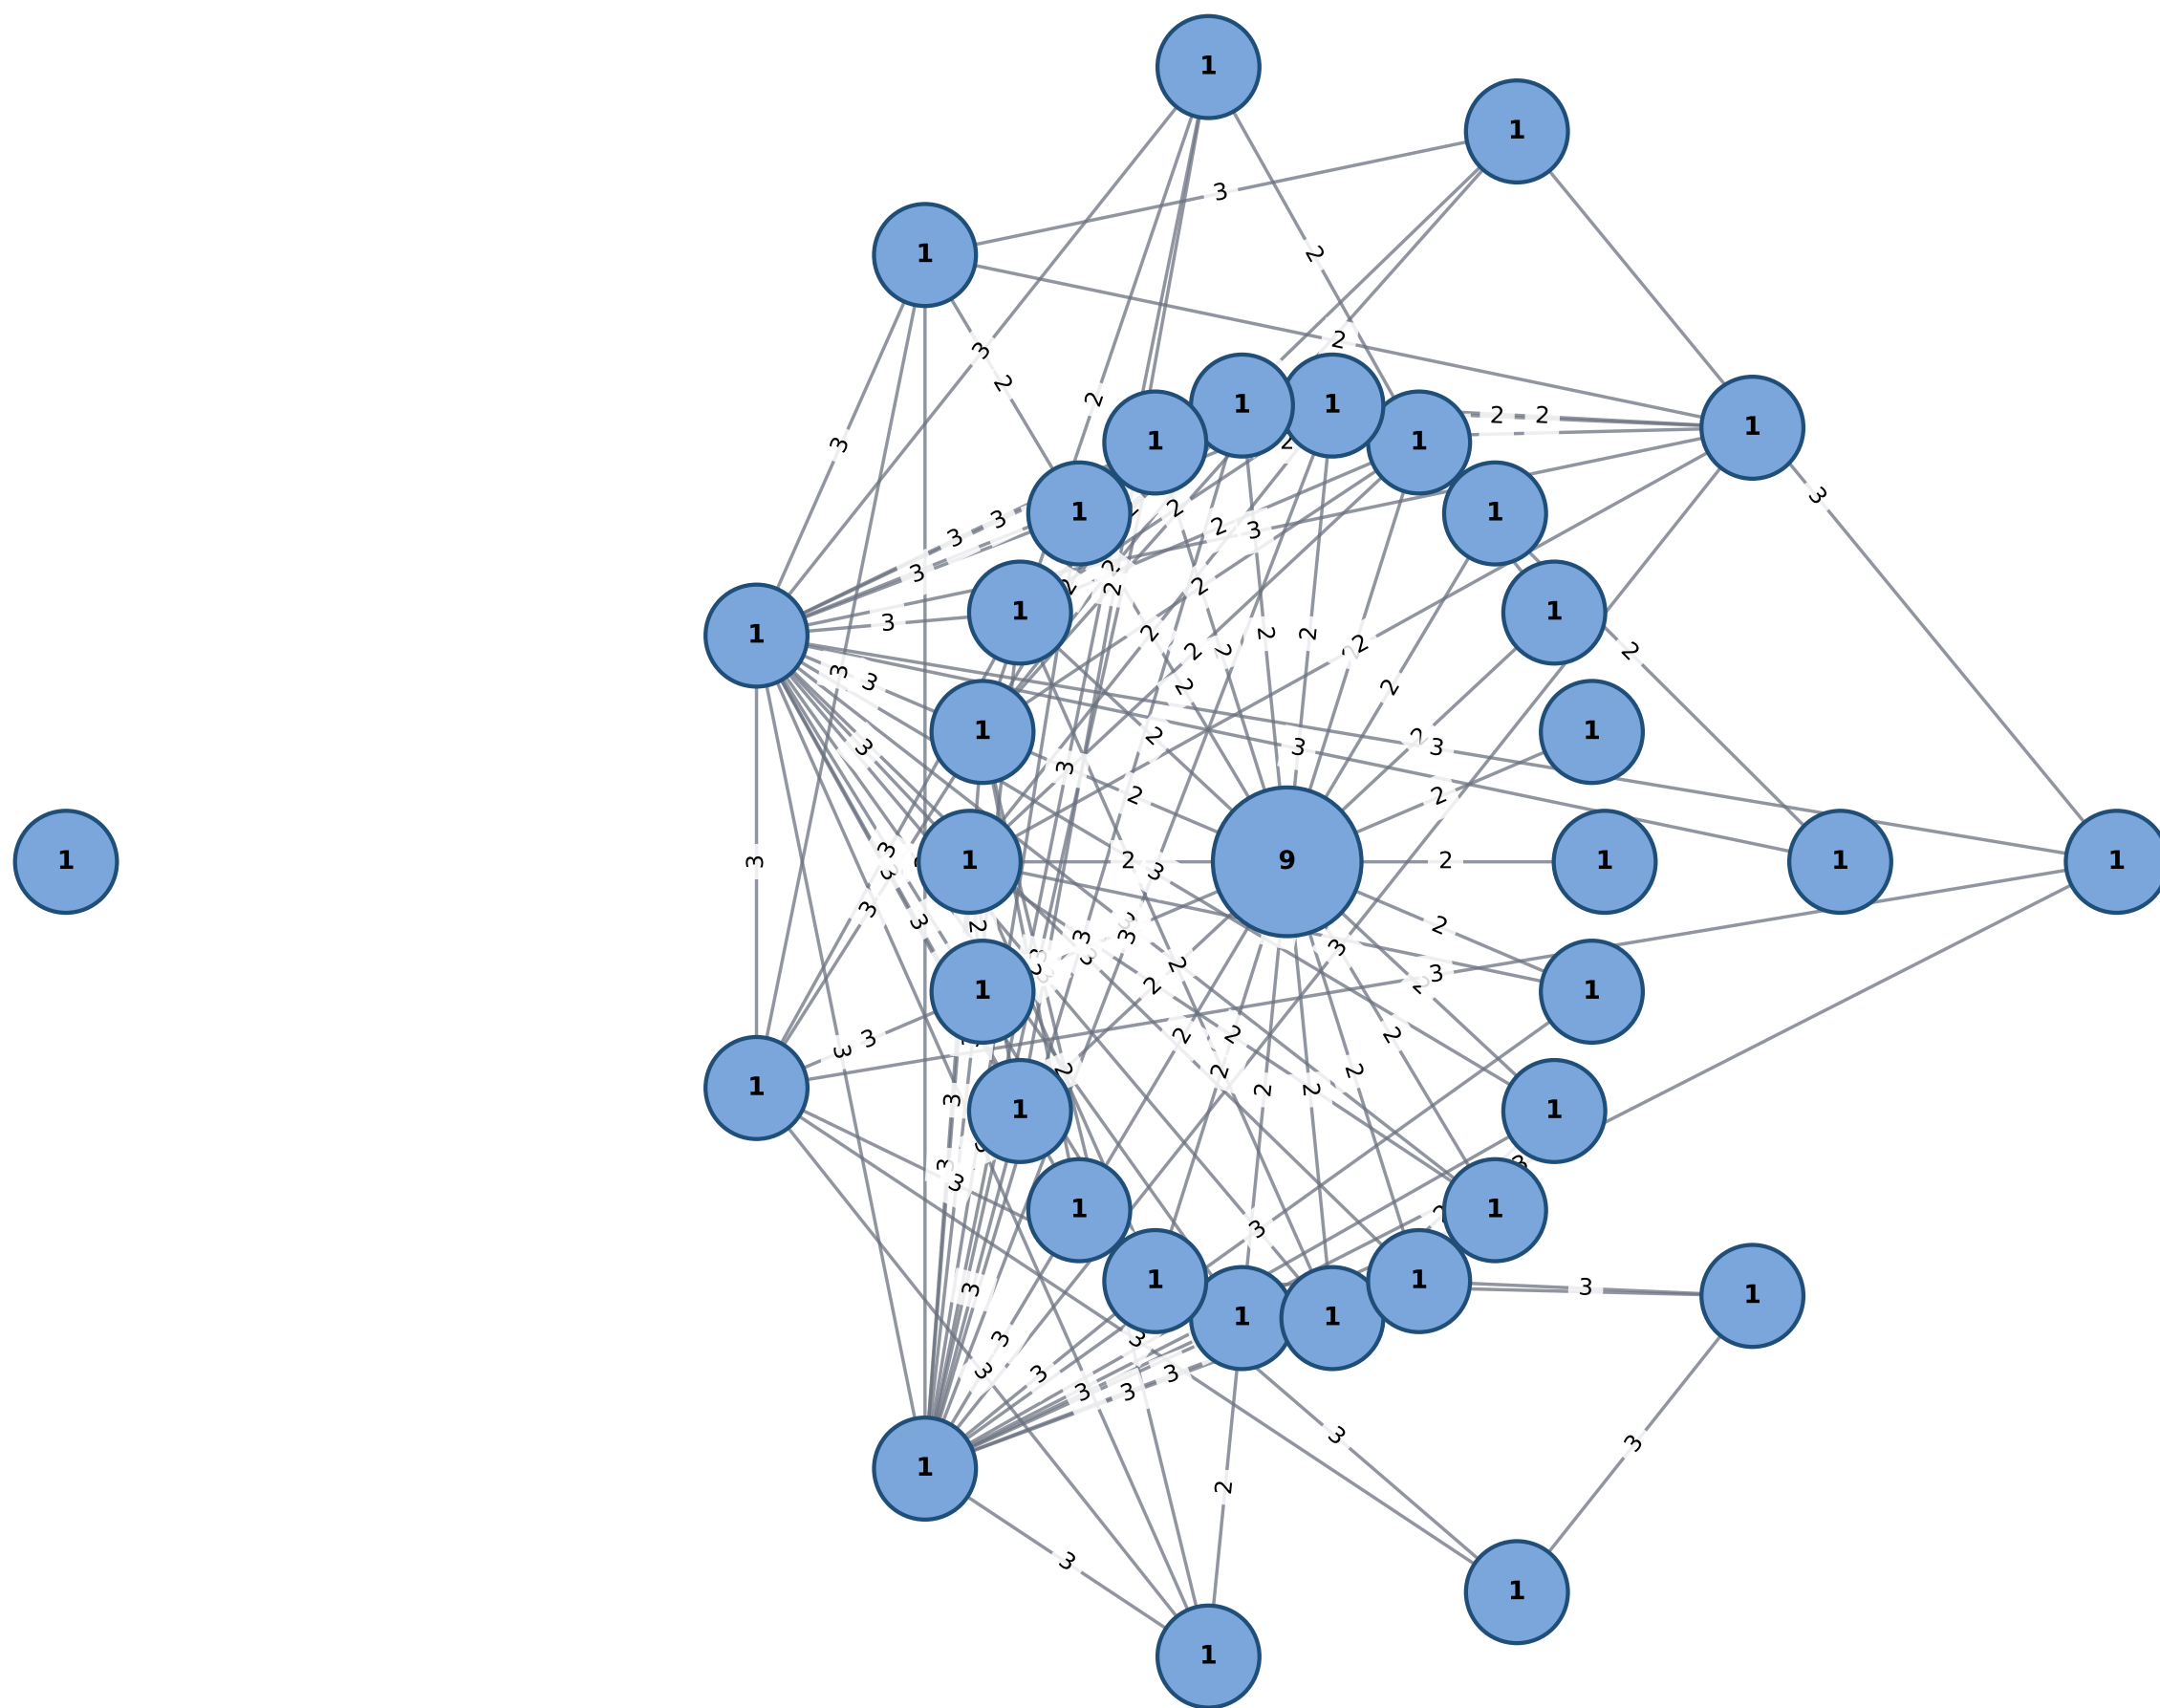

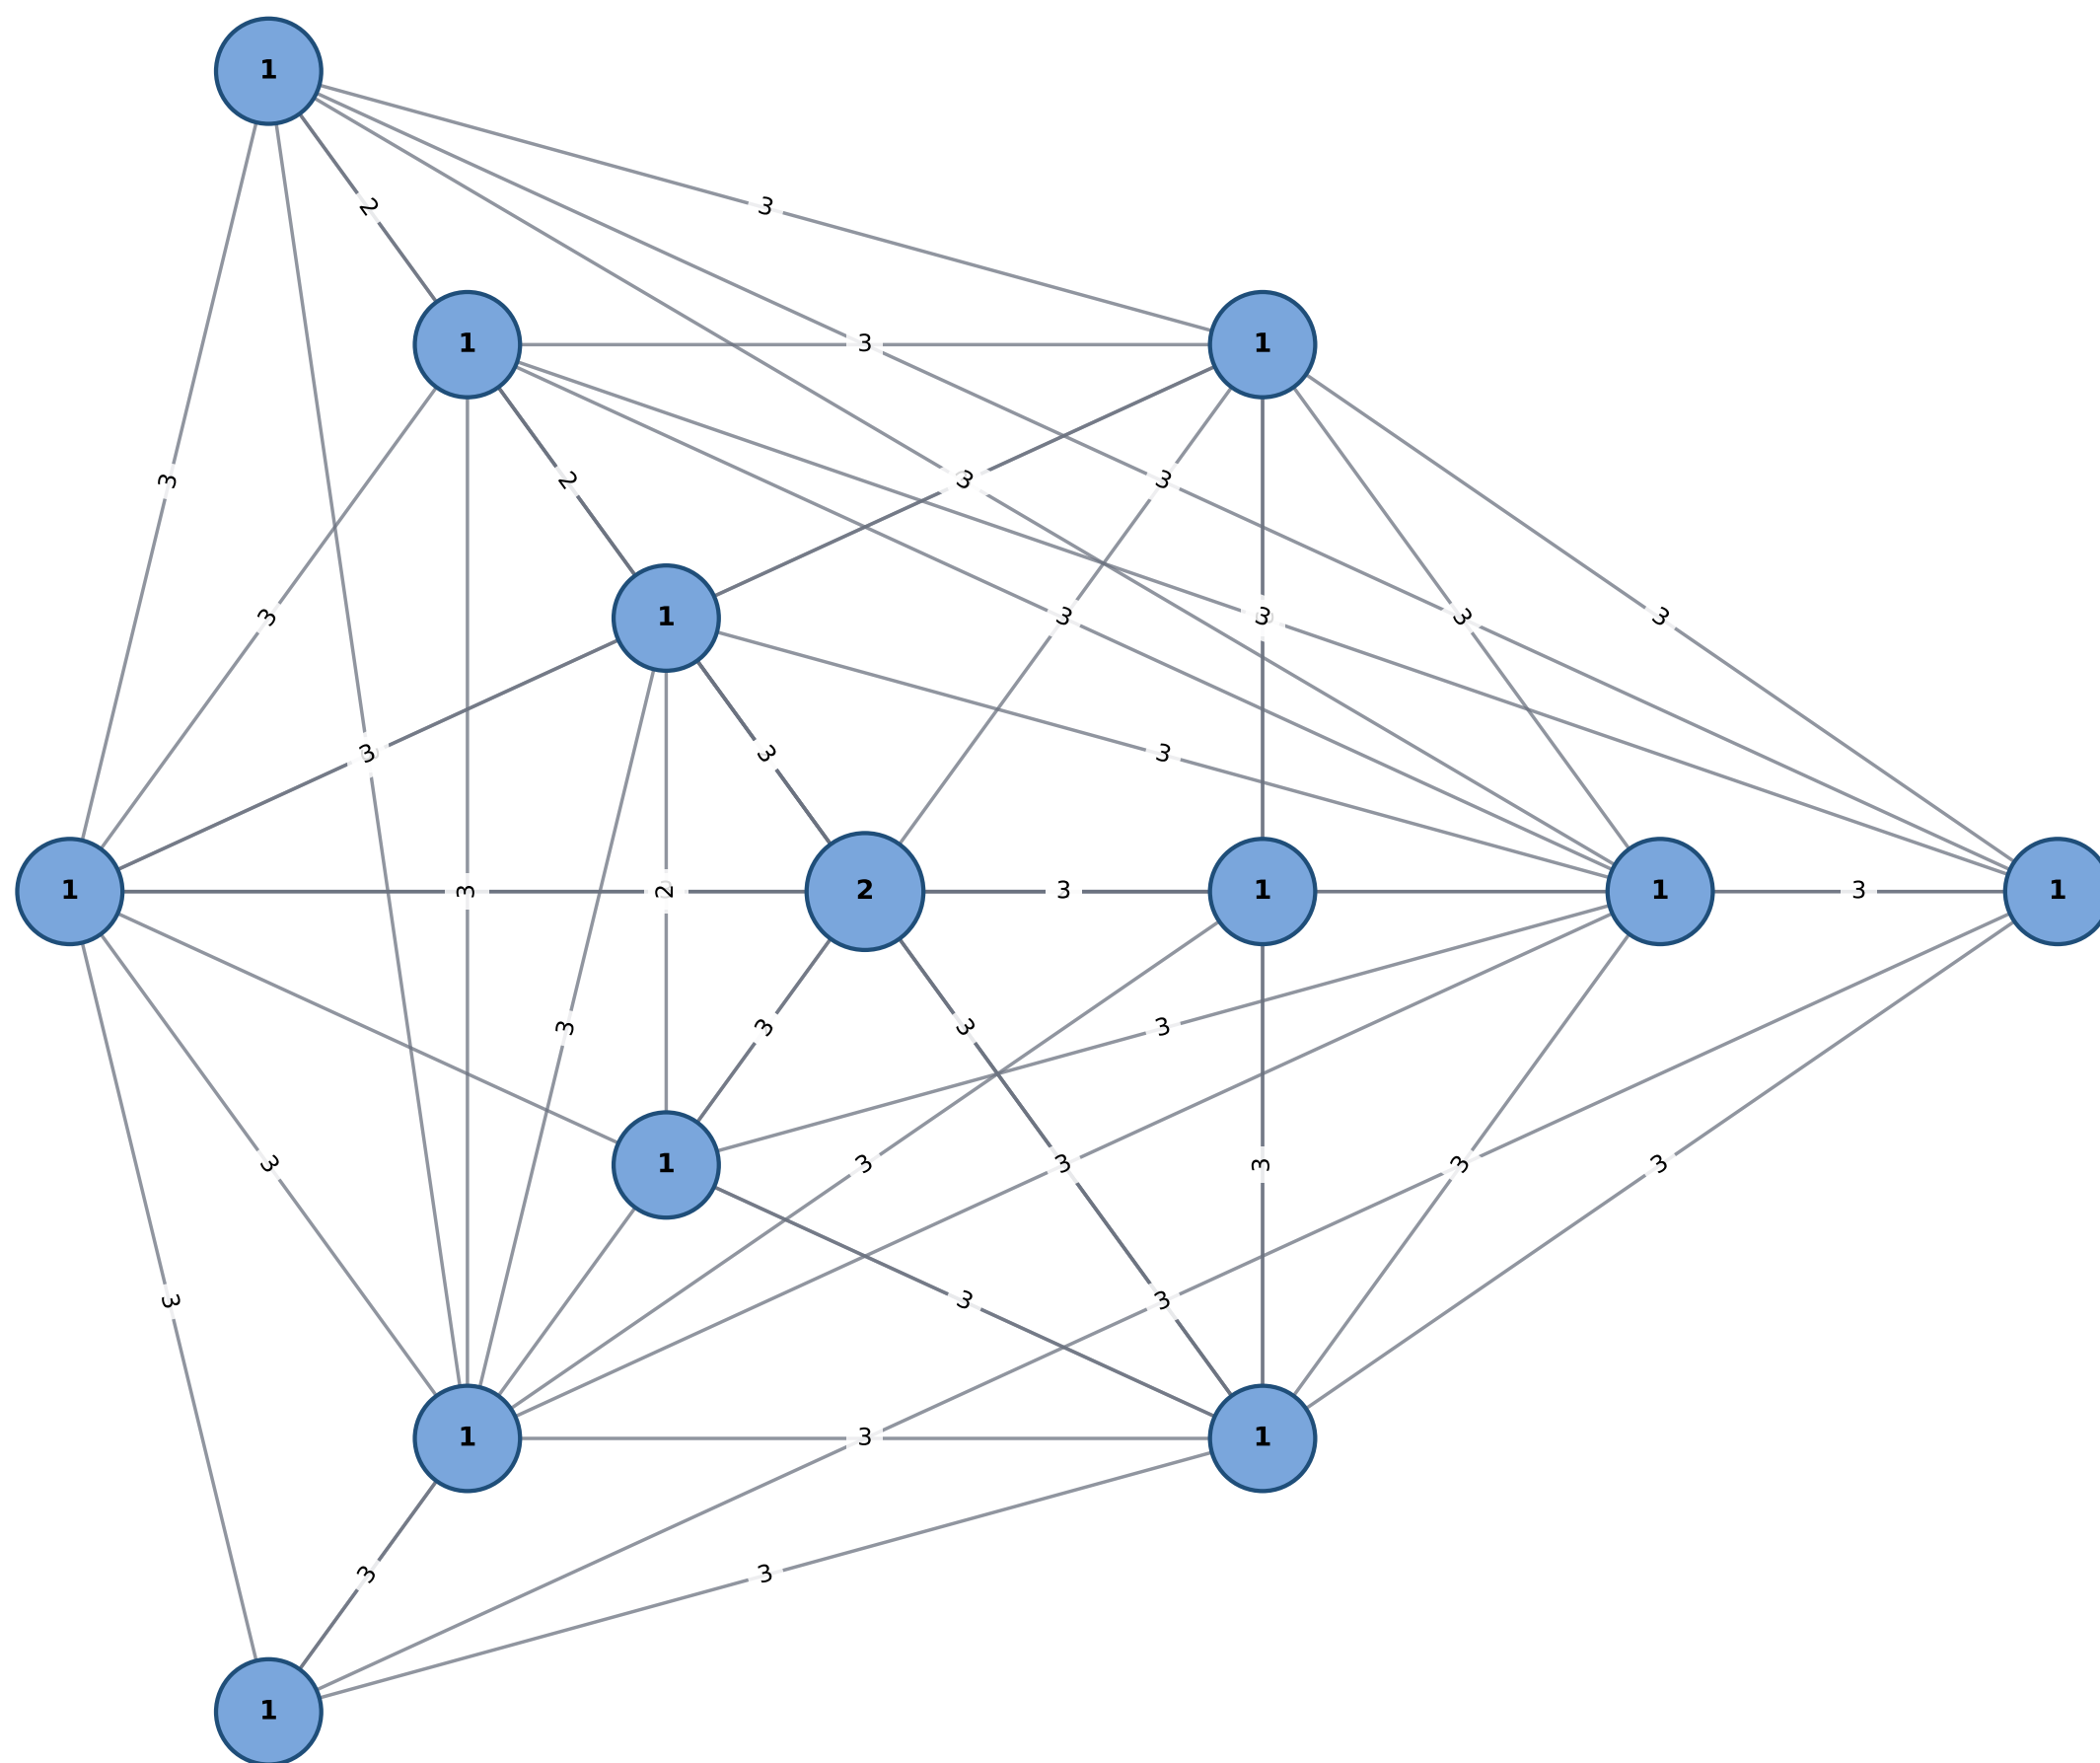

lysosomal storage diseases: cluster map (automatic layout, closest connections only)

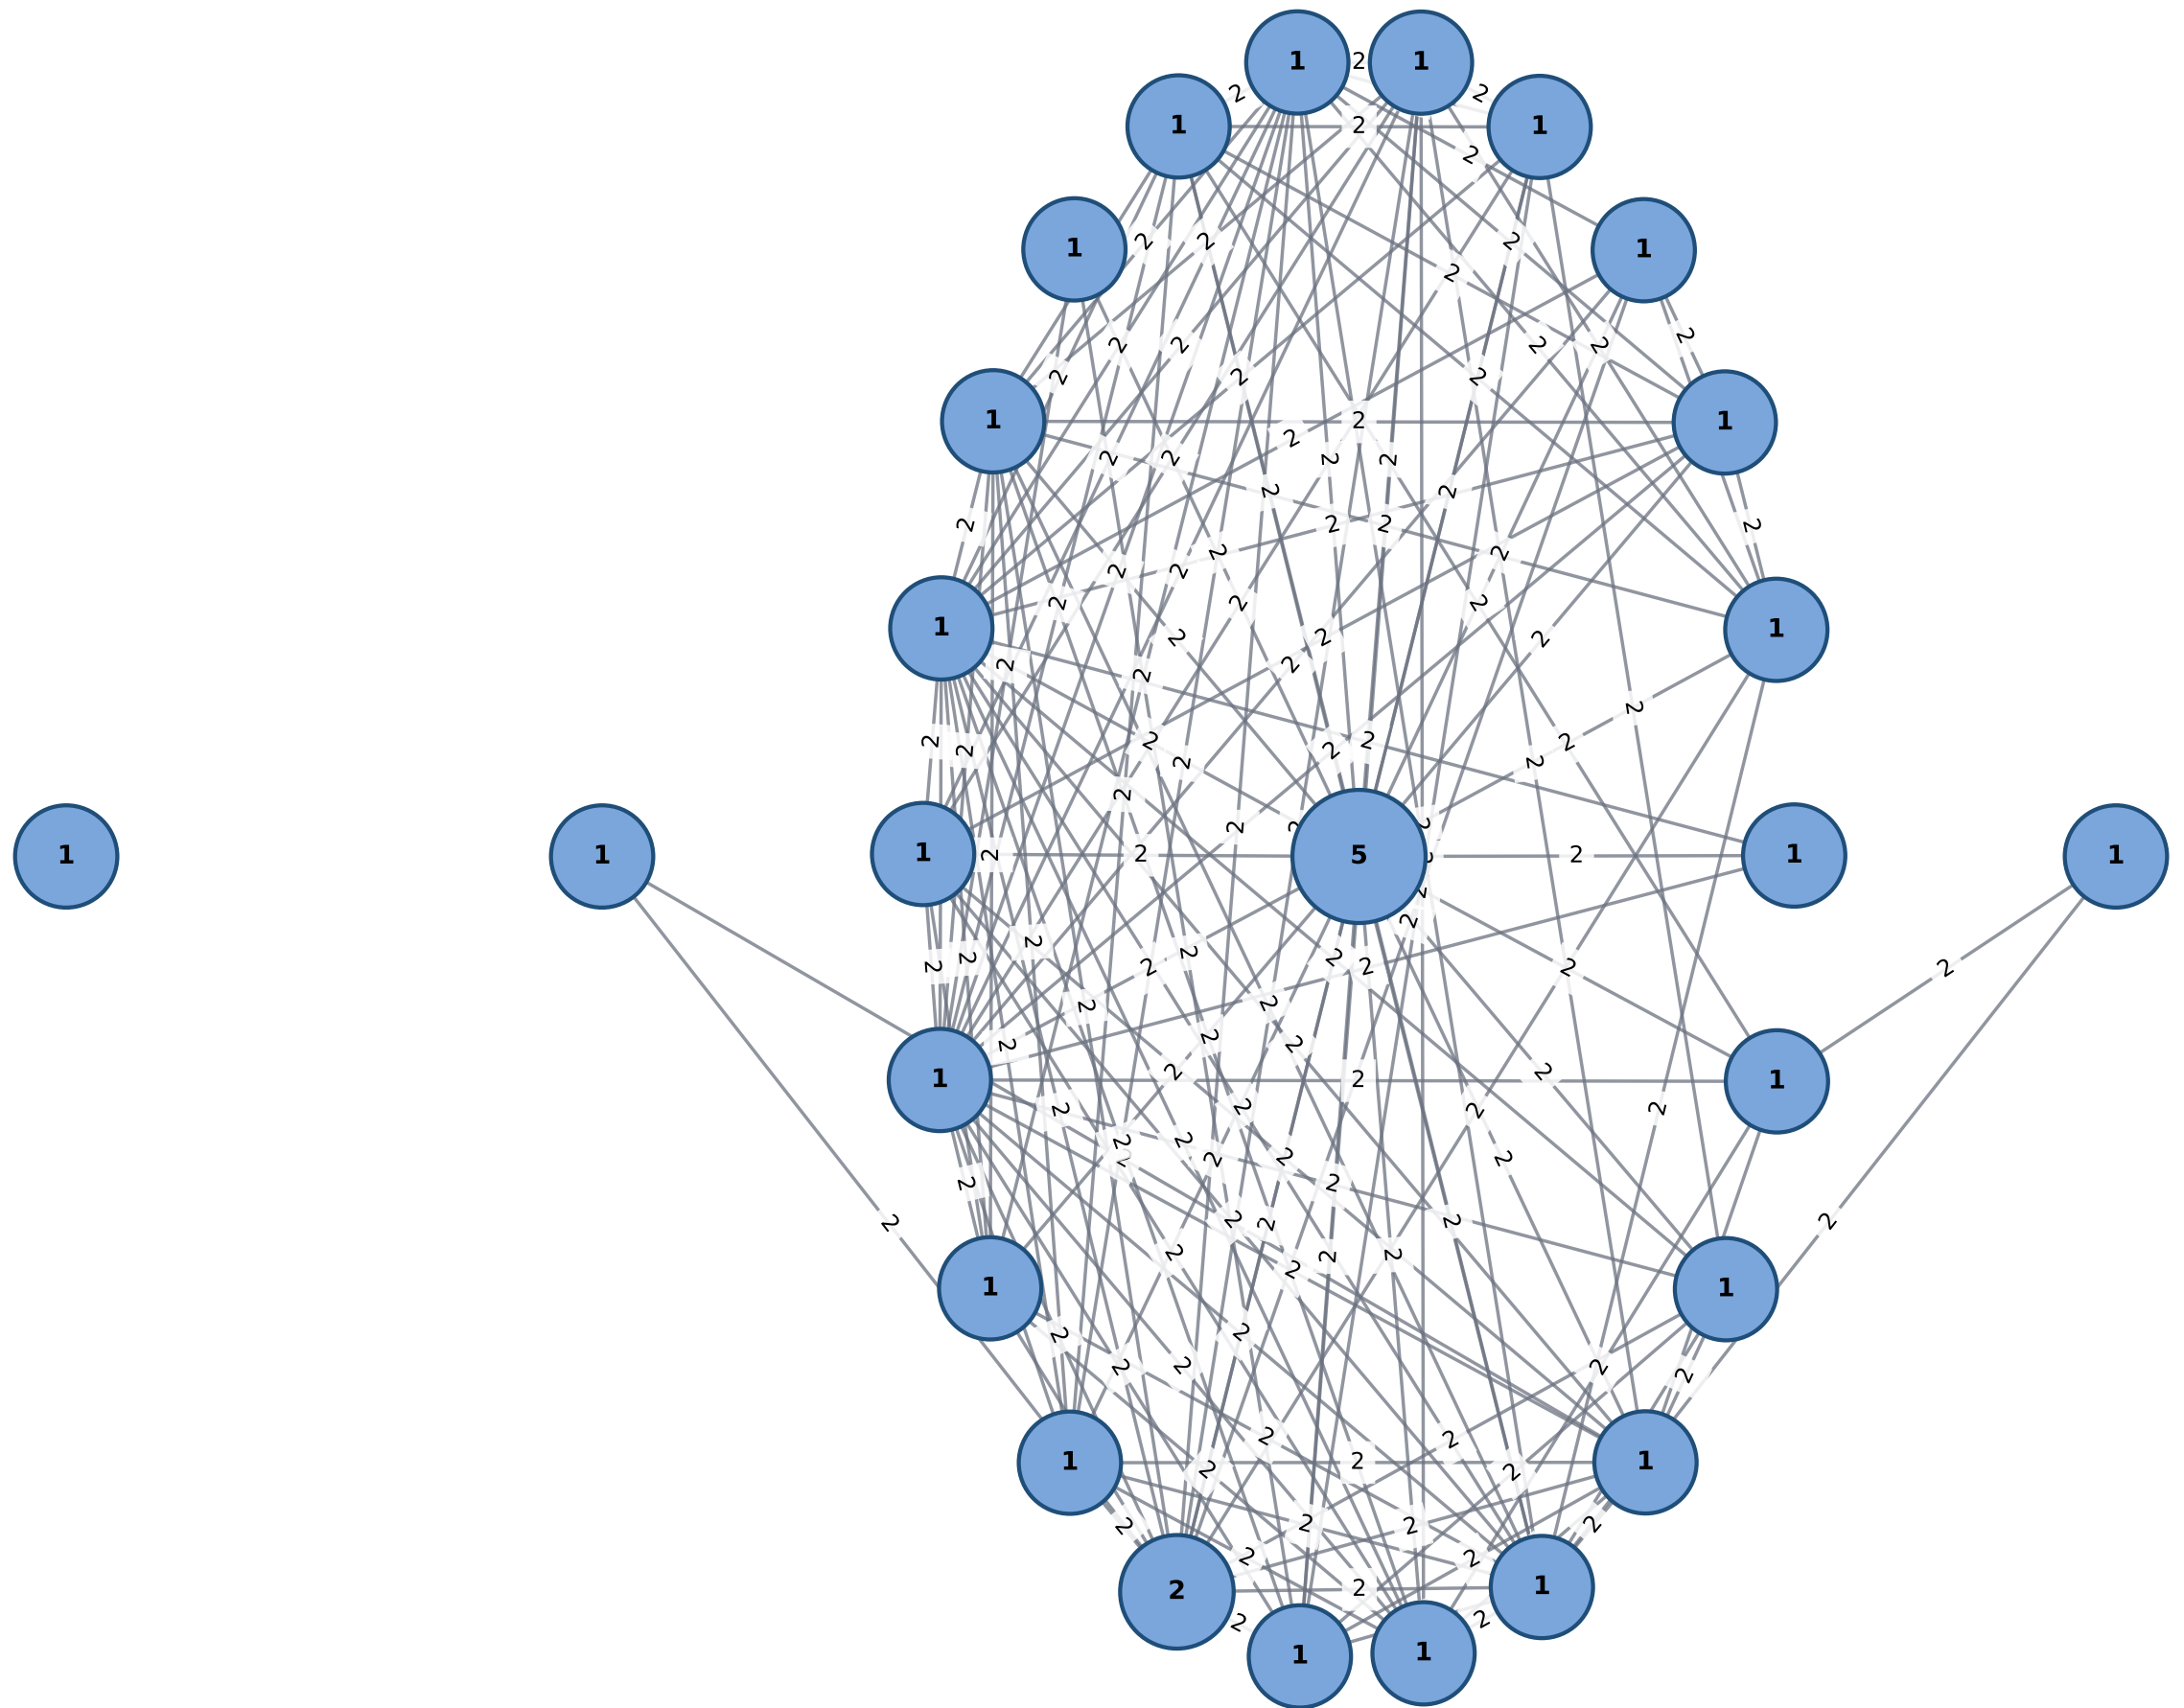

macular degeneration: cluster map (automatic layout, closest connections only)

metabolic syndrome x: cluster map (automatic layout, closest connections only)

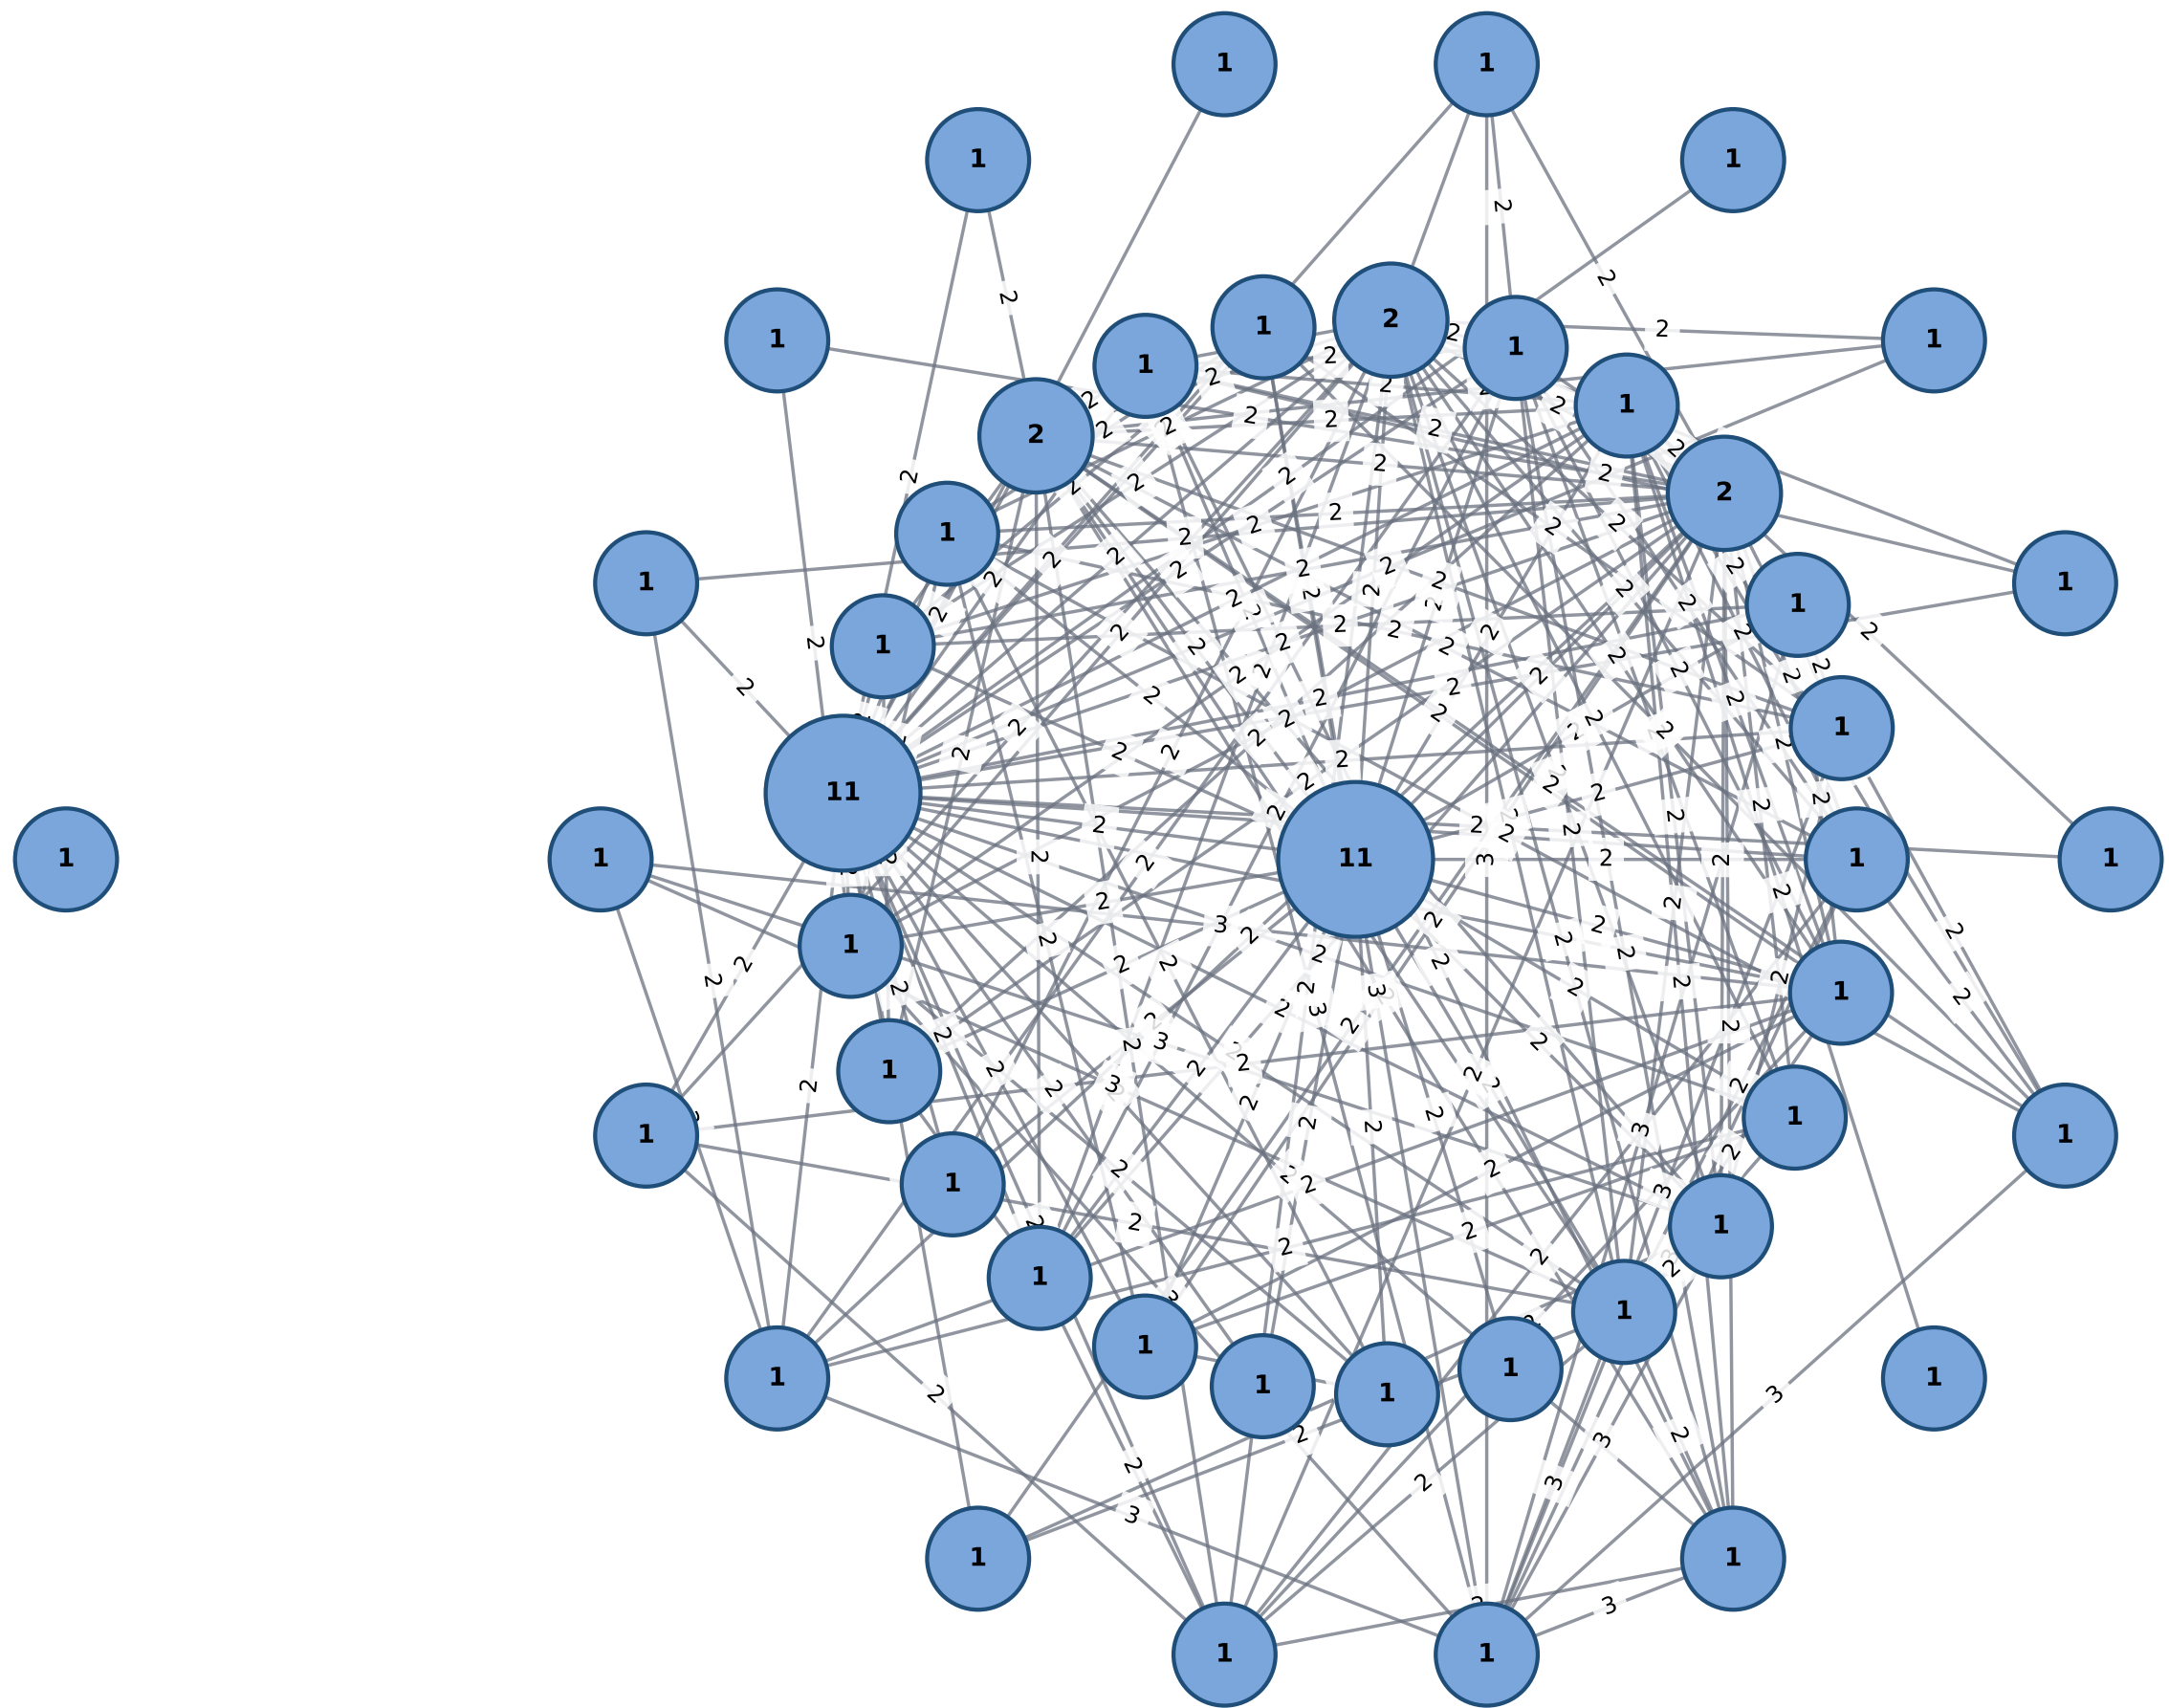

motor neuron disease: cluster map (automatic layout, closest connections only)

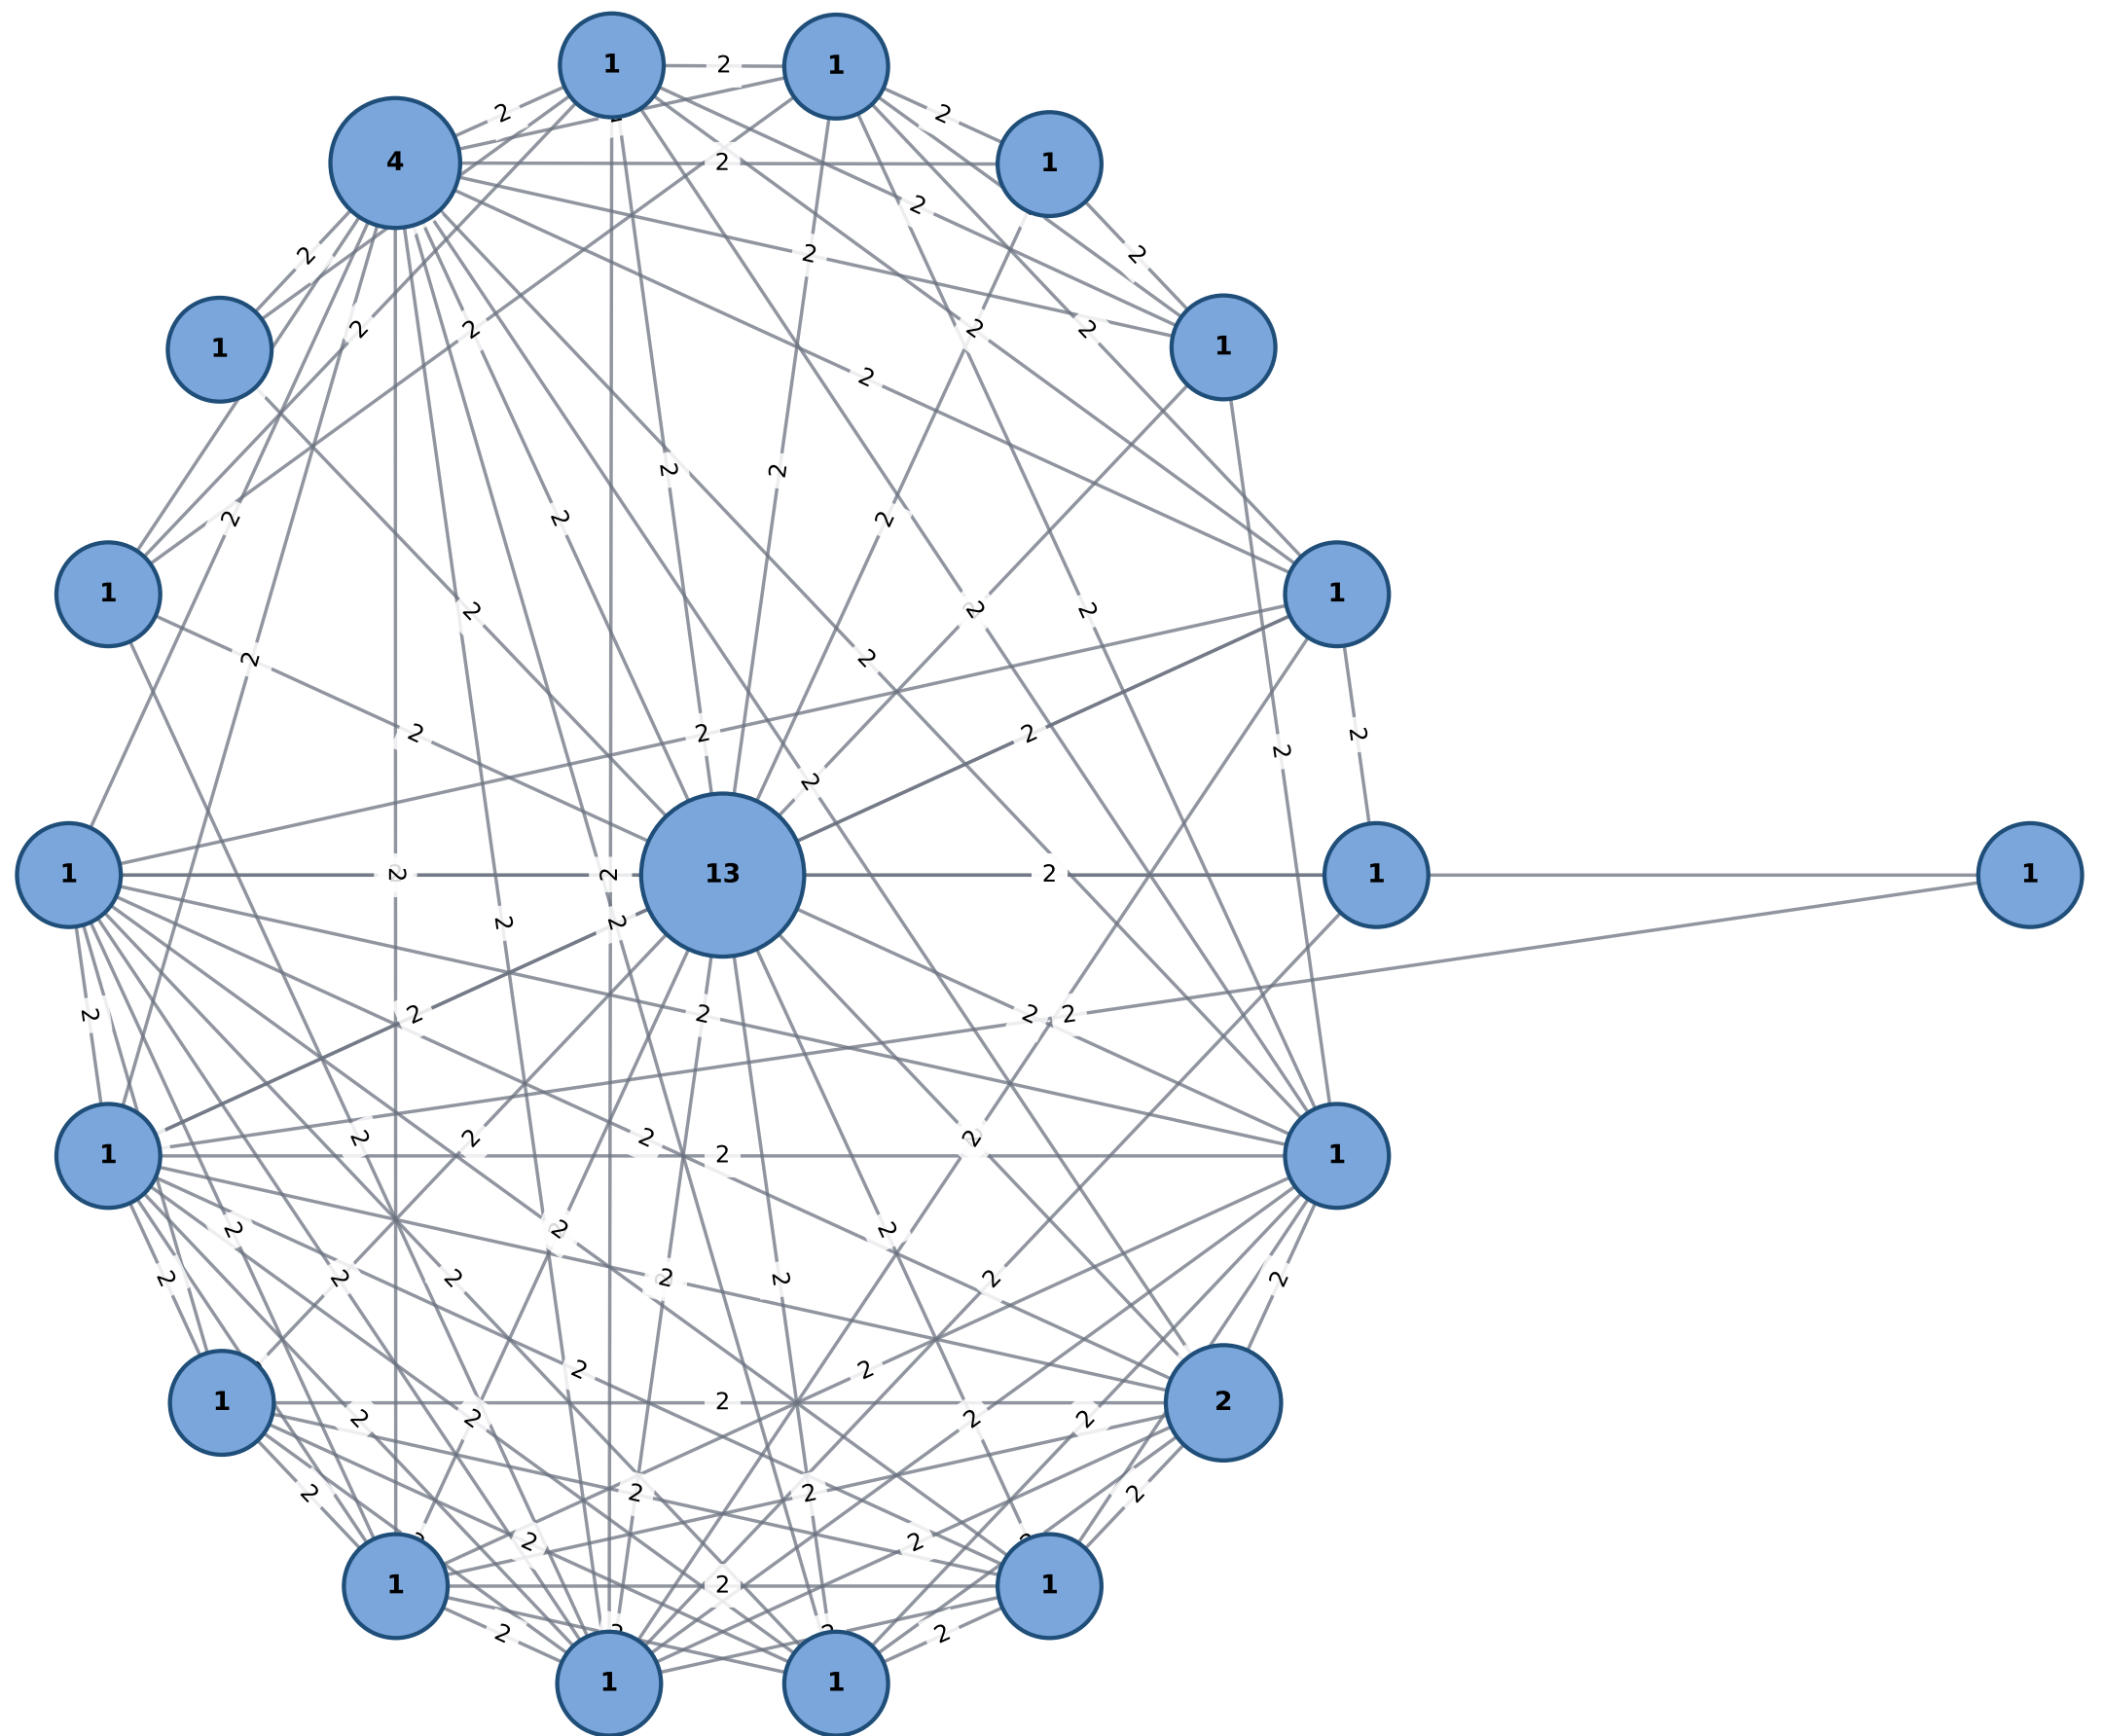

multiple sclerosis: cluster map (automatic layout, closest connections only)

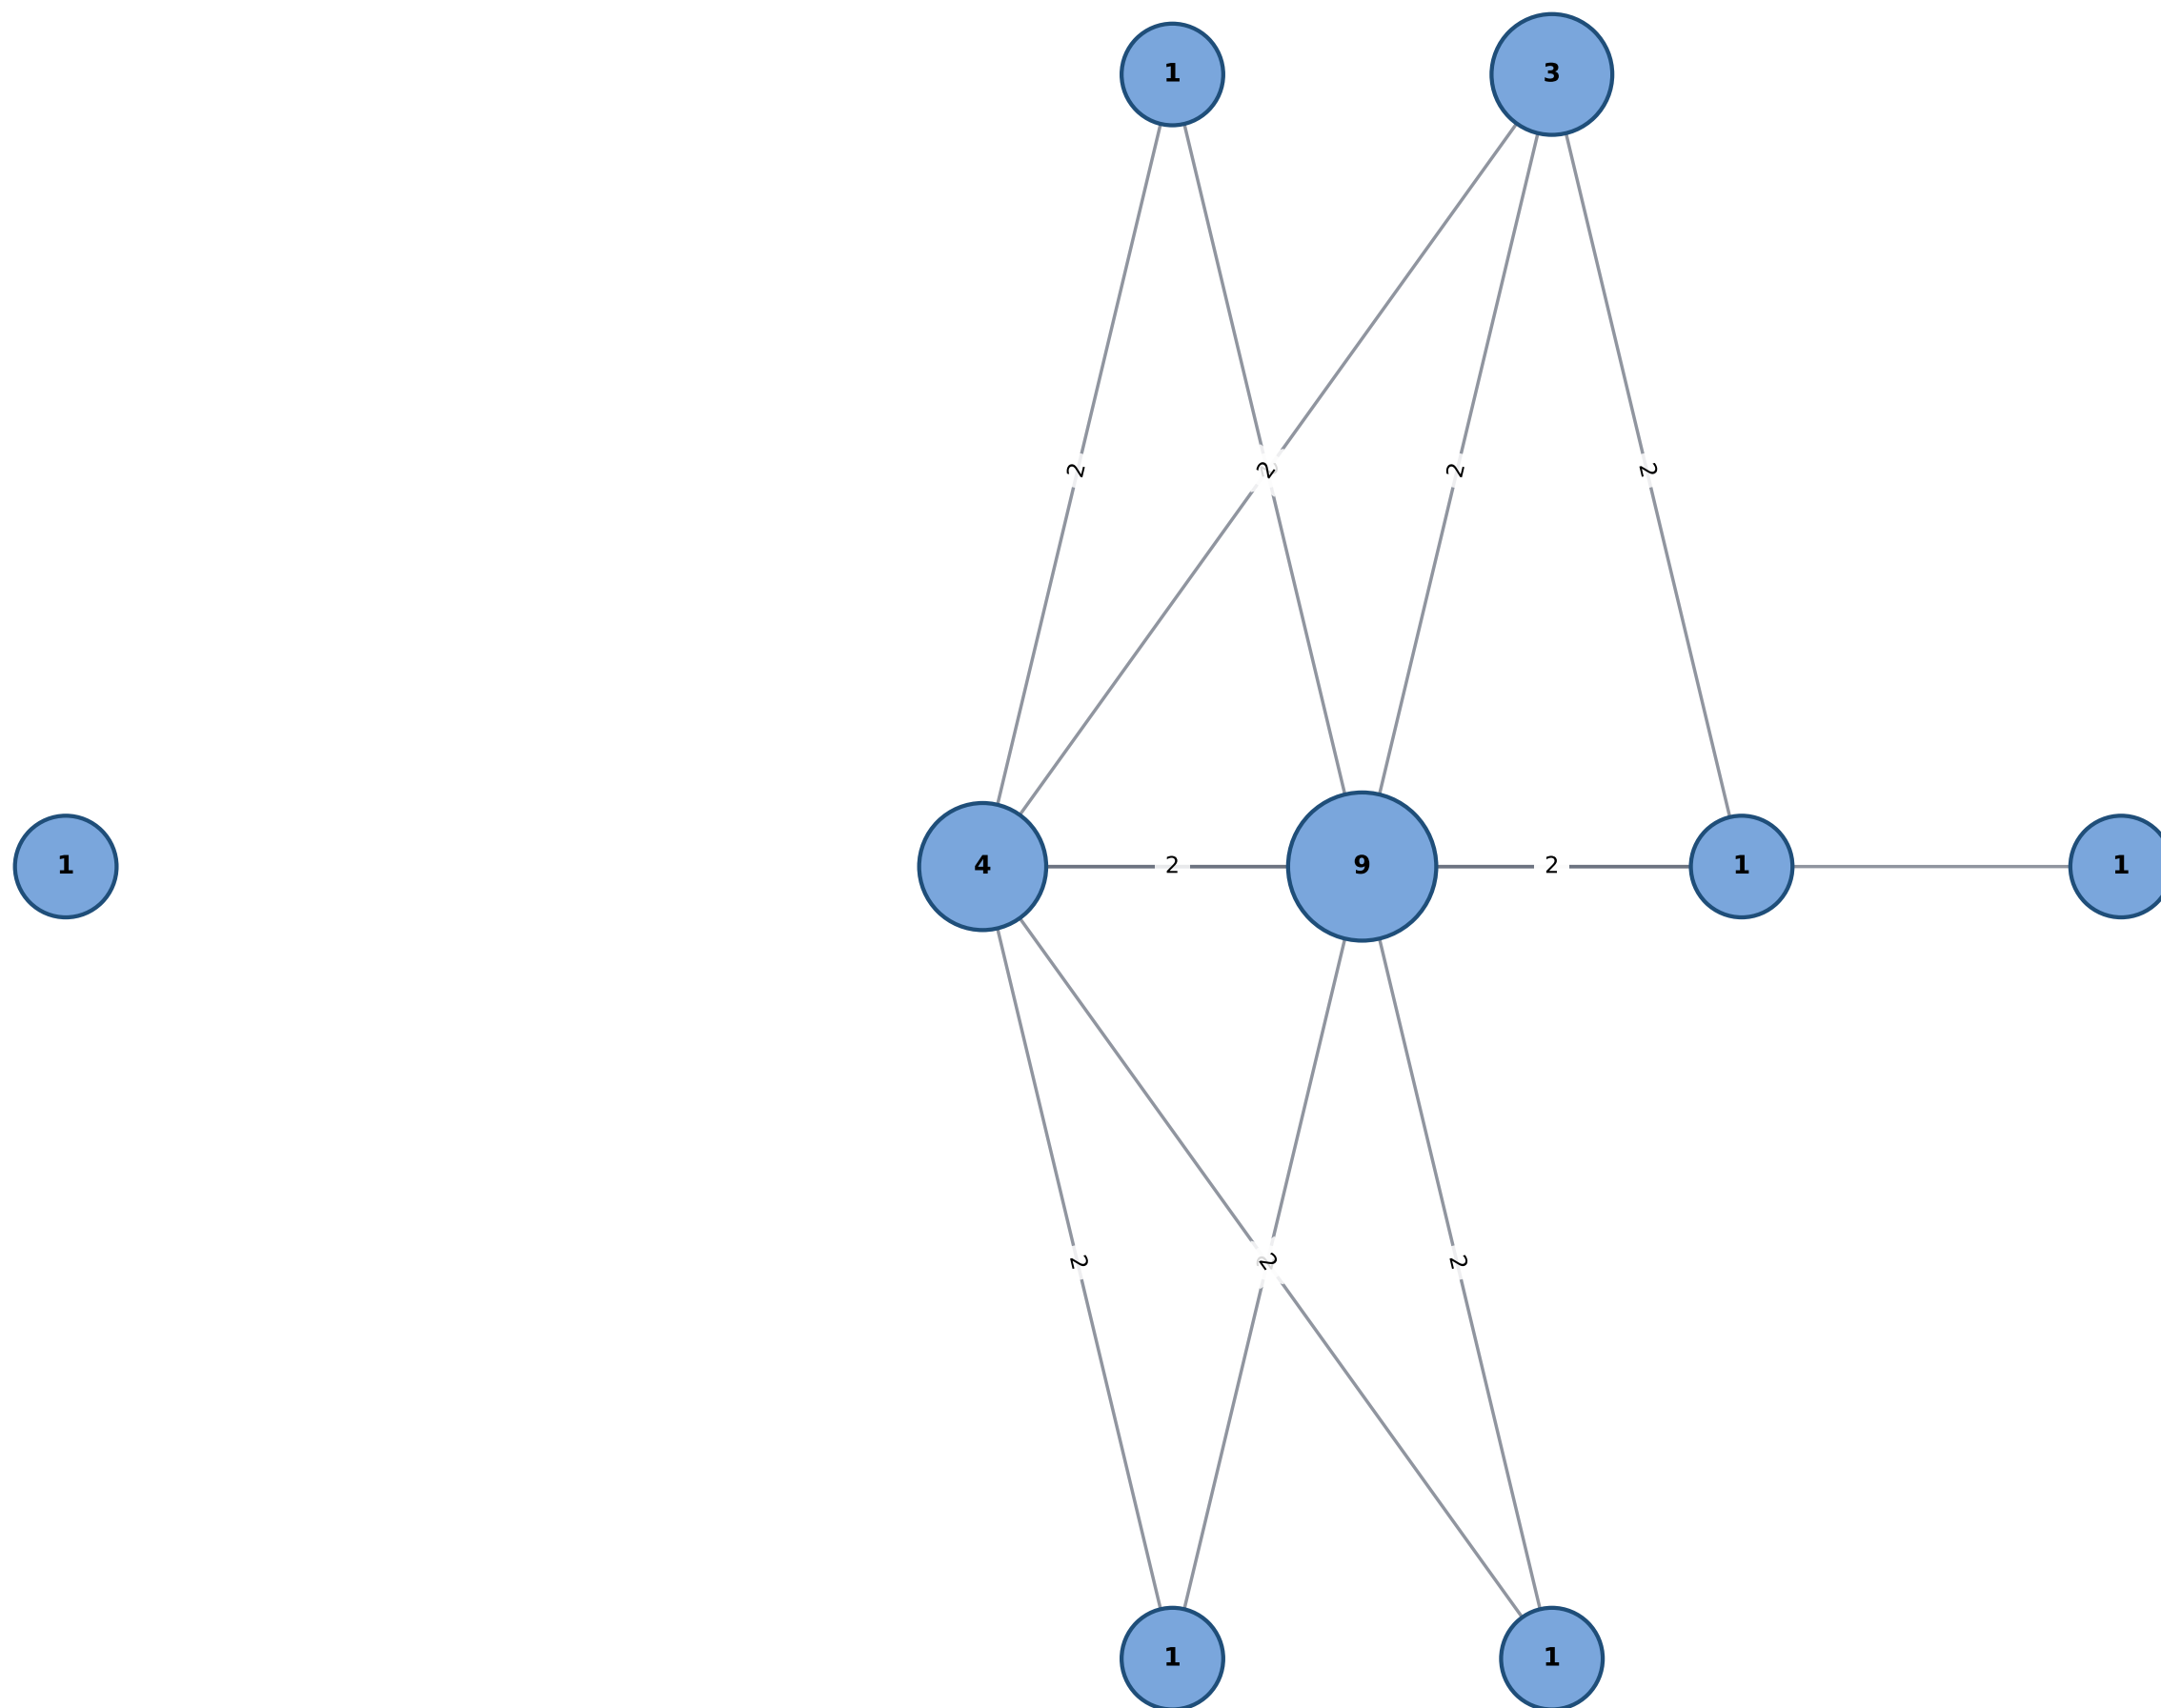

muscular dystrophies: cluster map (automatic layout, closest connections only)

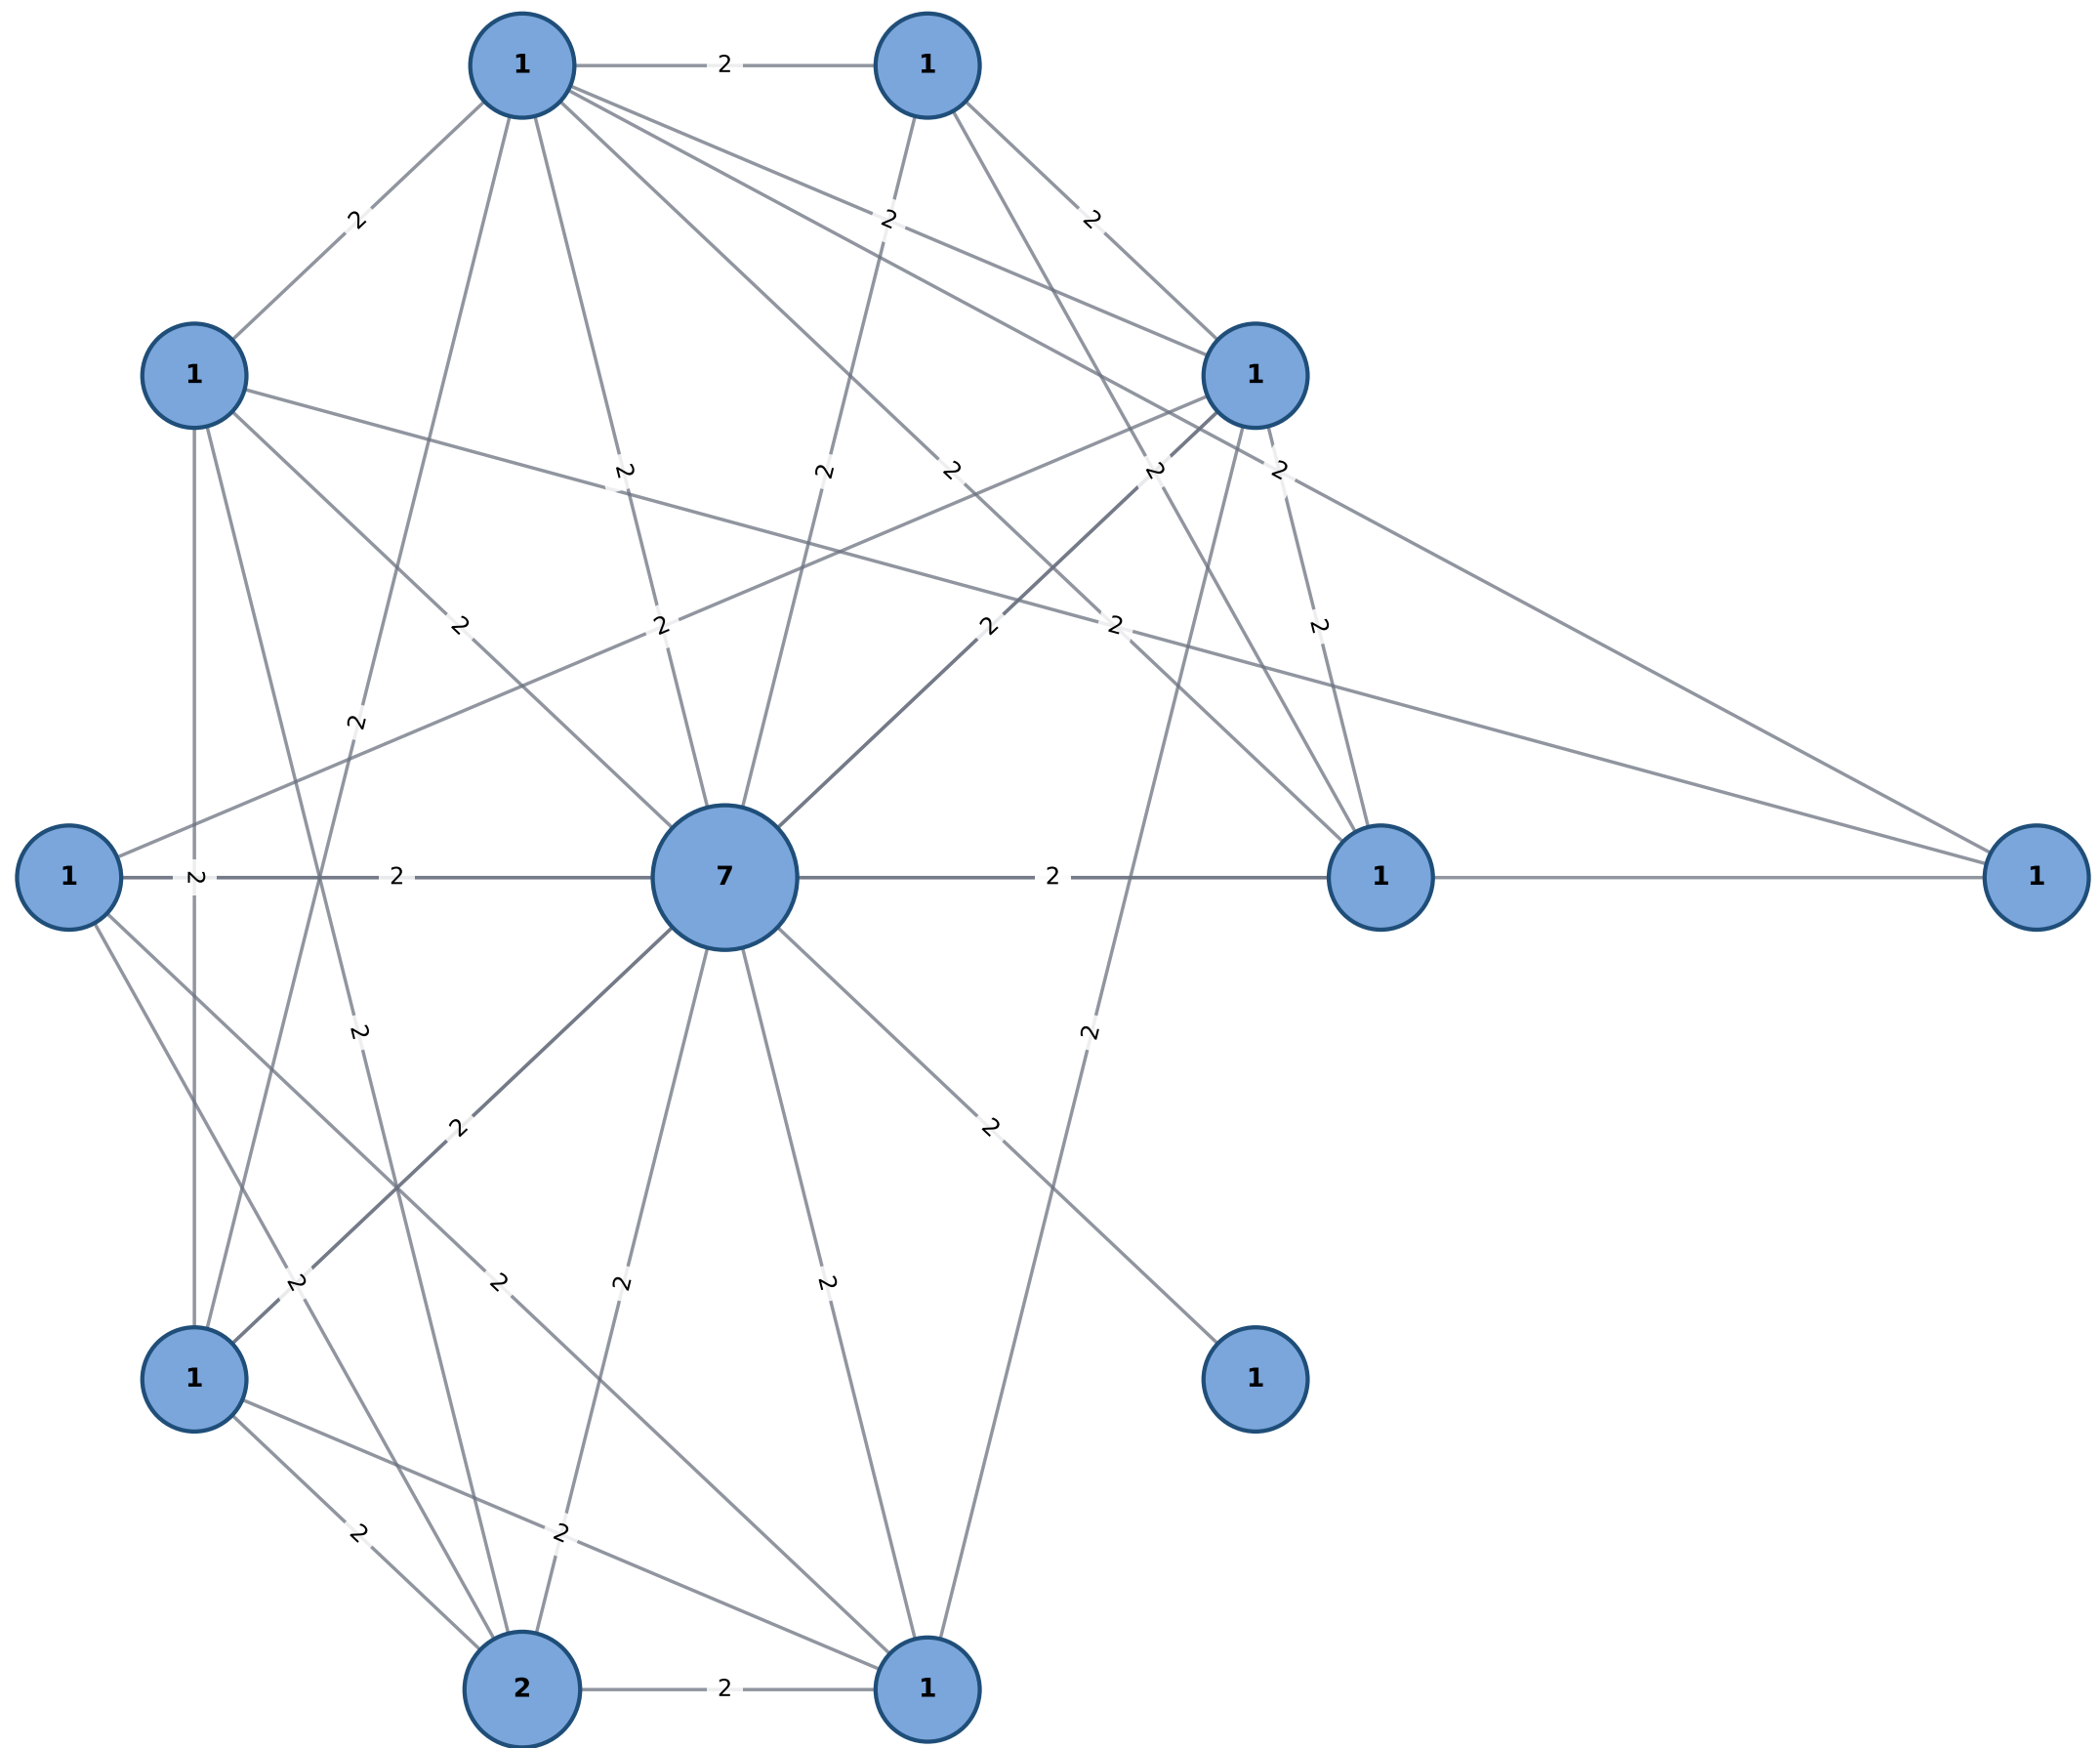

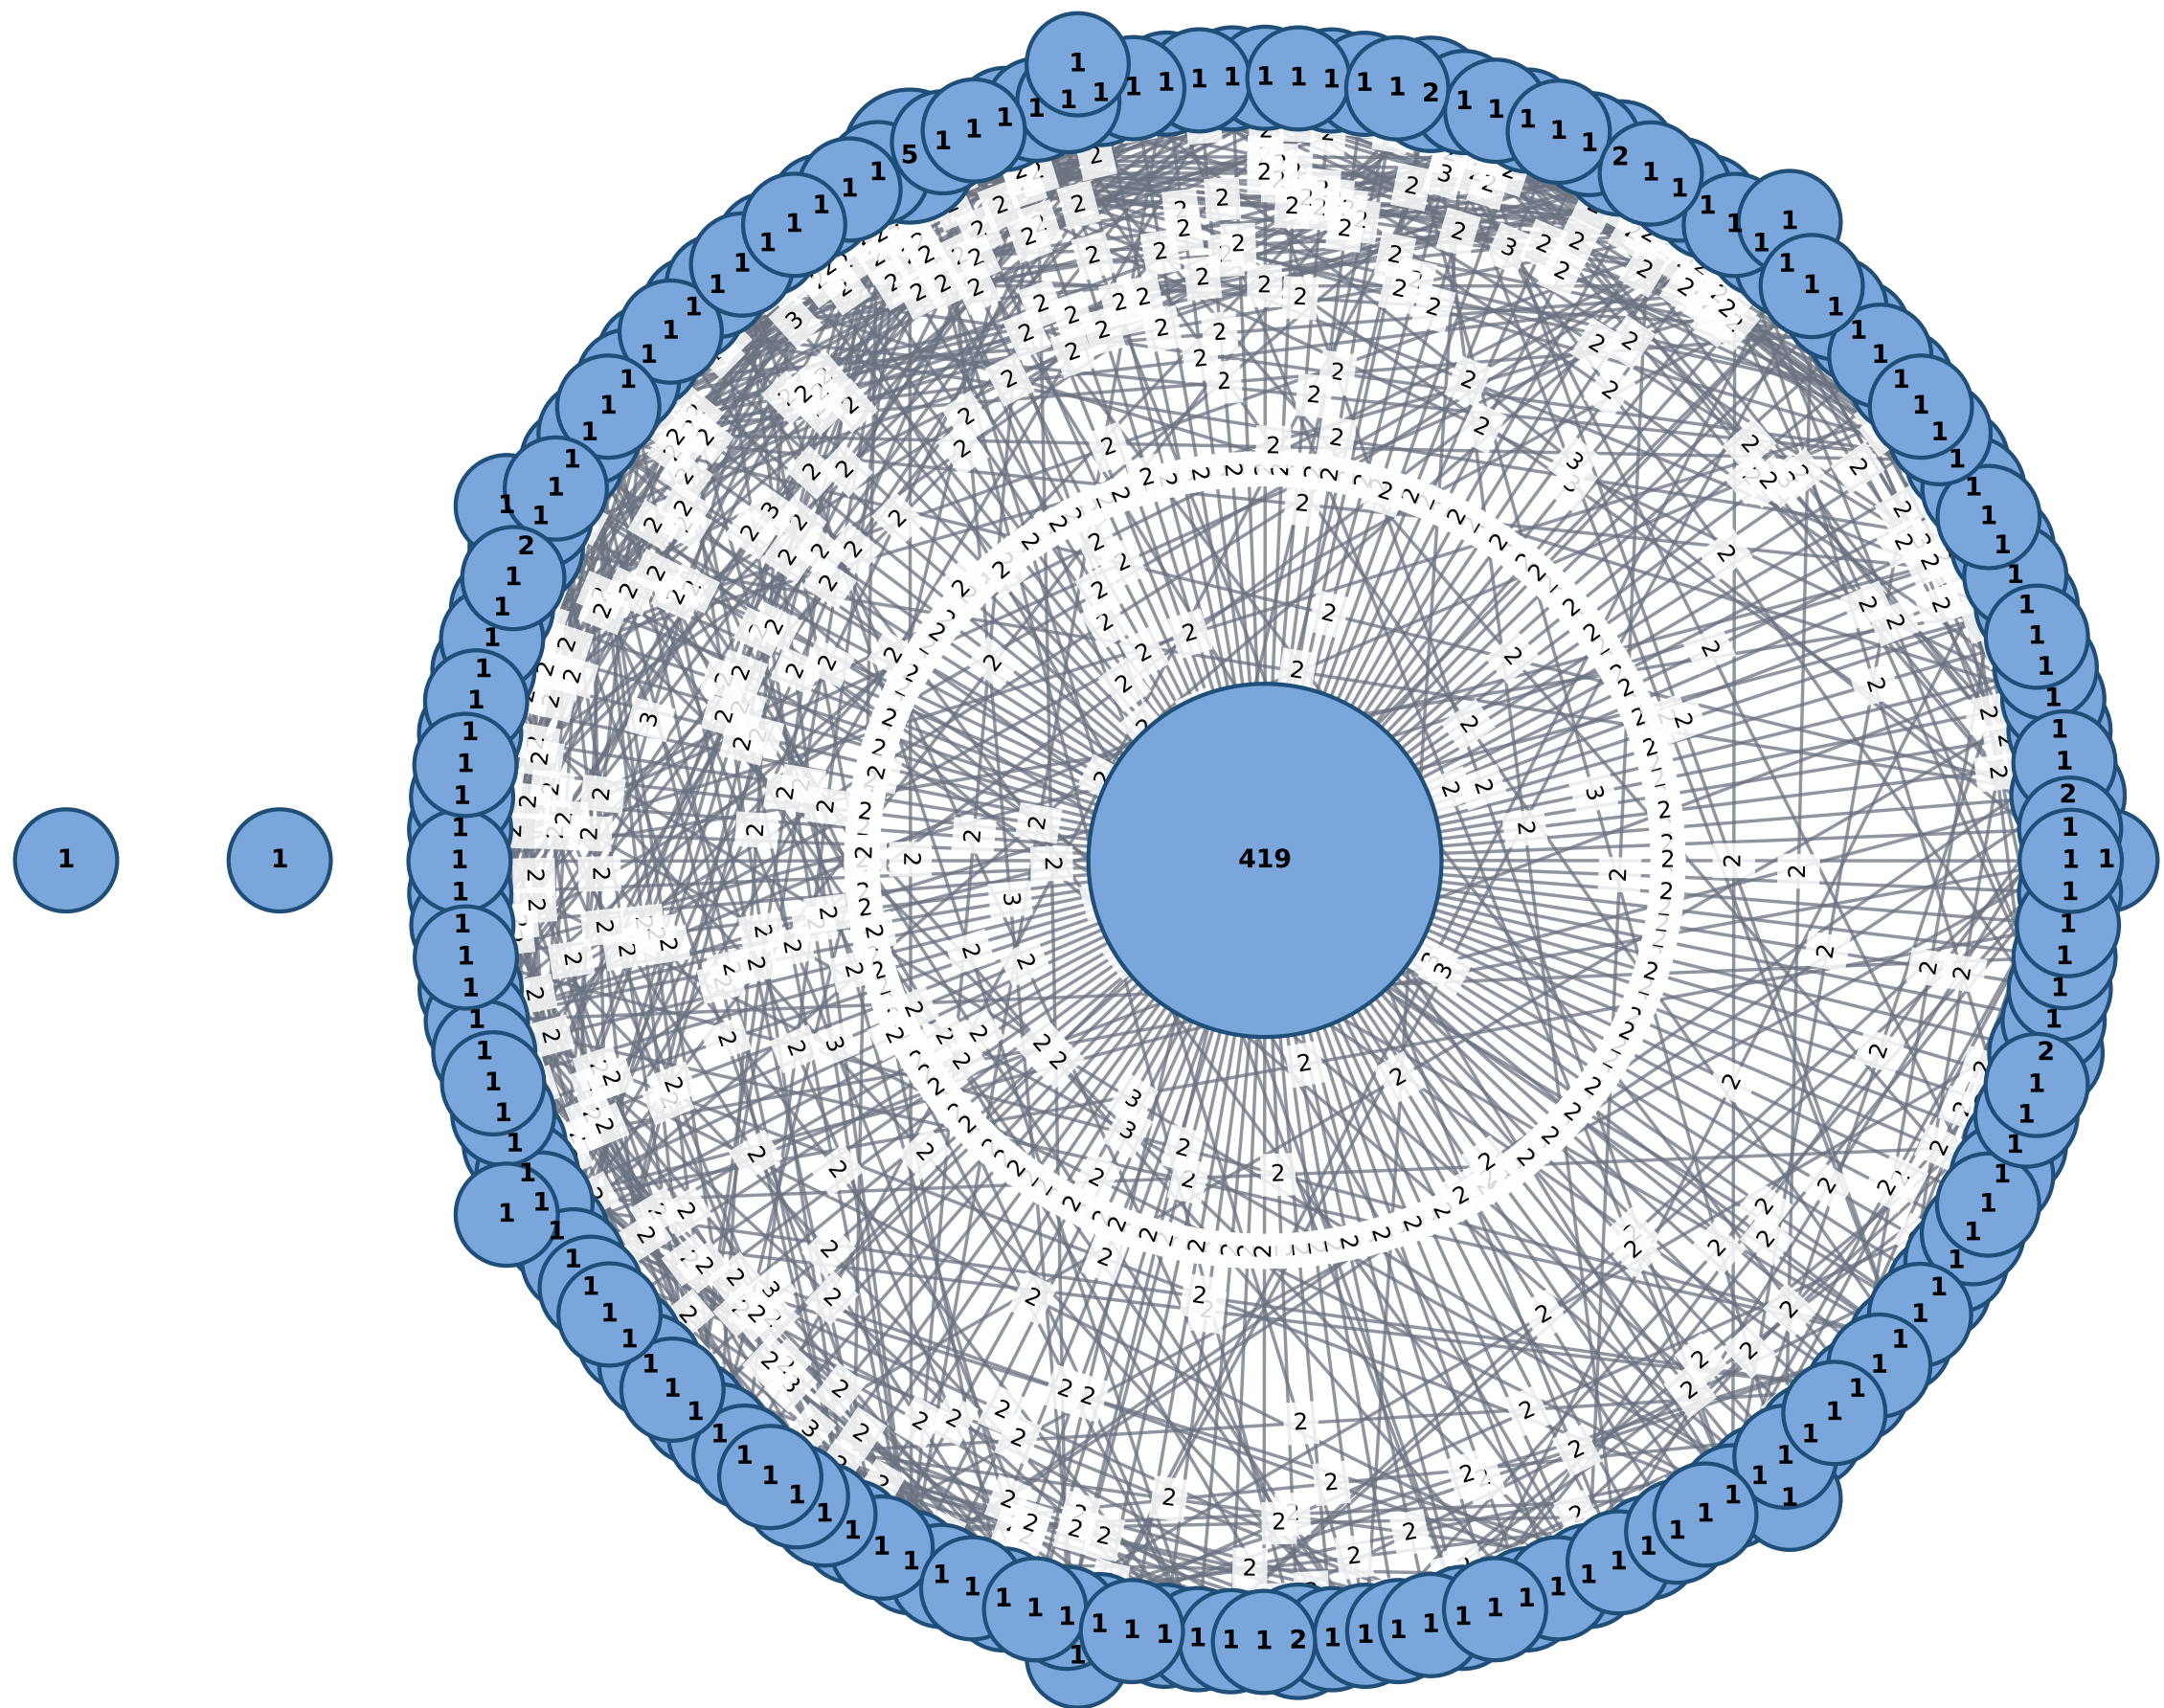

mycobacterium infections: cluster map (automatic layout, closest connections only)

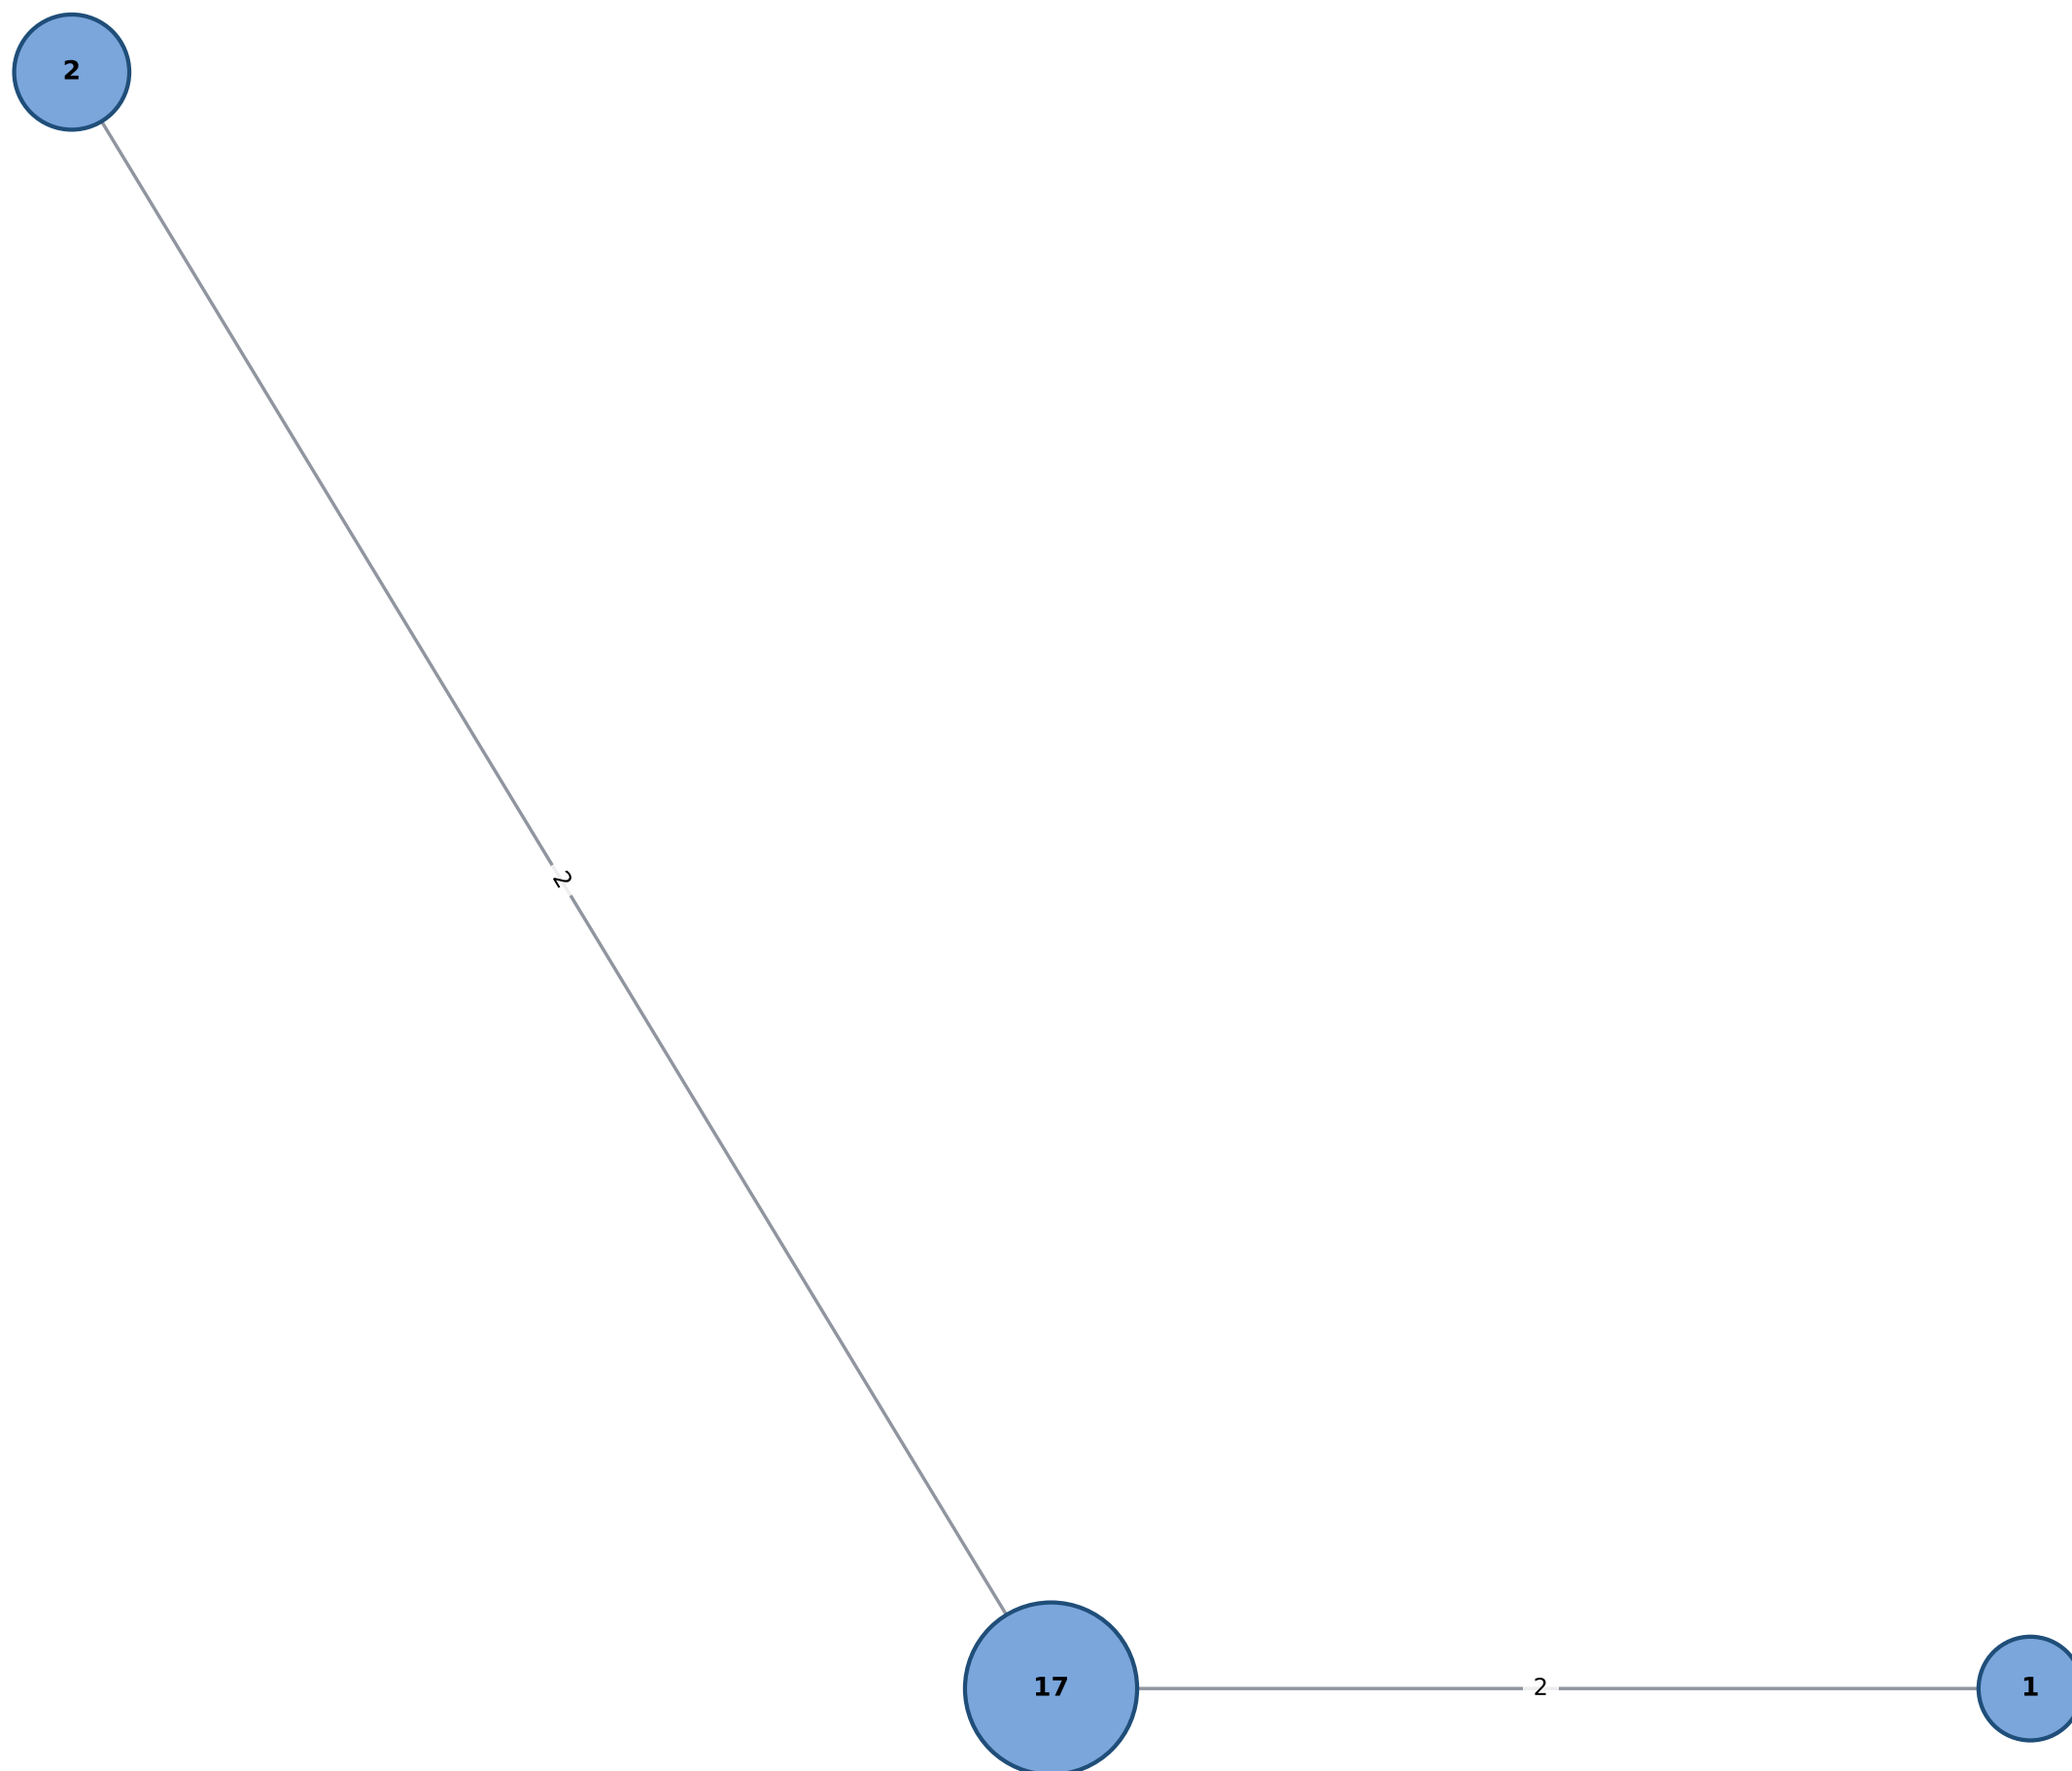

myeloproliferative disorders: cluster map (automatic layout, closest connections only)

nutritional and metabolic diseases: cluster map (automatic layout, closest connections only)

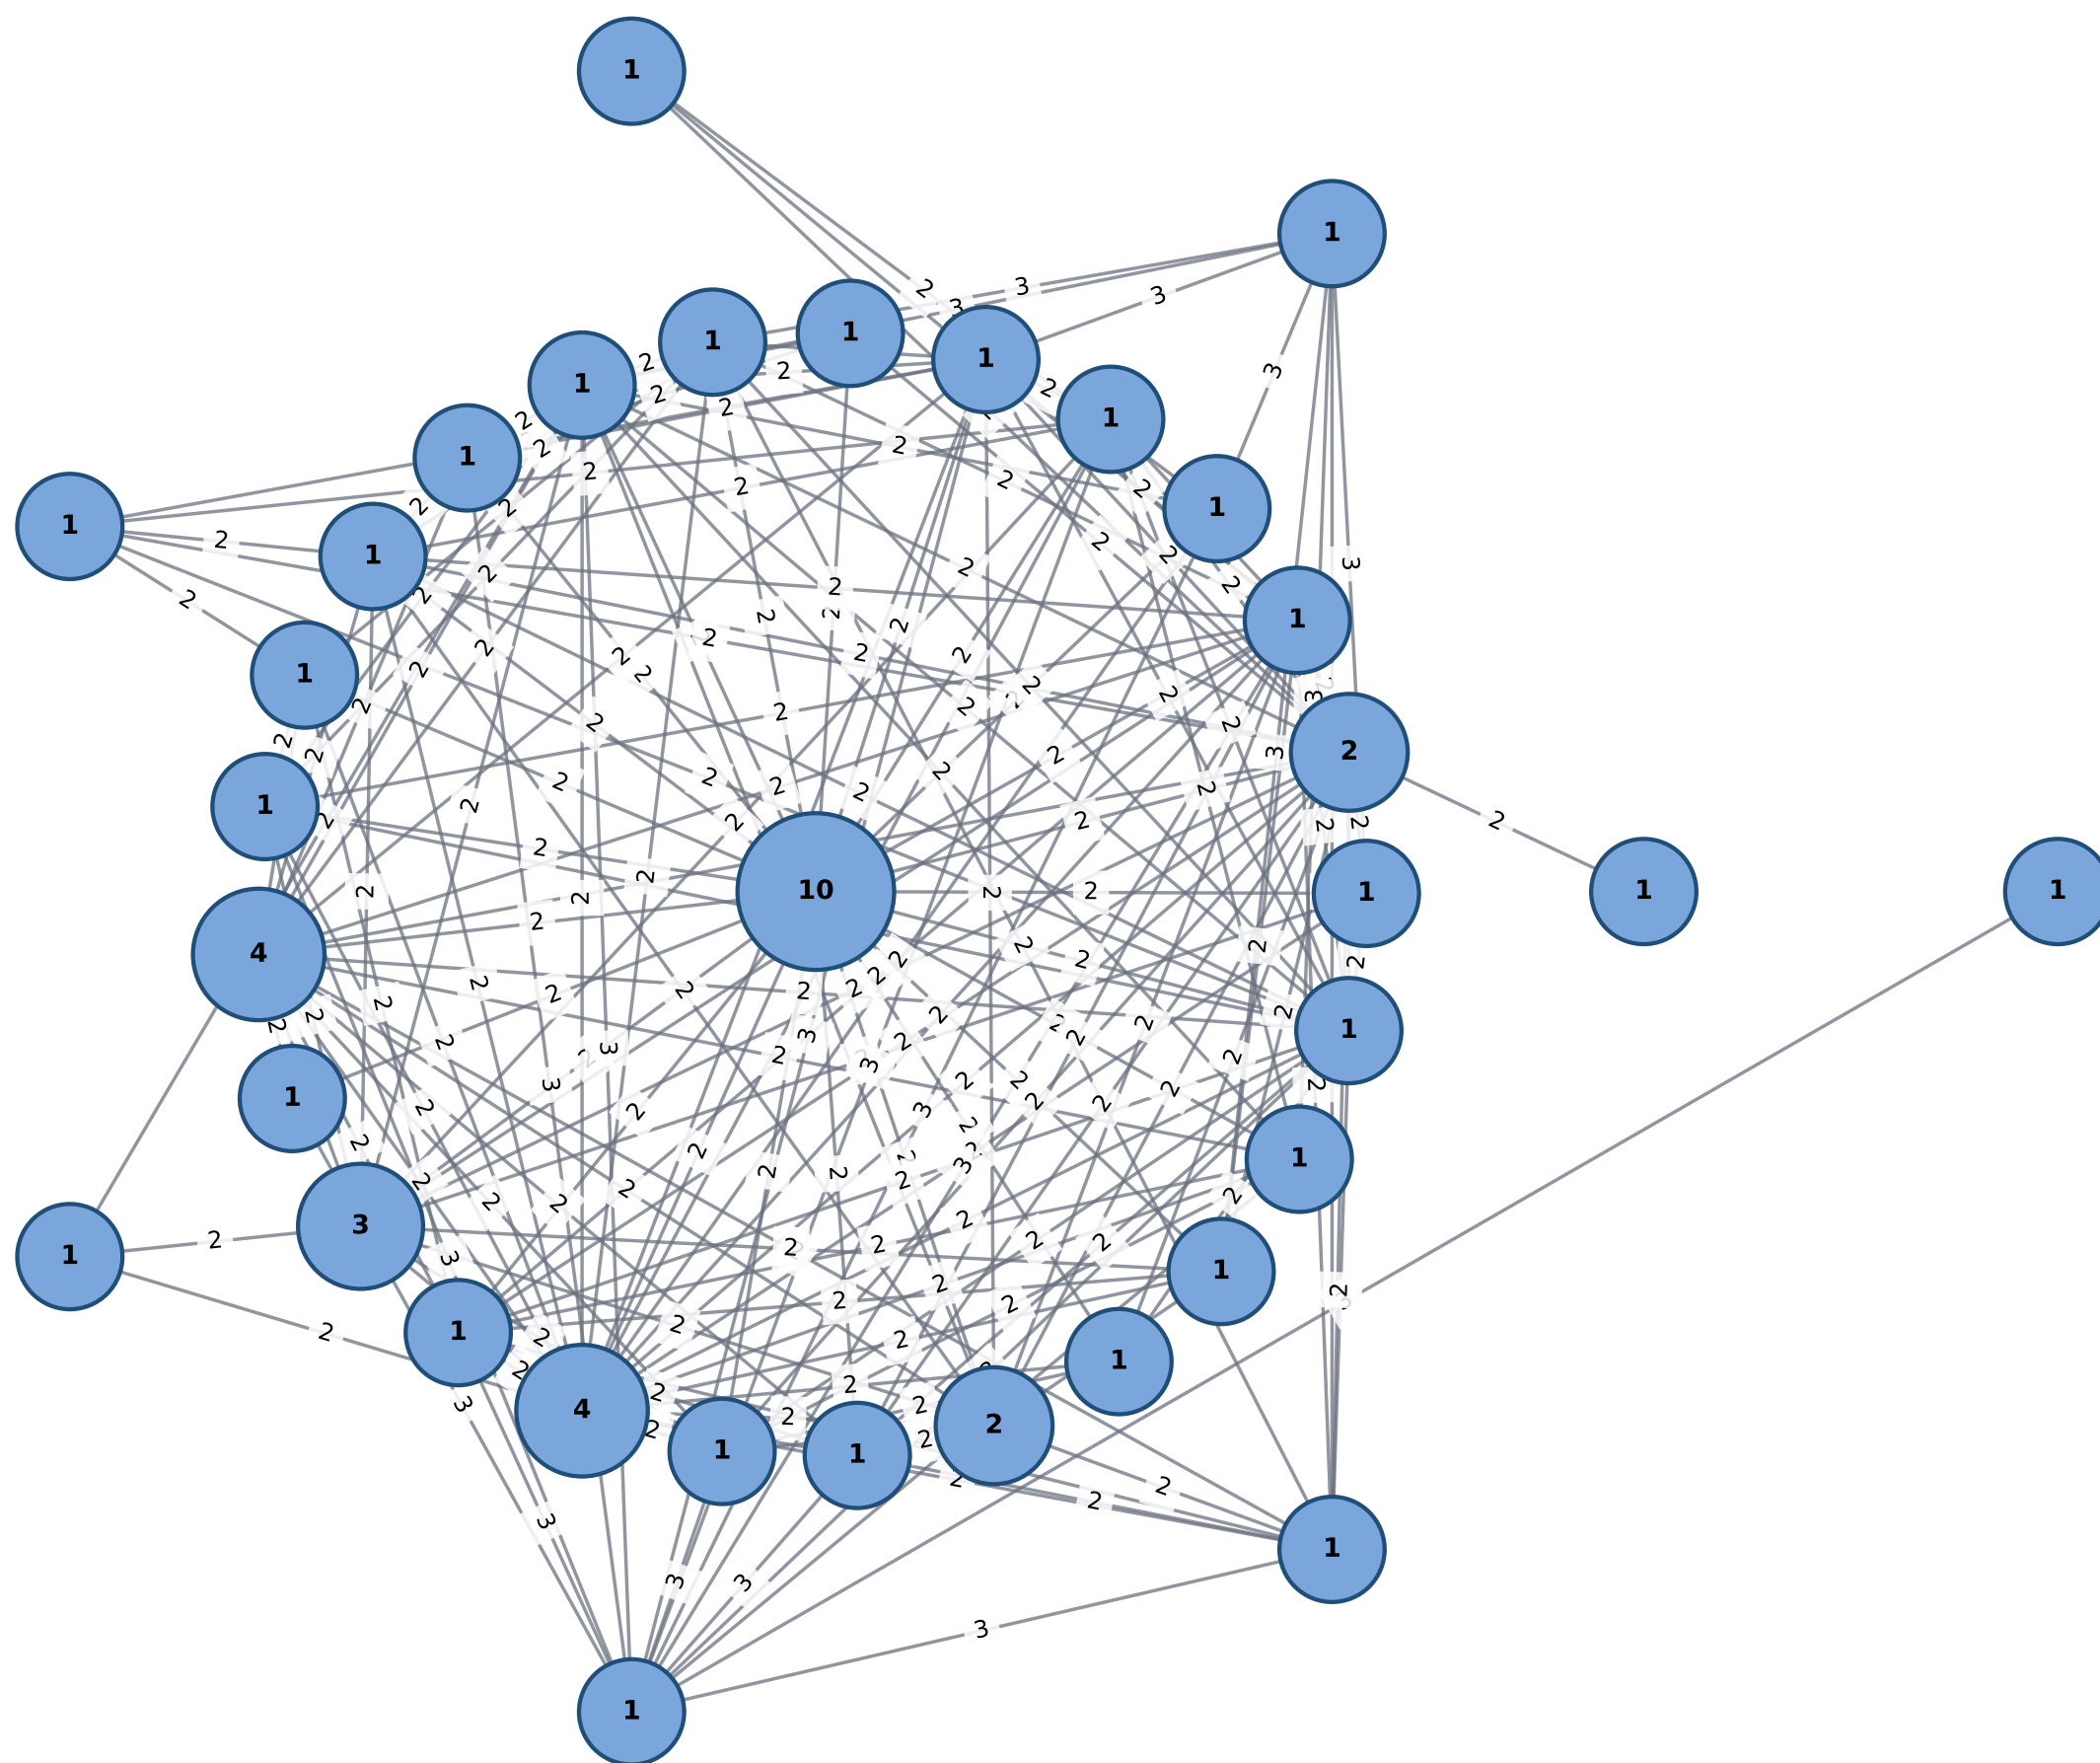

peroxisomal disorders: cluster map (automatic layout, closest connections only)

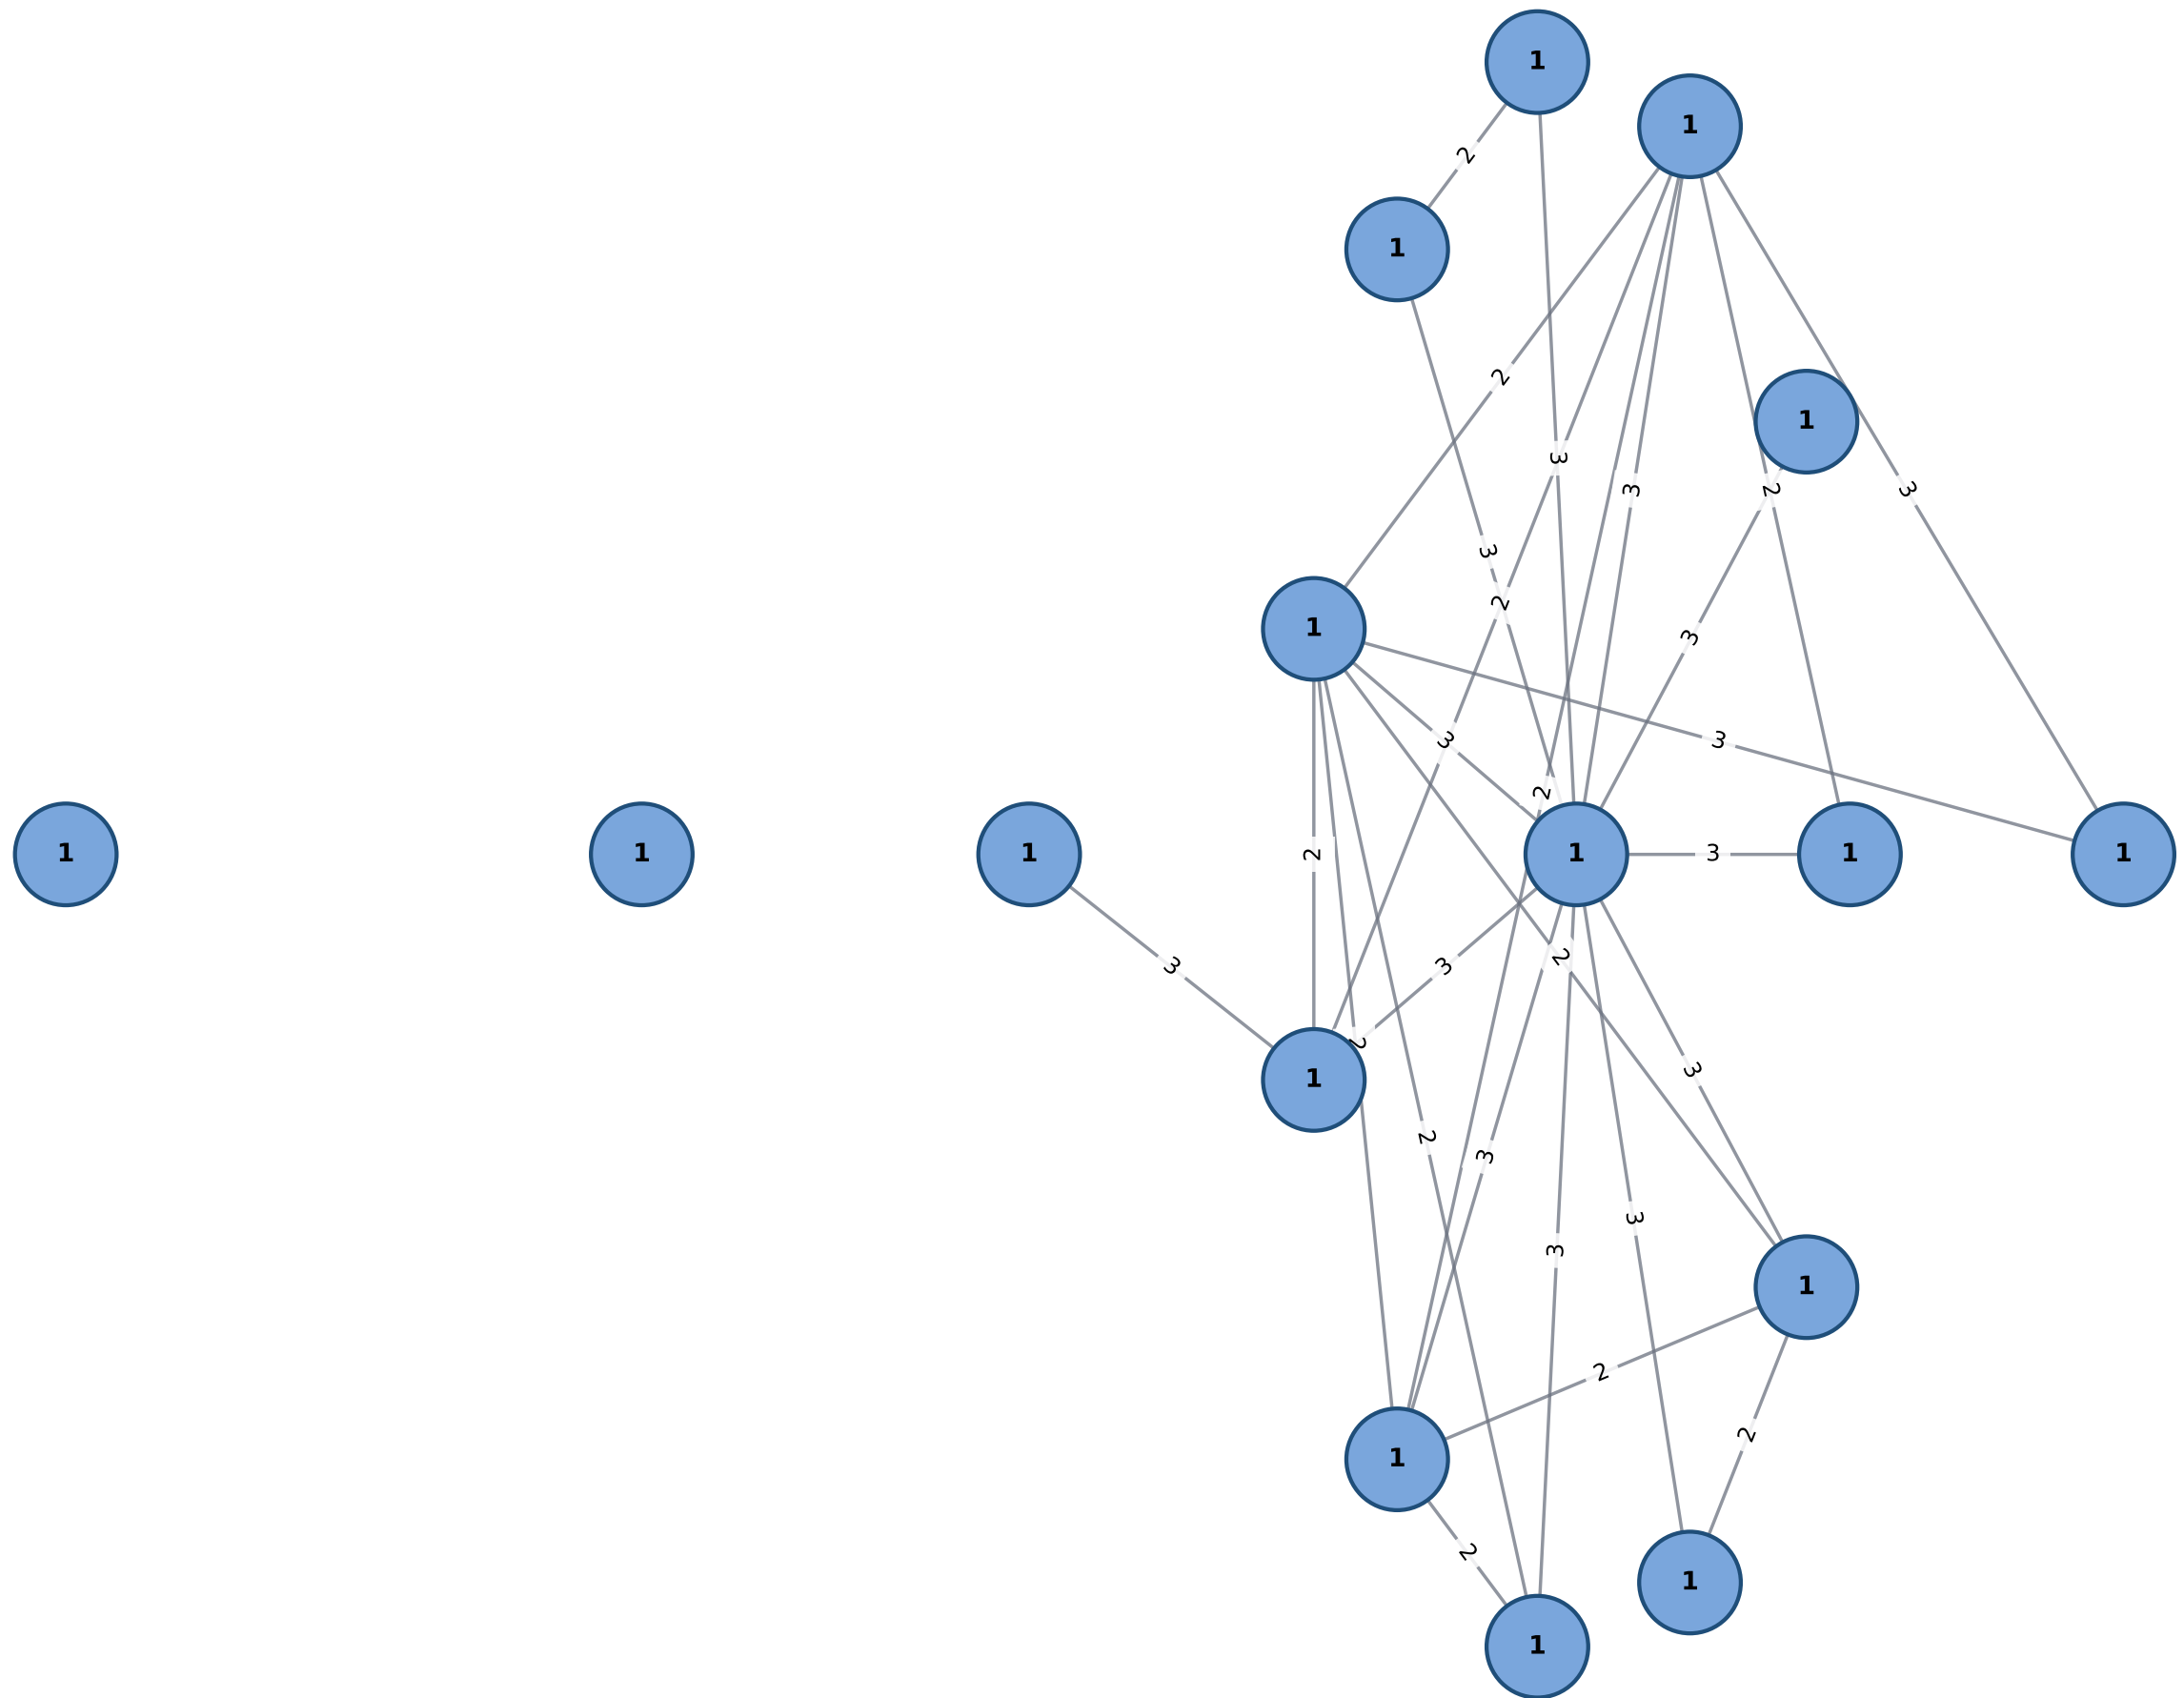

psoriasis: cluster map (automatic layout, closest connections only)

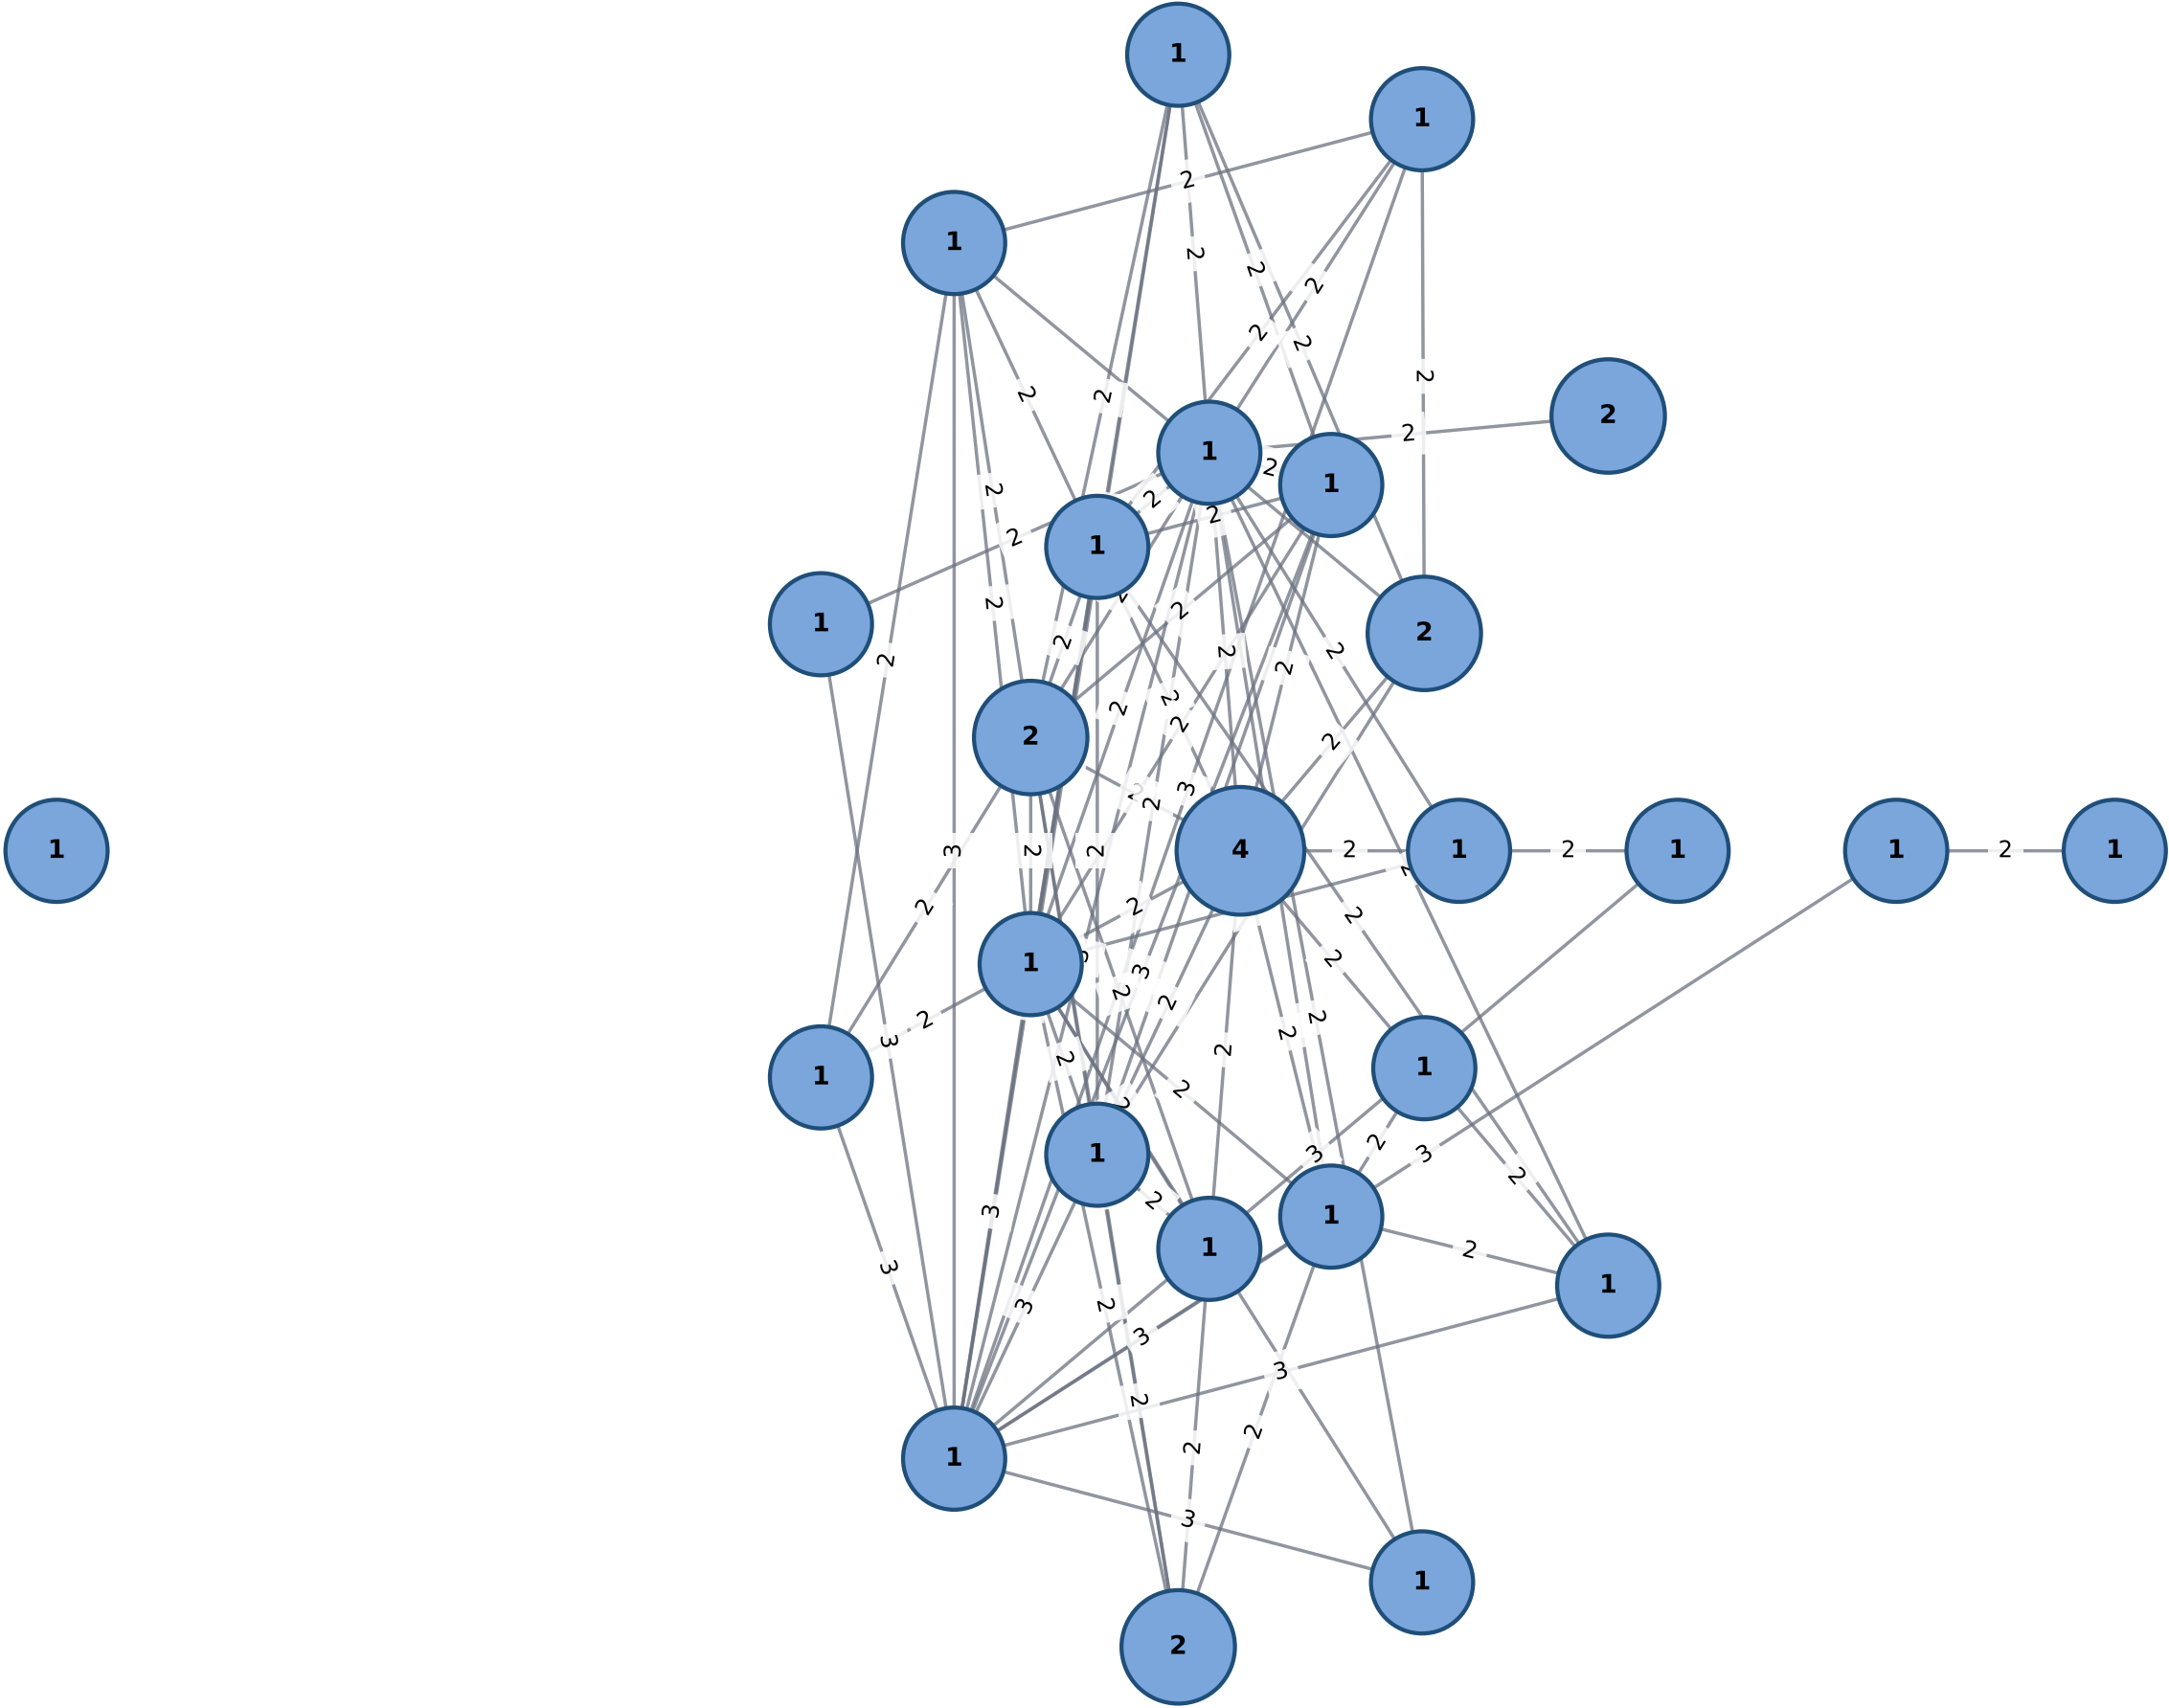

purine-pyrimidine metabolism inborn errors: cluster map (automatic layout, closest connections only)

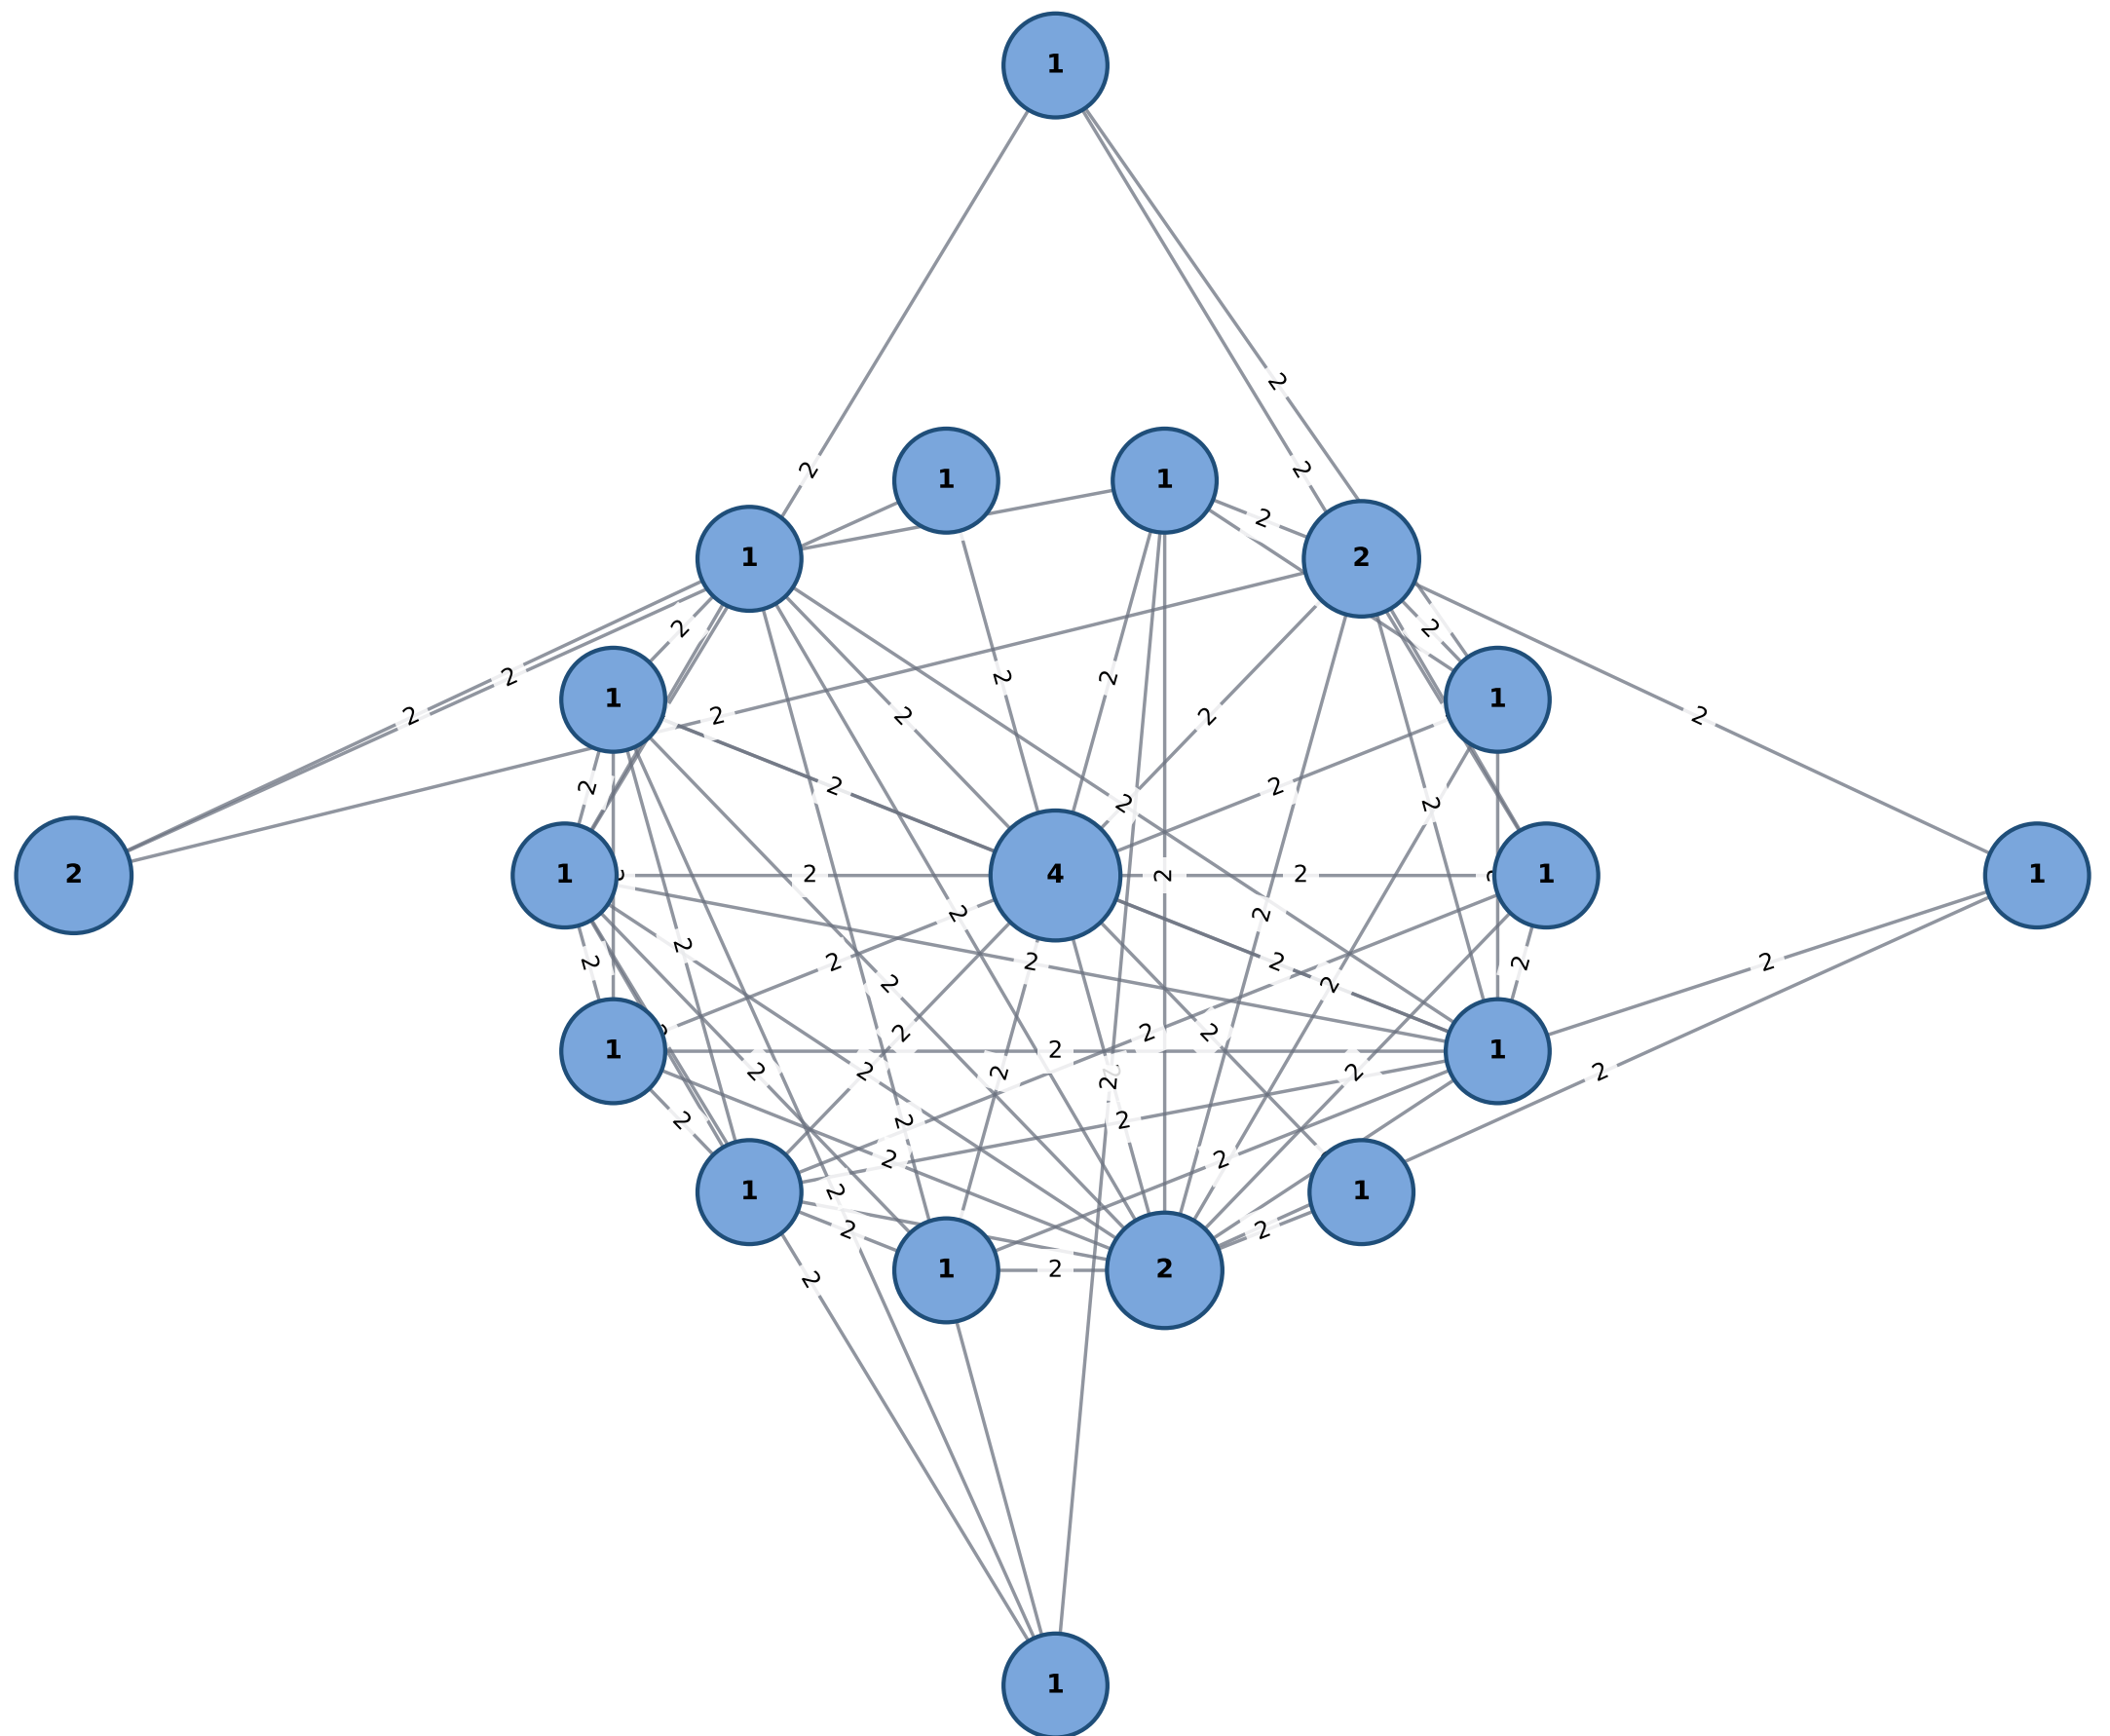

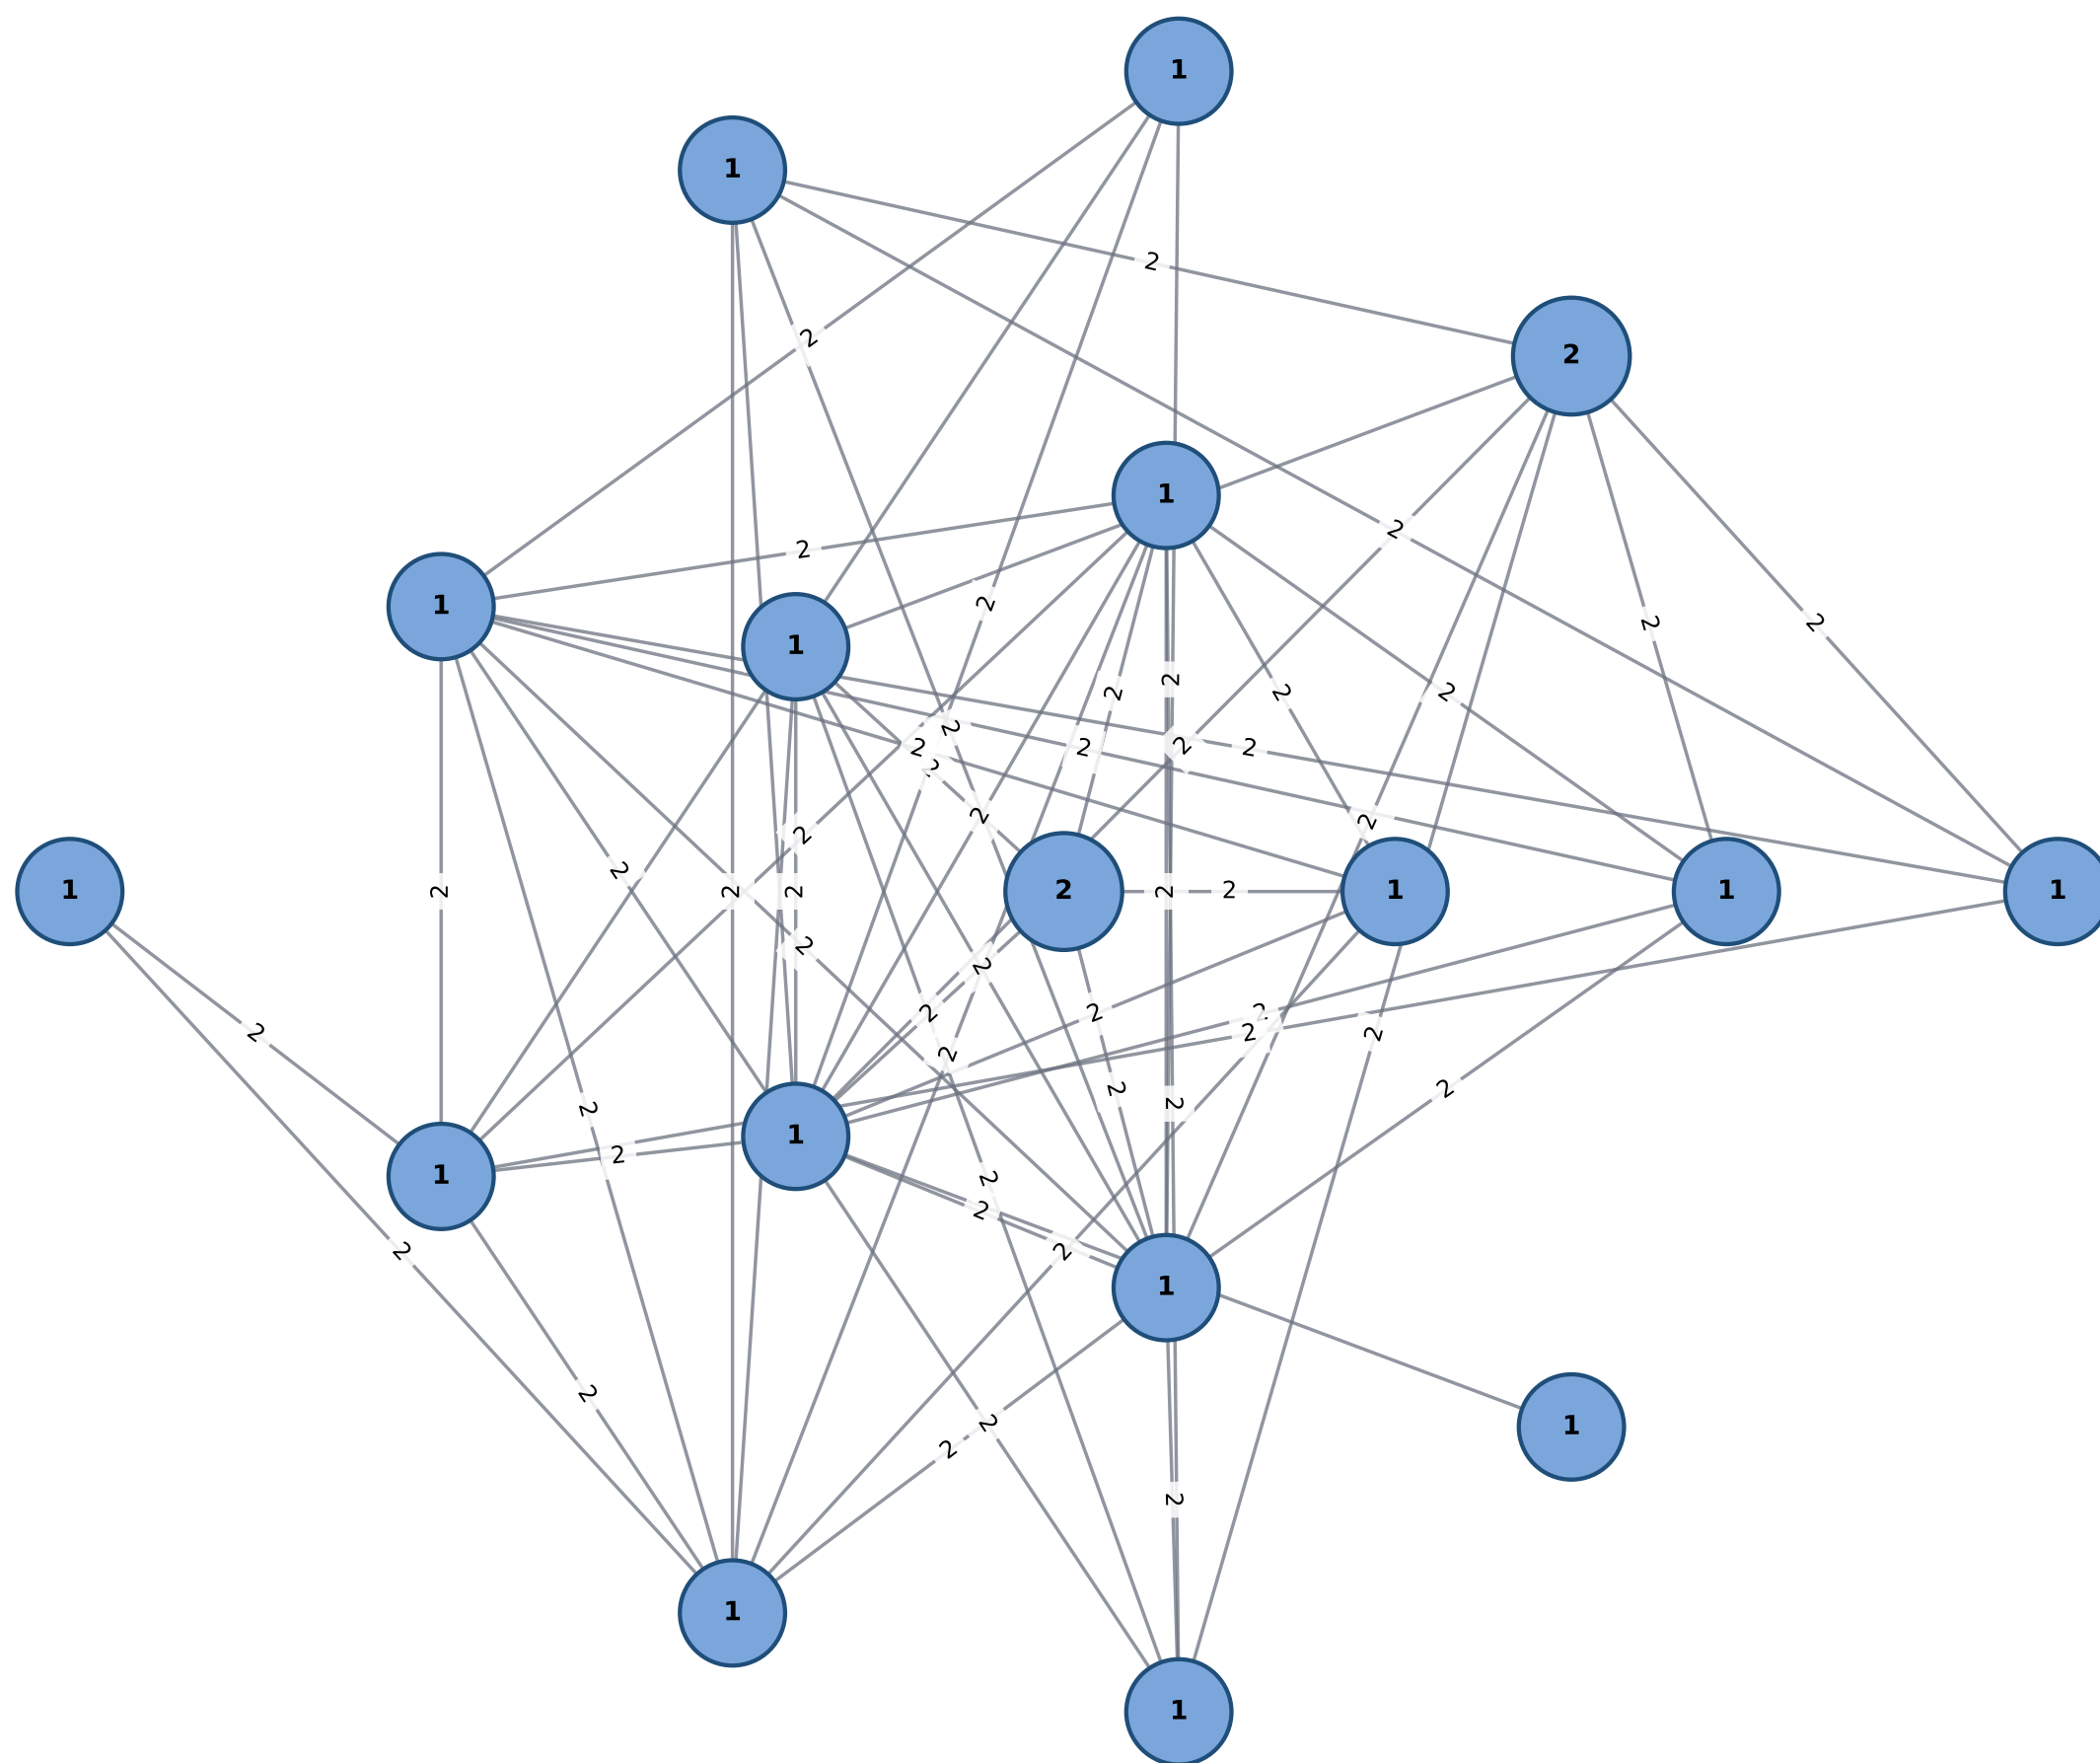

renal tubular transport inborn errors: cluster map (automatic layout, closest connections only)

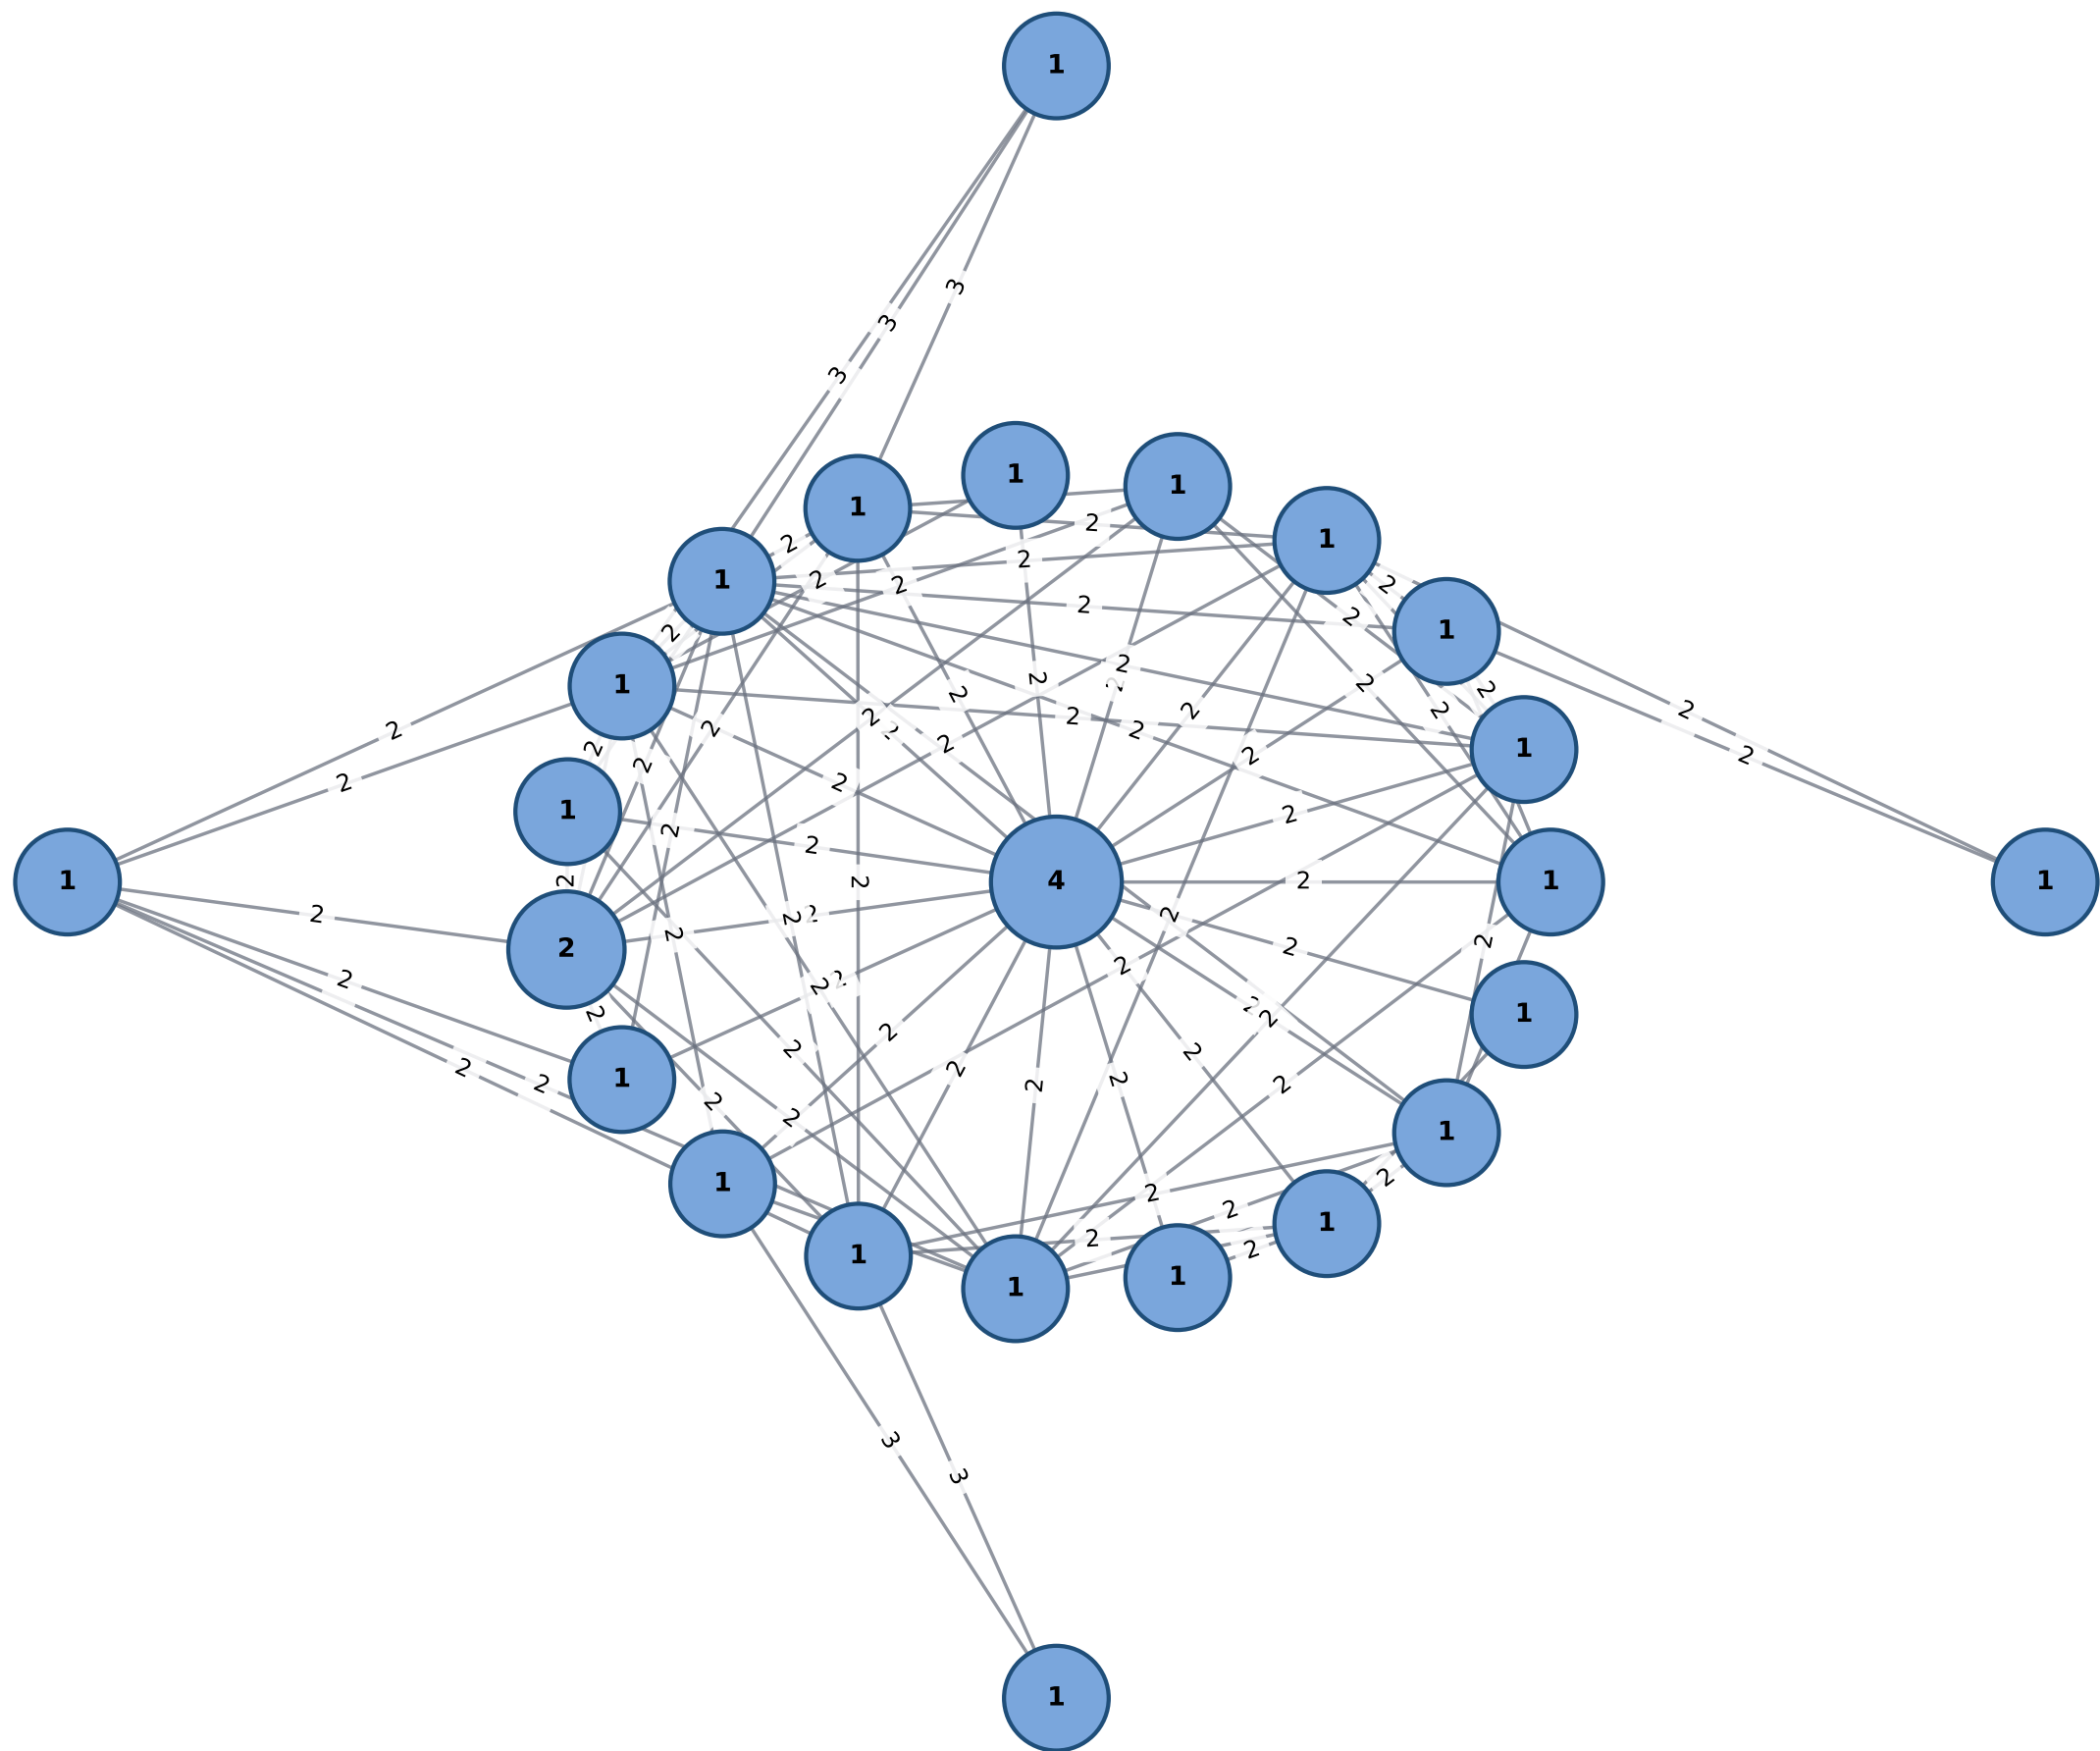

sarcoma: cluster map (automatic layout, closest connections only)

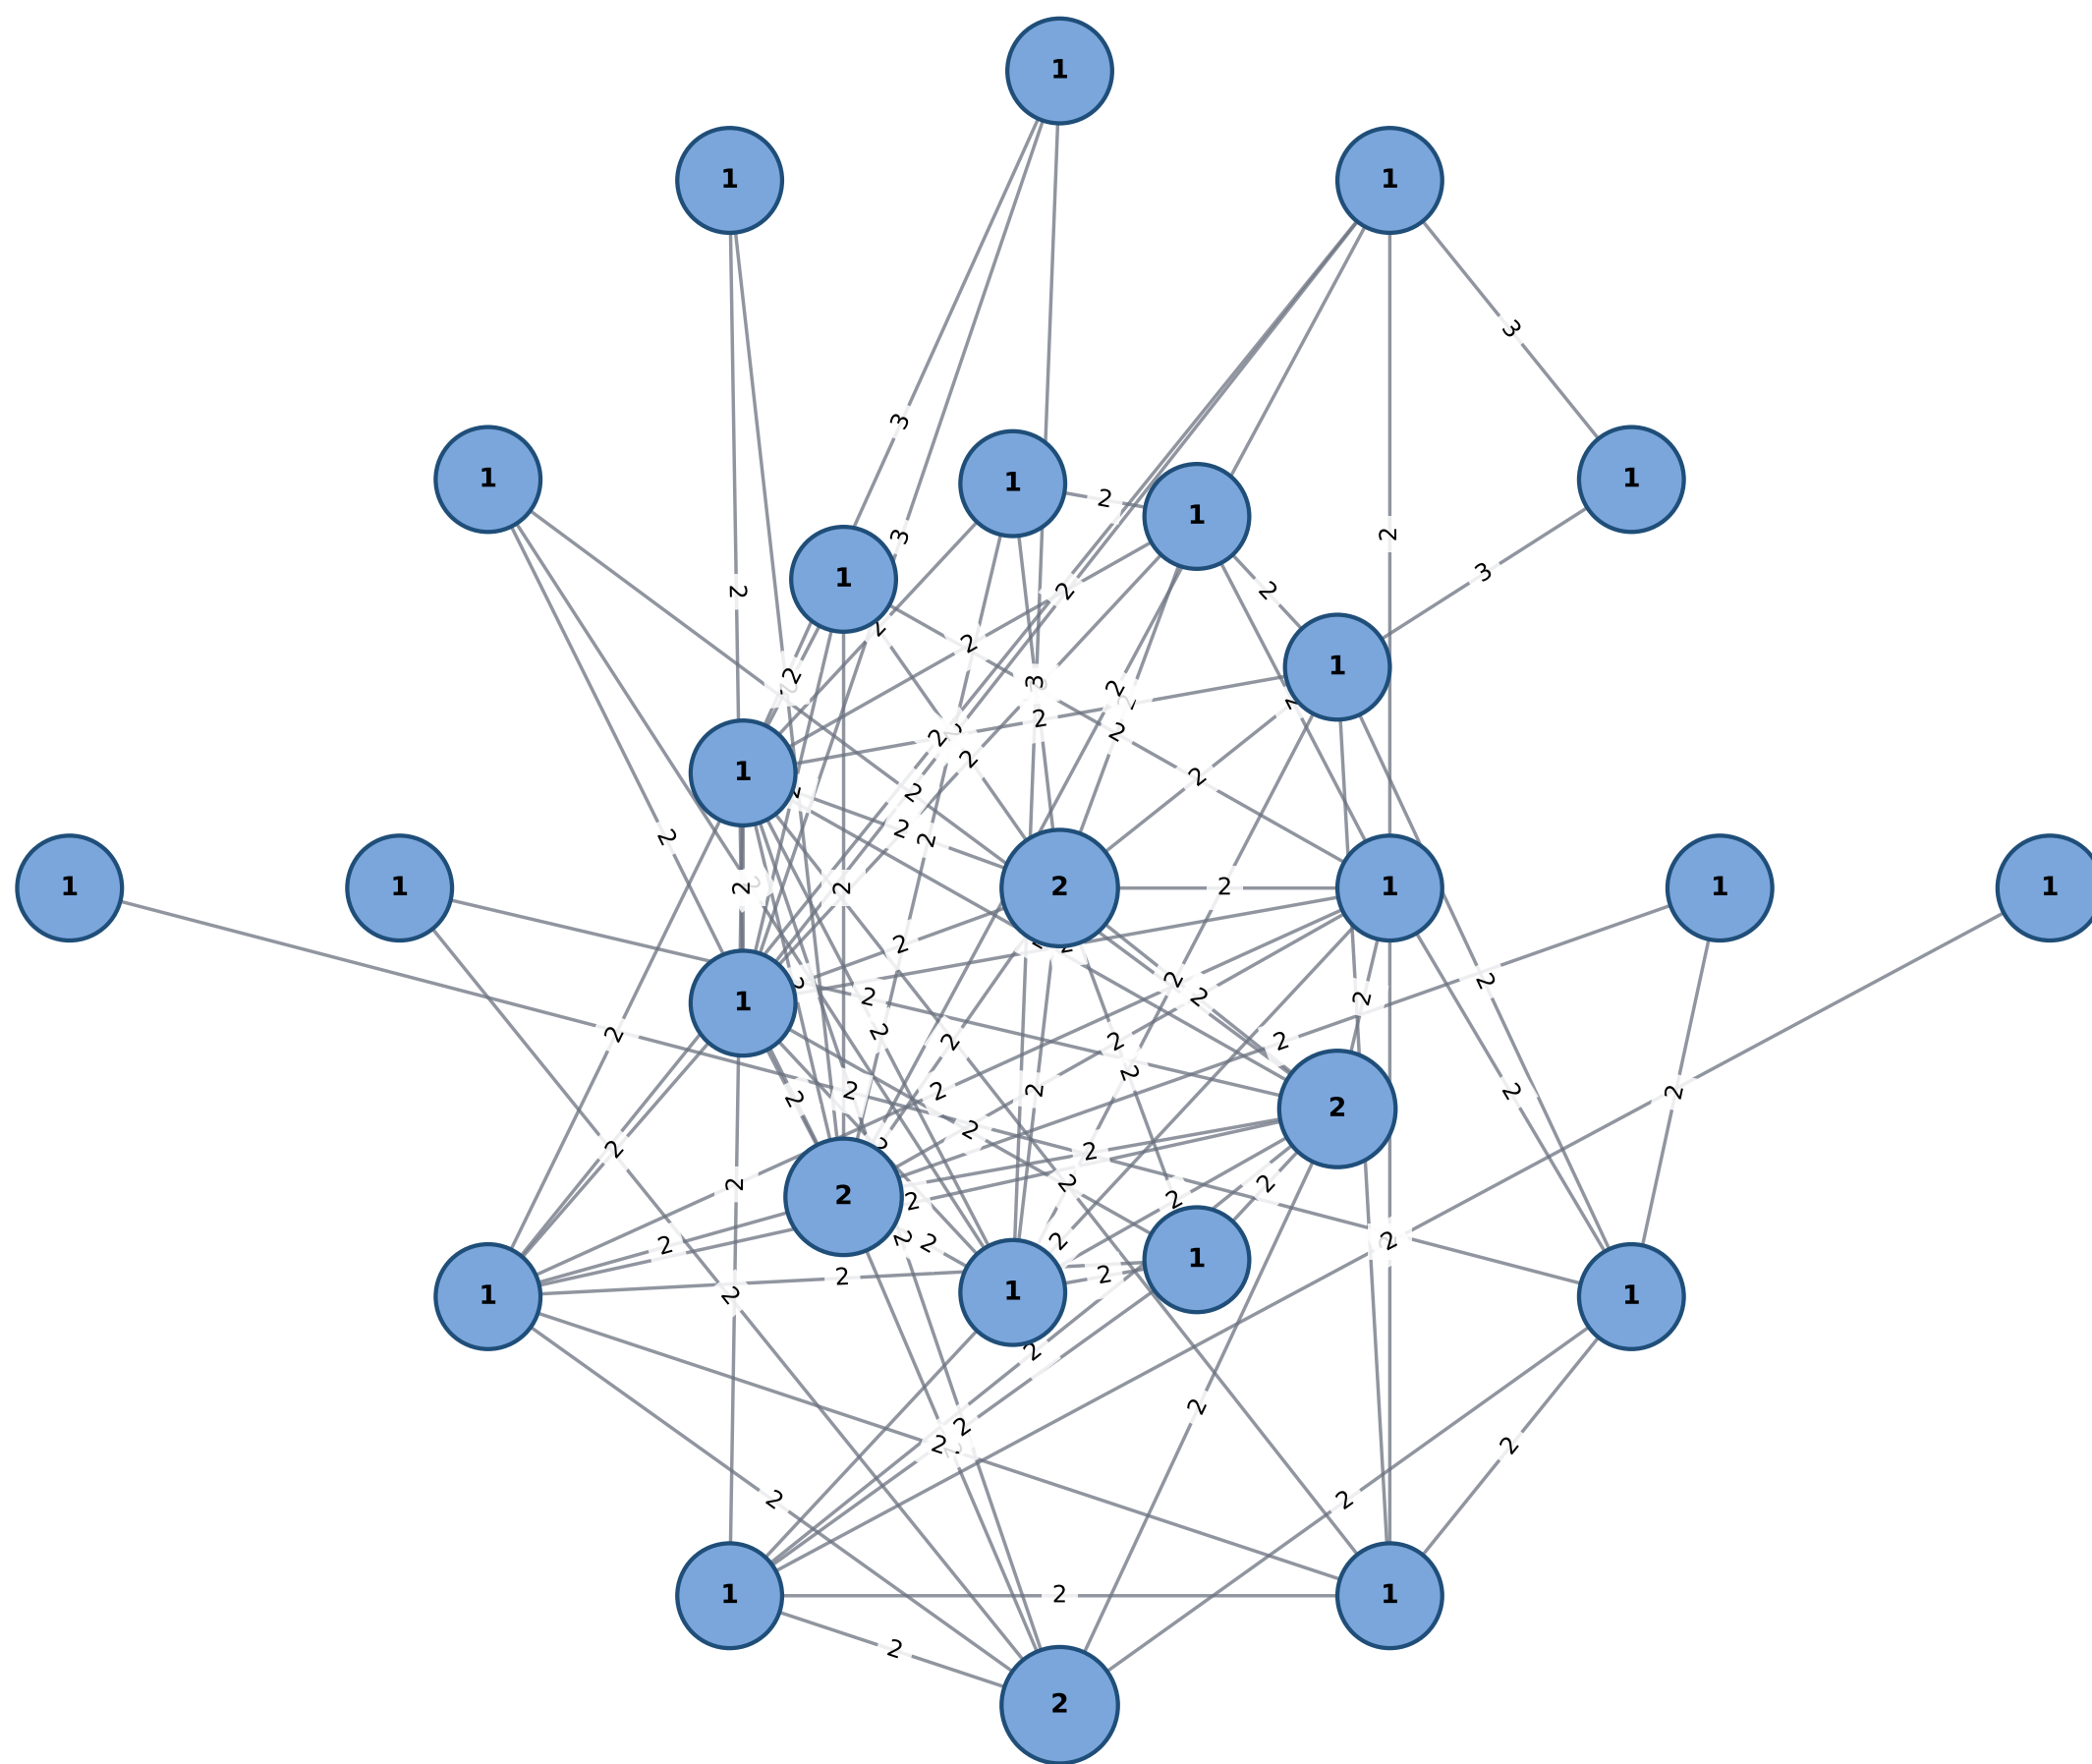

spastic paraplegia hereditary: cluster map (automatic layout, closest connections only)

spinocerebellar ataxias: cluster map (automatic layout, closest connections only)

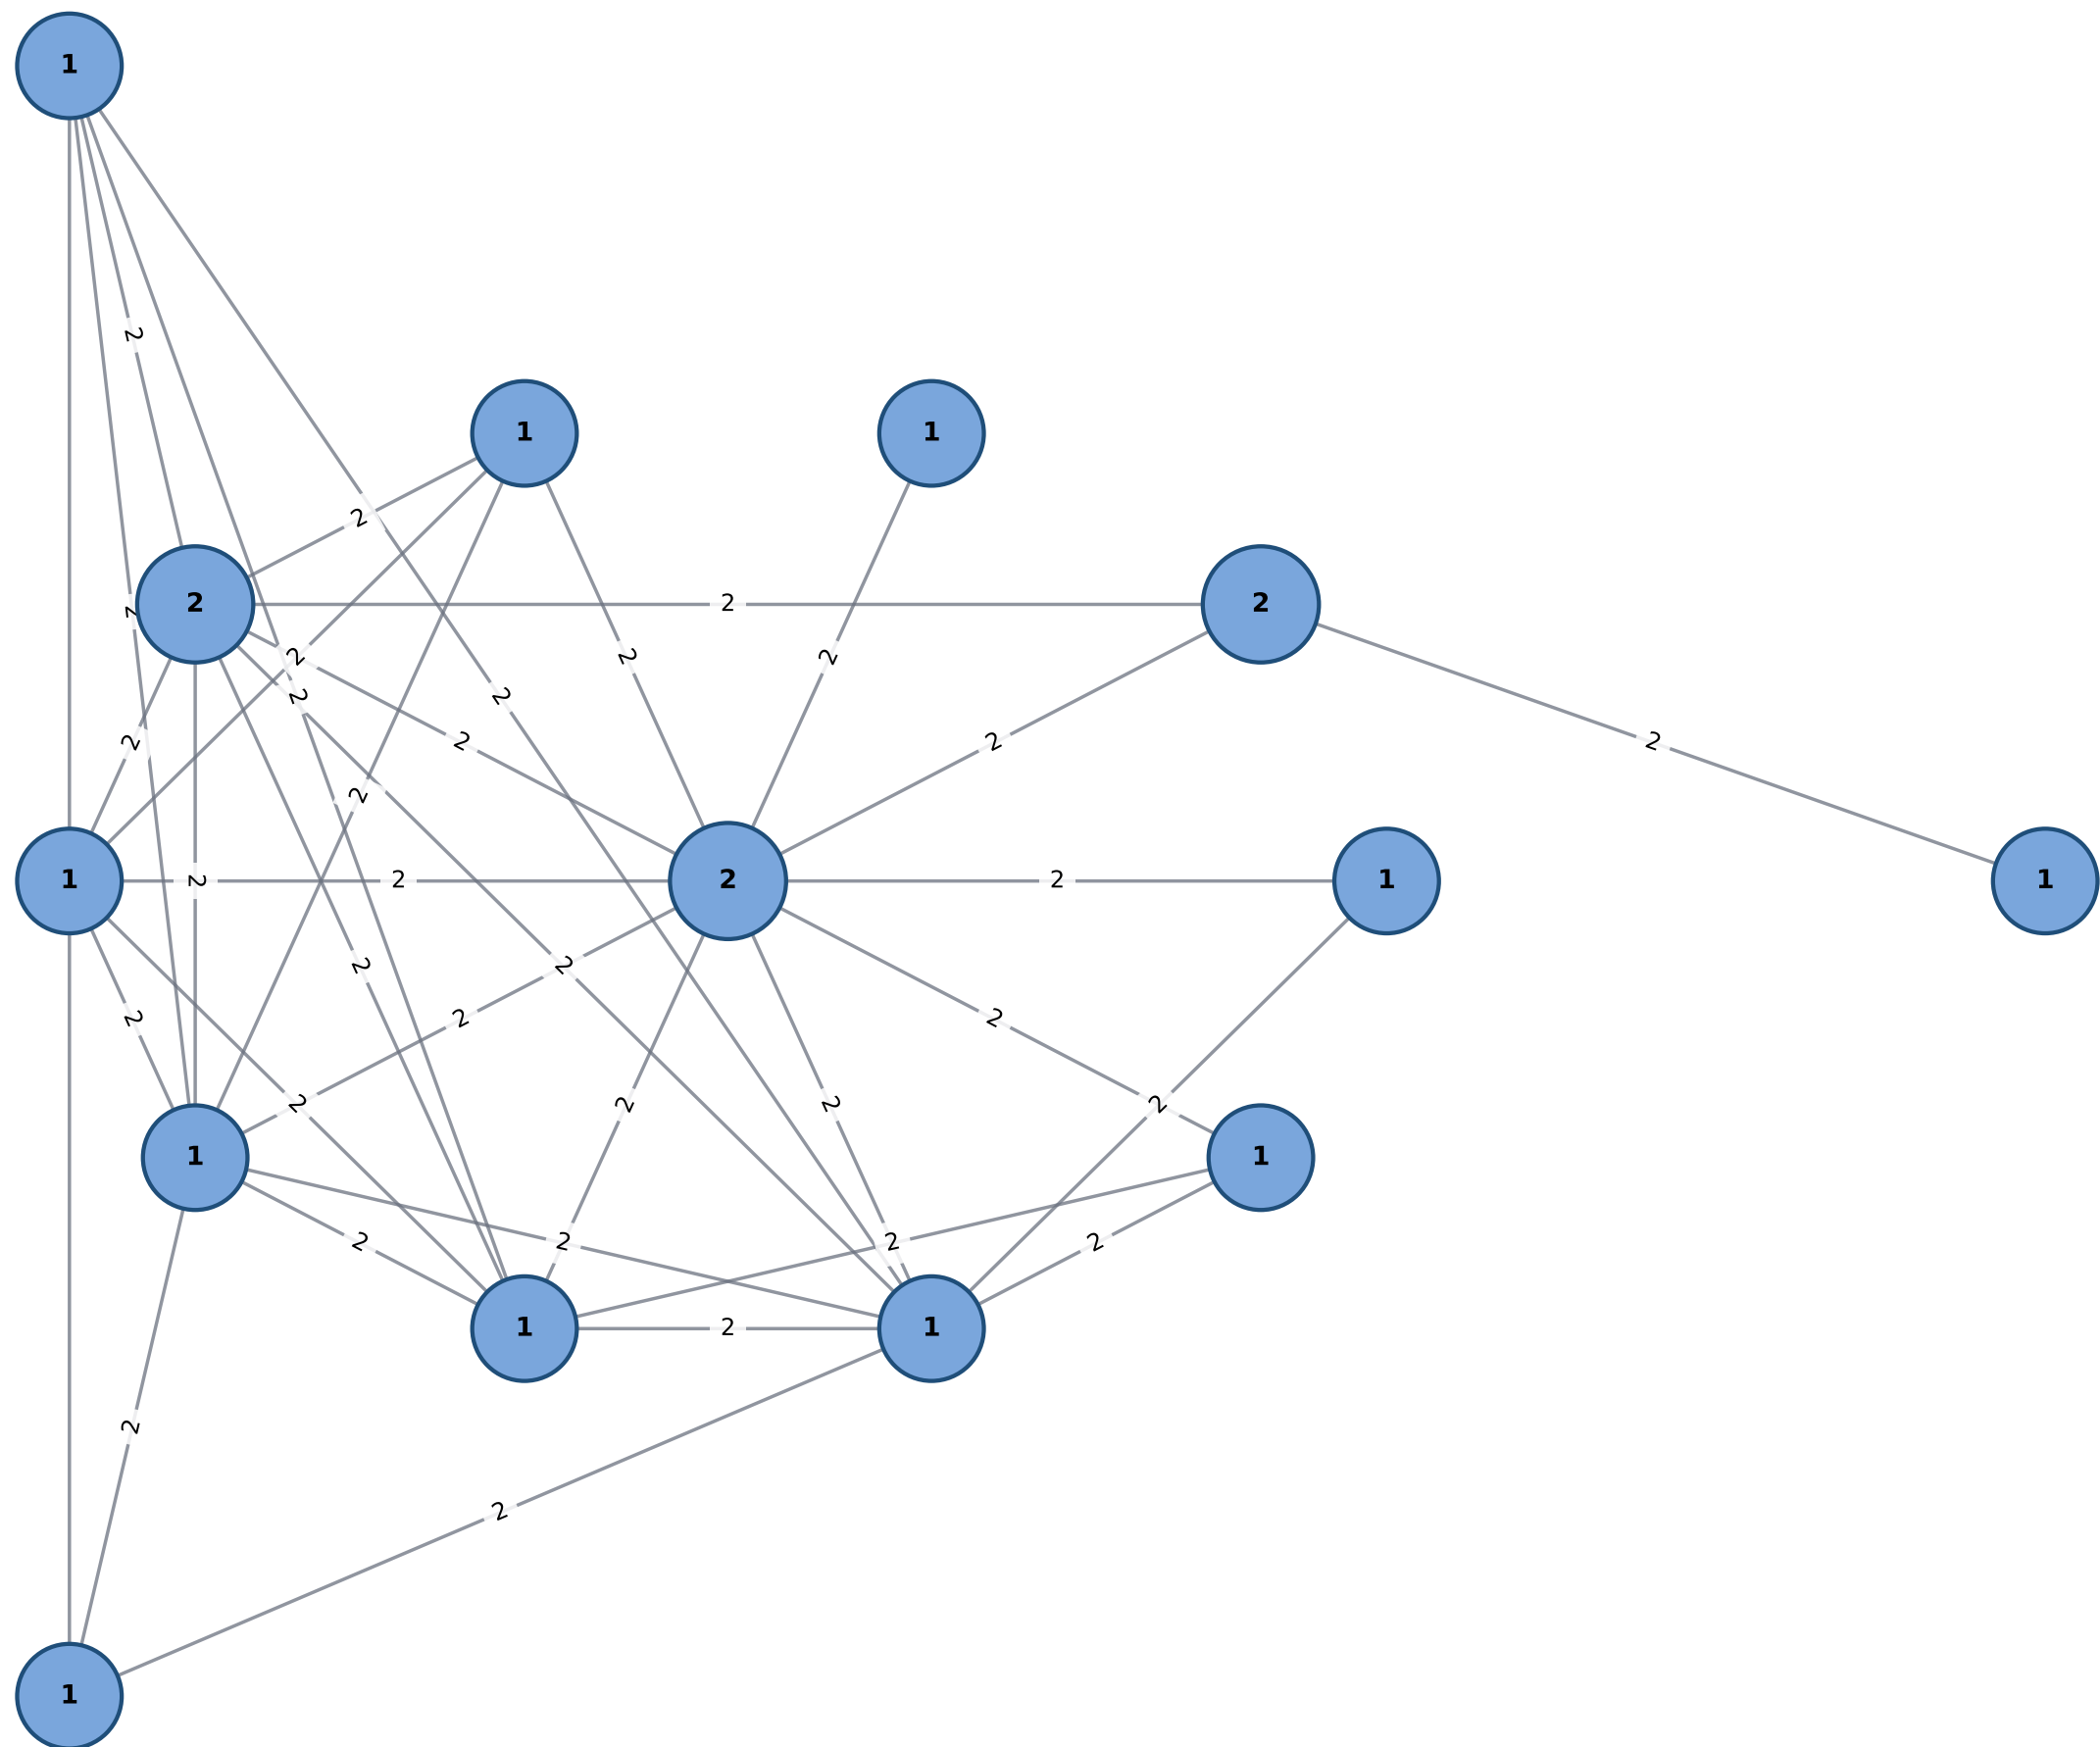

spinocerebellar degenerations: cluster map (automatic layout, closest connections only)

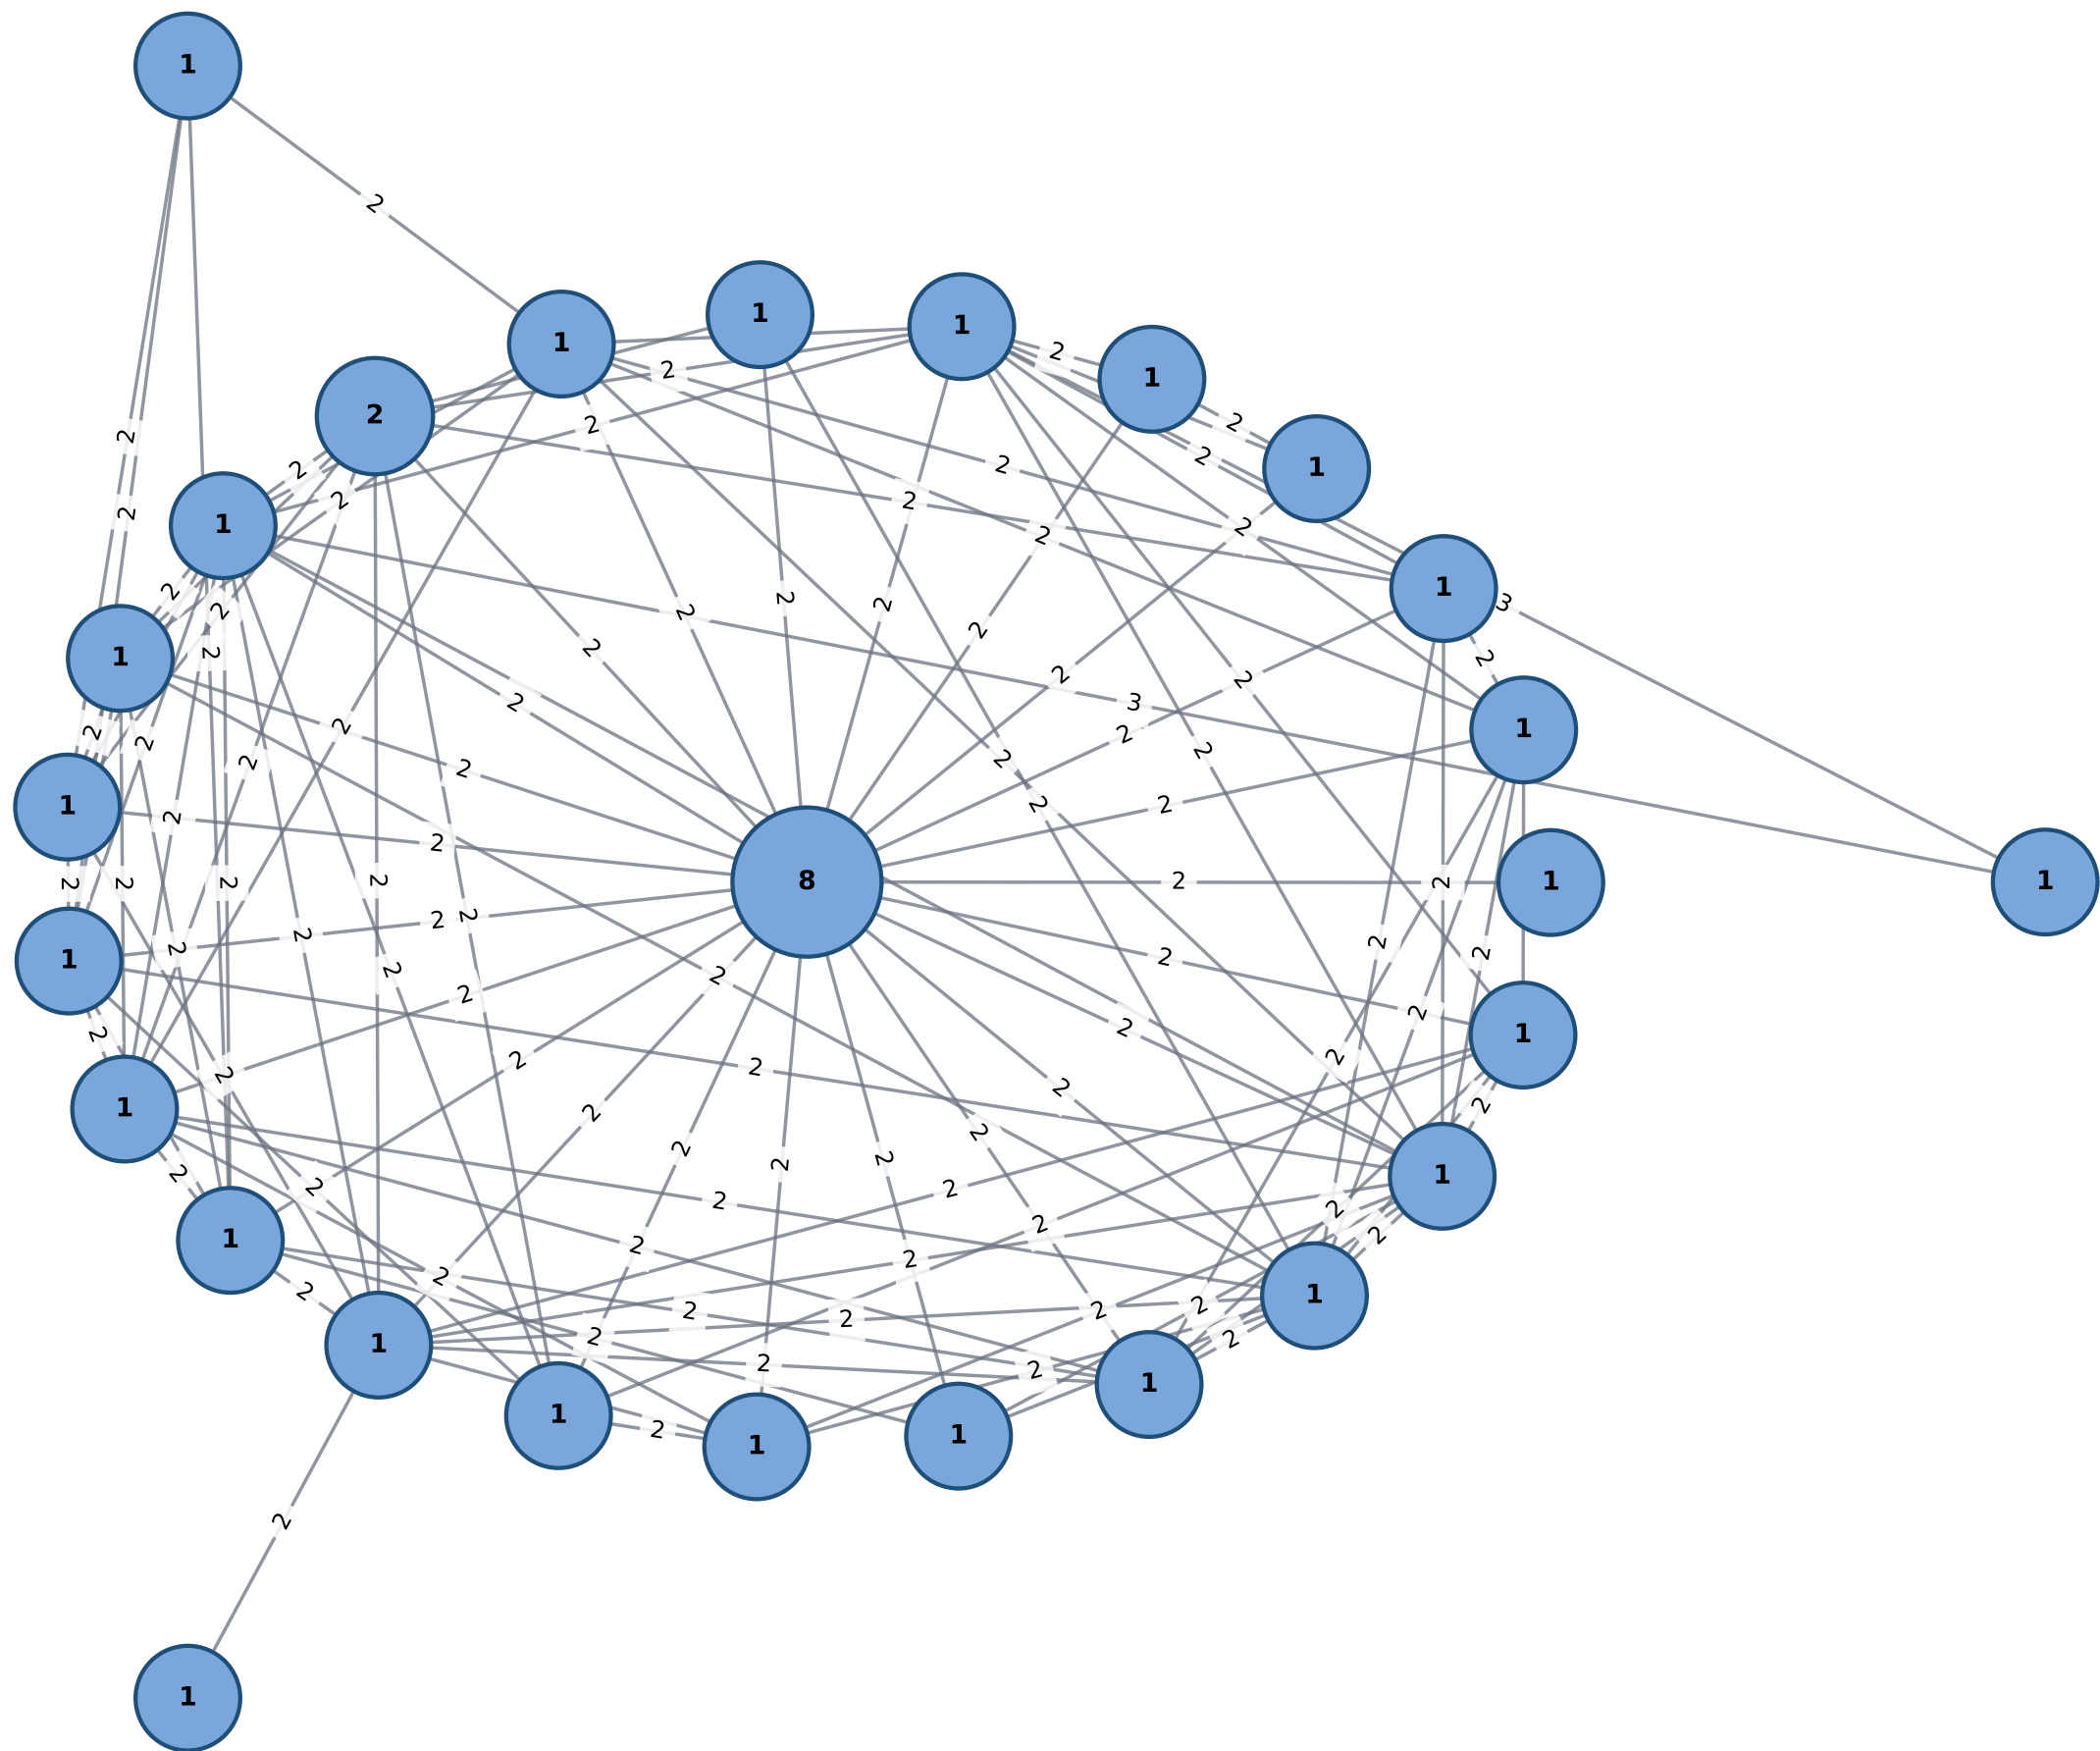

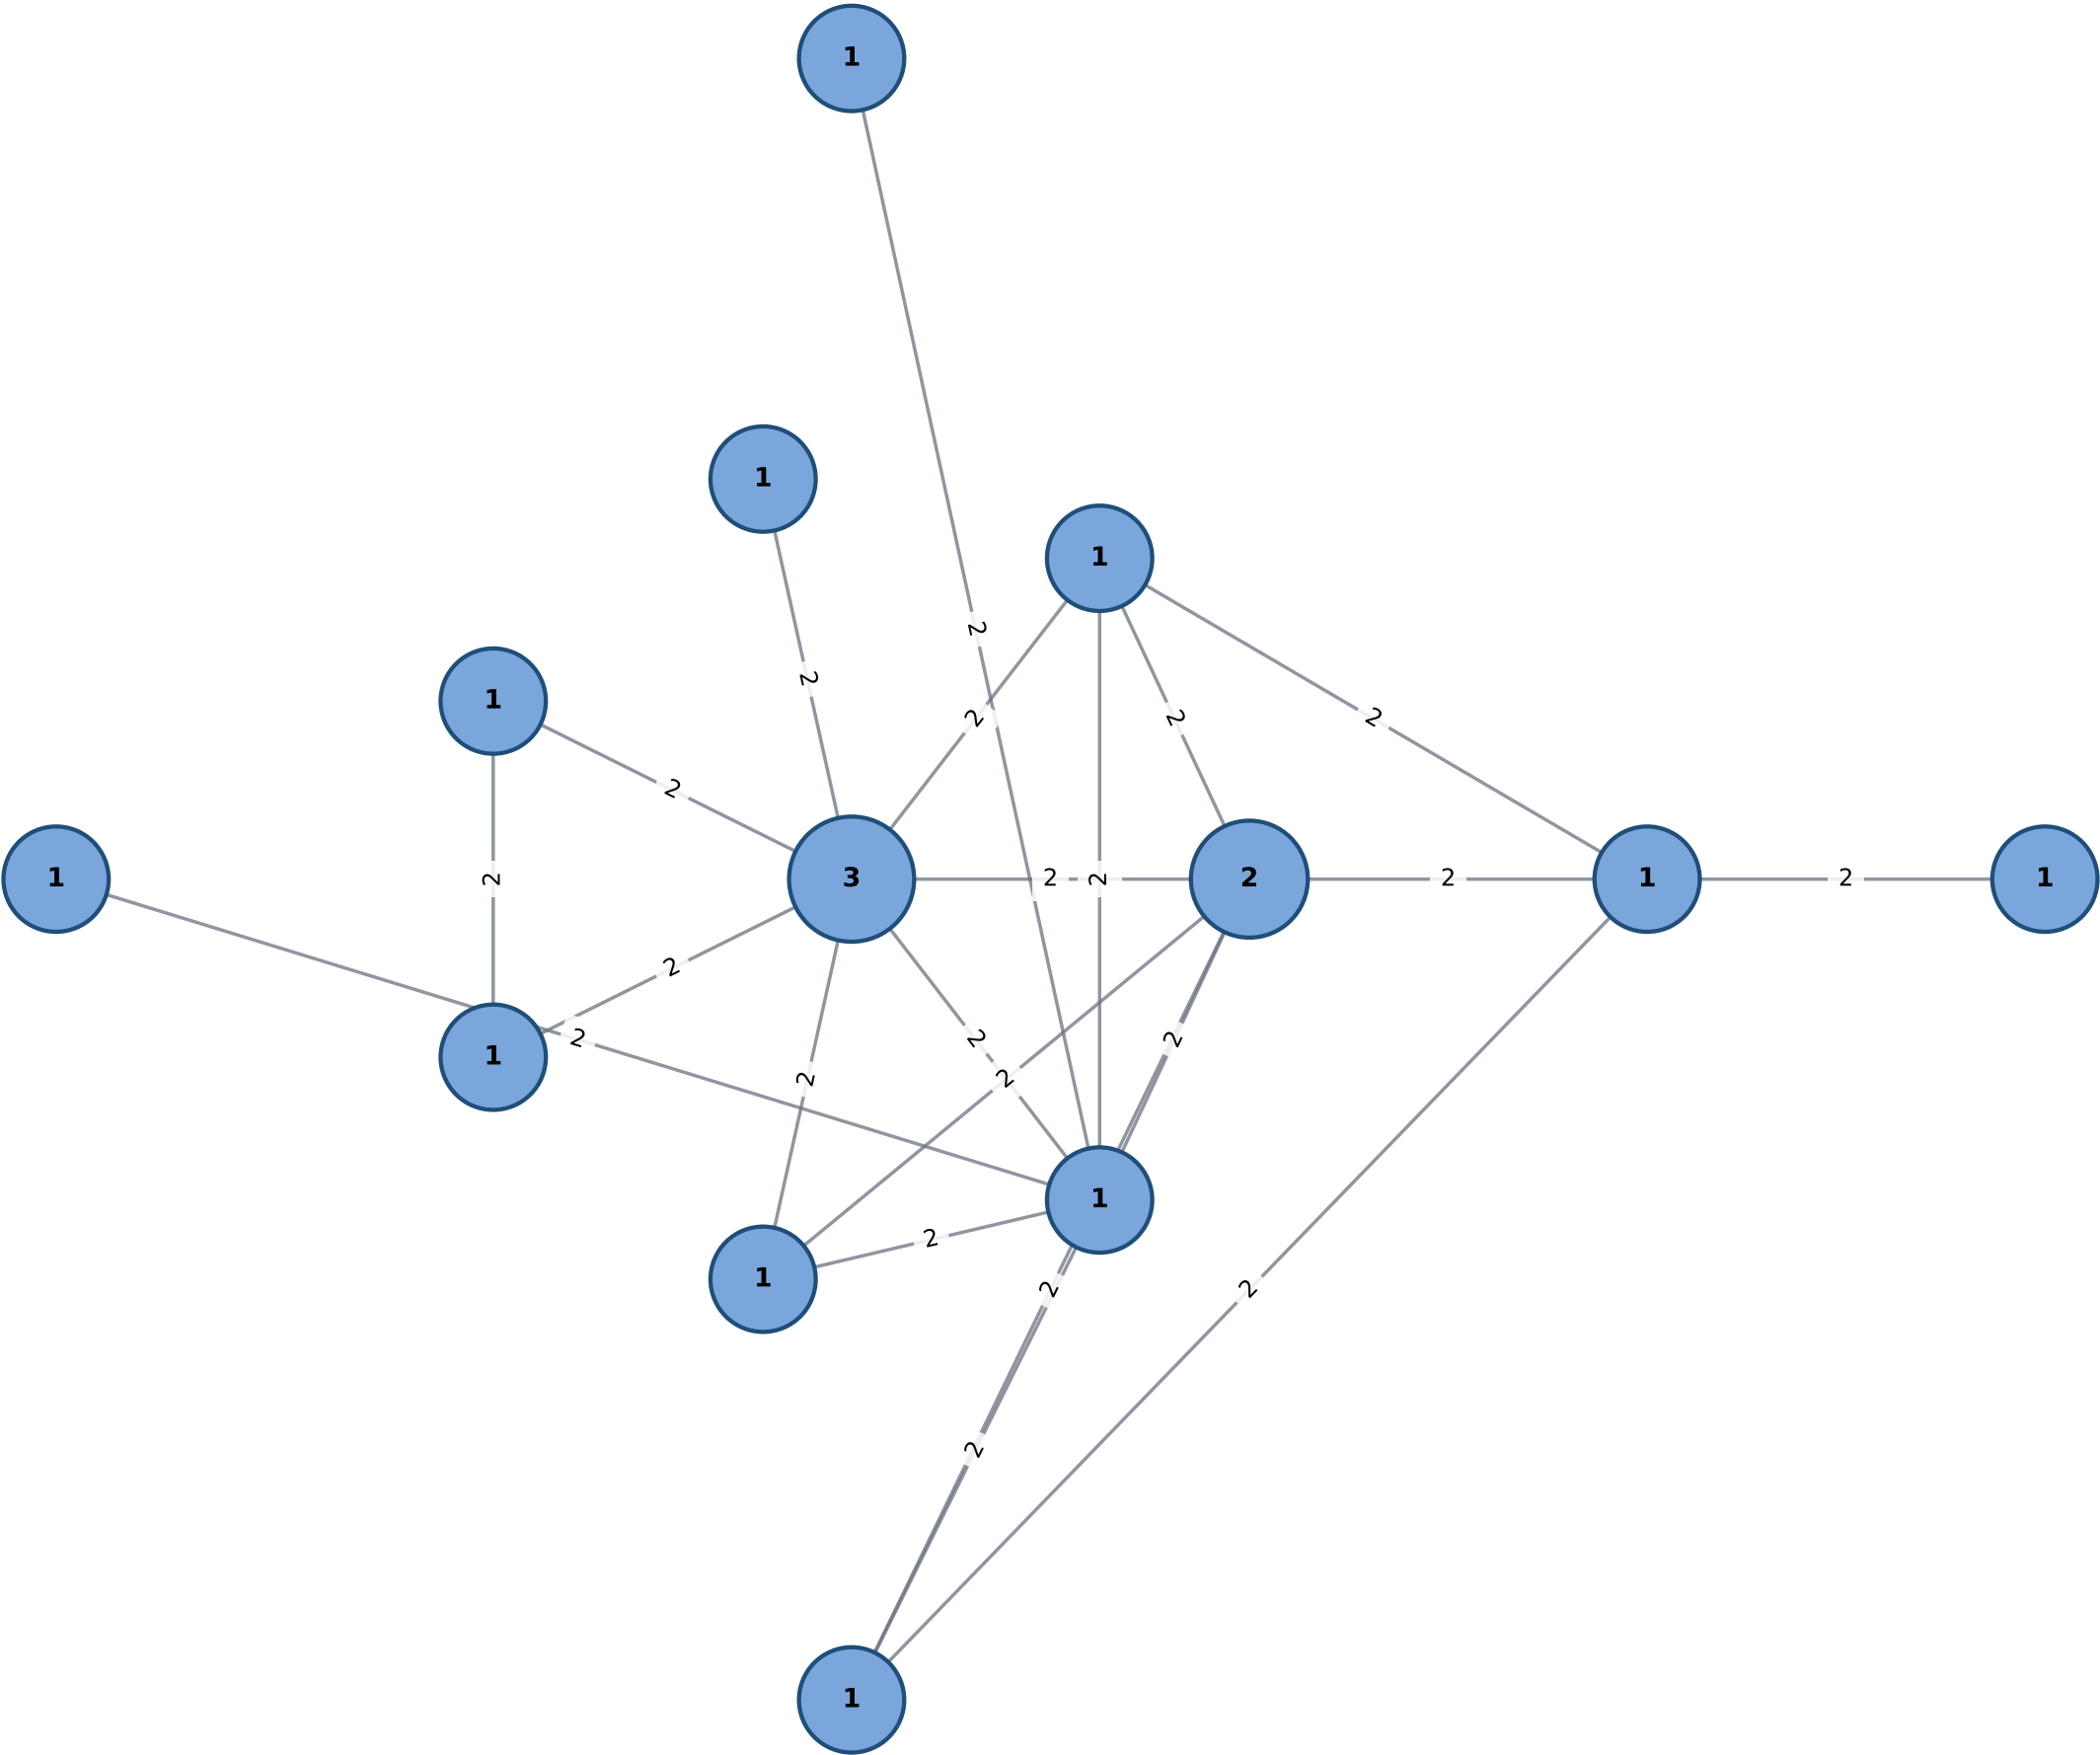

spondylarthropathies: cluster map (automatic layout, closest connections only)

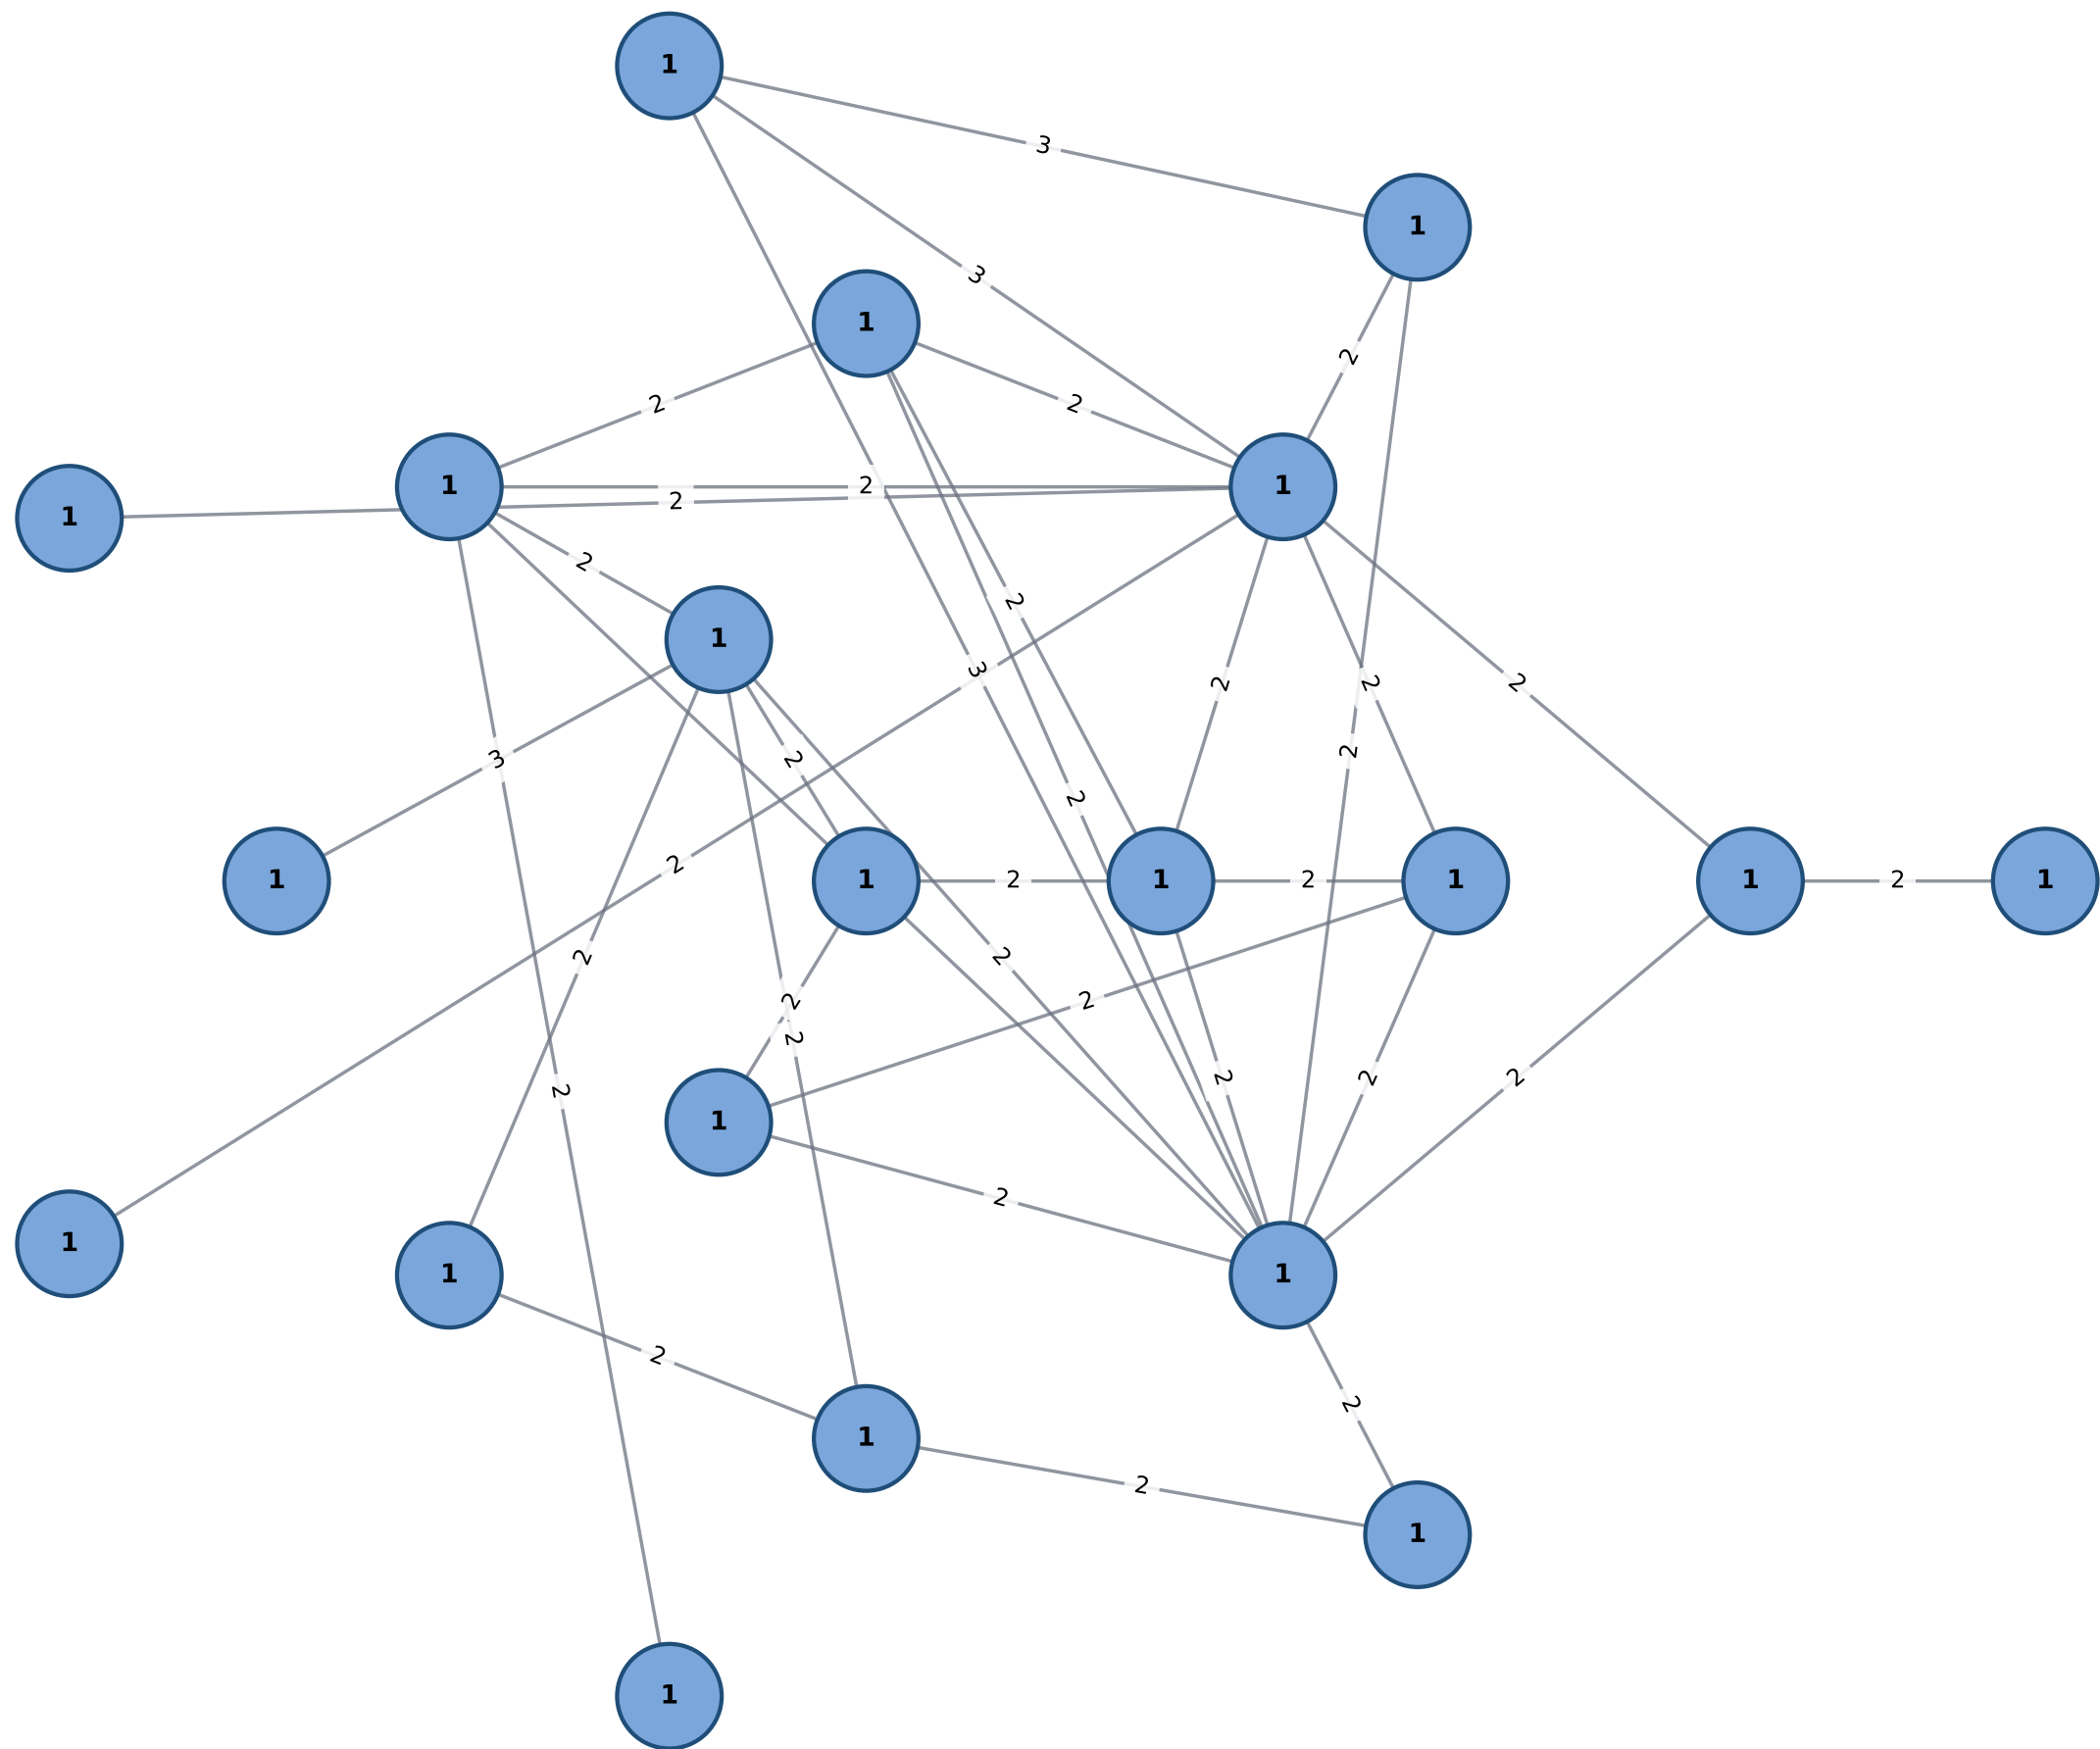

tauopathies: cluster map (automatic layout, closest connections only)

uveal diseases: cluster map (automatic layout, closest connections only)

varicose veins: cluster map (automatic layout, closest connections only)

vasculitis: cluster map (automatic layout, closest connections only)
